A large portion of the Kentish-town and Camden-road widening of the Midland Railway's junction with the Metropolitan line—namely, that between Kentish-town and St. Pancras stations, was opened on Monday, whereby the traffic on the main and suburban lines will be considerably accelerated. In connection with this widening of the railway, four additional platforms have been provided to meet the requirements of the suburban traffic—two at Kentish-town Station and two at Camden-road Station. In addition to their extra suburban lines, the Midland Railway Company on Monday opened at Somers-town a very large coal depôt, which has just been completed at a cost of fully half-a-million sterling. The depôt is in two floors, having a superficial area of over 10 acres, and the whole will be worked by hydraulic power. There are three hydraulic lifts, and a fourth will shortly be added, by means of which 200 wagon-loads of coal a day may be dealt with at the low level and 200 can be accommodated at the high level. The depôt is well lighted by electricity, and there are two electric traverses, one on each level, from one end of the depôt to the other.

Mr. Sutcliffe, the President of the Halifax Chamber of Commerce, has been in further communication with the Midland Railway Company with regard to their proposed running powers to Halifax, and he is in a position to state that the Midland board have given definite instructions to proceed in the ensuing session of Parliament to obtain powers to construct loop lines and junctions near Low Moor, connecting the Lancashire and Yorkshire Railway with the sanctioned Midland Railway from Royston to Bradford, and also running powers over the Lancashire and Yorkshire line to Halifax, as shown upon the plan which is in the possession of the Halifax Chamber of Commerce. It is anticipated that arrangements will be made under which the Midland passenger trains will have access to the joint station at Halifax of the Lancashire and Yorkshire and Great Northern companies, but it is the intention of the Midland Company to make a separate goods station upon the same site as proposed in their last year's scheme. The Midland Company will run their own passenger trains to Halifax, but have arranged to give the Lancashire and Yorkshire Company running powers to Bradford, and forward to Ilkley and Otley.

**Proposed Electric Tramways.**—The London United Tramways Company will make an application almost immediately, under the Light Railways Act, for permission to extend their system of electric tramways through Twickenham, Hampton, Hampton-court, Hampton-wick, and Teddington. Last year the company obtained an Act authorising them to construct electric tramways from the London boundary at Hammersmith, through Chiswick, Brentford, and Isleworth to Hounslow. Arrangements are also in progress with the London County Council, under powers conferred by the same Act, by which the electric tramways will be continued within the London border to the terminal station of the Central London Electric Railway at Shepherd's-bush. Should the proposed extension southward be granted, electric tramcars will run direct from Shepherd's-bush to Bushey-park and Hampton-court, and to the nearer end of Kingston-bridge.

## Notices to Readers.

The Offices of THE RAILWAY TIMES are at 2, Exeter-street, Strand, W.C.

Telegraphic Address:—RAILWAY TIMES, LONDON. Telephone No.:—1967 GERRARD.

All communications bearing upon literary matters should be addressed to the Editor.

Letters relating to Subscriptions, Advertisements, and other business matters should be addressed to the Publisher.

## TERMS OF SUBSCRIPTION.

Post-free to any address in the United Kingdom.

Three Months	£0 7 0
Six Months	0 13 0
Twelve Months	1 5 0

A special discount of 6d. on quarterly, 1s. on half-yearly, and 2s. on annual subscriptions will be allowed for payment in advance.

THE RAILWAY TIMES may be had at all bookstalls, and of any newsagent throughout the kingdom, at 6d. per copy.

Back numbers will be charged for as follows:—If dating back more than a year, 1s. per copy; if more than two years 2s. per copy.

## REMITTANCES.

Money Orders, Cheques, &c., should be drawn in favour of Lionel Bridgland, and should invariably be crossed "London and County Bank." Stamps will be taken in payment of small sums, say under 10s.

## EDITORIAL.

All communications must be authenticated with the name and address of the writer, which will be received in strict confidence.

## Forthcoming Meetings.

- Nov. 23—Delhi Umballa Kalka Railway (Half-yearly), Winchester House, at 12.
- Nov. 25—Leopoldina Railway (First Ordinary), Winchester House, at 12.
- Nov. 25—Mediterranean Railway (Annual), Milan.
- Nov. 30—Italian Company of Sicilian Railways (Annual), Rome.
- Dec. 7—Great Eastern Railway (Preference Stock Holders), City Terminus Hotel, at 2.
- Dec. 9—Bombay Baroda and Central India Railway (Half-yearly), City Terminus Hotel, at 1.
- Dec. 16—Indian Midland Railway (Half-yearly), Winchester House, at 1.

**Dover Harbour.**—An international conference was held at Dover on the 11th inst. for the purpose of considering what steps can be adopted immediately to obviate the serious inconvenience caused in the outer harbour at Dover during certain high winds, which render it dangerous for the mail boats to use the Admiralty Pier. The authorities represented included the English railways running to Dover, the Northern of France Railway Company, the Belgian Government, the Dover Harbour Board, and the engineers, Messrs. Coode, Son, and Matthews. As a result of the conference it is understood that the lengthening of the Admiralty Pier, which forms a part of the national harbour scheme, will be pushed on with the utmost possible speed. The trouble, it was pointed out, has been caused by the alterations required by the Admiralty in the original plans, which provided for the lengthening of the Admiralty Pier. As soon as the Admiralty Pier has been extended far enough to overlap the new East Pier, and thus intercept the tidal currents, there will be absolutely calm water in Dover harbour during the heaviest westerly gales.

## THE CHEAP TRAIN INQUIRY.

The Board of Trade has recently given notice of its intention to invoke the assistance of the Railway Commission to inquire into the alleged inadequacy of the service of workmen's trains on certain railways. This action is consequent upon a series of definite complaints which have been addressed to the Board in response to Mr. Ritchie's promise in the House of Commons that inquiry should follow if the general statements made from time to time were duly formulated. It is fair to say that the representative nature of the committees and other bodies by whom the question has been pressed affords *prima facie* grounds for investigation, and it should be added that this is no less desirable in the interests of the railways than on behalf of the workmen. The London Reform Union, the National Association for the Extension of Workmen's Trains, and last, but not least, the London County Council are sufficiently vociferous to gain the ear of many who have not time to study the details for themselves, and to some extent also the sympathy accorded to the persistent advocacy of any cause which is sincere in itself if one-sided in its object. The railways, on the other hand, have had but small opportunity of putting their case clearly and collectively before a tribunal free of preconceived ideas. The individual references of railway chairmen are apt to be dismissed as *ex parte* statements to be naturally expected from those who are responsible for the payment of dividends. Thus the coming opening for the justification of their alleged action or inaction will be welcomed by the companies. We shall be surprised if considerable astonishment does not follow the revelation of the amount which the railways are doing on their own initiative and outside of their statutory requirements. It would be improper, however, to attempt to forecast the result of what is an essentially judicial investigation, and we pass, therefore, to a brief review of the circumstances which have led up to the present position. For the workmen's train was not the invention of the Cheap Trains Act of 1883, although it was not perhaps till some years after the passing of that Act that the full effect of the policy became apparent. Between the years 1864 and 1871 opportunity was taken to insert in the private Bills of various companies the requirement to run one passenger train, which should stop at hours not later than 7 a.m., or earlier than 6 p.m., at every station on the section of line as specified, and which should convey passengers at fares not exceeding one penny per mile. It is to be observed that in no case was more than one train on each line or branch insisted upon, that by no means every company or every line was so dealt with, and that the hour of arrival was fixed comparatively early. In February, 1883, an investigation of the manner in which the companies were carrying out these obligations was made on behalf of the Board of Trade by Major, now Sir Francis, Marindin. The inspector reported that with a total obligation of eleven trains of an aggregate mileage of 50½ the companies having London termini were actually running 107 trains, covering no less than 714 miles daily. Nor was this the only way in which performance exceeded duty; for a spontaneous reduction of fares to as little as one half of the statutory rate had been in many instances effected. Among the recommendations of the report was one that still demands attention, for upon it turns the unalterable principle which has guided the companies in their opposition to many of the

demands made upon them. "Among the suggestions made," said Major Marindin, "is one that the cheap tickets should be made available up to 9 a.m. I do not think that this would be fair either to the companies or to the travelling public. The suburban lines at that hour are mostly crowded with trains filled by passengers who are of a class not entitled to claim workmen's tickets, although doubtless many of them are no better off pecuniarily than are workmen; and it would, I think, be an injustice to these men if they were crowded out by workmen travelling at a cheaper rate than themselves. Moreover I feel sure that such an extension of time would cause the over-crowding which now exists to become greater than ever." In spite of this recommendation, the Cheap Trains Act was passed in 1883, and extended the time of arrival up to 8 a.m., while abolishing the definite specification of trains in favour of the famous clause 3, requiring "sufficient workmen's trains . . . as may appear to the Board of Trade to be necessary." It is on this clause—the litigious character of the wording of which is obvious—that the coming inquiry is to be based. It is true that the companies obtained from this Act a remission of passenger duty on fares of one penny a mile or less; but they were henceforth burdened with a growing load of which no man could or can tell the limits, which has been the cause of an expenditure of millions upon station accommodation, upon rolling stock, upon sidings, to deal with a traffic which the railways are practically debarred from spreading over such a time as would have lessened overcrowding and given scope for a more efficient and economical management in the interests of the public as a whole. The step was taken. Let us go forward ten years and see how far it had satisfied its originators. On June 28th, 1893, there met at the Board of Trade, under the presidency of Sir Courtenay Boyle, representatives of all the London railway companies, and their opponents, the representatives of the London County Council. We use the term opponent in all courtesy, but it can hardly be considered misapplied, in face of the unconcealed antagonism which actuated one side in the conduct of the proceedings. The railway managers, on the other hand, left their offices for the purpose of showing that the companies had no desire to shirk their duty, literal or implied, and with a genuine desire to further in every way the legitimate interests of the working classes. It was at once evident that the passion for "concession" was growing with its food. Mr. Beachcroft, the spokesman of the County Council party, put in as the basis of discussion a letter of recommendation drawn up by the Housing Committee of the Council. We have not space to go through these seriatim, but the most important were, in brief, demands for the classification as "workmen's trains" of all third-class trains into London up to 8 a.m. and out of London up to 7.30 a.m. within the area of the cheap train service; for the workmen's tickets to be made available for return by any train carrying third-class passengers; and for the adoption of the zone system of fares. It will be seen at once what an advance is marked by these demands over the basis of 1883. At the conference it was admitted by the railway managers that no distinction was or could be made between a workman as such and any other individual who might apply for a workman's ticket. All who were prepared to travel by the special trains set apart as workmen's trains could avail themselves of the cheap fares, and in practice an enormous number of clerks, shopkeepers, and others to whom the Act was not intended to apply, actually did so avail themselves. The only check upon this held by the railway companies lay in the timing of the workmen's trains to which the cheap fares applied. The genuine workman class does not desire and cannot

afford to arrive late in London. By quoting fares between, say, 7 a.m. and 8 a.m. slightly higher than the minimum workmen's fare, and yet lower than the fares for a later hour, such companies as the Great Eastern had found it possible to spread the traffic to the great benefit of all classes. By extending the operation of the minimum fares up to 8 a.m., which is what the London County Council's proposal amounted to, would be to take out of the hands of the companies the power of controlling the traffic, and would further result in the vast proportion of the daily travel being performed at the reduced rate. So the companies refused to give way on that point. The hour of return is intimately connected with this. If the control of the traffic into London was left to the companies they had no objection to allowing any cheap ticket-holder to return by almost any train after twelve noon. They said so, and their concession was accepted. The zone system led to a long discussion, but it is too important to seek to dispose of here in a few words. There is much to be said on both sides, and to the principle, if duly safeguarded, it is probable that the companies are not irrevocably opposed. Since the conference the agitation for further facilities, principally for later hours, has become intensified, despite the efforts made by the railways to meet the class for which they are ostensibly demanded. For let it not be thought that the companies desire in the smallest degree to evade the responsibility thrown upon them by Parliament. On the contrary, day by day and month by month facilities are extended. But what the companies feel themselves entitled to resist with all their power is the insidious reduction of the cost of travel to those who can and should pay their fair share towards the maintenance of the steam highways of the country. If we have branched off from the point with which we started, it is because we feel the full importance of keeping the course of the proposed inquiry strictly to the point complained of—the alleged insufficiency of workmen's trains. It is an investigation ad hoc, and there must be no confusing of the issues. If by a "workmen's train" be meant a train for "workmen," neither the companies and their shareholders, the general travelling public nor the genuine working man will fail to derive satisfaction from the proceedings.

### THE TAFF VALE POSITION.

The Taff Vale Railway Company has probably suffered more than any other individual enterprise from the South Wales coal strike. In the first half of 1898, which covered three months, during which the miners were at "play," that company lost 111,000*l.* in gross revenue, and against that managed to effect a saving of 37,700*l.*, so that its net loss was nearly 74,000*l.*, or more than 40 per cent. of its profits for the previous corresponding period. In consequence of this great loss, and the continuance of the coal strike at the time the accounts were presented to the stockholders, it was decided not to pay the dividend on the preference stock for the first half-year. This was a necessary precaution, as, with the possibility of the strike continuing to the end of the year, there was a danger that there would be an insufficient balance, after meeting the whole year's fixed charges, to permit of even 2 per cent. being distributed on the preference stock. As a matter of fact the accounts to June 30th showed a balance available for dividend of 66,323*l.*, which was sufficient not only to pay the full dividend for the half-year on the 4 per cent. preference stock, but left a balance of over 20,000*l.* for the ordinary stock as well. The circular issued to the preference stockholders in July said:—"Owing to the uncertainty which exists as to the duration of the strike, and having regard to the fact that the dividend on the preference stock is contingent on the

"profits of the whole year, the board regret that they do not feel justified in at present distributing the amount which, under other circumstances, would be applied in payment of the preference dividend for the past half-year." As the strike came to a conclusion early in September last, the board have since satisfied themselves that the dividend can now be paid with safety, for the company announces that the dividend to June 30th will be posted on 30th inst. to the holders registered on the 16th inst. Since last half-year the company has lost a further amount of gross receipts published as 104,684*l.* for nineteen weeks, and it now becomes an interesting question whether it will be able to pay its full dividend on the preference stock for the year, and beyond that whether it will be able to pay such a dividend on its ordinary stock as will still render the preference eligible as an English trustee investment. Some misunderstanding appears to exist on this point. The Taff Vale, in order to pay the regulation 3 per cent. on its ordinary stock, does not require to distribute that rate on its existing stock, but on its *original* ordinary capital. Taff Vale ordinary capital has been "watered" to the lavish extent of 150 per cent. To pay 3 per cent. on its original capital, therefore, means that it need only pay 1 1-5 per cent. on its existing ordinary stock—i.e., 2-5 of 3 per cent. Of course, this is an important matter, and it is quite conceivable that the company will endeavour to scrape together the funds to pay this smaller dividend, though the higher rate is quite out of the question. To pay 1 1-5 per cent. would need a sum of 62,000*l.* We have shown that there was a surplus of over 20,000*l.* last half-year beyond the preference dividend now to be paid. The loss in gross receipts this half-year has not been so great as it was last half-year, and, of course, the company has had longer time in which to effect economies. It is probable, therefore, that at the end of the year there may be in all, say, 35,000*l.* available for the ordinary stock earned in the year. In addition to this, the company has reserves amounting to 20,500*l.*, making, say, 55,000*l.* This is still a few thousands short of the amount required to pay 3 per cent. on the original capital, but this difference could be provided by postponing that amount of revenue charges till next year. This course may appear an extreme one to adopt, but there is a precedent for it in the course adopted by the Great Northern in 1893. That company was in a similar position owing to the coal strike in that year, and in order to pay 3 per cent. on its ordinary capital, it carried forward to 1894 revenue charges to the amount of 35,000*l.* It would be a pity if the Taff Vale, for the sake of a few thousands, allowed its preference stock to suffer in prestige by reason of the temporary loss of gross revenue arising in so exceptional a way. There is some hope therefore, that the company will be in a position to make some distribution on its ordinary stock this year after all. It cannot be said, however, that the outlook for this company is at all cheerful in spite of the recent return to normal conditions. In the first place there is the promise of another keen struggle in the Parliamentary Committee rooms among the South Wales railways, and according to past experience, the Taff Vale, whilst having to pay heavily for opposing other companies' schemes, generally comes out of these frays with considerable damage to itself into the bargain. Another matter which has unpleasant possibilities is the relations of the Taff Vale Company with its employes. It seems that prior to the coal strike the Barry, Rhymney, and Taff Vale Companies, in accordance with a common understanding arrived at in 1890, gave their men what is termed a "guaranteed sixty hours week," thus ensuring them a minimum wage, the companies taking any risk of loss which might arise from insufficiency of work. When the coal strike

appeared of course this arrangement was cancelled. But since the resumption of work in the pits the Barry and Rhymney have restored the previous "guaranteed week;" but the Taff Vale has not, for reasons which no doubt are good enough. Mr. Beasley has pointed out that "there had not been full work for all the train men in the company's employ up to date, and that the indications of an immediate return to the normal conditions of working at the collieries were not then sufficiently favourable to justify the directors in guaranteeing full employment to all the men, but they would be very glad when the output of the collieries was such as to enable them to fully employ every man in the service." The position thus is that if the company restored the "guaranteed week" it would have to reduce its staff, and no one can in reason blame the company for adopting the middle course of withholding the "guarantee" and keeping on all its men in the hope that business will justify the restoration of the "guarantee" in the future. But the Amalgamated Society would not be acting up to its traditions if it did not interfere. The men, or some of them, had actually decided to strike, without giving due notice, some days ago. But Mr. Bell, the Amalgamated Society of Railway Servants' secretary, having in view the result of the miners' action in absenting themselves from work on Mabon's day—an illegality for which they were proceeded against by their employers—advised the men not to strike, but to wait, and if the company does not give way, to proceed against it for "wages lost through their breach of contract." This is the old game of "bluff" again, as we do not believe for a moment that such a course will really be taken. If it is taken the natural course for the company to adopt will be to reduce its train staff, and that, we take it, would not please the Amalgamated Society of Railway Servants, and still less the men dismissed. The Rhymney and Barry companies are able to restore the guaranteed week, because they are relatively in a better financial position than the Taff Vale, and besides, their staff is much smaller, and thus more easily regulated to traffic requirements. The matter is rather disturbing, though we do not think that it will lead to any trouble in the end. Taff Vale ordinary stock has suffered from these various adverse influences, and is now quoted at only 74, compared with 85½, the highest of 1898, and even the preference stock has declined from 144 to 133.

### CHATHAM FINANCE.

A sudden interest has developed this week in the financial position of the Chatham and Dover Railway Company, and it is apparently found to be not nearly so comfortable as was supposed, judging from the sharp decline in the stocks which has taken place. This will hardly surprise our readers who have been kept "au fait" with regard to all matters connected with the Chatham's finances, and who, therefore, know that there are various questions yet to be settled. On August 6th last, when Chatham stocks were being "boomed" to extravagant heights on the arrangement with the South Eastern Company, we had occasion to point out two matters of importance yet in abeyance. On that date, in dealing with the Chatham meeting, we said:—"The Chatham chairman anticipates that the second preference-holders will not have to wait long for the balance of their dividend, and even went on to remark that the 'ordinary shareholder is in a position of great comfort compared with any he has been in ever since I have had the honour of his acquaintance.' The standard of comparison is obviously a low one, but does the statement really square with facts?" We went on to point out that it did not, for the Chatham Company had yet to meet the pressure placed upon it by the House of Lords to reduce the nominal amount of the

ordinary stock to something approximating its market value, and also to deal with the obligation to redeem a million of arbitration preference stock by May, 1900. "This," we remarked, "surely does not make for the comfort of Chatham ordinary shareholders." The difficulties will presumably have to be dealt with next session, and the mere mention of them has caused a sharp drop in Chatham issues. Subjoined is a comparison of the prices existing on August 6th, the date of our article, and at the present time:—

Stock.	Price Aug. 6th, 1898.	Present price.
Arbitration preference .....	139 .....	134½
Second " .....	118 .....	108
Ordinary stock " .....	23½ .....	20½

So much for Mr. Forbes's idea of "comfort." It may now be useful to explain what the position really is. In the first place, the Chatham wants more money, and we grant that the sooner it gets it the better. In 1896 it asked the House of Lords to give authority to borrow 500,000*l*. Authority was only given for half that amount, the declared intention of this cutting down of its application being that the company should take "into consideration the whole position of their stocks." In fact, the House of Lords Committee clearly hinted at a scaling down of the ordinary stock as a condition antecedent to further special powers for raising capital. Why on earth the House of Lords should have concerned itself in such a matter is inconceivable, but the facts have got to be faced as we find them. In 1896 also the company applied for power to cancel the "redemption clauses" in its Acts of 1885 and 1890. This also was declined, and instead the House of Lords only gave its sanction to an extension of time until May 21st, 1900, by which date, as we have already remarked, the company has to redeem 1,000,000*l*. arbitration preference stock. For the purposes of redemption it is provided under the Act of 1885 that it may issue "either preference or ordinary, and, if preferential, capital then ranking after arbitration preference stock, and after any other preference capital then authorised as might enable them "to raise the moneys required for such redemption." In the 1890 Act ordinary stock only is mentioned, as the means of redeeming the preference stock issued thereunder. To redeem the million of arbitration preference stock it would thus require to issue either some stock behind the second preference or else ordinary stock. It might be possible, however, to come to some arrangement whereby the "seconds" are merged into a larger issue raised for the purpose of paying off the required amount of firsts, though even that, to meet the House of Lords' requirements, would have to be accompanied by a scheme for reducing the nominal amount of the ordinary capital as well, unless that august body can be induced to go back upon its previous absurd and unjust stipulations. We are not entirely without hope that this can be done. At June 30th last the Chatham Company had a debit balance on capital account of 644,689*l*., and its available capital powers were only 681,237*l*. Beyond this it had "Lloyd's Bonds" outstanding to the amount of 228,837*l*. So hard pressed was the company for funds for capital purposes that last half-year it took the somewhat unusual course of realising a large part of its steamboat depreciation fund and writing down the values of its steamers in the capital account. By this course the apparent outcome of the half-year's capital operations was a credit of 25,022*l*., whereas it actually expended on new rolling stock, &c., 70,731*l*. No doubt money is required to bring its line up to the standard rendered necessary by its arrangements with the South Eastern, and in order to put it in a position to realise the benefits to be derived therefrom. Anyway, there are likely to be some very interesting proceedings in connection with

the involved finances of the company next session, and in the meantime we may rest assured that no efforts will be spared by the board to grapple successfully with their difficulties.

### ANTEDILUVIANISM.

The decision of the High Court, requiring the North Western Railway to slacken the speed of all trains passing over a level crossing near Nuneaton Station to 4 miles per hour, shows the danger of permitting long-forgotten clauses in private railway Acts to remain unrepealed. The case is fully reported in another column, and it is thus unnecessary to repeat the details. It is sufficient to say that through negligence to obtain power to cancel an obsolete obligation enforced in the year 1845, the which has certainly been regarded as a dead letter since the introduction of the block system, a main line of railway has now been compelled by a body of faddists to subordinate the convenience of the travelling public to that of a relatively insignificant section of pedestrian and vehicular traffic. The absurdity of the proportion is well shown by the figures quoted without disproof in the course of the proceedings. Roughly, 120 express passenger and goods trains are affected thereby, and the delay to each, due to the enforced slackening, cannot be less than three minutes taken out of the running time. The result upon an intricate system of traffic connection would be serious if it were not found possible to make up the time by increasing the speed over other portions of the journey, a solution, of course, which is costly and undesirable in many ways. The absurdity of the case is well shown by the inevitable increase in the delay to road traffic, due to the longer period taken by the trains to traverse at the reduced speed the block section in which the level crossing exists. The company are hardly likely, we imagine, to embark upon expenditure to reduce the length of this section, when it is possible to obtain a revision of the clause in their next General Purposes Bill. It is scarcely probable that the evident sympathies of the court will fail to find an echo in the Legislature. Hence the outcome is essentially of the dog-in-the-manger order—no benefit to the road traveller, but as much harm as possible to the railway. Seriously, it is time to consider whether a kind of statute of limitations in railway obligations would not be a desirable addition to the Railway Clauses Acts. Conditions once imposed cannot in the nature of things be essential to all time, and such matters as those of slackening of trains, with traffic detail generally, is surely rather a matter for an order of the Board of Trade than for an Act of Parliament. Parliamentary obligations thus temporarily abrogated by official license might be legally and automatically cancelled after the efflux of a definite period without remonstrance of the parties affected. The prospect of long discontinued obligations, necessary enough fifty years ago, but wholly unreasonable in these days, rising as it were to give a back-handed blow to progress, is too serious a danger to be courted longer.

### THE CANADIAN RATE WAR.

The war of rates between the Grand Trunk and the Canadian Pacific has now developed into a war of words between the respective presidents of the two roads. The latest onslaught takes the form of a letter from Sir William Van Horne, in which he seeks to raise the charge against the Grand Trunk of acting in disloyalty to Canadian interests. The dispute between them, he says, "is a question affecting the settlement of the Canadian North-West, and as such it is of great consequence to the entire Dominion of Canada, as well as to this (the Canadian Pacific) Com-

"pany." No doubt, but the Grand Trunk has other interests besides those of its rival to consider; and as for Canada, well it has hitherto shown no disposition to pamper the Grand Trunk, whilst it certainly has done so as regards the Canadian Pacific. This cry about the betrayal of Canadian interests, which has been raised before, is mere rubbish. The Grand Trunk has to consider questions of this kind on a commercial footing and with due regard to its shareholders' interests. To back up its case the Canadian Pacific quotes a recommendation from the Western Traffic Association, which merely amounts to a suggestion that the Grand Trunk shall restore ante-bellum rates and refer the matter to arbitration. This recommendation is a gratuitous piece of impudence, for the American roads have already got from the Canadian Pacific what they wanted, and it is only the same concession as the Grand Trunk is standing out for—that is, an abolition of Canadian Pacific differentials. Their success was largely implemented by the assistance of the Grand Trunk, and they now throw over the latter in order to curry favour with the Canadian Pacific and attain other ends they have in view. Sir William Van Horne, in his letter, starts off by saying there is only "one question at issue between the Canadian Pacific Railway and the Grand Trunk—that of passenger rates." This is flatly contradicted in the next sentence by the statement that the North Bay arrangement will be considered so soon as the Grand Trunk offers "inducements" to do so. The Canadian Pacific president adopts a wholly unwarranted attitude towards the Grand Trunk, especially bearing in mind that the latter has agreed to refer the matters in dispute to arbitration; whilst in the matter of local rates in Canada the Canadian Pacific is practically the aggressor. The publication of the letter on Thursday caused a flatness in the former company's stocks, but they have since recovered the loss.

### PASSING NOTES.

The traffic receipts for the week ending November 13th, on thirty-three of the principal lines of the United Kingdom, amounted to 1,668,217*l.*, which was earned on 19,253½ miles. For the corresponding week in 1897 the receipts of the same lines amounted to 1,592,233*l.*, with 19,034½ miles open. There was thus an increase of 75,984*l.* in the receipts, and an increase of 219 in the mileage. The aggregate receipts for twenty weeks to date amounted on the same thirty-three lines to 36,459,675*l.*, in comparison with 34,236,851*l.* for the corresponding period last year; increase, 2,222,824*l.*

On Monday, the 14th inst., Mr. Henry Liddell, who recently retired from the position of chief clerk to the general manager of the South Western Railway, was presented at Waterloo Station with a handsome silver tea and coffee service and an arm-chair, together with a crescent-shaped brooch of diamonds for Mrs. Liddell. The presentation was made by Mr. C. J. Owens, general manager of the company, in the presence of most of the chief officials and a large number of Mr. Liddell's old colleagues and friends. The subscriptions had been sent in from all parts of the railway and from the Channel Islands, the total number of contributions being nearly 600. Mr. Owens spoke in highly eulogistic terms of Mr. Liddell's meritorious and honourable career on the railway, his faithful service to the company, and his unfailing kindness to all those with whom his duties had brought him in contact. Mr. Liddell afterwards acknowledged the compliments in appropriate terms.

In the Companies' Winding-up Court, on Wednesday, Mr. Justice Wright intimated that in all cases in which a supervision order was made in a voluntary winding up the liquidator, instead of being required to report monthly—a requirement which was at present quite inoperative—would for the future be called upon to furnish a report to the court on each quarter day. Dealing with the adjournment of winding-up petitions which appeared in

the list, his lordship laid it down as a guide to the practice of the court that in future no costs of adjournment would be allowed unless they were specially ordered. These perpetual postponements, he added, had the effect of piling up the costs.

The Furness Railway Company are promoting a Bill in Parliament to acquire powers to make a new lock at Ramsden Dock, Barrow; to remove the present piers at Bowness and Ambleside on Windermere Lake, and erect new ones; to purchase the Ravenglass and Eskdale Railway in Cumberland, a narrow-gauge line, 9 miles long; and also to purchase, build, and carry on hotels, to provide and work coaches, and to acquire other powers. The company have already tried on two occasions at Appleby Assizes to get power to extend the pier at Bowness, but were defeated.

Official intimation has been made that the Board of Trade refuse to confirm the Coatbridge and Airdrie Light Railway order, as passed by Lord Jersey's Commission, because of the magnitude of the effect the scheme would have on railways already existing in the district. Confirmation was opposed on the ground of competition by the Caledonian and North British Railway companies. The promoters of the order were the British Electric Traction Company.

Application is intended to be made during the present month to the Light Railway Commissioners by the Orpington Cudham and Tatsfield Light Railway Company, Limited, for an order authorising the construction of a railway of 8 miles or thereabouts in length, commencing by a junction with the South Eastern Railway at Orpington Station, Kent, and terminating at Tatsfield, Surrey. Messrs. Dollman and Pritchard, 39, King-street, Cheapside, E.C., are solicitors for the promoters.

Application is intended to be made to the Light Railway Commissioners on or before the 30th inst. for an order authorising a light railway commencing at Axminster by junction with the London and South Western Railway at Axminster Station, and terminating at Lyme Regis. The promoters of the proposed railway are Messrs. George Pye, Paul Hedler, and Alfred Parker. Messrs. Sebright Green and Co., 5, Spring-gardens, S.W., are acting as solicitors for the promoters.

The first meeting of the 145th session of the Society of Arts was held at John-street, Adelphi, on Wednesday night, when Sir J. Wolfe Barry, F.R.S., the new chairman of the council, delivered an opening address on the "Internal Traffic of London." Among those present were Sir F. Bramwell, Sir F. Abel, Sir Alfred Lyall, Sir Owen Tudor-Burne, Mr. E. Woods, Mr. A. Siemens, Sir H. Trueman Wood, and Professor Roberts-Austen.

The Railway and Canal Commissioners (Mr. Justice Wright, President, Sir F. Peel, and Viscount Cobham) on Thursday commenced the hearing of an application by the London Tilbury and Southend Railway Company against the Great Eastern Railway Company in respect of tolls on rent for improvements and widening of the Blackwall line. The hearing was concluded yesterday and judgment reserved.

The Manchester City Council, at a meeting on Wednesday, finally decided, after considering an exhaustive report by a special committee, to adopt the overhead wire system for working the municipal tramcars. The council also accepted a recommendation to abolish all charges in connection with the hire of electricity meters, which means a loss on revenue account of 2,000*l.* per annum.

The report of the Select Committee of the House of Lords appointed to consider the Companies Bill was published on Thursday. The committee held eight meetings, at which five witnesses were examined, but were still unable to complete the inquiry, and recommended that if the Bill be again introduced into the House of Lords a committee be again appointed.

The members of the Institution of Junior Engineers visited the northern extension works of the City and South London Railway on Saturday. The programme of the visit included an inspection of the tunnels, shafts, and sites of stations, and the underpinning

of St. Mary Woolnoth Church, which latter is regarded as a very fine piece of engineering.

At Thursday's meeting of the Court of Common Council, Sir Albert Altman called attention to the traffic arrangements and condition of Ludgate-hill station, which he spoke of in very disparaging terms. It was resolved that the matter be sent to the Streets Committee, with power to refer the whole question to the Board of Trade.

A scheme is on foot for making a light railway between Macduff and Fraserburgh. By rail at present Macduff is distant from Fraserburgh 65 miles, entailing a journey of three-and-a-half hours; but by the suggested railway the distance would be only 25 miles, and the journey would be only an hour-and-a-half.

The Joint Committee of the South Eastern and the London Chatham and Dover Railways have appointed Mr. J. E. Nichols to the position of chief cashier of the combined companies. Mr. Nichols has been in the service of the London Chatham and Dover Railway since 1860, and has been cashier for many years.

At Croydon, on Saturday, a boy eight years of age was ordered to receive ten strokes of the birch for placing iron chairs on the railway line between Kingswood and Purley, on the South Eastern Railway. A passenger train ran into the obstruction, but was not derailed.

The War-office notices in the *London Gazette* contain an announcement that the Queen has conferred the Volunteer Officers' Decoration upon Co'onel William Pollitt, J.P., general manager of the Great Central Railway.

Mr. A. H. Panfew, chief draughtsman at the Eastleigh (London and South Western Railway) works, has been appointed assistant-superintendent of the London Brighton and South Coast Railway Carriage Works, Brighton.

It is rumoured that the traffic which the Pontypridd Caerphilly and Newport Railway Company is abandoning at the end of the year will be taken up by the Great Western Railway Company.

The Portsmouth Meon Valley and Alton Railway Continuation Company has decided to wind up the undertaking voluntarily, making no further call on the shareholders.

The directors of the Great North of Scotland Railway Company have decided to present a cup and shield for annual competition among their ambulance corps.

## Money and Stock Markets.

*The monthly settlement in Consols takes place on the 1st prox.; the fortnightly settlement in other Securities commences on the 25th inst.*

CITY, FRIDAY EVENING.

THE MONEY MARKET is somewhat dull, and rates continue to display an easier tendency. In the discount market three months' bank bills are quoted  $3\frac{1}{4}$  to  $3\frac{5}{16}$  per cent. Call money is in good supply at  $2\frac{1}{2}$  per cent., and short fixtures at  $2\frac{3}{4}$  per cent.; whilst 3 per cent. was charged by the India Council to-day for renewals of loans for the next fortnight. The Bank of England did nothing. Another advance in the German Bank rate next week is feared in some quarters. The Bank Return, issued yesterday, shows that the imports of gold, together with the return of coin and notes from circulation, have increased the reserve by 678,000*l.*, making its amount 22,196,000*l.*, while the proportion of reserve to liabilities is 1 higher at  $53\frac{1}{8}$  per cent. A decrease of 300,000*l.* in the Government securities is probably caused by the repayment of deficiency advances, while the "other securities" show a slight increase. The private deposits are 660,000*l.* higher on balance. Since the Return was issued 27,000*l.* has gone into the Bank.

Silver bars are now quoted at 27 15-16*d.* per oz., being 1-16*d.* lower on the week. A year ago the price was 26*d.*

Eastern exchanges are telegraphed as follows:—Bombay 1*s.* 3 29-32*d.*; Calcutta, 1*s.* 3 29-32*d.*; Hong Kong, 1*s.* 11 5-16*d.*; Shanghai, 2*s.* 8*d.*; Singapore, 1*s.* 11*d.*

The premium on gold at Buenos Ayres has fallen during the week from 127*00* to 123*50* per cent., making the paper dollar (nominally worth 4*s.* 2*d.*) now actually worth 1*s.* 9*30d.* A year ago the premium was 175 per cent., and the value of the paper dollar 1*s.* 5*28d.*

The Valparaiso 90-day exchange comes over to-day at 13 7-32*d.*, being 1-32*d.* lower on the week. A year ago it was 17*d.*

The Rio de Janeiro exchange on London is 8 25-32*d.*, being 7-32*d.* higher on the week. A year ago it was 7 1-16*d.*

The Bankers' Clearing-house return for the week ending November 16th, 1898, shows a total of 175,689,000*l.*, as compared with 166,291,000*l.* for the corresponding period last year.

Subjoined is a comparison of the present position of the Bank of England, the Money Market, the prices of Consols, French Rentes, &c., with the position at the corresponding period of last year:—

	At Present.	Same Week last Year.
Coin and Bullion .....	£32,439,112	£31,917,033
Total Reserve.....	£22,195,937	£21,511,893
Proportion of Reserve to Liabilities...	$53\frac{1}{8}$ per cent.	$48\frac{1}{4}$ per cent.
Notes in Circulation .....	£27,043,175	£27,205,140
Bank Rate of Discount .....	4 per cent.	3 per cent.
Open Market ditto .....	$3\frac{1}{8}$ per cent.	$2\frac{1}{8}$ per cent.
Consols (account) .....	110 <i>3</i> / <sub>8</sub>	113 <i>3</i> / <sub>8</sub>
French Rentes (account) .....	101 <i>f.</i> 85 <i>c.</i>	103 <i>f.</i> 66 <i>c.</i>
Paris Cheque Exchange.....	25 <i>f.</i> 34 <i>c.</i>	25 <i>f.</i> 18 <i>c.</i>
New York 60 days ditto.....	\$482 <i>1</i> / <sub>2</sub>	\$482 <i>1</i> / <sub>2</sub>

THE STOCK MARKETS this week have witnessed a continuance of the recovery which set in after Lord Salisbury's speech at the Guildhall on the 9th inst., and though the volume of business in most departments is on a limited scale, the tone is very firm, with many substantial improvements to be recorded. Consols were steady until yesterday, when they lost their previous rise of  $\frac{1}{8}$  on fears of the Bank of Germany again raising its rate next week. Foreign Government Bonds are exceptionally quiet, and the only feature is a slight weakness in Russians. As regards British railway stocks, attention has been almost monopolised by Chatham second preference, which has undergone a rather severe onslaught on the part of bear speculators. At one time yesterday it was sold down to 104, but subsequently recovered, and to-day a further  $2\frac{1}{2}$  points were picked up, the stock closing at 108, or only 4 lower on the week. With the influences which have been at work to bring about this fall we deal at some length in our leader columns. Tilbury ordinary is up 5, notwithstanding the appearance of this company and the Great Eastern before the Railway Commissioners, for it is known that no bitterness is being imparted into the litigation, which, it is hoped, will settle the two companies' differences. The feature of the week has been the activity of American Rails, in which, however, a good deal of the business is still professional. This spurt is, of course, only part of the upward movement which we have frequently predicted as likely to continue in this department for the next year or so—with occasional set-backs, of course. The favourites have been, and are likely to continue to be, the preferred stocks of the "reorganised roads," though for the moment Northern Pacific is an exception to the rule, owing to a wrangle amongst the rival groups of operators. The stock of that wild-cat scheme, the Kansas City Pittsburg and Gulf Railroad, have been marked up  $5\frac{1}{2}$  points (though probably without a dollar of the stuff changing hands) on a rumour that the company is about to get control of the Chicago and Alton. Such an operation seems almost too absurd to contemplate, though, of course, anything is possible with Yankee railroad bosses. Canadian rails have risen in sympathy with Americans, though there is no sign yet of a settlement of the Canpac and Grand Trunk rael

squabble. Indian Railway stocks are recovering the losses they experienced during the late war scare, Bombay and Baroda being up 4 this week, Bengal Nagpur and Great Indian Peninsula 2 each, and most of the others a point or so. Foreign Railways, generally speaking, have been very quiet, but the tone is good, and most of the leading Argentine descriptions mark an improvement on the week. Ottoman shares have recovered  $\frac{1}{2}$ , and Antofagasta ordinary stock is nominally 7 points higher. Costa Rica shares were rather weak to-day, and lost about  $\frac{1}{4}$ . Manila debentures are again being inquired for, and dealings have taken place at over 40. A leading feature to-day was the demand for Nitrate Rails, which we have been recommending for some time past. The traffic published yesterday was fully up to expectations; and though the next return may not be so showy, further big increases can be looked for for some time to come. After official hours yesterday the undivided ordinary shares were bid for at 5 11-16, and the preferred ordinary at  $4\frac{1}{2}$ . Leopoldina shares have lost  $\frac{1}{8}$  on the week. At about 4 they are worth buying to hold, as they will be taken in hand for a good rise later on.

The principal movements on the week, so far as they relate to securities in which the readers of this journal are likely to be most interested, are set forth in the following table:—

Name of Stock.	Rise.	Fall.	Name of Stock.	Rise.	Fall.
<b>British Funds, &amp;c.</b>

The Stock Exchange Committee has ordered the under-mentioned securities to be quoted in the Official List:—United Railways of the Havana and Regla Warehouses, Limited.—Further issue of 360,800l. 5 per cent. consolidated irredeemable debenture stock.

Applications have been made to the Stock Exchange Committee to appoint a special settling day in and to grant a quotation to—Caledonian Railway Company—Further issue of 1,237,500l. ordinary stock; and to allow the following securities to be quoted in the Official List:—Atchison Topeka and Santa Fé Railway Company—\$3,181,000 additional general mortgage 4 per cent. 100-year gold bonds of 1895, Nos. M 96,207 to M 99,324 of \$1,000, and D 49,375 to D 49,500 of \$500 each; Surrey Commercial Dock Company—Further issue of 133,570l. ordinary stock.

Messrs. Thackeray and Co., of Cardiff, under date November 17th report as follows:—Barry Railway undivided, 262½ (unchanged); Barry preferred, 122 (unchanged); Barry deferred, 141 (a

rise of  $\frac{1}{8}$ ); Cardiff preferred, 112½ (unchanged); Port Talbot, 9½ (unchanged); Rhondda and Swansea Bay, 4½ (unchanged); Rhymney undivided, 263½ (unchanged); Rhymney preferred, 119 (a fall of 1); Rhymney deferred, 143½ (a fall of 1); Taff Vale, 74½ (a rise of  $\frac{1}{8}$ ); Vale of Glamorgan, 126 (a fall of 1). A much healthier tone has existed for all of the local railway stocks, though attention has been chiefly directed to the preferred and preference issues.

### RAILWAY PATENTS.

[This list is specially compiled for THE RAILWAY TIMES by Messrs. Rayner and Co., registered patent agents, 37, Chancery-lane, London, W.C., from whom all information relating to patents, designs, trade marks, copyrights, &c., may be obtained.]

23,384. Harry Edward Gresham, 5, Market-street, Manchester—Improvements in or applicable to mechanism for actuating brakes for railway wagons or vehicles.

23,410. Electric Fog Signal Syndicate, Limited, and William Robert Sykes—Improvements in explosive signalling apparatus for railways.

23,426. William Robert Renshaw—Improvements in brake mechanism for railway trucks.

23,475B. Joseph Mees, Comberton Villa, Stourbridge—Improvements in brake apparatus for vehicles, such as railway wagons.

23,643. William John Gooding, William Harry Wilkins, and Bertram Henry Tarrant—Improvements in front guards for locomotive engines.

23,669. Paul Czigler, Alexander Hirschmann, Franz Grunbaum, Jacob Wertheimer, Ferdinand Friedrich, Ludwig Rosenberg, and Hermann Kohn, 62, St. Vincent-street, Glasgow—A new or improved sleeper for railways and the like.

23,682. Andrew Thomson and John Robert Wood—Improvements in rail joints.

23,739. John James Whittaker Potter and Samuel Joseph Paul Shaw, 55, Market-street, Manchester—Improvements in stud bolts for connecting chairs to sleepers on railways; also applicable to other studs or bolts for like purposes.

23,769. Herbert Edward Rooke—Combined sleeper and chair for railways. (Date applied for under Patents, &c., 1883, section 103, May 21st, 1898, being date of application in United States.)

23,793. Arthur Thomas Metcalf Johnson—Improvements in railway keys or means for fastening railway rails with their chairs.

23,849. John Farquharson McIntosh and Archibald St. Clair Ruthven, 115, St. Vincent-street, Glasgow—Improvements in or relating to railway wagon brakes.

23,879. Matthew Henry Myers, 28, Roberts-road, Liverpool—Improvements relating to the simultaneous locking and releasing of railway and other similar carriage doors.

23,889. Erdmann Meyer—Improvements in railway fish-plates.

### SPECIFICATIONS PUBLISHED.

671. Annett—Level-crossing gates for railways. 1898.

19,171. Honen—Rail-joints for railways and the like. 1898.

The Paris Lyons and Mediterranean Railway Company has ordered 200 additional locomotives, to be completed before March, 1900, so as to provide for the heavy Exhibition traffic which is anticipated. Of these 200 engines, thirty have been ordered in Belgium, twenty will be built in the company's own workshops, and the remaining 150 will be ordered from various French firms.

**Railway Companies and their Servants.**—Mr. R. Bell, secretary of the Amalgamated Society of Railway Servants, on Wednesday issued a statement reiterating the allegation that in numerous instances servants of different railway companies have been dismissed for no other reason than that they had championed the cause of their fellows. This charge has been repudiated by the companies in a letter addressed to Sir Courtenay Boyle, but in the correspondence which he has had with the Board of Trade Mr. Bell asks, on behalf of the society, that an impartial inquiry may be held on the subject by Parliament, and he sets out particulars in eight cases, stated to be typical of fifty, in which men have been either discharged or reduced between December, 1897, and June, 1898, the vast majority, it is stated by Mr. Bell, for no other reason than that they acted as representatives of their respective grades in advocating improvements in the prevailing conditions of employment.

**EPPE'S COCOA.**—GRATEFUL AND COMFORTING.—"By a thorough knowledge of the natural laws which govern the operations of digestion and nutrition, and by a careful application of the fine properties of well-selected Cocoa, Mr. Eppe has provided for our breakfast and supper a delicately flavoured beverage which may save us many heavy doctors' bills. It is by the judicious use of such articles of diet that a constitution may be gradually built up until strong enough to resist every tendency to disease. We may escape many a fatal shaft by keeping ourselves well fortified with pure blood and a properly nourished frame."—*Civil Service Gazette*.—Made simply with boiling water or milk.—Sold only in packets and pound tins, by Grocers, labelled—"JAMES EPPE and Co., Ltd., Homoeopathic Chemists, London."

## Parliamentary Intelligence.

### NOTICES FOR BILLS AND PROVISIONAL ORDERS— SESSION 1899.

(FIRST LIST.)

#### AUDENSHAW URBAN DISTRICT TRAMWAYS.

Construction of tramways in the urban district of Audenshaw, in the county of Lancaster; power to urban district council to work tramways, and to levy tolls, rates, and charges; to let tramways on lease or otherwise; to use steam or other mechanical power, or electricity, or cable haulage; to acquire lands; the borrowing of money; the incorporation, amendment, and repeal of Acts, and other matters. *Solicitors*—Chorlton, Son, and Hamer, 32, Brazenose-street, Manchester. *Parliamentary Agents*—Baker, Lees, and Co., 22, Great George-street, S.W.

#### CITY AND BRINGTON RAILWAY.

Further works; acquisition of lands and easements; provisions as to shafts and underpinning, and as to surplus lands and tolls; confirmation of agreement with the City and South London Railway Company; capital and powers; incorporation and amendment of Acts. *Solicitors*—Dollman and Pritchard, 39, King-street, Cheapside, E.C.; Donald McMillan, 11 and 12, Clement's-lane, Lombard-street, City. *Agents*—W. and W. M. Bell, 27, Great George-street, Westminster.

#### EAST AND WEST YORKSHIRE UNION RAILWAYS (ADDITIONAL CAPITAL).

*Solicitor*—Ben Day, 4, Central Bank-chambers, Leeds. *Agents*—Rees and Frere, 5, Victoria-street, Westminster.

#### GREAT CENTRAL RAILWAY.

New railways in the county of Derby; lengthening or reconstruction of bridge in county borough of Sheffield; compulsory purchase of lands and houses; deviations; additional lands in counties of Lincoln and Nottingham, and county of the city of Lincoln; stopping up and diversion of footpaths in the county of the city of Lincoln, and the counties of Lancaster, Nottingham, and Northampton; exemption from private street work expenses; running powers to company over North Staffordshire Railway from Eggington to Burton, and Pinxton Colliery private railway, and running powers to North Staffordshire Railway Company over railway No. 4, authorised by the Manchester Sheffield and Lincolnshire Railway Act, 1845; abandonment of diversion of railway authorised by Sheffield and South Yorkshire Navigation Act, 1889, and release of deposit in respect thereof; extension of time for completion of the widening of the company's main line between Gorton and Hyde Junction; extension of time for compulsory purchase of lands for and completion of railways 2, 3, 4, and 5, authorised by the Manchester Sheffield and Lincolnshire Railway (New Railways) Act, 1888; extension of time for sale of superfluous lands of the Cheshire Lines Committee, and Sheffield and Midland Railway Companies Committee; extension of time for completion of railways authorised by the Cheshire Lines Act, 1890; extension of time for completion of railways authorised by the Wirral Railway Certificate, 1883, the Wirral Railway Act, 1884, and other Acts relating to the North Wales and Liverpool Railway Committee; extension of time for powers of Wrexham Mold and Connah's Quay Railway Company to form junctions with the London and North Western Railway Company; extension of time for compulsory purchase of lands for and for the completion of railway No. 2 authorised by the Manchester Sheffield and Lincolnshire Railway Act, 1894; extension of time for completion of deviation railway No. 3 authorised by the Manchester Sheffield and Lincolnshire Railway Act, 1894; tolls, rates, and charges; application of funds; additional capital; amendment of Acts; and other purposes. *Solicitor*—R. B. M. Lingard-Monk, 7, Victoria-street, Westminster, and Manchester.

#### GREAT EASTERN RAILWAY (AMENDMENT OF LONDON TILBURY AND SOUTHEAST RAILWAY ACT, 1898, &c.).

Repeal or amendment of section 38 of London Tilbury and Southend Railway Act, 1898; varying modification or repeal of section 33 of London Tilbury and Southend Railway Act, 1892, and section 47 of London and Blackwall Railway Act, 1885, removals of estoppals worked by those sections; power to or requiring Railway and Canal Commissioners to give effect to provisions of intended Act; amendment of Acts. *Solicitor*—Edward Moore, Liverpool-street Station, E.C. *Agents*—Rees and Frere, 5, Victoria-street, Westminster.

#### GREAT EASTERN RAILWAY (GENERAL POWERS.)

New railways in counties of Essex and Norfolk, and the Isle of Ely and county of Cambridge; widenings of company's Cambridge, Colchester and Tendring Hundred lines; lengthening of bridge carrying company's railway at Saxmundham; additional lines of rails and diversion of road at Ipswich; common lands; diversion of footpaths in parishes of Walton, Suffolk, and Hatfield Peverel, Essex; tolls; compulsory purchase of lands; exclusion of section 92 of Lands Clauses Consolidation Act, 1845; purchase of additional lands in counties of Middlesex, Essex, Suffolk, and Norfolk; diversion of Alders Brook and footpath in county of Essex; confirmation of purchase of lands in counties of Middlesex, Essex, and Suffolk; further money powers; extension of time for completion of works authorised by Companies General Powers Act, 1890; abandonment of construction of Cromer Junction No. 2, authorised by Great Eastern Railway Company and Midland and Great Northern Railways Joint Committee Act, 1898; representation of the company at meetings of Sheffield District Railway Company; amendment of Acts, &c. *Solicitor*—Edward Moore, Liverpool-street Station, E.C. *Agents*—Rees and Frere, 5, Victoria-street, Westminster.

#### GREAT NORTHERN RAILWAY.

Deviations and alterations of levels of loop line—Enfield to Stevenage; abandonment of parts of authorised line; widening between Finsbury-park and Harringay; widenings at Hornsey; widening and improvement at Peterborough; diversion of roads, construction of bridges by company and the Midland Railway Company, and abolition of level crossings at Peterborough; diversion of roads at Highbury; extension of bridge at Hatfield; new roads, stopping-up of roads and

footpaths and abolition of level crossings at Stevenage; bridge over River Welland at Deeping; new road and stopping-up of roads at Leicester; widening of bridges and stopping-up of footpath at Grantham; covering over portions of Nottingham Canal; taking water from River Trent; levying of tolls, rates, and charges; compulsory purchase of lands; exemption from section 92 of Lands Clauses Consolidation Act, 1845; purchase of additional lands in counties of London, Middlesex, Hertford, Bedford, Huntingdon, Leicester, Northampton, Lincoln, Nottingham, Derby, York (West Riding), and Lancaster, and power to hold for general purposes of their undertaking those already purchased; further extension of time for purchase of lands at Finsbury Park, Hornsey, and Leeds; power to invest any funds belonging to the company, and any part of their superannuation, guaranteed, or savings-bank funds respectively, in the preference or loan capital of the company, or in capital of any other undertaking on which they guarantee the dividend or interest; power to vary from time to time the scheme for establishing a guarantee fund authorised by the Great Northern Railway (Various Powers) Act, 1872; sub-lease or assignment of part of land adjoining to Bay of Nottingham Canal; Maintenance of diverted or substituted roads; agreements with local authorities; appropriation of lands of company for labouring-class dwellings; extension of time for sale of superfluous lands; power to Corporation of Peterborough to enter into agreements as to contribution, and to contribute funds; power to enter into working and traffic agreements with the Dearne Valley Railway Company; provision as to special constables; additional capital; application of funds by company; incorporation, repeal, and amendment of Acts. *Solicitor*—R. Hill Dawe, King's-cross Station, London; and 29, Abingdon-street, Westminster. *Agents*—Dyson and Co., 9, Great George-street, Westminster.

#### LANCASHIRE AND YORKSHIRE RAILWAY (NEW RAILWAYS).

New railways in Manchester and Middleton; widening Hunt's-bank incline, Manchester; purchase of lands and easements compulsorily and by agreement; additional lands at Manchester and Middleton; diversion and stopping up roads and footpaths; exemptions from provisions of section 92 of Lands Clauses Consolidation Act, 1845; underpinning; agreements with and powers to local authorities; levying tolls; additional capital; incorporation, repeal, and amendment of Acts. *Solicitor*—Chris. Moorhouse, Hunt's-bank, Manchester. *Agents*—Dyson and Co., 9, Great George-street, Westminster.

#### LANCASHIRE AND YORKSHIRE RAILWAY (VARIOUS POWERS).

Widenings at Middleton Junction, Chadderton; from Rainford Junction to Orrell; and at Pemberton; diversion of footpath at Nelson; additional arch under road at Low Moor station; purchase of lands and easements compulsorily and by agreement; additional lands at Nelson, Chorley, Kearsley, Westhoughton, Bamber-bridge, Ormskirk, Low Moor, and Knottingley; exemption from provisions of section 92 of Lands Clauses Consolidation Act, 1845; underpinning; powers to company and London and North Western Railway Company to make railway at Kirkham, to purchase lands compulsorily and by agreement at St. Anne's-on-the-Sea; superfluous lands; agreements with and powers to local authorities; levying tolls; extension of time for completion of Railway No. 2 authorised by Lancashire and Yorkshire Railway Act, 1891; abandonment of Railways Nos. 1 and 2 authorised by Lancashire and Yorkshire Railway Act, 1893, and new railway authorised by Lancashire and Yorkshire and London and North Western Railway Companies Act, 1896; additional capital by company and by London and North Western Railway Company; incorporation, repeal, and amendment of Acts. *Solicitor*—Chris. Moorhouse, Hunt's-bank, Manchester. *Agents*—Dyson and Co., 9, Great George-street, Westminster.

#### LEICESTER GROBY AND BRADGATE PARK RAILWAY.

Incorporation of company; construction of railway in the county of Leicester connecting with the Great Central Railway; compulsory purchase of lands; power to take part only of certain properties; tolls; running powers over portion of Great Central Railway; working and traffic agreements with the Great Central Railway Company; powers to trustees and others having limited interests in lands; payment of interest out of capital during construction; incorporation and amendment of Acts. *Solicitor and Clerk to the Council*—E. H. Grove, Great Cornbow, Halesowen. *Agents*—Baker, Lees, and Co., 22, Great George-street, Westminster.

#### LIVERPOOL OVERHEAD RAILWAY.

Lease of Waterloo with Seaforth and Great Crosby Tramways to Liverpool Overhead Railway Company; construction by company of authorised tramways; traffic and other agreements; construction of new tramways in Waterloo with Seaforth; gauge; motive power; generating stations; works in streets; passing-places, &c.; temporary tramways; tolls; rates and charges; breaking up of streets, &c.; compulsory purchase of land; agreements as to supply of electrical energy; further capital; repeal and incorporation of Acts. *Solicitors*—Alsop Stevens, Harvey, and Crooks, Liverpool. *Agents*—Sharpe, Parker Pritchards, and Barham, 9, Bridge-street, Westminster.

#### LONDON BRIGHTON AND SOUTH COAST RAILWAY (VARIOUS POWERS).

New railway at Deptford, London, and from Holmwood to Cranleigh, Surrey; widenings and improvements—Victoria Station, Streatham, Holmwood, main line, Brighton and Portsmouth line, Three Bridges and East Grinstead branch; alteration of streets; stopping up and diversion of roads and footpaths; compulsory purchase of lands; additional lands for various purposes in London, Sussex, and Southampton; prevention of trespass on railways; additional capital; tolls, rates, and charges; amendment of Acts, and sundry incidental powers. *Solicitors*—Rose and Co., 10, Victoria-street, Westminster, S.W. *Agents*—Dyson and Co., 9, Great George-street, Westminster, S.W.

#### LONDON AND NORTH WESTERN RAILWAY (ADDITIONAL POWERS).

Additional powers to company with reference to widening of existing railway and other works; footpaths and lands in the counties of Warwick, Chester, Lancaster, Flint, Buckingham, Leicester, Stafford, and Westmorland; agreements with Corporation of Manchester as to works and lands at Manchester; powers to company and Great Western Railway Company as to lands in county of Chester; extension of time for sale of superfluous lands of company; exemption from

private street work expenses; additional capital and application of funds by company and application of funds by Great Western Railway Company; amendment of Acts. *Solicitor*—C. H. Mason, Euston Station, and 35, Parliament-street, Westminster. *Agents*—Sherwood and Co., 7, Great George-street, Westminster.

#### LONDON CHATHAM AND DOVER RAILWAY.

Regulation of company's capital; additional capital; power to raise same by the issue of debentures, debenture stock, or by preference stock; power to make agreements with South Eastern Railway Company as to raising additional capital; repeal or modification of provisions to section 6 of the London Chatham and Dover Railway (Capital) Act, 1885, and to section 4 of the London Chatham and Dover Railway (Capital) Act, 1890; additional lands in the county of Kent; extension of time for sale of superfluous lands; extension of time for widenings of company's railway, authorised by the London Chatham and Dover Railway Act, 1879; extension of time for completion of Gibbon-road-bridge, authorised by the London Chatham and Dover Railway Act, 1892; Amendment of Acts. *Solicitor*—J. Lewis Morgan, Victoria Station. *Agents*—Martin and Leslie, 27, Abingdon-street, Westminster.

#### MATLOCK URBAN DISTRICT TRAMWAYS.

Construction of additional tramways; doubling of tramways; gauge; motive power; power to district council to work existing and new tramways, and to levy tolls, rates, and charges; agreements as to sale or lease of tramways; the borrowing of money; the incorporation, amendment, and repeal of Acts, and other matters. *Solicitor and Clerk to the District Council*—M. A. Sleigh, Matlock. *Agents*—Lewin, Gregory, and Anderson, 6, The Sanctuary, Westminster.

#### MILFORD DOCKS.

Alteration of security; priorities, and rights of special charge, debenture stock, and mortgages; payment of interest on debenture stocks A and B out of profits only; provisions as to arrears of interest thereon, and rights thereto; transfer of such rights to other parties; redemption of stocks; calling in and reduction of holdings in preference and ordinary capital and conversion thereof; power to transfer or issue to other parties; power to raise further capital by debenture or other stocks or shares; power to subsidise or otherwise assist steamship and other companies; formation of trusts; provisions for surrender of certificates of stocks and shares; power to lease portions of the company's lands or property; application of funds; amendment, &c., of Acts, &c. *Solicitors*—Beale and Co., 28, Great George-street, Westminster. *Agents*—Rees and Frere, 5, Victoria-street, Westminster.

#### NORTH PEMBROKESHIRE AND FISHGUARD RAILWAY.

Abandonment of railways authorised by North Pembrokeshire and Fishguard Railway Acts, 1895 and 1897; release of deposits; transfer of undertaking of company to Great Western Railway Company and dissolution of company; amendment of Acts. *Solicitors*—Rowlands and Co., 41, Temple-row, Birmingham. *Agents*—Sherwood and Co., 7, Great George-street, Westminster.

#### PORT TALBOT RAILWAY AND DOCKS.

Confirming deviations of railways authorised by the Port Talbot Railway and Docks Act, 1894, and by the Port Talbot Railway and Docks (Ogmore Valleys Extension) Act, 1896, and by the Port Talbot Railway and Docks (South Wales Mineral Railway Junction) Act, 1896. Requiring Great Western Railway Company to adapt portion of their Garw Branch for passenger traffic and in default power to Port Talbot Railway and Docks Company for that purpose; diversion of roads and footpaths, closing level crossings and extinguishment of rights of way; agreements with local authorities and powers to them to expend rates and funds; acquisition of land compulsorily and by agreement; additional lands; exemption from section 92 of the Lands Clauses Consolidation Act, 1845; working agreements with the Great Western Railway Company and owners of branch railway sidings; extension of time for compulsory purchase of lands and for completion of railway No. 4 authorised by the Port Talbot Railway and Docks (South Wales Mineral Railway Junction) Act, 1896; abandonment of portions of railways authorised by the said respective Acts; levying tolls, rates, and charges; extending limits of Port Talbot Harbour; Port Talbot Pilotage Board and pilotage limits; additional capital; repeal, amendment, and incorporation of Acts. *Solicitors*—Cheston and Sons, 1, Great Winchester-street, London; L. G. Williams, 20, Charles-street, Cardiff. *Agents*—Dyson and Co., 9, Great George-street, Westminster.

#### SURREY COMMERCIAL DOCKS.

Extension of time for compulsory purchase of lands authorised to be acquired by Surrey Commercial Dock Act, 1894, and for the completion of works authorised by that Act; amendment of Acts, &c. *Solicitors*—Druces and Attlee, 10, Billiter-square, E.C. *Agents*—Rees and Frere, 5, Victoria-street, Westminster, S.W.

## General News.

### FAST TRAINS AND LEVEL CROSSINGS.

In the Queen's Bench Division on Monday Mr. Justice Bruce delivered judgment in the case of "The Attorney-General v. the London and North Western Railway Company." This was a matter in which the Attorney-General, at the instance of the Warwickshire County Council, asked for an injunction against the railway company to restrain them from allowing their trains to travel at more than 4 miles an hour over the Watling-street level crossing, adjoining Atherstone Station, to the inconvenience of the general public. The case was briefly reported in our last issue. His LORDSHIP read the following judgment:—"In this case the Attorney-General, on the relation of the Warwickshire County Council, has instituted an action against the London and North Western Railway for an injunction to restrain the company from

allowing their trains to cross the Watling-street at the level crossing adjoining Atherstone Railway Station at a speed greater than 4 miles an hour. The main facts are undisputed. The Watling-street at the point in question is a main road within the meaning of the Highway and Locomotive Act, 1878 (41 and 42 Vict., c. 77, s. 13), is within the administrative county of Warwick, and is vested in the County Council pursuant to section 11 of the Local Government Act, 1888 (51 and 52 Vict., c. 41). The County Council, for the purpose of the maintenance, repair, improvement, and enlargement of, and other dealing with such road, have the same powers as a highway board, for preventing and removing obstructions to the road. The defendants or their predecessors in title obtained power by the Trent Valley Railway Act, 1845 (8 and 9 Vict., c. 112), to carry their railway across the road at the point in question on the level, and with this Act was incorporated the Railways Clauses Consolidation Act, 1845. The 48th section of the last-mentioned Act enacts as follows:—"Where the railway crosses any turnpike road on a level adjoining to a station all trains on the railway shall be made to slacken their speed before arriving at such turnpike road, and shall not cross the same at any greater rate of speed than 4 miles an hour. . . . " This latter enactment has never been relaxed, so that the right of the company to cross the Watling-street at the point in question is subject to the express terms imposed by the Legislature that the trains of the company shall not cross the road at the level crossing at a speed of more than 4 miles an hour. The only question for decision is whether the terms imposed by the Legislature can be enforced by injunction in this action. It is admitted that for a long time past the company has disregarded the conditions imposed, and have constantly caused their trains to cross the level crossing at a speed greatly exceeding 4 miles an hour. The crossing in question is part of a main line of the London and North Western Railway, and it is said that about 120 express passenger or goods trains pass over the crossing every twenty-four hours. It is beyond question that the vehicular traffic on the road is seriously impeded by reason of the railway traffic. The railway line is worked upon the block system under the direction of the Board of Trade. Under the system the line is divided into sections and the gates at the level crossing are kept closed across the road so long as any train is within the limits of the section on which the crossing is situate. In one direction the section extends 1,340 yds. from the level crossing, and, I suppose, it extends nearly the same distance in the opposite direction, so that, before the approach of a train within a distance to cause danger to vehicular traffic, the gates are closed across the road and are kept closed until the train has passed to a safe distance in the other direction. The result is that the gates are kept closed across the road from five to fifteen minutes at a time, and they are ordinarily kept closed against the public during the twelve hours extending from 6 a.m. for a period ranging from 275 to 319 minutes to 6 p.m., or for an average during each hour during that period varying from twenty-three to twenty-six minutes. The defendants contend in substance that the court in its discretion ought to refuse the injunction because they say that the inconvenience of which the public complain will not be diminished but will be increased if they are obliged to slow down the speed of all their trains as they approach the level crossing. Of course, it stands to reason, if the present system is maintained and the length of the section is not lessened, that the trains if they go more slowly, will remain a longer time in the section and the gates across the road will consequently be closed for a longer period. The plaintiffs contend that if the trains are all compelled to slow down as they approach the level crossing it will be quite safe to shorten the length of the section, and that, at all events, whether the trains go slow or fast, the company is not entitled, even for the purpose of the convenient use of their railway, unreasonably to obstruct the vehicular traffic or the road, and that the right of the company to cross the road is subject to the right of carts and carriages to pass. But, in the view I take of this case, it is wholly unnecessary for me to enter into these considerations. There are, no doubt, cases in which the object of the action has been to restrain a nuisance, and the courts have refused to act in the absence of evidence to prove that substantial injury has been caused by the acts complained of, or there has been some substantial interference with the rights of the public. But these cases differ altogether from an action such as the present, which is an information to enforce the express terms of an Act of Parliament. The Legislature, having imposed certain conditions for the protection of the public, it is the duty of the court on the application of the Attorney-General on the relation of the local authority charged with the protection of the public rights in question to enforce the provisions of the law. Jessel, Master of the Rolls in the case of "The Attorney-General v. Cockermouth" (18 Eq., 178) said:—"Now, if I understand the law upon the subject, it is not necessary for the Attorney-General

to show any injury at all. The Legislature is of opinion that certain acts will produce injury, and that is enough." His Lordship, having discussed this case together with the cases of "The Attorney-General v. Shrewsbury Bridge Company" (21 Ch. D., 752) and "The Attorney-General v. Great Western Railway Company" (7 Ch. App., 770), proceeded:—In the present case I think there can be no doubt that the provision inserted in the Railway Clauses Act respecting the speed at which trains should pass over the level crossing in question was intended for the protection of the public. The defendants are committing an illegal act in disregarding that provision. They have no right to pass over the Watling-street except on the terms imposed, and it is not for the court to disregard the terms which the Legislature has formulated, or to treat them as superseded or inoperative. The court is bound, upon the application of the Attorney-General, acting upon the relation of the public body charged with the protection of the public rights on the road in question, to grant the injunction asked for.

### LONDON AND NORTH WESTERN RAILWAY.

#### PROPOSED NEW PIER AT HOLYHEAD.

With reference to the proposal that a new pier shall be constructed on Salt Island in order to provide better facilities for handling the mails and for embarking and disembarking passengers at Holyhead Harbour, it is understood that negotiations have for some time past been in progress between the Board of Trade and the London and North Western Railway Company for the sale to the latter of the old harbour at Holyhead (now under lease to them for a long term of years) together with the adjacent quays and land, and if these negotiations are brought to a successful conclusion it will no doubt facilitate the action of the Board of Trade in carrying out the much-needed improvement by the erection of a pier which will meet the requirements of the mail service for many years to come. At present passengers travelling by the London and North Western Railway Company's steamers running between Holyhead and Dublin use the quays on the inner basin of the old or inner harbour, while the mails are embarked and landed at the mail pier in the outer area of the old harbour. This pier is a wooden one, and not well adapted for the large steamers that carry the mails, and, as has already been stated, it is very costly to maintain. Further accommodation is also much required. The construction of a substantial and commodious pier at Salt Island, outside the old harbour, which could be used by the mail steamers would be of great advantage to the mail service and to the harbour, but the expense involved in the construction of such a pier has hitherto proved an obstacle to the execution of the project. If the old harbour, with the adjacent quays and lands, were sold to the London and North Western Company the purchase money would be devoted to the construction of the new pier, and an improvement would be effected beneficial alike to the mail and passenger services conducted from Holyhead.

### NEW LINES NEAR MANCHESTER.

The new line which is proposed to be laid by the London and North Western Railway Company between Wilmslow and Longsight is not intended to be more than a relief to the existing main line through Stockport, and cannot be more than a supplementary line to the old one. The length of the line will be between 9 and 10 miles in length. It appears certain that the main line traffic will be taken from the old route, and the fast trains are far more likely to continue to be run through Stockport than diverted to the new line at Wilmslow, for it would mean an extra mile of haulage. The new line will start at point on the main line from Manchester to Crewe, between 250 and 300 yards south of the bridge over Swann-street, Wilmslow, and will join the main line again at a point almost equidistant from the southern end of the bridge which spans the Stockport-road at Levenshulme. In its course it will run through the heart of Styal, Cheadle, Didsbury, Burnage, and Withington, at each of which places stations are to be built. The locality to be served is already an important one, and the increase of direct railway communication with Manchester cannot fail to have a stimulating effect on it as a residential district. It is intended to purchase sufficient ground to allow of the construction of two up and two down lines, but they will certainly not be laid at first, although increasing traffic will, it is believed, necessitate a widening of the line at some future date. As to the rumours of the probable extension of the accommodation for goods in Manchester and the erection of a new goods station or warehouse in Deansgate for the London and North Western Railway Company, the assistant general manager of the company (Mr. Turner) states there is no intention at the present moment of doing anything of the sort or of erecting any property in or near the street named for the company's purposes. Nor is it their intention, in connection with the Altrincham and South Junction Railway (which is

controlled by the North Western), of undertaking similar works in Deansgate, for such a building, it is said, would be too far away from the company's main line.

### THE NORTH EASTERN AT HARTLEPOOL.

Speaking at a meeting of the Hartlepool Port and Harbour Commissioners, on Tuesday, Sir Lowthian Bell, a director of the North Eastern Railway Company, said the company fully recognised the necessity of having on the board of directors gentlemen well acquainted with the requirements of the port. Therefore he had had great pleasure in proposing Mr. W. C. Gray to succeed his father, the late Sir William Gray, whose appointment he (Sir Lowthian) had also proposed. ("Hear, hear.") For himself, he was not a very efficient commissioner, but when any work of importance was to be done, he was always prepared to make an effort to attend. ("Hear, hear.") These improvements such as were now proposed were alike important and complicated, and in considering them the company were bound to act with caution and prudence. The directors were not altogether in favour of Sir Wolfe Barry's plans, and the result of inquiries and consultations at the Hartlepool was that those plans had now been withdrawn, there not being time to obtain the necessary Parliamentary powers next session. But they would be prepared for the following session. The directors had every intention to spend the necessary money over the port, not only from the regard they felt for it, but also in the interests of the shareholders of the company. ("Hear, hear.") But the subject was not one that could be decided offhand. The directors must have time. He alluded to his long connection with the port, adding that it was mainly through his influence, some thirty-five years ago, that the port now had at its back a large and powerful company, ready and willing to do anything to further its interests.

### WESTERN RAILWAY OF MINAS.

The following, from the *Brazilian Review* of October 25th, bears upon the cable announcement contained in our last issue, that judicial liquidation of the Western of Minas Railway Company had been decreed on the petition of a bank representing German creditors:—"It is reported that the German Bank intends shortly to ask for the judicial liquidation of the Western Minas Railway Company for default in payment of the interest on its first debenture debt. The company has a capital of 60,000,000 milreis and an extension of 786 kilometres in traffic in the State of Minas, Rio and Goyaz. It enjoys a guarantee of 7 per cent. from the State of Minas, on a capital of 9,500,000 milreis, and another of 6 per cent. on 60,000 contos from the Union, besides a guarantee from the State of Rio de Janeiro. Its debt consists of the first debenture loan emitted in Germany and the London loan of 1895. This last is guaranteed by the Brazilian Government and was included in the funding arrangement. The German issue has no guarantee from Government and holders applied for the treatment of their securities on the basis of the London loan, but Government rightly refused. It is a private debt of the company, and the Government has no right or obligation to interfere, and has quite enough to look after without taking other people's debts on its shoulders."

### SWANSEA AND MUMBLES RAILWAY.

We are in a position to state that negotiations are in progress for the acquisition of the Swansea and Mumbles Railway by the British Electric Traction Company. The Traction Company has already acquired the Swansea Tramways with a view of adopting electric traction. In that purchase is included the old tramway company's running power on the Mumbles Railway, and if it can only get hold of the Mumbles Railway and work it in connection with the town tramway system by electricity it will be a grand thing for the district, for besides giving the company a continuous line between Morriston and the Mumbles Pier it will have the effect of doing away with the present dangers of the Mumbles-road, which are unavoidable so long as the railway is worked by steam. We are in a position to state that there is business in the negotiations, and that an early completion resulting in a purchase is probable. Meanwhile the Mumbles Railway Company are proceeding with a Bill in Parliament for the necessary authority to abandon the section from Blackmill towards the Mumbles which runs by the side of the road, the seaside line on that section, for which Parliamentary powers were obtained last year, being substituted for it. But this we learn, while affecting a portion over which the tramway company have running powers, will only improve the line as a whole and make the Electric Traction Company a more anxious buyer.—*South Wales Daily News*.

**NEW RAILWAY REGULATIONS IN URUGUAY.**

The Executive had approved and declared in force the new regulations for railway control, drawn up by Señor A. Madalena, and which are applicable to all the guaranteed railways. The principal clauses of the regulations are as follows:—"The monthly accounts shall be presented not later than the last third (2<sup>d</sup> third week) of the month following the one completed. For the purpose of the provisional quarterly payment of the guarantee, the companies shall draw up their accounts in the usual form, adding a simple summary of the results of the quarter's working, from which the control office shall arrange for the payment through the Ministries of Foment and Finance. The half-yearly accounts shall be presented not later than in the third part of February and August of each year. The companies must, further, always supply the following data:—The tariffs and timetables, further notifying any changes in the same; the annual reports of the company, translated into Spanish; a faithful copy of any agreements the companies may make between themselves relative to combined services; copies of the contracts for leases, freights, transport, &c., made with private persons, and of any changes in the same; advice of all financial operations carried out; notification of any improvements proposed to be effected; any *ad referendum* agreement between two or more of the companies must be arranged directly through the Minister of Foment."

**LLANELLY HARBOUR AND PONTARDULAI RAILWAY.**

A special meeting of the Llanelly Harbour Commissioners was held on 11th inst., when the Llanelly and Pontardulais Railway was further considered. An amended plan was put in, and a junction with the Great Western Railway near the dock was approved. Another proposed junction with the Burry Port and Gwendraeth Valley Railway was opposed by Mr. Knoyle on the ground that in the case the line would be taken over by the London and North Western Railway Company, it would be possible that traffic that should come to the Llanelly Dock would be taken down to Burry Port. Mr. Tom Hughes said they ought not to consider the matter from a narrow standpoint. If Burry Port became prosperous it would be all the better for Llanelly, because Llanelly was able to impose dues on everything that went there. This junction was also approved. Another junction was mentioned, but it was decided to leave it as an open question. On the proposition of Mr. Tom Hughes the following (two from each ward) were appointed to confer with the promoters:—Messrs. E. Trubshaw, J. Maybery, W. Knoyle, Ellis Evans, John Thomas, and Joseph Williams. It having been suggested by the promoters that the name would be better if changed to Llanelly Harbour and Pontardulais Railway, the chairman proposed, and Mr. Knoyle seconded, that the name should be changed accordingly.

**NEW COMPANIES AND NEW ISSUES.**

[Applications for shares in limited liability companies may be withdrawn by letter—or by telegram, if confirmed by letter—provided the notice of withdrawal reaches the secretary before the shares are allotted.]

**CANTON SYNDICATE, LIMITED.**

A prospectus, marked "private and confidential" is being circulated offering the 11 shares in this "syndicate" for subscription at 51. each. The total capital of the syndicate is only 5,0001. According to the prospectus the syndicate has acquired from the British-Chinese Railways Syndicate, Limited (a company organised with a capital of 100,0001. ordinary 11. shares and 1,000 founders' shares of 11. each), (a) the 1,000 11. founders' shares of that company, entitled to two-thirds of the profits after 10 per cent. has been paid on the ordinary shares; and (b) an option at par upon the ordinary share capital. The prospectus continues:—"The principal concession applied for from the Chinese Government is for the construction of a railway from Canton to Chen Tu (a distance of from 800 to 900 miles through the most populous section of China), together with valuable land and mineral rights. It may be stated that the application has the support of the British Foreign-office, and that Sir Claude Macdonald has been instructed to use all his efforts to bring the negotiations to a speedy and satisfactory conclusion. Sir John Lister Kaye, Bart. (a director), sailed for China on Tuesday, October 11th, 1898, to personally conduct negotiations with the Chinese Government, as his services were urgently needed. It is believed that Sir John's mission will prove entirely successful and very valuable concessions will be acquired." It is understood that this concern is in some way mixed up with the Fish Oil and Guano group of companies, and certainly it is fishy enough for anything. But, notwithstanding the oleaginous statements in the prospectus, we scarcely think the public is likely to be befooled into relieving the promoters of their trashy shares.

**YANG-TSE CORPORATION, LIMITED.**

This, apparently, is a somewhat similar concern to the above, but the prospectus is merely marked "private." The capital is 300,1001. in 300,000 shares of 11. each, and 2,000 deferred shares of 1s. each. The latter, are of course, intended to have most of the fat—i.e., if there is ever anything to cut up. The Marquis of Tweeddale—doubtless having a lot of sparetime on his hands with only about a score other companies to direct—is on the board.

**LANARKSHIRE AND DUMBARTONSHIRE RAILWAY COMPANY.**

The directors announce the issue of 8,430 ordinary 101. shares. One share will be allotted to the holders of every six shares registered on 7th inst., at 131. per share. The Caledonian Railway Company, which works the line, will be allowed the balance of the issue.

**HULL AND BARNESLEY RAILWAY COMPANY.**

The directors offer for subscription 600,0001. 3½ per cent. preference stock at par, being a part of the 750,0001. authorised in September last. It is announced that the proceeds are to provide for the construction of the Hull and South Yorkshire lines, for new rolling stock, and for the redemption of the existing 300,0001. 4 per cent. preference stock. This stock is redeemable in July next at 115 per cent., in cash. Until 30th inst. holders of the existing preferences have the option of taking 1151. of the new stock for every 1001. of their holding.

**POTTERIES ELECTRIC TRACTION COMPANY, LIMITED.**

This company having a share capital of 400,0001., in 101. shares, divided into equal proportions of 5 per cent. cumulative preference and ordinary, has, the prospectus states, been formed for the purpose of constructing tramways and light railways recently authorised in the Potteries district, and also of acquiring control of the tramways already constructed (worked at present by steam, but in course of being reconstructed for electric traction) belonging to the North Staffordshire Tramways Company, Limited, and the tramways in the borough of Longton, and of working all as one undertaking by the overhead system of electric traction. The several tramways and light railways are of an approximate total length of 33 miles, and it is intended to work a continuous service. The electrical equipment of the North Staffordshire Company's lines is now being carried out by the Brush Electrical Engineering Company at the price of 57,4181., and the contract for the construction of 14 miles authorised under the Potteries Extension Tramways Order, 1896, has been made at the price of 75,5901. Contracts have yet to be entered into for the remainder of the works. The British Electric Traction Company also holds 43,9001. first and 10,5001. second mortgage debentures and 9,7921. ordinary and preference shares of the North Staffordshire Company and has 2,3981. of Consols as a Parliamentary deposit. The new company takes over these debentures, shares, Consols, and all the rights, interests, and obligations under the various orders and contracts obtained or made in connection with the undertaking at the price of 152,4101., payable 66,6601. by the allotment of 6,666 ordinary shares and the balance in cash. It is estimated that the capital required by this company to complete the works and discharge the remaining obligations under the various orders and contracts, including the purchase of the balance of the shares in the North Staffordshire Company, will be 386,5001., in addition to the purchase price of 152,4101. The Electric and General Investment Company now offers at par the 20,000 preference and 13,334 of the ordinary shares of the new company.

**SOUTHERN PACIFIC OF CALIFORNIA.**

Messrs. Speyer Brothers invite subscriptions at 105 per cent., equal to 2101. per bond of \$1,000, for \$10,000,000 5 per cent. Southern Pacific Railroad Company (of California) first consolidated mortgage gold bonds, due 1937. The bonds form part of an issue secured by a trust-deed of September 15th, 1893, which has been modified by a supplemental deed of August 18th, 1898, and the Central Trust Company of New York is the trustee under these deeds. This supplemental deed limits the total amount of the issue, which comprises the bonds now offered, to \$30,000,000 in addition to the amount of bonds authorised to be issued bond for bond, to retire certain outstanding bonds. On June 30th, 1898, bonds to the amount of \$20,344,000 out of these \$30,000,000 had been created and were outstanding, and the balance, consisting of bonds for \$9,656,000, not then created, can only be issued for construction or acquisition of further designated lines of railroad, or betterments or improvements for the mortgaged lines, and any property thus acquired will at once become subject to the deed of trust securing these bonds. The company has reserved to itself the right, on and after April 1st, 1905, to redeem the bonds at 107½ per cent. (equal at the present rate of exchange to about 110½ per cent. London price) and accrued interest on six months' notice.

Mr. W. C. Gunner, the secretary of the Central Pacific Share-

holders' Protection Committee, dating from 124, Chancery-lane, W.C., states that an action has been commenced against Messrs. Speyer Brothers to injunct the proposed issue by them of \$10,000,000 5 per cent. Southern Pacific Railroad Company of California bonds, as advertised, on the security of or so as directly or indirectly to pledge or affect the property or credit of the Central Pacific Railroad, and for damages.

Mr. Walter Morshead, a holder of \$250,000 stock of the Central Pacific Railroad, and chairman of the Central Pacific Shareholders' Combined Protection Committees of 1894 and 1898, has addressed the following further letter to Messrs. Speyer Brothers, 7, Lothbury, E.C., under date November 11th, 1898:—"Notice is hereby publicly repeated to you and all whom it may concern that if you, or the Banbury Committee formed by yourselves, with the assistance of Mr. Huntington's English alter ego and counsel, Mr. Bretherton, or the Requa Board, arranged and qualified by Mr. Huntington in 1894 and re-elected by the Banbury Committee in 1898, attempt to pledge the property or credit of the Central Pacific Railroad by a blanket mortgage, an issue of Southern Pacific bonds, or otherwise, application for an injunction and damages will be made in the American or English courts, as the case may require, on the grounds specified in previous notices, and in a notice of which this is an abbreviated copy. These notices are published to prevent as far as possible any such securities as aforesaid from being negotiated or transferred to purchasers for value without notice of their disputed legality. If found necessary or expedient, a representative action will be commenced to set aside the lease of the Central to the Southern Pacific Company, and to test the validity, as against the shareholders of the Central Pacific, of previous operations in connection with Southern Pacific bond issues by Mr. Huntington and yourselves. This, or the notice from which it is abbreviated, will be sent in due course to the Banbury Committee, the Central Pacific Shareholding Company, the boards of the Central Pacific Railroad Company, the Southern Pacific Company, and the Southern Pacific Railroad Company of California, the Stock Exchanges of London, New York, Berlin, Frankfurt, and Amsterdam, and to the English, Irish, American, German, and Dutch press."

#### RAILWAY RATES AT CARDIFF, BARRY, AND PENARTH.

At the monthly meeting of the Cardiff Chamber of Commerce on Wednesday, Mr. JENNINGS, chairman of the import section, said the Great Western Railway Company had, as the result of repeated communication and agitation, made some important concessions for the port of Cardiff. Hitherto frozen meat could be conveyed quicker from London to Bristol than from Cardiff to Bristol, but now the Great Western Railway Company had agreed to run a fast train from Cardiff at night, so that frozen meat could be on sale at Bristol first thing in the morning, the same as from London. ("Hear, hear.") The company had also made a reduction of 20 per cent. in the provision trade from Bristol to Cardiff. The company had also consented to place Cardiff, Barry, and Penarth on the same rate for all Midland towns. That was a very important concession. ("Hear, hear.") In particular that would be a great benefit to the petroleum trade from Penarth. The company still refused to meet them on the preferential rate question from Bristol, but they now had hope of ultimate success. He had just been given an instance of lubricating oil being sent from Cardiff to a Monmouthshire colliery at 7s. 10d. per barrel, but from Bristol to the same colliery and for the same man, thirty barrels were sent for 7s. 6d. per barrel, although the distance was 30 miles further. It must be admitted, however, that they had gained some important points. ("Hear, hear.") The President said the question was often asked what good Chambers of Commerce did, and what good the Cardiff Chamber of Commerce had done? Well, they had one instance of something they had done. ("Hear, hear.") He considered it an extremely important matter that in the matter of rates Cardiff, Barry, and Penarth should be placed on the same level.

#### TAFF VALE RAILWAY SERVANTS.

At a meeting of the Executive Committee of the Taff Vale Railway servants, held at Pontypridd on Sunday evening, a letter was read from Mr. Beasley with reference to the dispute about the guarantee week. The letter, which was dated the 9th inst., stated that the guaranteed minimum of sixty hours per week would be restored from the 24th ult., being the earliest date upon which its restoration was justified under the terms of the agreement. No definite steps were taken by the committee in connection with the matter, but it will be seen that the demand of the men has been partly conceded. On Thursday the secretary of the Amalgamated Society of Railway Servants issued the

subjoined announcement:—"I this morning received an intimation from Cardiff that the Taff Vale directors had decided to restore the guaranteed week of sixty hours, the restoration to date as from the 24th of last month. The company in this way acknowledge the binding nature of the agreement entered into between themselves and the men to give the latter a guaranteed week of sixty hours, save during periods of strike and labour trouble. There is no reason why the restoration should not have taken place long ere this, or why the company should not have consulted with their men as to the date of the restoration, as did the directors of the Rhymney and the Barry Companies, both of which were also parties to the agreement. The Amalgamated Society of Railway Servants had determined to fight the Taff Vale Company in the courts, and were prepared to enter upon between 2,000 and 3,000 actions. What course we shall now pursue I cannot say. It may be advisable to bring one or two test actions, to see if the law which applies to the miners applies equally to railway directors who break an agreement, but the question is a moot one, which I am now engaged in considering."

#### NITRATE NOTES.

We have to thank those of our readers who have been good enough to furnish us, in response to our invitation of a week ago, with copies of the Lagunas Syndicate reports for 1891 and 1892, and the Consolidated Nitrate Company and Arauco Company prospectuses. We shall still be pleased to receive copies of the following prospectuses:—Bank of Tarapaca and London, Colorado Nitrate Company, Liverpool Nitrate Company, San Donato Nitrate Company.

Some enterprising but, of course, anonymous, individual has this week been circulating somewhat lavishly a verbatim report of the judges' summing-up in "Lockett v. the Lagunas Nitrate Company, Limited." No doubt the old North crowd think they have scored off the board of the Lagunas Company, and perhaps they have for the moment. But we would remind them that the game is not yet over, and, if we mistake not, the other side have still a good trump card to play.

The Bank of Tarapaca is reported to have been "let in" to the tune of \$20,000 by a gang of swindlers, who got in on the ground-floor at Valparaiso, where a big loss was made four years ago on a local account. After all it cannot be a "Nitrate Bank."

The "meritorious" example set by the Liverpool and Colorado companies of having their accounts vouched by a chartered accountant in Iquique, is not followed by the London Nitrate Company, one of the promotions of Mr. George M. Inglis, of Great Boulder notoriety. The "sales account" would severely tax Mr. Meritt's powers.

A daily contemporary remarks:—"The past fortnight's bumper traffic of the Nitrate Railways not only wipes out the deficit to date, but leaves 2,678*l.* to the good compared with last year. As the next three fortnights may in all probability add another 15,000*l.* to the surplus, whilst during the past six months the company must have effected a considerable saving in working expenses through the depreciation of the Chilean currency, the financial results of 1898 will be far more favourable than could at one time have been expected. To so low an ebb has interest in nitrate matters fallen, that this traffic improvement seems to be passing almost unnoticed. But the market will doubtless awaken when it realises the sudden improvement in prospects, especially if the shop at last takes a hand in the game." [Reference to our City article will show that Nitrate rails received a good deal of attention yesterday.]

As the shareholders in the Nitrate Railways Company may like to know how things are going with their ex-directors, we reproduce for their delectation the following interesting paragraph from the *Westminster Gazette*:—"It seems as if the Great Boulder board, although comprising some old Parliamentary hands—Messrs. Robertson, Inglis, and Gamble North, of nitrate fame, to wit—has been fairly cornered by the Shareholders' Provisional Committee. Instead of sitting down under the rebuff experienced three months ago, when the chairman refused to put to the vote a resolution formally proposed for the rescission of the semi-secret milling contract, the committee quietly proceeded to procure proxies in Australia. The directors have issued a circular requesting the shareholders to withhold their requisition for a meeting and their proxies, or if given, to withdraw them. As it happens, the proxies already received in large numbers by the committee are irrevocable, the precaution having been taken under eminent legal advice. The directors nailing their colours to the mast, announce their intention not to call another general meeting unless compelled. The necessary compulsion is about to be applied in the shape of a formal requisition, and the result will be watched with interest."

The *Investors' Review* would hardly predict a reduction in the next dividend of the Liverpool Nitrate Company were it aware of the fact that the current year's output will be three times as large as last year's and at a larger profit per quintal, owing to what Mr. Robert Harvey is pleased to call "an improvement in the labour market"—i.e., payment of wages in depreciated paper currency.

The "Primitiva" Company must be either very flush of caliche or very short of cash to have parted with part of its grounds to the Agua Santa Company for 7,500*l.* Any way, the buyers should make a clear 20,000*l.* out of the deal.

We owe the *South American Journal* an apology for having omitted to append Artemus Ward's N.B. to our recent note on the London Banks of Mexico and Tarapacá. By the way our contemporary again gets "delightfully mixed" (to use its own words) over nitrate statistics in last week's issue. The reproduction of so wide an estimate as "between 300,000 and 350,000 tons" for November-December shipments is safe enough, although, as a matter of fact, even the larger figure is likely to be exceeded, but the 1898 total of "1,203,000 or perhaps 1,228,000 tons," would, in any case, compare with 1,064,000 tons in 1897, 1,094,000 in 1896, and 1,226,000 in 1895—not 1,040,000, 1,210,000, and 1,075,000 respectively. The conclusion that consumption is steadily increasing is drawn from erroneous premisses and illogical to boot, there being no direct connection between exports and consumption, the heroic efforts of the Permanent Nitrate Committee notwithstanding.

At the annual general meeting of the London Nitrate Company on Wednesday, the chairman (Mr. Tobin) remarked that during the past year they were absolutely unfettered by any restrictions or agreements with other people, and the consequence was that they were able to increase their output of nitrate, and produce it more economically than ever they had done before. Unfortunately, all nitrate grounds were exhaustible in a certain number of years, and on that ground they should be very glad to see and would heartily welcome any fair combination that could be arrived at to restrict production and procure a more remunerative price. Mr. F. G. Lomax said that no doubt a large majority of the producers would welcome a combination, but the grasping disposition of some producers, who wanted to get more than their proportion, was a serious stumbling block in the way. "Grasping disposition" is good! It is something so entirely fresh in nitrate circles, and was never shown by the North crowd in their company flotations, their commission contracts, and so on. Oh dear no!

#### SOUTHAMPTON AND PLYMOUTH.

The following is from the *Western Morning News*:—"The arrangements at Plymouth for running special trains on the arrival of mail steamers are, we understand, about to undergo slight modification. At present the Great Western Railway Company will despatch a 'special' with only one passenger, but this arrangement, which has no doubt been felt to involve somewhat of a superfluous strain, will cease early in the coming year, and the matter of special train accommodation is to be left entirely in the hands of the local officials. There need be no fear but that they will still do their best to give incoming passengers 'prompt dispatch.' Plymouth, even when the present system is modified to this small extent, will still be far ahead of its rival, Southampton, as at the latter port no special train is ever arranged for less than twenty-five passengers, nor will the South Western Company run their trains to Waterloo unless they can be despatched from Southampton not later than 9.30 p.m. The latter arrangement makes it impossible for the Cape passengers landing to catch the night mail from Paddington, should any steamer arrive too late for their baggage to be cleared at that hour."

On the same subject the *Western Mercury* says:—"As everybody knows, Southampton owes the whole of its prosperity to the successful management of its docks by the London and South Western Company. Mr. Wyndham Portal, the chairman of the company, was at the Mayoral dinner at Southampton last week, and took the occasion to send Plymouth a lesson:—

'The starting point,' he said, 'of the era of progress which Southampton experienced was the time when the docks and railway companies were merged under one management. Unlike some other towns, which need not be mentioned, where it had been thought undesirable that so much power should be placed in the hands of one company, however respectable. Southampton people had taken a different view, and when he said that the progress of the trade and commerce of Southampton dated from the time that the docks and railway companies were merged into one, he liked to emphasise the point that that great step was due

to the good understanding and cordial feelings which then existed between the various governing bodies of the town and the railway company.'

"Coming after Sir J. Wolfe Barry's reference the other day to the necessity of a good understanding between dockowners and railway companies, this contains a lesson which should not be lost when the time comes for considering the development of the facilities for shipping trade of Plymouth."

#### FOREIGN AND COLONIAL ITEMS.

The Karahissar section of the Ottoman Smyrna and Cassaba Railway is now finished.

Recent mail advices from Rio de Janeiro state that the Bill for a railway to Bolivia had been voted by the Brazilian Chamber of Deputies.

Mr. W. A. Harrison, senior engineer on the Uganda Railway, has died from the effect of wounds inflicted upon him by a lioness which he had shot.

The Egyptian Council of Ministers has decided to make a grant towards the construction of the Atbara-Khartum Railway out of the special reserve fund.

The first ordinary general meeting of the Leopoldina Railway Company, Limited, will be held on the 25th instant for the purpose of the election of directors and the appointment of auditors.

The new stock certificates of the Entre Rios Railways Company, Limited, will be ready for delivery in exchange for the share certificates on or after December 1st, 1898. Shareholders are requested to surrender their share certificates, either personally or by letter, on or after December 1st.

Major de Thys, the Director-General of the Congo Railways, has recently had several conferences in Brussels with the representatives of leading Hamburg financiers, especially the North German Bank, with the object of inducing the participation of German capital in industrial undertakings on the Congo.

Speaking on Saturday, at Chittagong, the Viceroy of India (Lord Elgin) referred to the great possibilities in the future for the Assam-Bengal Railway. It would, he said, be a fortunate thing if it repaid the great outlay expended upon it; but in years to come it might possibly form a link connecting India and Burma by land.

The details respecting the Burmah Yunnan and Yangtze Railway survey are now being rapidly completed. The project has hung fire for many years, but latterly there have been indications that it is now being very earnestly taken in hand. Two surveying parties are to be engaged in the work, it is stated—one from the Burmah end and one from the Yangtze end.

A telegram from Peking states that the Chinese Empress has promised the contract for the Tientsin-Chiu-kiang Railway to an Anglo-German syndicate, represented by Herr Carlowitz and the Deutsche Asiatische Bank, and by the Hong Kong and Shanghai Bank and Messrs. Jardine, Mathieson, and Co. It is stated that there is some difficulty in abrogating the contract previously granted to Yung Wing, as he refuses to return the seal.

The *Rio News* says:—"A contract was signed at the Brazilian Consulate in Paris, on October 14th, between Dr. Muniz Freire and the Dyle et Bacalan Company, preliminary to the organisation of a company for the completion of the Sul do Espirito Santo Railway. The completed works will be taken over at a valuation of 13,500,000*fr.*, and the company obliges itself to complete the road and provide funds for the same to an aggregate not to exceed 12,000,000*fr.*"

Messrs. John Collinson and Co., 8, Great Winchester-street, E.C., in reference to the Mersina Tarsus and Adana Railway Company first mortgage bonds of 100*l.* and 25*l.* each, notify that they are authorised to pay, on behalf of the Mersina Railway Committee, a dividend of 2*l.* 17*s.* 6*d.*, less income-tax, on the committee's certificates for each first mortgage bond of 100*l.*, and 7*s.* 2*d.*, less income-tax, on the committee's certificates for each first mortgage bond of 25*l.*

The Zurich correspondent of the *Times* writes:—"The sittings of the Berne-Lausanne Court of Arbitration on the Delagoa Bay Railway are still in abeyance. A session which was fixed by the President for July last was again deferred till August, and has not yet taken place, this delay being, as already reported, due to

the serious illness of Professor Hensler, of Basle, one of the arbitrators. At present the medical report announces that he is making very slow progress towards recovery, and that it is hardly to be hoped that he can resume his duties in the Court of Arbitration before December or January next."

**The Chatham and South Eastern Railways.**—The Exchange Telegraph Company is authorised by Mr. William Forbes to deny the rumours that matters are not working at all smoothly between the South Eastern and Chatham railways, for the reason that the officials of the latter consider that they are being required to make way for the officials of the former; and that the alterations now being made on the train services, particularly the Continental, are having the effect of transferring business from Victoria to Charing-cross is absolutely incorrect. Mr. Forbes states that the officers of both the amalgamated companies are working in the most perfect accord, and that he has the most pleasant of relations with Mr. Willis, who has shown a most generous and broad-minded spirit in dealing with all Mr. Forbes's suggestions both as to staff and management.

**Great Eastern Railway.**—A meeting of the preference stockholders will be held on the 7th prox., at which meeting drafts of the following Bills proposed to be introduced into Parliament in the session of 1899, under the short titles of "Great Eastern Railway (General Powers)," "Midland Railway;" and also a draft of the following order, for which application has been made to the Light Railway Commissioners under the provisions of "The Light Railways Act, 1896," intitled—" (Draft) order authorising the construction of a light railway between Kelvedon and River Blackwater, in the county of Essex," will be submitted for approval. It is further notified that at the said meeting the directors of the company will submit for approval a statement of proposed expenditure on capital account, showing the work and objects to be accomplished, the estimated sum required, and the means by which the money is to be raised.

**French Railway Earnings.**—The gross receipts of the railways of France in the first half of 1898 amounted to 25,353,000*l.*, to which the six great companies contributed 24,309,000*l.* and the State lines 1,044,000*l.*, the former showing an increase of 1,039,000*l.*, and the latter 26,000*l.* Of the total increase, the first quarter contributed 360,000*l.*, and the second quarter 679,000*l.* The increase on the Paris Lyons and Mediterranean was 463,000*l.*, on the Southern of France 138,000*l.*, on the Western of France 134,000*l.*, on the Northern of France 126,000*l.*, on the Orleans 76,000*l.*, and on the Eastern of France 66,000*l.* The length of new line opened in the twelve months ended June 30th, 1898, was 223 miles, making the total length of line in operation on the date named 23,417 miles. Of the new lines opened in 1897-98 the Southern of France accounted for 111 miles, the Paris Lyons and Mediterranean for 56 miles, the Western of France for 42 miles, and the State lines for 14 miles.

**Proposed Joint Dock for Hull.**—It is understood that the Hull and Barnsley board have given their sanction to the proposal that the North Eastern Railway Company shall advance the money required for the construction of the new deep-water dock at Hull, which is to be the joint property of the two companies. The rate of interest agreed upon is 3½ per cent. In the draft agreement published last March it will be remembered that it was proposed that the required capital should be subscribed in equal shares by the two companies, and in the event of the Hull and Barnsley being unable to raise their proportion, the North Eastern should advance the money, to bear interest at 4 per cent. Thus it will be seen that the agreement to fix the interest at 3½ per cent. is an important modification of the original proposal. It is further understood that other details following on the lines of the draft scheme have been decided upon, with a view to their embodiment in the Bill, which will be deposited in Parliament in the ensuing session.

**The Railways of Queensland.**—The report of the Queensland Commissioner for Railways for the year ending June 30th, 1898, shows total receipts of 1,215,811*l.*, an increase of 36,538*l.* over those of the preceding year. Passenger traffic receipts increased by 20,000*l.*, and goods traffic by 18,000*l.*, but live stock was less by 21,000*l.* The expenses were 686,066*l.*, an increase of 1,920*l.*, and the net revenue was thus 529,745*l.*, an increase of 34,618*l.* Allowing interest at 4 per cent. on the total capital, there was thus a deficiency of 214,420*l.* It is pointed out, however, that if the charge had been confined to the expenditure on open lines the deficiency in meeting interest for the year 1897-8 would have been 192,506*l.*, the amount which the general taxpayers of the colony have to make good from consolidated revenue. The total railway capital expenditure has been 18,604,122*l.*, of which 574,119*l.* was used during the year. The railways of the colony aggregate 2,635 miles, of which 120 were opened during the past twelve months.

## METROPOLITAN RAILWAY CARRIAGE AND WAGON COMPANY, Limited.

SALTLEY WORKS, BIRMINGHAM.

Successors to Messrs. Joseph Wright and Sons.

MANUFACTURERS OF RAILWAY CARRIAGES, TRAMWAY CARS WAGONS, and RAILWAY IRONWORK of every description. Railway Carriages and Wagons built for cash, or upon deferred payments extending over a period of from three to ten years. A large number of Coal, Ironstone, Ballast, and other wagons to be let on hire.

Manufactory and Chief Offices—Saltley Works, Birmingham.

## WEST AUSTRALIAN HARDWOODS.

# KARRI & JARRAH

FOR

SLEEPERS, STAIR TREADS, BRIDGES, PILES, PLATFORMS, CHAIR KEYS.

REGISTERED TRADE MARKS:—

LOCO: CASTINGS, WHEEL CENTRES & HORN-BLOCKS.

# BLAENAVON COLD BLAST PIG IRON

(MADE WITH THE CELEBRATED BLAENAVON CHARCOAL COAL).

- No. 1 Foundry.**—A Dark, Grey, Soft Iron, used for Castings, where toughness and strength are required, such as Toothed Wheels for Agricultural, Cotton and other Machinery; also by various Governments, for Guns and other superior work.
- No. 2 Foundry.**—A more Open Quality, used for similar purposes, and largely by nail makers.
- No. 3 Foundry.**—An Open Grain, Harder Iron; used for both Foundry and Forge; it has a high transverse strength in Castings, but not so tough as the No. 1 and No. 2; gives a strong fibre in wrought iron.
- No. 4 Grey Forge.**—An Open, Soft Iron; possesses great strength; suitable for toughening and tempering harder qualities; it is a very superior Forge Iron.
- No. 5 Common Forge.**—A Harder, Finer Grain, very Strong Iron; suitable for Heavy Machinery, such as Shafts, Large Wheels, and also for Steam and Blowing Cylinders, Guides, Slides, &c., as well as for Forge purposes in Cable Bolts, Boiler Plate, and B.B. Merchant Bars.
- No. 6 Strong Forge.**—A still harder and Closer quality used for Mill Rolls and for bringing up the strength of weaker Forge Irons.

**MOTTLED.**—Used for Chilled Rolls in tempering; and for other similar purpose

\* These qualities have a high tensile strength in wrought iron, and are used for bringing up weaker iron to stand the Government tests.

Extract from Report made by the Officers of H.M. Government to the Royal Arsenal on the strength of various descriptions of Iron, showing the general average of a number of Specimens prepared and tested from fifty-seven samples and also from five samples of Blaenavon Iron.—Parliamentary Paper No. 4971, Session 1858.

## GREAT EASTERN RAILWAY COMPANY.

CONTRACT for HYDRAULIC APPLIANCES and POWER COMPOUND SURFACE CONDENSING ENGINES.  
ACCUMULATORS.  
TRAVELLING CRANES.  
WAREHOUSE CRANES.  
CAPSTANS.  
SNATCH HEADS.  
TANKS.  
PIPES, &c.

The Directors of this Company invite TENDERS for HYDRAULIC APPLIANCES and POWER for their Parkstone Quay.

The Drawings and Conditions of Contract may be seen at the Engineer's Office on or after the 21st instant, and copies of the Specification, Schedule of Quantities, and Form of Tender may be obtained from the Engineer on payment of Ten Guineas, which will be refunded on receipt of a bona fide Tender and the return of all documents.

Sealed Tenders, addressed to the undersigned, and endorsed "Tender for Hydraulic Appliances and Power," must be sent to him at his office so as to arrive not later than 10.0 a.m. on Friday, the 9th day of December, through the General Post-office.

The Directors do not bind themselves to accept the lowest or any Tender.

By order,

W. H. PEPPERCORNE, Secretary.  
Liverpool-street Station, E.C., 19th November, 1898.

## GREAT EASTERN RAILWAY COMPANY.

NOTICE is hereby given, that, in pursuance of "The Great Eastern Railway (Finance) Act, 1887," a MEETING of the PREFERENCE STOCKHOLDERS of the Great Eastern Railway Company will be held at the City Terminus Hotel, Cannon-street, in the City of London, on WEDNESDAY, the 7th day of December, 1898, at Two o'clock in the Afternoon precisely, at which Meeting Drafts of the following Bills proposed to be introduced into Parliament in the Session of 1899, under the short titles of:—  
"Great Eastern Railway (General Powers)," "Midland Railway."

And also a Draft of the following Order, for which application has been made to the Light Railway Commissioners under the provisions of "The Light Railways Act, 1896," intituled:—  
"(Draft) Order authorising the construction of a Light Railway between Kelsvedon and River Blackwater in the County of Essex,"

will be submitted for approval.

And Notice is hereby further given, that at the said Meeting the Directors of the Company will submit for approval a Statement of proposed Expenditure on Capital Account, showing the work and objects to be accomplished, the estimated sum required, and the means by which the money is to be raised.

By order,

CLAUD J. HAMILTON, Chairman.  
W. H. PEPPERCORNE, Secretary.  
Liverpool-street Station, London, E.C.,  
17th November, 1898.

## GREAT EASTERN RAILWAY COMPANY.

NOTICE is hereby given, that the TRANSFER BOOKS of the Metropolitan Debenture and Rent-charge Stocks of the Company will be CLOSED on the Evening of Monday, the 28th November instant, and all parties registered at the time of such closing of the Transfer Books will be entitled to the Dividend payable on the 2nd January, 1899.

The Transfer Books of the above Stocks will reopen on Thursday, the 1st December next, with the exception of the B 5 per Cent. Debenture Stock, 1867, which will remain Closed until Wednesday, the 7th December next, in order that a Drawing for the purposes of the redemption of part thereof, notice of which has been given, may take place on the preceding day.

By order,

W. H. PEPPERCORNE, Secretary.  
Liverpool-street Terminus, London,  
15th November, 1898.

## THE GREAT INDIAN PENINSULA RAILWAY COMPANY.

NOTICE is hereby given, that the NINETY-EIGHTH HALF-YEARLY GENERAL MEETING of the Proprietors in this Company will be held at Winchester-house, Old Broad-street, London, on FRIDAY, the 16th December next, at 12.30 p.m. precisely, for the general business of the Company, pursuant to the Act.

The Registration Books will be Closed from Thursday, the 1st, to Saturday, the 31st, December proximo, both days inclusive, for the purpose of the Meeting, and for the preparation of the Half-yearly Interest Warrants, which will be forwarded to the Proprietors on the 31st day of December, 1898.

F. L. SOARE, Secretary.  
Company's Offices, Copthall-house, 48, Copthall-avenue, E.C., London, 7th November, 1898.

## NORTH EASTERN RAILWAY.

NOTICE is hereby given, that the BOOKS for the REGISTRATION of TRANSFERS of the Company's Debenture Stock will be CLOSED from the 5th to the 31st December next inclusive, preparatory to the payment of the Half-yearly Interest.

C. N. WILKINSON, Secretary.  
York, 18th November, 1898.

### AMERICAN RAILWAY SHARES AND BONDS.

THE ENGLISH ASSOCIATION of AMERICAN BOND and SHARE HOLDERS, Limited, Register Shares, Collect Dividends, and Cash Coupons. Shares may be registered either in owners' names or in that of the Association. In the former case dividends are collected by Powers of Attorney (forms supplied at the office), and on shares in Association's name on presentation of the shares certificates. The Association also issues its own certificates good to bearer or registerable, countersigned by the London and Westminster Bank against the deposit of the original shares. These certificates save great trouble to Executors as they can be distributed, avoiding the expense of sending the original shares and certified copies of Wills to America.

Particulars and Forms may be obtained at the Association's Offices, 51, Great Winchester-street, London, E.C.

## THE GREAT NORTHERN RAILWAY COMPANY.

### STORES CONTRACTS.

The Directors are prepared to receive TENDERS for the SUPPLY of NEW and the PURCHASE of OLD STORES for Twelve Months from 1st January next.

A list of the Contracts, and separate Forms of Tender for each Contract, may be obtained upon application to Mr. Weeks, the Stores Superintendent, Doncaster, by whom every information will be furnished.

The stores must be in every case equal in quality to the Company's sealed samples and patterns, which will be exhibited in the Stores Department, Doncaster, where they may be inspected on application to the Stores Superintendent, from Monday, the 21st November, to Monday, the 5th December, inclusive, between 10 a.m. and 4 p.m., and the Contractors are requested to call and examine them before tendering.

The Company's samples and patterns cannot be sent to Contractors for inspection.

Tenders, addressed to the Stores Committee, marked on the outside with a description of the Stores tendered for, must be sent to the Company's Offices at King's-cross, in the envelopes specially provided, so as to be received not later than 10 o'clock a.m. on Tuesday, the 6th December, 1898.

The Directors do not bind themselves to accept the lowest or any Tender.

WILLIAM LATTI, Secretary.

Secretary's Office,  
King's-cross Station, London, N.,  
19th November, 1898.

## BOMBAY BARODA and CENTRAL INDIA RAILWAY COMPANY.

NOTICE is hereby given, that the EIGHTY-SIXTH HALF-YEARLY GENERAL MEETING of the Bombay Baroda and Central India Railway Company will be held at the City Terminus Hotel, Cannon-street, E.C., on FRIDAY, the 9th day of December next, at One o'clock precisely—

- (1) To receive the Directors' Report and Accounts,
- (2) To declare a Dividend
- (3) To consider the advisability of amending the Rules and Regulations of the Provident Fund of the Company, and
- (4) To transact the general business of the Company.

The Transfer Books will be closed from the 19th to the 31st December, both days inclusive, and transfers will not be received at the Office while the Books are closed.

The Dividend Warrants will be forwarded on the 4th day of January to the Proprietors who are registered in the Company's books on the 17th day of December.

By order,

T. W. WOOD, Secretary.  
Offices: 45, Finsbury-circus, London, E.C.,  
11th November, 1898.

## SOUTH INDIAN RAILWAY COMPANY, Limited.

NOTICE is hereby given, that the next ORDINARY GENERAL MEETING of the South Indian Railway Company, Limited, will be held at the Offices of the Company, 55, Gracechurch-street, London, E.C., on TUESDAY, the 6th day of December, 1898, at Half-past One o'clock, for the purpose of receiving the Directors' Report and Statements of Accounts for the Half-year ended 30th June, 1898, and for the transaction of the ordinary general business of the Company.

The Transfer Books will be Closed from Saturday, the 17th, to Saturday, the 31st day of December, both days inclusive, for the preparation of the Half-yearly Warrants.

Transfers will not be received at the Office while the Books remain closed.

The Warrants payable on and after the 2nd January next will be forwarded to the Proprietors on the 31st December.

By order,

HENRY W. NOTMAN, Managing Director.  
Company's Offices,  
55, Gracechurch-street, London, E.C.,  
November 8th, 1898.

## THE INDIAN MIDLAND RAILWAY COMPANY, Limited.

NOTICE is hereby given, that the TWENTY-SIXTH ORDINARY HALF-YEARLY GENERAL MEETING of the Proprietors in this Company will be held at Winchester-house (Hall No. 174), 50, Old Broad-street, London, on FRIDAY, the 16th December next, at One o'clock p.m., to receive a Report from the Directors and the Accounts of the Company to the 30th June, 1898, and to transact the ordinary business of the Company.

R. A. FAYRER, Secretary.

Company's Offices,  
48, Copthall-avenue, E.C. London,  
15th November, 1898.

Footbridge at Cilfynydd; purchase of railway in parish of Ystrad-y-fodwg and agreements with reference thereto; additional lands at Cardiff and Ystrad-y-fodwg; extension of time for compulsory purchase of lands and for construction of authorised railways; provisions as to capital; amendment of Acts. *Solicitors*—Ingledew and Sons, Cardiff. *Agents*—Sherwood and Co., 7, Great George-street, Westminster.

#### TENTERDEN RAILWAY.

Construction of railways in the county of Kent; compulsory purchase of lands; abandonment of railways authorised by the Tenterden Railway Act, 1895; tolls; application of fund deposited in

respect of the Tenterden Railway Act, 1895; application of funds and additional capital; subscription by South Eastern Railway Company, and power to that company to take and hold shares, &c., in company; and to guarantee interest or dividend on the company's share and loan capital and the principal thereof; amendment of Companies Clauses Consolidation Act, 1845, as to auditors; payment of interest during construction; incorporation and amendment of Acts, and other purposes. *Solicitors*—Dollman and Pritchard, 39, King-street, Cheapside, E.C. *Agents*—R. W. Cooper and Sons, 5, Victoria-street, Westminster, S.W.

#### UXBRIDGE AND RICKMANSWORTH RAILWAY.

Abandonment of portion of authorised railway, and construction of new or deviation railways; purchase of lands and easements; rates and charges; extension of time for compulsory purchase of lands and completion of authorised railways; application of capital; running powers; agreements with Great Western Railway Company; amendment of Acts. *Solicitors*—Mellor, Smith and May, 1, Moorgate-place, London, E.C. *Agents*—W. and W. M. Bell, 27, Great George-street, Westminster, S.W.

#### VALE OF GLAMORGAN RAILWAY.

Additional capital, and in relation thereto, extending and applying to the company and the Barry Railway Company section 52 of the Barry Railway Act, 1893, and any agreement between them in pursuance thereof; confirming expenditure on temporary line; amendment or repeal of Acts. *Solicitors*—Downing and Handcock, Cardiff. *Agent*—John Charles Ball, 3, Victoria-street, Westminster.

#### WEST METROPOLITAN RAILWAY.

Incorporation of company; construction of railways in counties of London and Middlesex; power to deviate; powers as to roads over bridges, &c.; agreements with local authorities; compulsory purchase of lands; power to purchase parts only of properties; underpinning; rates, tolls, and charges; running powers over certain railways and facilities by companies owning those railways; working and other agreements with the Great Western and Metropolitan railway companies; traffic arrangements with and powers of subscription, &c., to those companies; payment of interest out of capital; incorporation and amendment of Acts. *Solicitors and Agents*—Burchell and Co., 5, The Sanctuary, Westminster.

#### WOODHOUSE AND CONISBROUGH RAILWAY.

Abandonment of railway; release of deposit; winding-up and dissolution of company; repeal or amendment of Act. *Solicitors*—Land and Foster, Halifax. *Agent*—John Charles Ball, 3, Victoria-street, Westminster.

## Law Intelligence.

### RAILWAY AND CANAL COMMISSION.

(Before Mr. Justice Wright, President; Sir F. Peel; and Viscount Cobham.)

#### LONDON TILBURY AND SOUTHEAST RAILWAY COMPANY v. GREAT EASTERN RAILWAY COMPANY.

This was an application by the London Tilbury and Southend Railway Company in respect to tolls on rent for improvements and widening of the Blackwall line. Applicants, in their statement of the case, set forth that by section 33 of the London Tilbury and Southend Railway Act, 1882, it was enacted that if at any time after the passing of the Act the company should desire, under their running powers, to convey over the London and Blackwall Railway, for the purpose of giving effect to any proposed agreement with the East and West India Dock Company, or to a railway known as No. 3, authorised by the above-named Act, an amount of traffic greater than that conveyed by them over the London and Blackwall Railway before the passing of the Act, and an amount which, in the opinion of the Great Eastern Company, could not be properly and safely conveyed without the construction of additional works, it should, on the application of the Tilbury Company or Great Eastern Company, be referred to arbitration, to determine whether the widening of the London and Blackwall Railway, or the construction of additional works, was required. It was also to be determined by the arbitration what additional payment should be made by the Tilbury to the Great Eastern Company, the additional payment to be either by way of toll or rent for the increased accommodation, and the arbitrator to fix the minimum amount to be paid. The London and Blackwall Railway Act, 1885, authorised the widening of certain parts of the line, and by section 47 of that Act such widenings or additional works were to be deemed to come within the foregoing section 33 of the Tilbury Company's Act, 1882, with all the provisions as to arbitration. The Blackwall Railway was widened and improved with the object of facilitating the traffic of the Tilbury Company, under their running powers, to Fenchurch-street, and differences arose between the two companies as to the amount of toll or rent to be paid. The London and Tilbury Company thereupon applied to the court to act as arbitrators, and the matter came before the Commissioners. Lord Justice Collins, who was then president, delivered the judgment, and questions of detail were referred to Sir Benjamin Baker, as arbitrator. Mr. CRIPPS, Q.C. (for the Great Eastern Company) said in the circumstances, the case having been previously before the court, and since before an arbitrator, he submitted that it was the right of the Great Eastern Company who were really the claimants, to open their case, their claim

involving some hundreds of thousands of pounds. While the questions between the companies were still under discussion, the Tilbury Company went to Parliament and obtained a new clause which altered the basis on which the claim of the Great Eastern Company could be formulated. The Great Eastern Company protested against the clause, and so far they were beaten. Therefore the onus was on both sides as regarded the history of the past, and as regarded the new clause. After some discussion, the PRESIDENT called upon Mr. Cripps to open for the Great Eastern, observing that the Commissioners were happy to think that in the circumstances no harm could result. Mr. CRIPPS having opened the case, Sir WILLIAM BIRT, general manager of the Great Eastern Railway Company, examined by Mr. Russell, said he had considered the new section of the Tilbury Act of 1898, and there was no doubt that the whole of the benefit of the widening of the line had been derived by the Tilbury. Tables had been prepared of the increased traffic over the widened portion of the railway, and of the tolls paid by the Tilbury Company from 1890 to 1897. These showed that trains other than Tilbury were two less per day than they were in 1890. The Tilbury trains showed an increase of twenty-two from 1890, the total number being 104 per day. His company had derived no benefit whatever from the construction of a fourth line in a monetary sense. Of course four lines offered greater facilities to all the companies with running powers than three did, but that benefit could not be reduced to a money value. It could not be shown that the Great Eastern Company had obtained one shilling from the widening of the Blackwall line. The company did not direct their attention to increasing the accommodation at Fenchurch-street for their own purposes. Their efforts were directed to the enlargement of Liverpool-street station, on which since 1882 they had spent a million and three-quarters of money. Fenchurch-street was a very good station, but it did not offer the conveniences afforded by Liverpool-street. The Great Eastern Company never at any time considered the widening of the Blackwall line for their own purposes. The cost of the fourth line which had been constructed had been fixed by the arbitrator at 402,000*l.*, and the interest on that at 3*l.* 11*s.* 8*d.* per cent. The Great Eastern Company did not seek to charge the Tilbury Company with anything higher than that per-centage. As against that the Tilbury Company were entitled to the set-off, consisting of the net advantage which the Great Eastern Company derived from any additional trains which they were enabled to run by reason of the construction of the fourth line. They were not entitled to more than that. The Great Eastern Company bore all the expenses of the line, maintenance, signalling, &c. The sum receivable from the Tilbury was not a net amount, for the working expenses were to be deducted before they could ascertain the net sum which would go into the pockets of the Great Eastern Company. The fourth line was not opened until 1896, and if the Great Eastern Company were saddled with anything in respect of an earlier date it would be something that had not gone into their pockets. But the company were already being very seriously saddled with interest on the expenditure of an additional 200,000*l.*, rendered necessary by Board of Trade requirements in consequence of the widening of the line. That was an expenditure that the Great Eastern Company had never contemplated. If they had considered only their own traffic the line would never have been widened, for all the trains which were now being run over the four sets of rails could, but for the requirements of the Tilbury Company, as well be run over three lines. The Great Eastern Company at present received no benefit whatever from the widened line, but it would be fair to set off against the payment by the Tilbury Company any net advantage which might in future be derived from it. But the evidence was that, compared with 1890, the Great Eastern Company were running fewer trains. Sir F. PEEL, referring to the new clause, observed that if it were read closely it would be found that they were not compelled to go back to 1890. The words were "additional to the payments," which meant something in addition to what was already to be paid in 1890. In cross-examination, Mr. BALFOUR BROWNE put to Sir William Birt the report of Sir Benjamin Baker, in which he stated that a widening of the line equivalent to that which had been effected had become necessary to accommodate the increasing traffic, and that the Great Eastern Company had obtained benefit in the form of relief from pressure and other inconveniences. The witness said that this was correct, if applied to certain hours of the day when suburban traffic was very great, but if it was applied to other hours of the day then he differed from the report. He had never denied that it was easier to work the traffic over four lines than over three, but the cost was one hundred times more than the worth of the convenience, the Great Eastern Company having to bear the burden of the interest on the outlay of 200,000*l.* rendered necessary by the widening of the line, which they did not want, and which was practically of no use. The

cost of Leman-street and Shadwell stations was included in the 200,000*l.*, but the coaling depôts were not included. Mr. BALFOUR BROWNE, Q.C., opened the case for the Tilbury Company and Mr. F. WHINNEY (also for the Tilbury Company) called Mr. A. L. STRIDE, managing director of the London Tilbury and Southend Railway Company, who in his evidence said all the increased traffic of that company was accommodated before the opening of the fourth line in 1896, and if the new line was of no use to the Great Eastern Company neither was it of any use to the Tilbury, seeing that they ran no more trains than they did before it was constructed. But if the fourth line facilitated traffic, as it did, then it was of more value to the Great Eastern and the other companies with running powers than it was to the Tilbury Company. He could not put a figure upon the value it was to the Great Eastern at that moment, but it was a great value. His own strong view was that the Tilbury's payment should be based on user of the new line, and that basis would work out, in a division of the 14,405*l.* interest on the 402,000*l.* expenditure, in the proportion of four-and-a-half parts by the Great Eastern and other companies to the Tilbury's one part. Cross-examined by Mr. CRIPPS, witness admitted that owing to the line at Purfleet having been flooded, the Tilbury Company had this year put on additional trains, which had not been taken off, and to that extent it was a misapprehension to say that the Tilbury could not have any increase after 1896. Mr. WHINNEY said the Tilbury Company had no further evidence to call, and suggested that, according to the view which might be held by the court, tables should be prepared and the matter sent back to the arbitrator, Sir Benjamin Baker. The PRESIDENT said the Commissioners felt that they could not properly delegate to Sir Benjamin Baker the decision of questions which they were sitting as arbitrators to consider; though if they found it necessary they reserved to themselves liberty to ask Sir Benjamin about any matter of fact. The Commissioners must themselves decide what the amount should be, and on that they were prepared to hear counsel. Mr. WHINNEY and Mr. CRIPPS having addressed the Commissioners, the PRESIDENT intimated that the court must take time to consider both the question of law and the question of fact. Judgment was accordingly reserved.

#### JUSTICIARY APPEAL COURT OF SCOTLAND.

(Before the Lord Justice-Clerk and Lords Trayner and Moncreiff.)

APPEAL—CALEDONIAN RAILWAY COMPANY v. PATERSON.

Judgment was given on the 17th inst. in the appeal by the Caledonian Railway Company against a conviction obtained in the Sheriff Court of Glasgow, whereby the railway company was convicted by Sheriff-Substitute Boyd of having contravened the Factory and Workshop Acts, in so far as they, being the occupiers of the Central Station Hotel, part of which was used for the washing and ironing of linen for the purpose of gain, these parts being a laundry within the meaning of the Act, did fail to affix in the laundry the prescribed abstract of the Factory and Workshop Acts. Lord Trayner, who gave the judgment, said it was not contended that the appellants carried on the laundry by way of trade or as a separate business, and he did not think it could be seriously maintained that the work done in the laundry in washing and ironing the household linen and the servants' clothing was done for the purpose of gain. That was just the kind of work done in every private establishment, large or small, in which there was a laundry. It would be unduly straining the law to say that it was done for the purpose of gain. As regards the work done for the guests and visitors to the house, it was not performed for any persons not resident in the hotel, but for the convenience of those resident in the house, and who expected such accommodation from the servants of the place in which, for the time being, they resided. That, in his opinion, could scarcely be termed carrying on a laundry for the purpose of gain. He thought the statutory provision intended to apply to a laundry to which any one could resort, and where any one for certain charges could have laundry work done. The conviction should, therefore, be quashed. The other Judges concurred, and expenses were given to the appellants.

#### QUEEN'S BENCH DIVISION.

(Before Mr. Justice Wills and Mr. Justice Channell.)

WHITWAM v. WREXHAM MOLD AND CONNAH'S QUAY RAILWAY COMPANY.

This was a summons (issued at the instance of the late Mr. Piercy, railway contractor) for leave to issue a writ of sequestration against the property of Mr. Herbert Gladstone, M.P., Sir J. W. Maclure, M.P., Mr. J. Fraser, Mr. R. Venables Kyrke, Sir H. B. Robertson, and Mr. W. Pollit, directors of the Wrexham Mold and Connah's Quay Railway Company, for

alleged wilful disobedience of a judgment of the court directing the company, among other things, to issue to the applicants certain ordinary and preference stocks. As against the four last directors the applicants asked in the alternative for writs of attachment. Mr. BALFOUR BROWNE, Q.C., in support of the summons, said the late Mr. Piercy entered into a contract to construct a railway at Wrexham. Before the work was completed Mr. Piercy died, and his trustees were authorised to complete the railway. Under his contract Mr. Piercy was to acquire the necessary land and construct the line, and his payments were to be made partly in cash and partly in shares. On the completion of the line the question as to the amount to be paid to Mr. Piercy's trustees was referred to Sir B. Baker, who directed the company to pay 23,000*l.* and to transfer to the trustees 6,993*l.* in ordinary fully paid-up stock, 1,733*l.* in perpetual 4 per cent. preference stock, and 4,826*l.* in C debenture stock. The directors had neither paid the money nor issued the stock, and he submitted that he was entitled to the writs for which he asked. He understood that the directors alleged that they could not issue the stock because the railway was in the hands of a receiver; but he did not think there was anything in that. Another point raised by the directors was that under the award the applicants were bound to transfer certain lands to the company. That was true. During the progress of the arbitration proceedings a plan was prepared showing what lands were to be conveyed and what lands were to be vested in the applicants, and by inadvertence the applicants were ordered to transfer the fee simple of a small piece of land which belonged to the Great Western Railway, and over which the applicants had only an easement.—Mr. JOSEPH WALTON, Q.C., on behalf of the directors, said there had been no wilful disobedience. Difficulty had arisen which his clients wished to get rid of.—Mr. Justice WILLS asked whether it was not possible for the parties to arrange terms.—In the result it was agreed that the applicants should pay the company the value of the land they were unable to convey, and the company should issue the stock within a month.

## American & Canadian Railways.

### MANITOBA AND NORTH WESTERN.

The following circular, marked "urgent," has been sent out to the English holders of the first mortgage bonds of the First Division of the Manitoba and North Western Railway Company of Canada:—

"25, Abchurch-lane, E.C., November 22, 1898.

"Dear Sir or Madam—As explained at the meeting of the bondholders of the above company, held at the Cannon-street Hotel on the 11th inst., the majority of the bonds have changed hands and are now held in Canada. As an action is now pending in the Canadian courts for foreclosure and sale of the railway, it seemed to those of the holders of bonds in this country who attended the meeting on the 11th inst. that, unless the remaining English bondholders speedily arrange to be officially represented at this juncture, they may find when too late that the property which has been mortgaged to them in conjunction with the other holders of bonds has been parted with for such a sum as will yield an inadequate—possibly an infinitesimal—return for the moneys loaned by them to the company. Under these circumstances, the bondholders who attended the meeting on the 11th inst. elected certain of their number to constitute a committee to watch over your interests and take such action at once and from time to time as, in their judgment, may appear desirable to protect them. The members of this committee now address you through their chairman, and beg that you will, in your own interest, give them your support, and enable them to act promptly. It is hoped that when the purchasers of the majority of the bonds have the facts placed before them they may see their way to offer at least the same terms to the minority as were obtained by the majority, and every effort will be made to bring about an amicable settlement. At the same time the committee desire to be empowered to enforce their rights, should they deem it in your interests to do so, by taking legal proceedings. If you are still a bondholder, will you communicate to us, by return of post if possible, the amount of your holding and the distinctive numbers of your bonds; but if you have already parted with your bonds, will you kindly communicate to us the name and address of the buyer, or of the banker or broker through whom they were sold?—Yours faithfully,

"RANDALL MERCER, Chairman of the Committee."

### RAILROAD NOTES.

We are officially informed that an agreement has been executed by the general manager of the Grand Trunk Railway Company and the vice-president of the Canadian Pacific Railway Company

covering the interchange of traffic between the two companies *via* North Bay, and that all local rates will be restored on the 28th inst. East-bound rates are being severely cut, especially on grain. The rate situation between the cities of Chicago and St. Paul has become demoralised. The Canadian Pacific, by its Soo line, following out the policy already announced of putting in the lowest rate found to exist on any competing road, announces a through rate based on a \$7 rate between St. Paul and Chicago. The Pennsylvania has decided not to meet the cut in passenger rates between New York and Pittsburgh made by the Baltimore and Ohio. The dispute among the North Western lines has excited much interest, but since last week but little news of a definite nature has been received.

Messrs. Speyer and Co., of New York, are offering \$75 per share for all Baltimore and Ohio preferred stock seeking a market. The proposed sale by the State of Maryland of its holdings of Baltimore and Ohio stock to the reorganisation committee is being questioned, and the actual transfer of the stock has been postponed pending the rendering of an opinion on the matter by the Attorney-General. It is said that Mr. William Salomon, of Messrs. Speyer and Co., will be the chairman of the forthcoming Baltimore and Ohio Company. He is already a member of the voting trust nominated under the reorganisation plan.

The Union Pacific Denver and Gulf system has been sold to the reorganisation committee for the sum of \$9,250,000, who will transfer it to a new company entitled the Colorado and Southern on January 1st. Mr. Frank Trumbull, the present receiver and general manager of the property, will most likely be elected president of the new corporation. The common and first and second preferred stocks of the new Colorado and Southern Railway Company have been admitted to the unlisted department of the New York Stock Exchange, to succeed the Union Pacific Denver and Gulf securities.

The Baltimore and Ohio report for the year ended June 30th shows:—Gross income, \$27,723,000—increase, \$2,141,000; net earnings, \$7,447,000—increase, \$1,877,000; other income, \$1,017,000—decrease, \$23,000; from which are deducted the net earnings of the Washington branch, \$127,000—increase, \$111,000; leaving an available income of \$8,337,000—increase, \$1,743,000; total fixed charges, \$8,147,000—increase, \$376,000; leaving a surplus of \$190,000, against a deficit of \$1,117,000 last year.

Negotiations are pending between the Northern Pacific, the Union Pacific, and the Oregon Railroad and Navigation companies relative to the allotment of territory. The Northern Pacific wanted to build a cut-off—as cabled some days ago—from Missoula (Montana) to Washington, but the Oregon Navigation Company opposed the project, claiming that it was an invasion of its territory.

The governors of the New York Stock Exchange have granted the application to list \$1,777,000 of Northern Pacific prior lien bonds, of \$754,000 Lake Shore and Michigan Southern 3½ per cent. new gold bonds, and of \$10,000,000 Southern Pacific of California 5 per cent. bonds of 1905 and 1937, which reduces the issue of the Southern Pacific consolidated 5 per cent. gold bonds of 1937 accordingly.

Vice-President Watt of the San Francisco and San Joaquin Valley Railroad says that the Atchison Topeka and Santa Fé will probably secure the required trackage rights over the Southern Pacific Railroad, so that it would not be necessary to build the Bakersfield line.

Application has been made to the governors of the New York Stock Exchange to list \$754,000 of 3½ per cent. gold bonds of 1907 of the Lake Shore and Michigan Southern Railroad Company.

Last week's east-bound all-rail freight tonnage from Chicago amounted to 95,000 tons, against 48,000 in the corresponding week last year. The traffic just now is almost unprecedentedly high.

Chairman Walker, of the Atchison Topeka and Santa Fé, denies that any trackage agreement has as yet been made with the Southern Pacific Company.

It is reported that the Kansas City Pittsburgh and Gulf's negotiations for the acquisition of the Chicago and Alton have fallen through.

**LATEST EARNINGS.**

Third week of November.—Chicago Milwaukee and St. Paul, \$839,000—increase, \$69,000.

Second week of November.—Chesapeake and Ohio, \$220,000—decrease, \$21,000; Chicago Great Western, \$112,000—increase, \$3,000; Missouri Kansas and Texas, \$301,000—decrease, \$58,000; Missouri Pacific, \$573,000—increase, \$15,000; St. Louis South Western, \$146,000—increase, \$9,000; Wabash, \$285,000—increase, \$30,000; Louisville and Nashville, \$491,000—increase, \$43,000; Mexican Central, \$273,000—increase, \$35,000; St. Louis and San Francisco, \$162,000—increase, \$19,000; Cleveland Cincinnati Chicago and St. Louis, \$272,000—decrease, \$7,000; Norfolk and Western, \$243,000—increase, \$9,000; Oregon Railroad and Navigation, \$175,000—increase, \$18,000; Southern Railway, \$542,000—increase, \$66,000; Baltimore and Ohio South Western, \$148,000—increase, \$24,000. The gross earnings of thirty-five roads in the second week of November show a decrease of 1.48 per cent.

Month of October.—Southern Railway, gross, \$2,259,000—increase, \$189,000; net, \$827,000—increase, \$67,000. Chicago and North Western, gross, \$3,677,000—increase, \$50,000.

Month of September.—Baltimore and Ohio, gross, \$2,536,000—increase, \$103,000; net, \$732,000—increase, \$37,000. Calgary and Edmonton, net, \$5,767—decrease, \$9,967. Qu'Appelle Long Lake and Saskatchewan, net loss \$3,323, compared with a profit of \$126. During the month of September 133 roads had gross earnings of \$86,820,772, an increase of \$1,796,448, or 2.11 per cent., and net earnings of \$32,121,979, an increase of \$1,225,646, or 3.96 per cent.

**General News.****DOVER HARBOUR IMPROVEMENTS.**

With regard to the difficulties which have been experienced recently at Dover owing to the delay in extending the structure of the Admiralty Pier, Captain A. Pierre, the chief inspector of the Belgian mail packet service at Ostend, and M. C. Verbrugghe, of Brussels, director of the administration controlling the railways and marine services, state that the Belgian service has suffered very great inconvenience through the heavy swell at Dover, but the authorities there have promised speedy attention to the evil, which will most likely be remedied by the construction of a landing at the new East Pier for temporary use till the Admiralty Pier can be extended. If they are able to use the east side of the east jetty, Captain Pierre states that the steamers will be able, in almost all cases of bad weather, to land their passengers and mails in quiet water. These improvements are to be made with all possible speed, but while they are being carried out it will be a great advantage to the service if they can run to another port in cases of heavy south-westerly gales, when Dover is difficult to approach. But there is no other port to which they can go. If they get permission from the South Eastern Railway Company, they can go to Folkestone, but even then he would not think of sending the boats there at certain states of the tide or at night, owing to the risk of mishap. Until better accommodation is provided, their captains will return to Ostend with the mails and passengers, or lie in the Downs, if at any time it is found inadvisable to attempt to enter Dover Harbour. M. Verbrugghe adds that the Belgian Government has no idea of leaving Dover for another port. In fact, they could not, as it is the nearest point to Ostend.

**NITRATE NOTES.**

A good many readers of THE RAILWAY TIMES will remember how, whenever Mr. Herbert Allen threatened the Nitrate Railways directors with a requisition for a general meeting for certain specified objects, the board thwarted him by promptly calling a meeting for some totally different purpose. But the board of the Great Boulder Proprietary Gold Mines, Limited (which includes an ex-director of the Nitrate Railways Company and two other of the late "Colonel" North's pals), have gone one better than the old Nitrate Railways board, judging from the following announcement which appeared in the *Times* and other daily papers of Monday last:—

"In conformity with the requirements of the articles of association, the Great Boulder Shareholders' Provisional Committee, before 1 p.m. on Saturday, tendered at the company's office a requisition signed by 400 shareholders, holding in the aggregate about 200,000 shares, calling upon the directors to convene an extraordinary general meeting of the company for certain specific objects. The secretary of the company declined to receive the requisition. In consequence of this refusal the committee subsequently met and resolved that steps be taken forthwith to give effect to the wishes of the shareholders and to secure the calling of the desired meeting without delay."

Needless to say, these shuffling tactics have been severely condemned in the columns of the independent financial papers. They have, however, availed the directors nothing, for that body

soon realised their blunder, climbed down with agility, and received the requisition on Tuesday last.

The following estimate of the Nitrate Railways Company's working for the current year should not be far wide of the mark. In working expenses allowance has been made for the longer haul of some of the traffic this year, already explained in these columns:—

	1897.	1898.
Down traffic .....	Qts. 12,600,000	Qts. 13,500,000
Up traffic .....	3,200,000	3,500,000
<b>Total .....</b>	<b>Qts. 15,800,000</b>	<b>Qts. 17,000,000</b>
Gross receipts—Nitrate .....	£303,000	£338,000
" Coal .....	80,000	87,000
" General cargo & lugge. ....	26,000	30,000
" Passengers .....	29,000	32,000
" Sundries .....	5,000	5,000
<b>Total working expenses .....</b>	<b>52½ p.c. 232,900</b>	<b>50 p.c. 246,000</b>
<b>Net receipts .....</b>	<b>£211,000</b>	<b>£246,000</b>
Debt service .....	£131,000	£131,000
Inc.-tax, investigation, &c. ....	16,000	11,000
<b>Net profits .....</b>	<b>£64,000</b>	<b>£104,000</b>
Dividend, 3 p.c. ....	48,000	
<b>Unappropriated net profits—</b>	<b>£16,000</b>	
1895 .....	£13,000	
1896 .....	107,000	
<b>Balance forward, December 31st, 1897 ...</b>	<b>£136,000</b>	

On the basis of these figures the board next May will have at its disposal a net revenue balance of 240,000L., equal to nearly 15 per cent., or 30s. per share on the entire ordinary capital of 1,656,000L.

We are promised a washing of some of the Arauco Company's dirty linen in the courts very soon. It is no exaggeration to say that the inception and administration of this concern was one of the vilest "jobs" for which the late "Colonel" North and his crowd were responsible; and the revelations should be instructive, even if somewhat nauseating.

**ARGENTINE RAILWAY ITEMS.**

The *Review of the River Plate* of October 22nd says:—

Telegrams have been received from London announcing that Mr. F. W. Barrow has resigned the general managership of the Great Southern Railway, and has accepted the post as general manager of the Leopoldina Railway Syndicate in Brazil. The Great Southern Railway Company loses in Mr. Barrow a most capable manager and one whose foresight has done much for the prosperity of the line. As usual in such instances, there are any amount of candidates said to be in the field, and we have already heard the rumour of at least half-a-dozen local men being sure of the post. Amongst them are accountants, managers, and engineers. Nothing is yet known as to who the fortunate candidate will be, and so much interest is being shown in the case, that we feel inclined to start a coupon competition, giving a valuable prize (say a year's subscription to *The Review*) to the winner. By this time our contemporary will have received its RAILWAY TIMES, and seen that Mr. Barrow is to be succeeded by Mr. Frank Henderson, general manager of the Central Uruguay Railway of Montevideo. Mr. Henderson, in turn, will, we understand, be succeeded as general manager by one of the present officers of the Central Uruguay, but we are not at liberty at present to disclose the names of the two gentlemen from whom the selection will be made.

The work on the Neuquen extension of the Buenos Ayres Great Southern Railway is being pushed rapidly ahead. According to the latest mail advices over 1,500 men are working between Chelforo and Chinchinales stations. The line is open to public service to Choele-Choele, the rails reaching k. 429, and the telegraph k. 428. Four stations to the south of Choele-Choele are finished—viz., Chelforo, Chinchinales, Rio Negro, and Neuquen. The ironwork for the 260 m. bridge across the river Neuquen is on its way out. Only 127 k. remain for the conclusion of the works.

Good news for railway shareholders and managers. The National Railway Board disappears from this world on November 14th next at midnight; it will be accompanied in its retirement by the National Department of Engineers. In future these branches of the administration will be dependencies of the Ministry of Public Works.—*Review of the River Plate*.

The personalty of the late Mr. O. C. Waterfield, a director of the Buenos Ayres and Valparaiso Transandine Railway, and

several other companies, has been entered for probate at the amount of 106,300*l*.

Applications for light railways in the Province of Buenos Ayres continue to be made to the La Plata Government. Amongst the latest are Sr. Julio Gerling with about 3,000 kilometres, and another to Sres. J. Porritt and Co., who already hold one large concession.

The engineering staff of Messrs. Hawkshaw, Hayten, and Dobson, employed on the Buenos Ayres Port Works, will return to England at the end of the current year, as the works are now finished.

On January 28th, 1892, a spark from a locomotive of the Buenos Ayres Great Southern Railway caused a fire that destroyed about 300 hectares of wheat in the Ester colony. The judge sentenced the company to the payment of \$29,175, but on appeal the Civil Court has increased this to \$45,000.

Amongst the subjects to be discussed during the special session of the Argentine Congress are the following referring to railways:—Sale or rental of Government railways. Prolongation of the Argentine Western Railway to join up with the Villa Maria Rufino line. Prolongation of the Reconquista Railway to Resistencia. Construction of branch lines by the Argentine Great Western. *Ad referendum* contract with the Central Cordoba and Transandine Railway with respect to the guarantee question.

#### STOCK EXCHANGE VALUES.

The *Bankers' Magazine* gives the aggregate value of 325 representative securities on the 19th inst. as 3,206,000,000*l*., compared with 3,196,422,000*l*. a month earlier, being a rise of 9,578,000*l*. Our contemporary remarks:—"With the exception, perhaps, of the American market, business has remained at a low ebb, the many uncertainties surrounding foreign politics still tending to check all dealings on the part of the public. A small investment business, however, has taken place, and, speaking generally, the tendency of markets has been in the direction of a gradual recovery from the previous month's somewhat severe depression. At the time of our last valuation consols were especially depressed by political scares, and the recovery in that security is mainly responsible for the material increase shown under the head of British and Indian funds. Of other investment securities English railways have tended to improve, and there has been a recovery of about 2 per cent. in the stocks of Indian railway companies. Foreign Government securities have moved irregularly, and owing to a decline in the value of such large capitalisations as French Rentes, there is a net decline to note in that section of markets. Owing to a renewal of strong support from New York and the Continent, American railroad securities have been buoyant during the latter part of the month."

#### FOREIGN AND COLONIAL ITEMS.

An interesting article on the Uganda Railway appeared in the *Times* of Tuesday last.

The telegraph line from the coast to Uganda is now open to the public for a distance of over 300 miles into the interior. The railway is now open for a third of the way to Uganda.

Iskander Fehmy, for many years traffic manager of the Egyptian State Railways, has been appointed native administrator on the Egyptian Railways Board in the place of Boghos Nubar Pasha.

The accounts of the Bengal Central Railway Company, Limited, for the half-year ended June 30th last admit of a dividend of 11s. per cent., in addition to the guaranteed interest, making a distribution for the current half-year of 2*l*. 6s. per cent., subject to income-tax.

The St. Petersburg *Journal of Industry and Commerce* announces that the Ministry of Communications will lay before the Imperial Council a scheme for modifying the international railway goods transport convention. The modifications are intended to facilitate still further international goods traffic.

The Venezuela *Herald* reports the granting of a concession for an electric railway line, 70 kilometres (43½ miles) in length, to a French company. The line is to connect Cumana and Cumanaçao, and the electrical power is to be generated by the waterfalls of mountain streams. The company has sent engineers to Cumana to begin the survey.

The secretary of the Mashonaland Railway Company, Limited,

announces that a cablegram has been received from Salisbury, reporting that on the 19th instant an accident occurred on the railway 33 miles from Umtali. While rounding a curve at full speed the engine and some trucks were derailed and upset. The accident is stated to have been due to the disobedience of the driver.

According to the *Chilian Times*, the Arbitral Tribunal appointed to decide several questions arising out of the unfortunate transactions with the celebrated North and South American Construction Company has just pronounced judgment in favour of the Government in three cases, one of them representing a claim of \$40,704, another for \$2,032, and a third for 200,000*l*. The same tribunal has condemned the representatives of the company to pay to the Government two sums, one amounting to \$40,566, with interest at 6 per cent., and the other for \$120,000.

The Transvaal Volksraad is discussing the various offers made for issuing the projected State loan. One of these is from Messrs. Baerveldt and Heyblom for a loan of 2,500,000*l*., at 4 per cent., to be issued at 95 with 2½ per cent. commission, subject to ordinary conditions. A second is from Messrs. Fraumer and Co. for 1,000,000*l*., at 4 per cent. with 2½ per cent. commission, the applicants to have in addition the right to build the projected Lydenberg railway at 9,500*l*. per mile, and the proposed Rustenburg railway at 7,750*l*. per mile, the Government guaranteeing 3½ per cent. interest on the bonds with rights of expropriation.

## Money and Stock Markets.

The monthly settlement in Consols takes place on the 1st prox.; the fortnightly settlement in other Securities commences on the 28th inst.

#### CITY, FRIDAY EVENING.

The MONEY MARKET remains very quiet, with a continued tendency towards easier rates. No further reduction is looked for in the German Bank rate, and that has a reassuring effect on the market here, with the consequence that the outside rate for three months' bills has sunk to 3¼ per cent., or ¾ below our Bank Rate. The India Council to-day lent and renewed a large amount till about the middle of next month at 3 per cent. Gold was in good demand in the open market for Germany at 77s. 10½*d*. per ounce. Call money was plentiful at 2 per cent., and short fixtures were borrowed at 2½ per cent. The Bank Return issued yesterday shows that the imports of gold, together with the return of coin and notes from circulation, have added 819,000*l*. to the Reserve, which now stands at 23,015,000*l*; its proportion to the current liabilities has risen from 53½ to 54½ per cent. Revenue payments have caused an increase of 540,000*l*. in the public deposits, and the "other deposits" are 422,000*l*. higher. Since the return was made up 52,000*l*. on balance has left the Bank.

Subjoined is a comparison of the present position of the Bank of England, the Money Market, the prices of Consols, French Rentes, &c., with the position at the corresponding period of last year:—

	At Present.	Same Week last Year.
Coin and Bullion .....	£32,977,053	£32,395,667
Total Reserve .....	£23,015,053	£22,324,072
Proportion of Reserve to Liabilities...	54½ per cent.	49½ per cent.
Notes in Circulation .....	£26,761,960	£26,871,595
Bank Rate of Discount .....	4 per cent.	3 per cent.
Open Market ditto .....	3½ per cent.	3 per cent.
Consols (account) .....	111	113½
French Rentes (account) .....	102 <i>l</i> . 87 <i>c</i> .	103 <i>l</i> . 50 <i>c</i> .
Paris Cheque Exchange .....	25 <i>l</i> . 31½ <i>c</i> .	25 <i>l</i> . 20½ <i>c</i> .
New York 60 days ditto.....	\$481½	\$482½

Silver bars are now quoted at 27½*d*. per oz., being 3-16*d*. lower on the week. A year ago the price was 27½*d*.

Eastern exchanges are telegraphed as follows:—Bombay 1s. 3 15-16*d*.; Calcutta, 1s. 3 15-16*d*.; Hong Kong, 1s. 11 5-16*d*.; Shanghai, 2s. 8½*d*.; Singapore, 1s. 11 13-16*d*.

The premium on gold at Buenos Ayres remains unaltered at 123-50 per cent., making the paper dollar (nominally worth 4s. 2*d*.) now actually worth 1s. 9-30*d*. A year ago the premium was 176 per cent., and the value of the paper dollar 1s. 5-18*d*.

The Valparaiso 90-day exchange comes over to-day at 13½d., being 3-32d. lower on the week. A year ago it was 17 11-16d.

The Rio de Janeiro exchange on London is 8 17-32d., being ½d. higher on the week. A year ago it was 7 3-16d.

The Bankers' Clearing-house return for the week ending November 23rd, 1898, shows a total of 133,748,000*l.*, as compared with 128,513,000*l.* for the corresponding period last year.

The STOCK MARKETS continue in cheerful mood, and a further appreciable rise in prices, as a result of the week's fluctuations, has to be recorded. Consols are up ¼ on the prospects of cheaper money, and all other gilt-edged securities have moved up in sympathy. Foreign Government bonds show little or no change to speak of. As regards British Railway stocks, all the more active descriptions show an appreciable rise, a leading feature being the jump of 2 in Districts on exaggerated expectations from talked-of extensions and the adoption of electric traction. Metropolitan, on the other hand, are lower on the prospect of a Parliamentary tussle with the Great Central, and certainly it is not to be wondered at that the latter company jibs at the onerous conditions imposed upon it under the Watkin régime. Yankee Rails continue to meet with a good deal of support, and show an almost general rise, whilst quite a boom has set in in Grand Trunks and Canadian Pacifics upon the settlement of their rate dispute. The only question is—whether peace has not come too late, to help the current half-year at all events. In the Foreign Railway market one of the features has been the further rise in Manila debentures, which were dealt in to-day as high as 46—a nice little profit for those who acted upon the advice given in this column to buy them when they were under 20. In the event of American annexation there is no reason why these bonds should not see par before another year runs out; they certainly would if the United States monetary standard were adopted, for at present half the company's remittances are lost in exchange owing to the depreciated Philippine dollar. Costa Rica shares are weak on a variety of unconfirmed, and probably unfounded rumours. At one time during the week they were as low as 2½. Central Bahia 6 per cent. debenture stock is up 5, Manila debentures 6, ditto A 4, Antofagasta debenture stock, Bahia Blanca first preferred, Mexican debenture stock, Italian bonds, and Western of Havana bonds 2 each; whilst Rio Claro Sao Paulo debenture stock has fallen 3, Ottoman 1888 debentures 2½, Campos and Carangola debentures 2½, Midland Uruguay debenture stock 2, and Antofagasta ordinary 2.

The principal movements *on the week*, so far as they relate to securities in which the readers of this journal are likely to be most interested, are set forth in the following table:—

Letters of allotment in connection with the issue of ordinary and preference shares of the Potteries Electric Traction Company, Limited, have been posted.

The death is announced of Mr. Charles Bellairs, of the firm of De la Bere, Bellairs, and Co., of the Stock Exchange.

Messrs. Thackeray and Co., of Cardiff, under date November 24th report as follows:—Barry Railway undivided, 262½ (unchanged); Barry preferred, 122 (unchanged); Barry deferred, 141 (unchanged); Cardiff preferred, 112½ (unchanged); Port Talbot, 9¼ (a rise of ¼); Rhondda and Swansea Bay, 4½ (a rise of ¼); Rhymney undivided, 260 (a fall of ¼); Rhymney preferred, 119 (unchanged); Rhymney deferred, 143½ (unchanged); Taff Vale, 74½ (unchanged); Vale of Glamorgan, 125½ (a fall of ½). The local rail market has continued fairly active, but nothing of any importance has taken place. The number of Bills to go before Committee are considerably less than of late years.

**London and South Western Railway.**—The London and South Western Railway Company have decided to issue an illustrated guide and official list of hotels, boarding-houses, sea-side and farm-house apartments throughout the extensive district covered by their system in the Thames Valley and in the South and West of England. Illustrations and short descriptive accounts of some of the most attractive places on the line will be given, and the information embodied in the official list of hotels, boarding-houses, and apartments will be precisely that required by holiday-makers and other travellers. The work will be published by Messrs. Spottiswoode and Co., of 54, Gracechurch-street, E.C., and the first edition, which is to be ready early in April next, will consist of 50,000 copies.

**Milford Haven and the Canadian Mails.**—On Saturday morning last the chairman and secretary of the Milford Docks Company, the chairman of the Canadian Steamship Company, the chairman of the Atlantic and Lake Superior Railway Company, and other gentlemen arrived at Milford Haven in their official capacity, and spent several hours inspecting the dock, together with the new landing-stage and railway station, which is in course of erection, and which is being pushed forward with all possible speed. It is reported that arrangements have been made for the first steamer to leave Milford Haven on the 7th proximo for Canada, and that a continued weekly service will be carried on between this port and Canada. A portion of the large building which is now used for the Fish Market is already locked off, and is being prepared as storehouses for Canadian produce to be conveyed by this line of steamers. Mr. Ward, the manager of the Milford Docks, expects to have the extensive buildings and sanitary accommodation ready by the stipulated time.

**EPPS'S COCOA.**—GRATEFUL AND COMFORTING.—“By a thorough knowledge of the natural laws which govern the operations of digestion and nutrition, and by a careful application of the fine properties of well-selected Cocoa, Mr. Epps has provided for our breakfast and supper a delicately flavoured beverage which may save us many heavy doctors' bills. It is by the judicious use of such articles of diet that a constitution may be gradually built up until strong enough to resist every tendency to disease. We may escape many a fatal shaft by keeping ourselves well fortified with pure blood and a properly nourished frame.”—*Civil Service Gazette*.—Made simply with boiling water or milk.—Sold only in packets and pound tins, by Grocers, labelled—“JAMES EPPS and Co., Ltd., Homoeopathic Chemists, London.”

## METROPOLITAN RAILWAY CARRIAGE AND WAGON COMPANY, Limited.

SALTLEY WORKS, BIRMINGHAM.

Successors to Messrs. Joseph Wright and Sons.

MANUFACTURERS OF RAILWAY CARRIAGES, TRAMWAY CARS, WAGONS, and RAILWAY IRONWORK of every description. Railway Carriages and Wagons built for cash, or upon deferred payments extending over a period of from three to ten years. A large number of Coal, Ironstone, Ballast, and other wagons to be let on hire.

Manufactory and Chief Offices—Saltley Works, Birmingham.

## The Railway Times.

Established 1837.

NOVEMBER 26, 1898.

## SOUTH WALES RAILWAY SCHEMES.

Up till a few days ago it was generally expected that a keen Parliamentary struggle between the various railway and dock interests in South Wales would again be witnessed in the 1899 session. In view of the great loss the shareholders have already suffered by the coal strike in their districts, a repetition of the heavy Parliamentary outlay of 1898 was not to be regarded complacently, and it is therefore satisfactory to know that so far as can be judged by the notices of Bills the important South Wales railways will not occupy a very prominent place in the legislation of next session. Last session it was estimated that amongst them these companies expended about 80,000*l.* upon the promoting of their own various schemes and opposing those of their neighbours. Even for ordinarily prosperous companies this is no fleabite, and certainly the avoidance of the prospect of another outlay on the same scale is, in view of the temporary adversity which has overtaken them, a result for which their stockholders will be duly grateful. The notices published are of an unusually humdrum character. The prospects of a fight turned mainly upon the course which the Taff Vale Company would adopt with regard to their ill-fated Windsor Dock scheme. Parliament has rejected this three times already, and though last session it was passed by the Commons, it was rejected by the House of Lords. The renewal of that project would, of course, have invited retaliatory measures from the Cardiff Railways Company, which, even without such encouragement, has shown itself in past sessions a formidable enough aggressor. Further, with its former persistence it was thought probable that the Taff Vale would again come forward and seek the repeal of clause 23 of the Barry Act of 1889, which would also have stirred up further retaliation from that quarter. It is true that the repeal has been refused by Parliament on four occasions already; but the championing of lost causes has for some time been the policy of the Taff Vale Company. Neither the Windsor Dock scheme nor the suggested repeal of clause 23, however, appear in the Taff Vale notice, and to this fact is mainly attributable the prospect of a quiet session for the South Wales railways. So conciliatory does the prospect look that it is suggested that amalgamation proposals are in the air, or at the very least that a truce in relation to new schemes has been come to by the Taff Vale, Rhymney, and Cardiff railways. Such a contingency is quite probable in the circumstances, but whether the more comprehensive amalgamation proposals hinted at will assume any definite shape is perhaps doubtful. However, a mutual understanding between these three undertakings in the nature of a "defensive alliance" would be something to be thankful for, and if the other companies could be induced to come in, much advantage would ensue and the way be paved for a possible all-round amalgamation. There is no doubt that all the companies in their common adversity are in a more reasonable frame of mind. On August 27th last we said:—"Now that by reason of the protracted coal strike these companies are placed in the position of being unable to pay any dividend to the ordinary stockholders, they will, perhaps, be in a more suitable frame of mind to entertain amalgamation proposals," and according to local gossip our forecast is already being borne out by events. For the most part the notices point to legislation of a merely formal character. This, at least,

## Notices to Readers.

The Offices of THE RAILWAY TIMES are at 2, Exeter-street, Strand, W.C.

Telegraphic Address:—RAILWAY TIMES, LONDON. Telephone No.:—1967 GERRARD.

All communications bearing upon literary matters should be addressed to the Editor.

Letters relating to Subscriptions, Advertisements, and other business matters should be addressed to the Publisher.

## TERMS OF SUBSCRIPTION.

Post-free to any address in the United Kingdom.

Three Months .....	£0 7 0
Six Months .....	0 13 0
Twelve Months .....	1 5 0

A special discount of 6*d.* on quarterly, 1*s.* on half-yearly, and 2*s.* on annual subscriptions will be allowed for payment in advance.

THE RAILWAY TIMES may be had at all bookstalls, and of any newsagent throughout the kingdom, at 6*d.* per copy.

Back numbers will be charged for as follows:—If dating back more than a year, 1*s.* per copy; if more than two years 2*s.* per copy.

## REMITTANCES.

Money Orders, Cheques, &c., should be drawn in favour of Lionel Bridgland, and should invariably be crossed "London and County Bank." Stamps will be taken in payment of small sums, say under 10*s.*

## EDITORIAL.

All communications must be authenticated with the name and address of the writer, which will be received in strict confidence.

## Forthcoming Meetings.

- Nov. 29—Rohilkund and Kumaon Railway (Half-yearly), 237, Gresham-house, E.C., at 12.  
 Nov. 30—Cheadle Railway (Debenture Stock Holders), 35, Old Jewry, E.C., at 12.  
 Nov. 30—Italian Company of Sicilian Railways (Annual), Rome.  
 Dec. 2—Uruguay Northern Railway (Annual), 35, New Broad-street, E.C., at 3.  
 Dec. 6—South Indian Railway (Half-yearly), 55, Gracechurch-street, E.C., at 1.30.  
 Dec. 7—Great Eastern Railway (Preference Stock Holders), City Terminus Hotel, at 2.  
 Dec. 9—Bombay Baroda and Central India Railway (Half-yearly), City Terminus Hotel, at 1.  
 Dec. 16—Indian Midland Railway (Half-yearly), Winchester House, at 1.

The French Council of Ministers yesterday completed its examination of the plans of railways to be constructed in Indo-China. It has decided to authorise an expenditure of 270,000,000*f.* for that purpose, and this sum will be raised by a loan to that amount, issued under the guarantee of the French Government. A line will be constructed connecting the already existing lines, and thus a long frontier, which will consolidate the unity of the French Indo-Chinese possessions, will be established. The section to which the Ministers devoted the most attention was that which will establish from Lao-Tai to the Province of Yunnan a means of access into China.

may be said of the Cardiff Railways and the Taff Vale Company. In addition to its ordinary notice, the Barry again comes forward in support of passenger steamers from Barry, a line of which it is thought is likely to be soon put on. The Port Talbot Railway and Docks Company seeks to force the hand of the Great Western Company so that the former can exercise running powers granted in 1894 over part of the Gawr branch of the Great Western Railway. It also proposes to ask for additional powers at Port Talbot. The Vale of Glamorgan Company intends to apply for power to raise money to construct a temporary line during the repair of its Porthkerry viaduct, but no reference is made to its absorption by the Barry Company, of which we have heard so much lately.

### A PLEA FOR UNIFORMITY.

The public, as is well known, has never shown any overpowering passion for the perusal of Blue-books, and it must be admitted that the Continuous Brakes Return, issued half-yearly by the Board of Trade, offers less than the usual small inducement to the general reader to dip into its pages. But the long string of instances quoted of delays to passenger trains through "failure of material" or "neglect of staff" in connection with the working of the brakes is, in view of the very monotony and "damnable reiteration," a matter which closely concerns the comfort of passengers, though not perhaps their safety. On the latter head, indeed, there is nothing to criticise. As nearly as possible 100 per cent. of the total passenger train mileage of the railways is run under the safeguard of continuous brake power, and the column in the return devoted to cases of failure to act when required in case of accident shows a uniform and satisfactory "nil" throughout. Similarly, we are glad to note the extremely small number of cases, only four in all, in which the brakes failed when called upon in ordinary circumstances. Although these instances are all reported as due to negligence of staff, they are absolutely insignificant when considered in relation to the enormous mileage of over 90 millions in the course of which they occurred. That they are so few is ample testimony to the rigid sense of duty for which railway employes are justly famed in connection with all that appertains to safety of train working. It is when we turn to the report of cases of delay to trains due to failure of the brakes in some technical detail that the showing of the return is not so good. Every instance of delay is not only an inconvenience to the travelling public; it means actual expense to the railways, and may have far-reaching effect upon the traffic working as a whole. As our lines become more crowded the importance of absolute regularity becomes enhanced, and every case of avoidable delay must be strictly scrutinised. We have no doubt that they are so by the officials concerned; but an analysis of the return under review would seem to point to the existence of a different standard upon different companies' systems, and it is to this that we would now direct attention. Taking the reports of twenty-two great companies, as quoted in the return dealing with the first six months of the current year, we find that twelve of these have adopted the Automatic Vacuum brake, while nine make use of the Westinghouse type, one company, the Glasgow and South Western, reporting separately with regard to both types as run on its lines. Let us say at once that we have no desire to compare the merits of these two brakes. That is a purely technical subject, which has before now been fought out in the columns of the engineering journals. The object of distinguishing between the two patterns will appear below. Abstracting, then, from the return, and calculating the number of train

miles run per instance of failure, the following results appear:—

#### I.—COMPANIES USING AUTO-VACUUM BRAKE.

Company.	Passenger train miles.	Instances of delay reported.	Miles run per instance of delay.
1.—Metropolitan .....	1,018,000	nil.	—
2.—Midland Railway .....	7,850,000	6	1,308,308
3.—Great Northern .....	5,235,000	5	1,047,135
4.—Cheshire Lines .....	956,000	2	478,412
5.—Great Central .....	1,892,000	4	474,012
6.—North London .....	929,000	2	464,669
7.—London & South Western	8,149,000	19	428,924
8.—London & North Western	10,718,000	25	428,725
9.—Highland .....	794,000	2	396,922
10.—Glasgow & South Western	2,004,000	6	333,951
11.—Lancs and Yorks .....	5,594,000	22	254,305
12.—South Eastern .....	3,252,000	19	171,172

Total ..... 60,947,000 ..... 145

Average mileage per delay, 420,324.

#### II.—COMPANIES USING WESTINGHOUSE BRAKE.

Company.	Passenger train miles.	Instances of delay reported.	Miles run per instance of delay.
1.—Caledonian .....	4,517,000	11	410,630
2.—London Brighton & S. C.	3,920,000	15	261,351
3.—Great Eastern .....	6,312,000	32	197,281
4.—Metropolitan District .....	784,000	5	156,905
5.—North British .....	4,298,000	32	134,330
6.—North Eastern .....	6,438,000	56	114,974
7.—Great North of Scotland ..	776,000	9	86,195
8.—London Chatham & Dover	1,978,000	31	63,836
9.—Tilbury and Southend ..	496,000	8	62,037
10.—Glasgow & South Western	31,000	5	6,252

Total ..... 30,020,000 ..... 196

Average mileage per delay, 153,194.

Thus it will be seen that on the basis of the Westinghouse companies cases of delay were proportionately more than twice as numerous as those occurring upon the systems of the "Automatic" companies. Still, avoiding any reference to the comparative merits of the brakes as such, let us see if we can find any clue to the reason for this state of affairs. Of the 145 failures of the "Automatic," only nine, or 6 per cent., occurred to vehicles when travelling off their own systems, while of the Westinghouse failures fifty-four, or 27 per cent., took place on "foreign" lines. The result is what might have been expected when two systems, opposite in many respects, are in parallel daily use. The lines with the smaller aggregate train mileage must send more vehicles on to foreign systems than they on their side will have to deal with in the course of exchange. With the greatest personal care, there cannot be avoided instances of misuse of appliances differing from those with which the staff of a railway have normally to deal. The case is, in fact, one of those in which the railway servant has to bear in mind two distinct sets of rules, one of which he has infrequent opportunity of putting into practice. This was clearly foreseen by the Board of Trade in its circular letter of August 30th, 1877, when the hope was expressed that, for the avoidance of such trouble, the companies would take steps for the adoption of a general and uniform system of brake power. The interchange of vehicles and the running of through trains over the lines of several connecting companies have increased to such an extent since that circular letter was addressed to the companies that the desirability of the course recommended has become emphasised. At present many companies find it necessary to equip rolling stock with fittings of both types, and in the case of the joint stock used for the Scotch traffic this is more particularly noticeable. Such a source of unnecessary expense would certainly have been obviated in America, where the standardising of railway appliances is a recognised axiom of railway management. But in such matters our Railway Companies' Association still lacks the moral force, to say nothing of the initiative, which characterises its sister body across the Atlantic.

### THE SECOND-CLASS AGAIN.

Our contemporary, the *Railway News*, in its issue of the 19th inst., essays what is obviously intended to be a crushing reply to our recent remarks on this subject. From the authoritative tone of the language employed it is not unreasonable to assume for the paragraph an inspired source. While welcoming in any shape the disposition to regard the subject as one worthy of the fullest discussion, we would, however, deprecate the narrowing of the question to the affairs of a single company. The North Western, whose figures alone are quoted by the *Railway News*, is, no doubt, the greatest of those companies which have thought fit to retain the second-class, and to adopt special measures to justify its action by unquestionably imposing gross results. At the same time, to adduce the North Western without reference to other and not insignificant companies which have supported its lead, is to bring into the argument something akin to the personal element, and to deprive the whole subject of some of the importance which attaches to what is a matter of national concern, irrespective of the success or failure of the policy under discussion. Such a matter is one which can only fairly be dealt with in the light of all the evidence which can be brought to bear, in order to eliminate as far as possible the effect of purely local and exceptional conditions. With these general remarks we would respectfully remind our contemporary that assertion is not argument; and assertion pure and simple is all that the *Railway News* has to offer as a contribution to the subject. The gross figures of second-class traffic are not in dispute, nor that a vast number of individuals have been induced by reduced fares to travel second instead of third. The point, and the whole point, is whether the excess of earnings over cost of the second-class is greater than the net profits which would have been earned had the passengers travelled third-class. For in this connection let it be remembered that an excess of 10 per cent. of second-class fares over third becomes 5 per cent. only when passenger duty is deducted. As to the abstraction from the first-class, the *Railway News* denies that the earnings per passenger of the latter have been reduced. At the same time, from the Board of Trade returns—the accuracy of which we assume is not impugned—there is a reduction in the first-class earnings per passenger, not only on the North Western but upon several other lines upon which the second-class policy is being pursued. And, further, to support our contention that this reduction was not due to any cause operating generally upon railway business, we quoted at the same time, three weeks ago, the figures of an equal number of non-second-class companies which showed that their first-class business was increasing. Unless the *Railway News* will take the figures, which are not ours but are official, and are presumably supplied by the companies themselves, and with these figures will prove that the second-class is earning at least as great a ratio of profit as the third, and is not drawing that profit from the first-class, we shall not admit that our interpretation of these figures is incorrect. And our interpretation left no doubt as to the non-profitable character of the second-class under such conditions as are in force to-day; we might add, indeed, under any conditions, the suburban traffic excepted.

### CANADIAN RATE-WAR SETTLEMENT.

At last the protracted rate war between the Grand Trunk and the Canadian Pacific has been settled, and it is to be hoped that all outstanding questions between them will be finally adjusted. It is officially announced that an agreement has been arrived at regarding the North Bay line of the

Grand Trunk, and that local rates will be restored. Since February last this strife has existed, and to what extent it has affected receipts it is impossible to say. It has been confined to passenger rates, and the point originally in dispute was the "differentials" charged by the Canadian Pacific from eastern points to the Pacific. This gradually developed into a cut in local rates practically instituted by the Canadian Pacific as a retaliatory measure. For a long time receipts appeared to be practically unaffected, for increases in traffic were shown by the Grand Trunk down to June last, and by the Canadian Pacific till still later. But allowing for the fact that there was a large exodus to Klondike, and also for the development of passenger traffic which would naturally follow from a recovery in trade and a growth in freight traffic, it is probable that the increases actually shown in the early part of the year were much smaller than they would have been under normal conditions. We know by the Grand Trunk figures for the first half-year that there was an increase in the number of passengers carried accompanied by a decline in receipts, and no doubt the same was the experience of its rival. Rate wars are much more easily started than stopped, and the damage done was probably a growing one. The attempts to bring about a settlement previously were futile, and were followed by recriminations which did not improve the situation. Stocks suffered severely with the decline in traffics and the uncertainty of the outlook whilst the rate war existed. This week, however, there has been a sharp recovery; but values are still below the best points of the year, and with the better traffics which may be expected now that the rate war is settled further recovery is possible. What the basis of settlement has been is not announced, but as the Canadian Pacific had to give way in the former fight with the American lines, it is probable that it has had also to yield the same terms to the Grand Trunk in the matter of the Pacific rates.

### THE REVOLT OF THE THIRD-CLASS PASSENGER.

A curious decision has been given this week, and one which if not reversed on appeal may have inconvenient results so far as railway administration is concerned. Last week a gentleman residing in Kensington was summoned by the Metropolitan Railway Company for travelling in a second-class carriage with a third-class ticket with intent to avoid payment of the difference in fares, in other words, with intent to defraud. The case came before the magistrate at the West London Court, and he reserved his decision in view of the unusual character of the defence put forward by defendant's counsel. This defence was that the course of riding in a superior class with a third-class ticket was adopted as a protest against the absence of cushions in the third-class. Defendant apparently maintained that the company were bound to supply cushions to their passengers of whatever class, and that his action was merely a form of protest against their absence from Metropolitan third-class carriages. The magistrate is therefore of opinion that he could not convict the defendant because there was no intention to defraud the company, and accordingly the summons was dismissed. On the application of counsel for the company, however, he agreed to state a case for the opinion of a superior court, so that more will probably be heard of the matter. Whether the passenger in question adopted a constitutional method of protest may very well be doubted, and the absurd contention set up that a railway company is bound to supply cushions for any class is only another outcome of the pampering of the third-class passenger. Obviously the case cannot be left in its present position, or numerous other travellers will be

adopting this convenient method of protest as an excuse for escaping payment of higher fares. Whether it is desirable that the third-class carriages of the Metropolitan and similar companies, where the traffic is of the most miscellaneous character, should contain cushions in preference to the ordinary wooden seats may well be open to discussion on sanitary grounds; and medical journals, which have occupied their valuable space with discussions as to the atmosphere on the Waterloo and City Railway, will perhaps take up the vexed question of microbes and bacilli in railway cushions. It is fairly obvious, from the point of view of ordinary cleanliness, that the wooden seats are much more easily kept clean than elaborately upholstered compartments, and they are further free from the depredations of a not inconsiderable body of travellers who indulge in the absorbing pastime of destroying railway property and making matters generally uncomfortable for their fellow-passengers. We shall await with interest the further outcome of this case.

### PASSING NOTES.

The traffic receipts for the week ending November 20th, on thirty-three of the principal lines of the United Kingdom, amounted to 1,670,263*l.*, which was earned on 19,253½ miles. For the corresponding week in 1897 the receipts of the same lines amounted to 1,590,724*l.*, with 19,034½ miles open. There was thus an increase of 79,539*l.* in the receipts, and an increase of 219 in the mileage. The aggregate receipts for twenty-one weeks to date amounted on the same thirty-three lines to 38,129,938*l.*, in comparison with 36,949,112*l.* for the corresponding period last year; increase, 1,180,826*l.*

A point of some importance to railway passengers was raised in an action tried before Judge Masterman in the Newark County-court on Saturday. Mr. William Curtis, a commercial traveller, had taken a week-end ticket from Newark to Woodhall Spa, but on arriving at Woodhall he decided to continue his journey to Horncastle by the same train. The booking clerk refused to issue a ticket, whereupon Mr. Curtis re-entered the train, and at Horncastle tendered excess fare of 5½*d.*, which was refused. The Great Northern Railway Company now claimed that the week-end ticket was forfeited, and sued the defendant for the amount of the ordinary fare. Judge Masterman said defendant had only used his excursion ticket for the stations named upon it, and tendered it with the excess fare to the collector. He, therefore, gave judgment for the passenger, with costs.

The case of Mr. James M'George, of Marloes-road, Kensington, who was summoned to the West London Police-court for travelling on the Metropolitan Railway in a second-class carriage with a third-class ticket with intent to avoid payment, was again before the court on Wednesday. It was urged that the defendant had travelled second-class as a protest on behalf of the public, because the company failed to provide cushions in the third-class carriages. The magistrate repeated his opinion that there was no intention to defraud, and, therefore, there could be no conviction, but agreed, on the application of the company's representative, to state a case for the consideration of the superior court.

The *Financial News* of Tuesday last, in leaded type, under big black-letter headings, loudly proclaims that Mr. Barrow has resigned the managership of the Buenos Ayres Great Southern to go on to the Leopoldina Railway. As a matter of fact Mr. Barrow's resignation was officially announced at the Buenos Ayres Great Southern meeting five weeks ago, and his appointment to the Leopoldina Railway Company was commented upon at length in these columns on October 29th, when, by the way, by a slip of the pen, the gentleman in question was referred to in one paragraph as Mr. Samuel Barrow instead of Mr. F. W. Barrow.

In pursuance of the provisions contained in a trust-deed, dated December 17th, 1891, for securing an issue of 5 per cent. perpetual mortgage debenture stock created by the Chendale Railway Company, Limited (formerly named the Chendale Railway Mineral

and Land Company, Limited), a meeting of the holders of such debenture stock will be held on the 30th inst. for the purpose of considering and, if thought fit, passing resolutions with reference to the creation of 12,500*l.* redeemable 4 per cent. mortgage debenture stock, having priority to the 5 per cent. stock, to be submitted to the meeting.

A meeting of the Maryport Harbour Commissioners last week considered an offer of a syndicate who propose to buy the harbour estate and spend 275,000*l.* on enlarging the docks and channel to meet the increasing needs of West Cumberland iron trade. The capital invested in the harbour amounts to 314,000*l.*, and the syndicate, it is understood, offer 255,000*l.*, half payable in cash and half in bonds in the new company. Par value is offered for some classes of bonds, and above market value for others. The Commissioners appointed a committee to take expert advice and report.

When that remarkable institution the Cheque Bank was being "reorganised" a couple of years or so ago, and its founders' and ordinary shares were being peddled out on the public by the aid of assiduous puffing in the *Financial News* and other organs of the press, we repeatedly warned our readers against being drawn into the trap which was being set for the unwary investor. This week we see that a special general meeting has been called to pass a resolution "cancelling capital which has been lost or is unrepresented by available assets to the extent of 6*s.* 6*d.* per share."

A special general meeting of the Whitechapel and Bow Railway Company was held on Thursday, when the chairman (Major Isaacs) stated that the terms of the agreement between this company, the Metropolitan District Railway Company, and the London Tilbury and Southend Railway Company with regard to the working, maintenance, and user of this company's line had now been settled and duly sealed by each of the three companies interested. A resolution approving the agreement was passed.

Sir F. T. Mappin, M.P., a director of the Midland Railway Company, writing to the secretary of the Sheffield Trades Council, says he does not think that there is any ground for the allegations that servants of his company have been dismissed because they were active trade unionists. He was in touch with the employés of two important departments, and with a few isolated exceptions the company and their servants are working amicably together.

The following paragraph from yesterday's *Daily News* reads uncommonly like a feeble joke, unless it be that our contemporary has been "spoofed":—

"It is stated on good authority that the general managers, at the quarterly meeting of the Railway Clearing-house, decided to grant the same concessions to religious bodies in regard to travelling to and fro to their annual conferences and congresses as they are accustomed to grant to theatrical companies and race committees."

The London and North Western and Midland railway companies have written to the chief constable of Northampton expressing the thanks of the respective directors for the ability and skill with which the police tracked down Tomlinson, who was convicted last week. The two companies also sent a sum of money to be distributed among the officers and men engaged in the case.

Mr. J. H. Gallimore, who for seven or eight years has represented the Great Western Railway Company at Southampton, and is now leaving that town for Gloucester, was entertained last week at a public dinner, presided over by the Mayor of Southampton, and presented with a service of plate and an illuminated address.

Mr. Victor Gerard, who for many years was Continental traffic manager of the London Brighton and South Coast Railway, has, in consequence of ill health, retired on a pension granted him by the directors in consideration of his long service. The board have not yet decided upon the selection of his successor.

At a meeting of the Swansen Corporation last week it was resolved to approach the Great Western Railway Company and urge that the main line of the Great Western Railway be diverted so as to run through the town of Swansea.

Mr. Maxwell, the station-master of the chief North British Railway station at Glasgow, has resigned his post, which is one of the best of its kind in Scotland, owing to ill health. He has been ordered to the Cape.

We learn that Mr. Henry Taylor, who for twenty-five years has successfully managed the London and North Western Railway Company's hotels and refreshment-rooms, has announced his intention of retiring.

At a meeting of the board of the London and South Western Railway, held on Thursday, Mr. Michael Williams, of Gnaton Hall, Plymouth, was elected a member of the board in succession to the late Mr. Mills.

The Board of Trade has confirmed the Bankfoot Light Railway Order, 1898, authorising the construction of a light railway in the county of Perth, between Strathord Railway Station and Bankfoot.

Mr. John Young, general manager of the Glasgow Corporation Tramways, has been selected by the committee of the London County Council as chief officer of the Council's tramway system.

Sir John Fowler, the eminent engineer, died on Sunday night at Bournemouth. He was in his eighty-second year. Sir John received his baronetcy for his share of the work of the Forth-bridge.

A new station will be opened by the Great Western Railway Company next spring between Slough and Taplow and will be "Burnham Beeches."

#### STORES CONTRACTS.

The Directors are prepared to receive TENDERS for the SUPPLY of NEW and the PURCHASE of OLD STORES for Twelve Months from 1st January next.

A List of the Contracts, and separate Forms of Tender for each Contract, may be obtained upon application to Mr. Weeks, the Stores Superintendent, Doncaster, by whom every information will be furnished.

The stores must be in every case equal in quality to the Company's sealed samples and patterns, which will be exhibited in the Stores Department, Doncaster, where they may be inspected on application to the Stores Superintendent, from Monday, the 21st November, to Monday, the 5th December, inclusive, between 10 a.m. and 4 p.m., and the Contractors are requested to call and examine them before tendering.

The Company's samples and patterns cannot be sent to Contractors for inspection.

Tenders, addressed to the Stores Committee, marked on the outside with a description of the Stores tendered for, must be sent to the Company's Offices at King's-cross, in the envelopes specially provided, so as to be received not later than 10 o'clock a.m. on Tuesday, the 6th December, 1898.

The Directors do not bind themselves to accept the lowest or any Tender.

WILLIAM LATTA, Secretary.  
Secretary's Office, King's-cross Station, London, N.,  
19th November, 1898.

### BOMBAY BARODA and CENTRAL INDIA RAILWAY COMPANY.

NOTICE is hereby given, that the EIGHTY-SIXTH HALF-YEARLY GENERAL MEETING of the Bombay Baroda and Central India Railway Company will be held at the City Terminus Hotel, Cannon-street, E.C., on FRIDAY, the 9th day of December next, at One o'clock precisely—

(1) To receive the Directors' Report and Accounts,  
(2) To declare a Dividend,  
(3) To consider the advisability of amending the Rules and Regulations of the Provident Fund of the Company, and

(4) To transact the general business of the Company.  
The Transfer Books will be closed from the 19th to the 31st December, both days inclusive, and transfers will not be received at the Office while the Books are closed.

The Dividend Warrants will be forwarded on the 4th day of January to the Proprietors who are registered in the Company's books on the 17th day of December.

By order, T. W. WOOD, Secretary.

Offices: 45, Finsbury-circus, London, E.C.,  
11th November, 1898.

### MADRAS RAILWAY COMPANY.

NOTICE is hereby given, that the FORTY-SIXTH HALF-YEARLY GENERAL MEETING of the Madras Railway Company will be held at the Offices of the Company, 61, New Broad-street, London, E.C., on TUESDAY, the 13th day of December next, at 1 o'clock precisely, in conformity with the terms of the Company's Deed of Settlement.

And Notice is hereby further given, that the Transfer Books of the Company will be closed from Thursday, the 1st day of December, to Saturday, the 31st of December next, both days inclusive, for the above purpose, and for making up the Interest Accounts to the 31st proximo.

The Interest Warrants will be forwarded on the 31st December to the Proprietors whose names are registered on the 1st proximo in the Books of the Company. Deeds of Transfer are not received at the offices of the Company while the Books are closed.

By order of the Board,  
JULIAN BYRNE, Secretary.

Company's Offices: 61, New Broad-street,  
London, E.C., 25th November, 1898.

IN PARLIAMENT.—SESSION 1899.

## GREAT WESTERN RAILWAY.

(Additional Powers to Company with reference to new Railways and alterations of existing Railways and bridges and other works, roads, foot-paths, and lands in the counties of Gloucester, Middlesex, Bucks, Worcester, Somerset, Berks, Devon, Warwick, London, Wilts, Salop, Denbigh, Glamorgan, Pembroke, Cornwall, Monmouth, and Carmarthen; Abandonment of Railways Nos. 1 and 2 authorised by the Great Western Railway (General Powers) Act, 1898; Powers to Company and London and North Western Railway Company as to bridge and lands in counties of Salop and Hereford; Provisions as to special constables; Repeal of provisions as to subscriptions to undertakings of Alexandra (Newport) Dock Company, and Waterford and Central Ireland Railway Company and other provisions as to capital; Exemption from private street work expenses; Transfer to and vesting in Company of undertaking of Golden Valley Railway Company; Additional Capital and application of funds; Amendment of Acts.)

NOTICE is hereby given, that application is intended to be made to Parliament in the ensuing Session by the Great Western Railway Company (hereinafter called "the Company") for an Act under the above name or short title for all or some of the following purposes, that is to say:—

[In this Notice any township or other place for which a separate Poor-rate is or can be made or for which a separate Overseer is or can be appointed is referred to as a parish, and the term "district," with respect to the administrative county of London, means any parish in Schedule A and any district in Schedule B of the Metropolitan Management Act, 1855, as amended by any subsequent Act.]

To empower the Company to make and maintain the Railways and deviations of Railways and works hereinafter mentioned, or some of them or some part or parts thereof, together with all necessary stations, sidings, approaches, roads, works, and conveniences connected therewith (that is to say):—

A Railway (No. 1) commencing in the parish and borough of Cheltenham, in the county of Gloucester, by a junction with the Cheltenham Branch Railway of the Company at the north-eastern end of the engine shed near the bridge carrying St. George's-road over the said Railway, and terminating in the parish of Church Honeybourne, in the rural district of Evesham, in the county of Worcester, by a junction with the Honeybourne and Stratford-upon-Avon Railway of the Company at a point 58 chains or thereabouts east of Honeybourne Station.

A Railway (No. 2) wholly in the said parish and borough of Cheltenham, commencing by a junction with the said Cheltenham Branch Railway at a point 6 chains or thereabouts from the termination of that Railway at Cheltenham, and terminating by a junction with the said intended Railway No. 1 at or near the southern end of Bloomsbury-place and ½ chain or thereabouts west of St. Mary's Cemetery.

A Railway (No. 3) wholly in the said parish of Church Honeybourne commencing by a junction with the said intended Railway No. 1 at or near a point on the Oxford Worcester and Wolverhampton Railway of the Company 63 chains or thereabouts south-east of Honeybourne Station and terminating by a junction with the said Honeybourne and Stratford-upon-Avon Railway at a point 40 chains or thereabouts east of the said station.

The said intended Railways Nos. 1, 2 and 3 will pass from through or into the parishes areas and places following or some of them, that is to say:—

The parish and borough of Cheltenham, the parishes of Prestbury, Southam and Brockhampton, Woodmancote, Bishop's Cleeve, Town-ship and Gotherington and the parishes of Great Washbourne, Prescott, Hailes, Didbrook, Buckland, and Stanley-Pontlarge, in the rural district of Winchcomb; and the parishes of Alderton, Winchcomb, Stanway, and Stanton and the parish of Saintbury, in the rural district of Peckworth and the parishes of Cow Honeybourne, Weston-sub-Edge, and Willersley, all in the county of Gloucester; and the parish of Broadway and the parish of Church Honeybourne, in the rural district of Evesham, in the county of Worcester.

A Railway (No. 4) commencing in the parish of Hillingdon West in the urban district of Uxbridge in the county of Middlesex by a junction with the Uxbridge branch railway of the Company at a point 34 chains or thereabouts south of the termination of that branch Railway at Uxbridge, and terminating in the parish of Harefield in the county of Middlesex by a junction with Railway (No. 1) authorised by the Great Western Railway (Additional Powers) Act, 1897, at or near a point on the western boundary of the field or enclosure numbered 108 on the 25-inch Ordnance map (1896 edition) of the said parish of Harefield 13 chains or thereabouts north of the south-west corner of the said field.

A Railway (No. 5) wholly in the parish of Harefield in the county of Middlesex, commencing by a junction with the intended Railway No. 4, at a point in the field numbered 100 on the 25-inch Ordnance map (1896 edition) of that parish, 1 chain or thereabouts east of a point on the western boundary of the said field, 64 chains or thereabouts north of the south-west corner of the said field, and terminating by a junction with Railway No. 1, authorised by the said Act of 1897, at a point in the field numbered 135 on the said Ordnance map, 12 chains or thereabouts east of the western boundary, and 6 chains or thereabouts north of the southern boundary of the said field.

The said intended Railways Nos. 4 and 5 will pass

from, through, or into the parishes, areas, and places following or some of them, that is to say, the parishes of Hillingdon West and Uxbridge, in the urban district of Uxbridge and the parishes of Hillingdon East and Harefield in the county of Middlesex, and the parish of Deunham in the county of Bucks.

To empower the Company to abandon the construction of Railways Nos. 1 and 2 authorised by the Great Western Railway (General Powers) Act, 1898.

A Railway (No. 6), wholly in the county of Warwick, commencing in the parish of Beasley, in the rural district of Stratford-upon-Avon, by a junction with the Company's Stratford-upon-Avon and Hatton Branch Railway, at a point thereon 38 chains or thereabouts south of the platforms at Beasley Station, and terminating in the parish of Wootton Wawen by a junction with the Company's Alcester Branch Railway at a point thereon 33 chains or thereabouts measured along that Branch Railway from the platforms of Beasley Station.

The said intended Railway (No. 6) will pass from, through, or into the parishes, areas, and places following, or some of them, that is to say:—The parish of Beasley, in the rural district of Stratford-upon-Avon, and the parishes of Aston Cantlow and Wootton Wawen.

A deviation (No. 1) wholly in the county of Somerset, of Railway (No. 2), authorised by the Great Western Railway (New Works) Act, 1898, commencing in the parish of Charlton Mackrell by a junction with that Railway at a point in the eastern boundary of the field No. 318 on the 25-inch Ordnance map (1887 edition) of the said parish, 1 chain or thereabouts north of the south-east corner of the said field, and terminating in the parish of Long Sutton, by a junction with the said authorised Railway, at a point in the field No. 75 on the 25-inch Ordnance map (1887 edition) of the said parish, 2 chains or thereabouts north of the south-west corner of that field.

A deviation (No. 2) wholly in the county of Somerset, of the said authorised Railway, commencing in the parish of High Ham by a junction with that Railway at a point in the field numbered 1163 on the 25-inch Ordnance map (1887 edition) of that parish, 2½ chains or thereabouts north of the southern corner of the said field, and terminating in the parish of Curry Rivel by a junction with the said Railway at or near the south-west corner of the field No. 86 on the 25-inch Ordnance map (1887 edition) of that parish.

The said intended deviations will pass from, through, or into the following parishes, areas, and places or some of them, that is to say the parishes of Charlton Mackrell, Somerton, Long Sutton, High Ham, Huish Episcopi, Langport, and Curry Rivel.

For the purposes of the said intended deviation (No. 2) it is proposed to acquire certain common or commonable lands known as Langport Common Moor and Langport Moor respectively, in the parish of Langport, of which it is estimated that six acres or thereabouts will be situate within the limits of deviation and one acre or thereabouts will be required to be taken.

To empower the Company to abandon so much of the said authorised Railway No. 2 as will be rendered unnecessary by the construction of the said intended deviations.

## Additional Lines of Rails.

To empower the Company, in the parish of Shrivernham, in the county of Berks, to lay down an additional line of rails on the level adjoining the existing line of rails at the crossing by the main line of railway of the Company of the road leading from Ashbury to Shrivernham, and known as Ashbury level crossing.

To empower the Company to execute the works and acquire the lands (which expression in this notice includes houses, buildings, mines, minerals, and easements in and over lands), and to exercise the powers following, that is to say:—

## Reconstruction of Viaduct.

The reconstruction in the parish of Buckland Monachorum, in the county of Devon, of the viaduct on the Company's Launceston Branch Railway known as Macpie Viaduct, and lying between points respectively about 6 chains and 11 chains north-west of the post on that Branch Railway indicating 9½ miles from Plymouth, and to empower the Company to enter upon, take, and use certain lands in the said parish lying on the south-western side of and adjoining the said Branch Railway and between points about 5 chains and 17 chains respectively south-east of the said post.

It is proposed to take for the purposes of the said intended reconstruction portions, not exceeding 1 acre in extent, of certain lands in the said parish, which are or are reputed to be common or commonable lands known as Roborough Down, and of which 2 acres and 10 perches or thereabouts are included within the limits of deviation.

## Widenings of Bridges.

The widening on the northern side of the bridge in the parishes of West Hendred and Ardington, in the county of Berks, which carries the main line of railway of the Company over the road situate about 8 chains east of the post on that Railway indicating 59 miles from Paddington.

The widening on the northern side of the bridge in the parish of Ardington, and in the parish of East Lockinge, in the rural district of Wantage, in the county of Berks, which carries the main line of railway of the Company over the Wilts and Berks Canal.

The widening on the northern side of the bridge in the parish of Peabworth, in the county of Gloucester, which carries the Honeybourne and Stratford-upon-Avon Railway of the Company over the road leading from Peabworth to Long Marston, at or near the post on that Railway indicating 103½ miles from Paddington.

The widening on the northern side of the bridge in the parish of Clifford Chambers, in the county of Gloucester, and in the parish of Milcote, in the rural district of Stratford-upon-Avon, in the county of Warwick, which carries the said Honeybourne and Stratford-upon-Avon Railway over the River Stour.

The widening on the northern side of the viaduct in the parish of Clifford Chambers, in the county of Gloucester, and in the parish of Old Stratford Within, in the borough of Stratford-upon-Avon, in the county of Warwick, which carries the said Honeybourne and Stratford-upon-Avon Railway over the River Avon.

The widening on the northern side of the bridge in the parish of Church Honeybourne, in the rural district of Evesham, in the county of Worcester, which carries the said Honeybourne and Stratford-upon-Avon Railway over the road leading from Honeybourne to Peabworth, 38 chains or thereabouts east of Honeybourne Station.

The widening on the northern side of the bridges in the parish of Claverdon, in the county of Warwick, which carry the Company's Stratford-upon-Avon and Hatton Branch over the roads respectively leading from Alcester to Warwick and from Langley to Warwick on either side of the mile post on that Railway, indicating 11½ miles from Paddington.

The widening on both sides of the bridge in the parish of Birmingham, in the city and county borough of Birmingham, in the county of Warwick, which carries the Company's Oxford and Birmingham Railway over the Warwick and Birmingham Canal.

The widening of the following bridges, which carry the Company's Birmingham, Wolverhampton, and Dudley Railway over the roads, streets, and canal hereinafter specified, all in the parish of Birmingham in the city and county borough of Birmingham in the county of Warwick, that is to say:—

Road, Street, or Canal.	Side of Bridge on which Widening is to be Made.
Great Charles-street .....	Both sides.
Lionel-street .....	Both sides.
Birmingham and Fazeley Canal...	Both sides.
Water-street .....	North-eastern side.
Henrietta-street .....	North-eastern side.

And in connection with the widening of the said bridge over Great Charles-street, to empower the Company to alter the level of the said street for a distance of 35 yards or thereabouts from the south-western side of the existing bridge.

## Lengthenings of Bridges.

The lengthening at both ends of the bridge in the parish of Birmingham, in the city and county borough of Birmingham, in the county of Warwick, which carries Golden Hillock-road over the Company's Oxford and Birmingham Railway at Small-heath Station.

The lengthening at the south-western end of the bridge in the said parish and city and county borough of Birmingham, which carries the Midland Railway over the said Oxford and Birmingham Railway.

The lengthening at the south-western end of the bridge in the parish of Stonehouse in the county of Gloucester which carries the road over the Company's Cheltenham and Great Western Union Railway at a point 16 chains or thereabouts south-east of the goods shed at Stonehouse Station.

## Roads, Footpaths, &amp;c.

In the parish and district of Paddington, in the county of London:—

To stop up and discontinue so much of South Wharf-road as lies between the junction therewith of London-street and a point 120 yards or thereabouts from that junction, and in lieu thereof to make and maintain a new road from the said point to a point in the boundary wall of the Company's premises 67 yards or thereabouts north-west of South Wharf-road, and to empower the Company to enter upon, take, and use certain lands in the said parish and district lying on the north-western side of and adjoining the said portion of South Wharf-road.

In the parish and urban district of Ealing, in the county of Middlesex:—

To alter and divert so much of Drayton-green-lane as lies between its junction with Argyle-road and a point in that lane 4 chains or thereabouts north of the foot-bridge over the main line of Railway of the Company which connects that lane with William's-road.

In the parish of Swindon, in the urban district of Swindon New Town, in the county of Wilts:—

To alter and divert so much of the road known as Station-road as lies between a point 2 chains or thereabouts east of the bridge carrying the main line of Railway of the company over the road leading from the Queen's Arms Hotel to Rodbourne and a point in Station-road 4 chains or thereabouts westward of the junction of that road with Cricklade-road.

In the parish of Little Somerford in the county of Wilts:—

To stop up and discontinue so much of the road leading from King's Mead Mill to Great Somerford, which joins the road leading from Little Somerford to Great Somerford at or near the cemetery at Little Somerford as lies between points respectively about 4½ chains and 9½ chains north-west of the said cemetery, and in lieu thereof to make and maintain a new road between the last mentioned point and a point in the said road leading from Little Somerford to Great Somerford 4 chains or thereabouts north of the said cemetery.

In the parish and city and county borough of Bristol, in the county of Gloucester:—

To alter and divert so much of the road leading from Hotwells-road to the Butts as lies between the junction therewith of Lower Lamb-street and a point in the said road 2 chains or thereabouts west of the Drill Hall.

In the parish of Westerleigh, in the county of Gloucester:—

To alter and divert so much of the road leading from Bristol to Chipping Sodbury, near Blackberry Farm, as lies between the junction therewith of the approach road to Blackberry Farm and a point 13 chains or thereabouts south-west of that junction, and to carry the diverted road under Railway No. 3 authorised by the Great Western Railway (South

Wales and Bristol Direct Railway) Act, 1886, now in course of construction, by means of a bridge.

In the parish of Aston, in the city and county borough of Birmingham, in the county of Warwick:—

To make and maintain a new road commencing in Montgomery-street at or near its junction with Kendal-road, and terminating at a point in Bolton-road 16½ chains or thereabouts north-west of the junction of the last mentioned road with Oakley-road, and to carry the same over the Company's Oxford and Birmingham Railway by means of a bridge.

In the parishes of Bersham and Broughton and in the parish of Wrexham Regis, in the borough of Wrexham, all in the county of Denbigh:—

To stop up and discontinue so much of Cathrall-lane and the footpath connecting that lane with the footbridge over the Wrexham, Mold, and Connahs Quay Railway as lies between a point in Cathrall-lane at or near the Wrexham Brewery and the said footbridge, and in lieu thereof to make and maintain a new footpath between the said points, and to carry the same over the Company's Shrewsbury and Chester Railway by means of a footbridge.

In the parishes of Bettws and Llangeinor, in the urban district of Ogmore and Garw, in the county of Glamorgan:—

To stop up and discontinue so much of the road which crosses the Company's Garw Valley Branch Railway on the level at the northern end of Pontycwmmer Station as lies between the boundary of the Company's property, and in lieu thereof to make and maintain a new road between points in the existing road respectively 2 chains or thereabouts west and 3½ chains or thereabouts east of the said level crossing, and to carry the same over the Railway by means of a bridge.

In the parish of Roath, in the borough of Cardiff, in the county of Glamorgan:—

To stop up and discontinue so much of the road which crosses the South Wales Railway of the Company on the level, and connects Moorland-road with Beresford-road, as lies between the boundaries of the Company's property, and in lieu thereof to make and maintain a bridge over the said Railway on or near the site of the said level crossing, and in connection therewith to alter the levels of the respective portions of the roads and streets hereinafter specified, that is to say:—

Moorland-road for a distance of 130 yards or thereabouts from the south-eastern boundary of the said Railway.

Railway-street, for a distance of 65 yards or thereabouts from Moorland-road.

Beresford-road for a distance of 120 yards or thereabouts from the north-western boundary of the said Railway.

Spring Gardens-terrace for a distance of 70 yards or thereabouts from Beresford-road.

Pearl-street for a distance of 80 yards or thereabouts from Beresford-road.

In the parish of Cockett, in the county of Glamorgan:—

To alter and divert so much of the road leading from Wauarllydd to Pentre which crosses the South Wales Railway of the Company at the level crossing known as Mynydd-bach-y-glo level crossing as lies between points respectively about 16 chains south-west and 8 chains north of the said level crossing, and to carry the diverted road over the Railway by means of a bridge.

It is proposed to take for the purposes of the said diversion of road portions, not exceeding two acres in extent, of certain lands in the said parish which are, or are reputed to be, common or commonable lands known as Mynydd-bach-y-glo Common.

In the parish of Llanelly (urban), in the urban district of Llanelly, in the county of Carmarthen:—

To stop up and discontinue so much of Station-road and New Docks-road which crosses the Company's South Wales Railway on the level at the eastern end of Llanelly Station as lies between the boundaries of the Company's property, and in lieu thereof to make and maintain a new road commencing at the junction of Marsh-street with Emma-street, and terminating by a junction with Trinity-road when diverted as hereinafter mentioned at a point 4 chains or thereabouts east of its existing junction with New Docks-road, and to carry the same over the said Railway by means of a bridge.

To alter and divert Trinity-road for a distance of 8 chains or thereabouts from its junction with New Docks-road.

To stop up and discontinue so much of Glamorgan-road which crosses the said South Wales Railway on the level at the western end of Llanelly Station as lies between the boundaries of the Company's property, and to remove the footbridge over the said Railway connecting Glamorgan-road with Nelson-terrace, and in lieu thereof to make and maintain a new road commencing at the junction of Glamorgan-road with Railway-terrace, and terminating at a point in Nelson-terrace 4 chains or thereabouts south of the said Railway, and to carry the same over the Railway by means of a bridge, and in connection therewith to alter the levels of the road leading from Nelson-terrace to Glamorgan-road for a distance of 4 chains or thereabouts east of Nelson-terrace.

In the parish of Clarbiston in the rural district of Narberth, and in the parish of Wiston, all in the county of Pembroke:—

To stop up and discontinue so much of the road leading from Clarbiston to Narberth which crosses the South Wales Railway of the Company on the level at or near Dreppford Farm as lies between the boundaries of the Company's property, and in lieu thereof to make and maintain a new road between points in the existing road respectively about 2 chains north and 5 chains south of the said level crossing, and to carry the same over the Railway by means of a bridge.

Lands.

To empower the Company to purchase by compulsion or agreement, and to hold lands (which expression

in this notice includes houses, buildings, mines, minerals, and easements in and over lands), in the parishes, areas, and places hereinbefore mentioned, for the purposes of the said intended Railways, deviations of Railways, widening and lengthening of bridges, roads, footpaths and other works, and for the general purposes of the Company and of their undertaking and works connected therewith, and for providing increased accommodation, and also to acquire by compulsion or agreement, and to hold for the purposes aforesaid or any of them the lands hereinafter described or referred to, and to exercise the powers hereinafter mentioned (that is to say):—

In the county of London:—

Certain lands in the parish and district of Paddington lying on and adjoining both sides of Stanley-street and Arthur-mews, the north-west side of Praed-street, and the north-east side of London-street, and to stop up and discontinue and extinguish all rights of way over Stanley-street and Francis-street, and so much of Arthur-mews as extends for a distance of 80 yards or thereabouts from Francis-street, and so much of London-street as extends for a distance of 167 yards or thereabouts in a north-westerly direction from the junction therewith of Arthur-mews, and to vest the site and soil of the roads and portions of roads so to be stopped up in the Company, and to repeal, alter, or amend all or some of the provisions of section 58 of the Great Western Railway (No. 1) Act, 1882, and of section 38 of the Great Western Railway (General Powers) Act, 1898, and to empower the Company to enter into and carry out agreements with the Postmaster-General with reference to any lands purchased under the powers of the intended Act or otherwise.

In the county of Bucks:—

Certain lands in the parish of High Wycombe in the borough of Chepping Wycombe, lying on the southern side of and adjoining the Company's Wycombe and Oxford Railway, and between the Jacques Works in the occupation of Rhys and Co., Limited, and the western end of the viaduct carrying that Railway over Frogmore-street.

In the county of Berks:—

Certain lands in the parishes of Steventon, West Hendred, and Grove, and in the parishes of East Lockinge, West Lockinge, and Charlton, in the rural district of Wantage, lying on the northern side of and adjoining the Company's main line of Railway, and between points respectively about 48 chains and 198 chains east, and between points respectively about 7 chains and 92 chains west of the bridge carrying that Railway over the Wilts and Berks Canal.

Certain lands in the parishes of Shrivensham and Ashbury lying on the northern side of and adjoining the Company's main line of Railway, and between the level crossing of the said Railway known as Knighton Crossing and Shrivensham Station.

In the county of Wilts:—

Certain lands in the parish of Corsham, lying on the northern side of and adjoining the Company's main line of Railway, and between points respectively about 12 chains and 26 chains east of Corsham Station.

Certain lands in the parish of Westbury lying on both sides of the Company's Wilts, Somerset, and Weymouth Railway, and extending in a south-westerly direction for a distance of about 22 chains from Westbury Station.

Certain lands in the parish of Swindon and urban district of Swindon New Town lying on the southern side of and adjoining Station-road and extending from a point about 1 chain east of Gladstone-street to a point about 6 chains west of Cricklade-road.

Certain lands in the parish of Fisherton Anger without lying on both sides of and adjoining the Company's Salisbury Branch Railway and near the termination of that Railway at Salisbury.

In the county of Somerset:—

Certain lands in the parish of Curry Rivell lying on the southern side of and adjoining the Company's Durston and Yeovil Branch Railway, and between points respectively about 4½ chains and 18 chains north-west of Langport Station.

In the county of Devon:—

Certain lands in the parish of Stoke Damerel in the county borough of Devonport at and near the junction of Valletor-road and Portland-road.

In the county of Cornwall:—

Certain lands in the parish of Saint Sampson, in the rural district of Saint Austell, lying on the western side of and adjoining the Company's Lostwithiel and Fowey Branch Railway, and between points respectively about 6 chains and 10 chains north of the post on that Branch Railway indicating 280½ miles from Paddington.

In the county of Worcester:—

Certain lands in the parish of Aldington in the rural district of Peabworth, lying on the southern side of and adjoining the Company's Oxford, Worcester, and Wolverhampton Railway, and between points respectively about 7 chains and 17 chains east of the bridge carrying the road leading from Evesham to Offenham over that Railway.

Certain lands in the parish of Oldbury, in the urban district of Oldbury, lying on the eastern side of, and adjoining the Company's Oldbury Branch Railway, and at and near the goods shed at Oldbury Station.

In the counties of Worcester and Gloucester:—

Certain lands in the parish of Church Honeybourne, in the rural district of Evesham, in the county of Worcester, and in the parishes of Peabworth and Marston Sica, in the county of Gloucester, lying on the north-western side of and adjoining the Company's Honeybourne and Stratford-upon-Avon Railway, and extending from Honeybourne Station to Long Marston Station.

In the county of Gloucester:—

Certain lands in the parish of South Hamlet, in the City and County Borough of Gloucester, lying between the Company's sidings and property and Hempstead-lane, and known as Llanthony Abbey Farm.

Certain lands in the parish of Stonehouse, lying on

the south-western side of the Company's Cheltenham and Great Western Union Railway, and between points respectively about 12 chains and 22 chains south-east of the goods shed at Stonehouse Station.

Certain lands in the parish and borough of Cheltenham lying on the south-eastern side of and adjoining the Company's Cheltenham Branch Railway, and extending for a distance of 23 chains or thereabouts in a south-westerly direction from the bridge carrying Malvern-road over the said Railway.

Certain lands in the parish of Marston Sica lying on the north-western side of and adjoining the said Honeybourne and Stratford-upon-Avon Railway and lying between points respectively about 22 chains and 34 chains north-east of Long Marston Station.

In the counties of Gloucester and Warwick:—

Certain lands in the parish of Wellford-on-Avon and in the parish of Weston-on-Avon, in the rural district of Marston Sica, in the county of Gloucester, and in the parish of Milcote, in the rural district of Stratford-upon-Avon, in the county of Warwick, lying on the north-western side of and adjoining the said Honeybourne and Stratford-upon-Avon Railway, and lying between a point about 12 chains north-east of the post on that Railway indicating 106 miles from Paddington and Milcote Station.

Certain lands in the parish of Clifford Chambers in the county of Gloucester, and in the parish of Milcote in the rural district of Stratford-upon-Avon in the county of Warwick, lying on the north-western side of and adjoining the said Honeybourne and Stratford-upon-Avon Railway, and lying between a point about 54 chains north-east of Milcote Station and the viaduct carrying the said Railway over the River Avon.

In the county of Warwick:—

Certain lands in the parish of Old Stratford Within in the borough of Stratford-upon-Avon, lying on the western side of and adjoining the said Honeybourne and Stratford-upon-Avon Railway, and extending in a southerly direction for a distance of 24 chains or thereabouts from the road leading from Stratford-on-Avon to Alcester near Stratford Station.

Certain other lands in the parish of Old Stratford Within in the borough of Stratford-upon-Avon, lying on the north-eastern side of and adjoining the Company's Stratford-upon-Avon and Hatton Branch Railway, and at and near the junction therewith of the sidings leading to the goods yard at Stratford-on-Avon.

Certain lands in the parish of Old Stratford and Drayton in the rural district of Stratford-upon-Avon, and in the parish of Aston Cantlow lying on the eastern side of and adjoining the said Branch Railway, and extending for a distance of 72 chains or thereabouts in a southerly direction, and 13 chains or thereabouts in a northerly direction, from the road leading from Wilmore to Stratford-upon-Avon at Wilmore Station.

Certain lands in the parish of Beoley, in the rural district of Stratford-upon-Avon, lying on the south-eastern side of and adjoining the said Branch Railway, and between points respectively about 48 chains south-west and 16 chains north-east of Beoley Station.

Certain lands in the parish of Wootton Wawen, lying on both sides of and adjoining the said Branch Railway, and lying between points respectively about 36 chains and 8 chains east of Beoley Station.

Certain lands in the parish of Claverdon, lying on the south-eastern side of and adjoining the said Branch Railway, and extending for a distance of 23 chains or thereabouts in a north-easterly direction from Claverdon Station.

In the counties of Warwick and Worcester:—

Certain lands in the parish of Birmingham, in the City and county borough of Birmingham, in the county of Warwick, and in the parish of Yardley, in the rural district of Yardley, in the county of Worcester, on both sides of and adjoining the Company's Oxford and Birmingham Railway, and between points 12 chains or thereabouts north-west, and 50 chains or thereabouts south-east of the bridge carrying Golden Hillock-road over the said Railway at Small Heath Station.

In the county of Salop:—

Certain lands in the parish of Whittington lying on the western side of and adjoining the Company's Shrewsbury and Chester Railway, and adjoining the southern side of the road which crosses that Railway on the level at Whittington Station, and to enable the Company to stop up and discontinue any rights of way over the said Railway to and from the said lands.

In the county of Denbigh:—

Certain lands in the parish of Llangollen urban, in the urban district of Llangollen, lying between the Company's Llangollen and Corwen Railway, the River Dee, and the Chester and Ebbw Vale Railway.

Certain lands in the parish of Broughton and in the parish of Wrexham in the borough of Wrexham, lying between the Company's Shrewsbury and Chester Railway, the Wrexham Mold and Connahs Quay Railway, and the road leading from Gwersyllt to Wrexham.

In the county of Monmouth:—

Certain lands in the parish of Llanhilleth, in the urban district of Abertillery, lying between the Company's Nantyglo and Ebbw Vale Branch Railways and at and near the junction of those Railways and in connection therewith to stop up and extinguish all rights of way over the Company's property between the said lands.

Certain lands in the parish of Mynyddislwyn, lying on the southern side of and adjoining the Company's Penarth Branch Railway and extending for a distance of nine chains or thereabouts in a westerly direction from the road leading from Crumlin to Trefdegar Junction.

Certain other lands in the parish of Mynyddislwyn, lying on both sides of the Monmouthshire (Western Valleys) Railway and between the northern and southern junctions with that Railway of the sidings to Celynen Colliery.

Certain lands in the parish of Aberystwith, in the urban district of Nantyglo and Blana, lying between

the Company's Nantyllo Branch Railway, Oak-street, and the approach road to the goods shed at Abertillery Station, and including a portion of the said road.

In the county of Glamorgan:—  
Certain lands in the parish of Higher Hamlet of Newcastle lying on the eastern side of and adjoining the Company's Porthcawl Branch Railway, about 3 chains south of the bridge carrying the said Railway over the road leading from Aberkenll to Tondur.

Certain other lands in the same parish lying on the southern side of and adjoining the said Branch Railway at and near the Fountain Arms Public-house.

Certain other lands in the same parish lying on the south-eastern side of and adjoining the said Branch Railway, and at and near the junction therewith of the siding to the Cribwr Coke Ovens.

In the County of Carmarthen:—

Certain lands in the parish of Llandilo Fawr (Rural), lying on the northern side of and adjoining the Company's Brynamman Branch Railway, and at and near Glanamman Station.

To empower the Company and the London and North Western Railway Company (hereinafter called "the two Companies"), or either of them, with the consent of the other, to execute the work hereinafter mentioned (that is to say):—

The widening on the eastern side of the bridge in the parish of Leebotwood, in the rural district of Church Stretton in the county of Salop, which carries the Shrewsbury and Hereford Railway of the two Companies over the road leading from Shrewsbury to Lower Wood.

To empower the two Companies, or either of them, with the consent of the other, to purchase, by compulsion or agreement, and to hold lands in the said parish for the purposes of the said intended work, and also to purchase by compulsion or agreement, and to hold for the purposes of the two Companies or either of them, and for providing increased accommodation the lands hereinafter mentioned or referred to (that is to say):—

County of Hereford:—

Certain lands in the parishes of Pipe and Lyde and Moreton-on-Lugg in the rural district of Hereford, and in the parish of Marden, lying on the south-western side of and adjoining the Shrewsbury and Hereford Railway of the two Companies, and extending for a distance of 25 chains or thereabouts in a south-easterly direction from the road which crosses the said Railway on the level at Moreton Station.

In the county of Salop:—

Certain lands in the parishes of Church Stretton and Wistanslaw lying on the south-western side of and adjoining the said Railway and at and near Marsh Brook Station.

Certain lands in the parishes of Leebotwood and Woolaston in the rural district of Church Stretton, lying on the eastern side of and adjoining the said Railway and extending for a distance of 21 chains or thereabouts in a north-easterly direction from the bridge carrying the said Railway over the road leading from Shrewsbury to Lower Wood.

Certain lands in the parish of St. Julian, in the borough of Shrewsbury, lying on the south-eastern side of and adjoining the said Railway, and extending for a distance of 18 chains, or thereabouts, from the bridge over the said Railway connecting Sutton-lane with Sutton-street.

Certain lands in the parish of St. Mary, in the borough of Shrewsbury, lying between the Crewe and Shrewsbury Branch of the London and North Western Railway, Castle Forge, Cross-street, and Wrekin Cottages.

Certain other lands in the said parish and borough lying at and near the eastern end of John-street and the northern end of Lindley-street and Queen-street.

To authorise the purchase and acquisition of part only of or of an easement in over or under any property which may be required to be taken for the purposes of or in the exercise of the powers of the intended Act without the Company or Companies purchasing the same becoming subject to the liability imposed by section 92 of the Lands Clauses Consolidation Act, 1845.

To vary, repeal, or extinguish all existing rights or privileges in any manner connected with the lands proposed to be purchased or taken, or which would in any manner impede or interfere with any of the objects of the intended Act, and to confer other rights and privileges.

To authorise the alteration, diversion, widening, crossing, or stopping up of all roads, bridges, footpaths, railways, tramways, aqueducts, canals, ferries, streams, and rivers, within or adjoining the before-mentioned parishes and places, and which it may be necessary or convenient to interfere with in the execution of the powers of the intended Act, and to provide that the Company shall not be liable under section 46 of the Railways Clauses Consolidation Act, 1845, to repair or maintain the surface of any road which shall be carried over any existing or authorised or intended Railway by a bridge or bridges, or the immediate approaches thereto, except so far as the level of such road or approaches shall be permanently altered.

To make provision for the repair of all or any of the new or altered roads, streets, footpaths, or highways to be constructed or altered or sanctioned under the authority of the intended Act by the same persons and by the same means as other roads, streets, footpaths, or highways in the parishes or places within which the new or altered roads, streets, footpaths, or highways respectively will be situate, are for the time being legally repairable, or in such other manner as may be prescribed by the intended Act, and to empower the Company or Companies exercising the powers of the intended Act on the one hand, and any municipal, sanitary, highway, or local authority, and any company or person or persons, and the owners, lessees, and occupiers of any lands taken under or affected by the powers of the intended Act on the

other hand, to enter into and fulfil contracts and agreements for or in relation to the execution of any works and the cost thereof and incidental thereto, the construction, maintenance, and repair of any roads or footpaths, and the taking of any lands in or by which they may respectively be interested or affected, and to enable any such authority to provide the necessary funds for the purpose by borrowing and by the levying of rates or by either of those means, and the intended Act will or may confirm any such contract or agreement which may already have been or which at any time hereafter may be entered into for or in relation to any of the matters aforesaid.

To extinguish or provide for the extinguishment of all rights of way over the public carriage and other roads, streets, footpaths, ways, courts, alleys, and passages, or portions thereof, which are proposed to be stopped up and discontinued or diverted, and in and over any of the lands to be acquired under the provisions of the intended Act, and for vesting the site and soil of such roads, streets, footpaths, ways, courts, alleys, and passages or portions thereof in the Company or Companies exercising the powers of the intended Act.

To make provision for the appointment by any two justices or a stipendiary magistrate of special constables to act within, upon, and near to all or any of the railway stations, works, and lands belonging or leased to or worked by the Company either solely or jointly with any other Company or Companies, with all the powers, authorities, protection, and privileges by law attaching to constables.

To authorise the levying of tolls, rates, and other charges for and in respect of the use of the said intended Railways and works, and also for the use of the other works, conveniences, and accommodation connected with all or any of the said Railways and works, or to be authorised by the intended Act, and to alter existing tolls, rates, and charges, and to grant exemptions from tolls, rates, and charges.

To repeal, alter, or amend sections 12 and 13 of the Alexandra (Newport) Dock Act, 1873, and section 13 of the Waterford and Central Ireland Railway Act, 1875, with reference to the powers thereby granted to subscribe to the undertakings of the Alexandra (Newport) Dock Company and the Waterford and Central Ireland Railway Company respectively so far as such powers have not been exercised, and to extinguish the powers of the Company to raise capital for the purposes aforesaid and to reduce the capital of the Company.

To provide that the Company shall in respect of any lands acquired by them under the powers of the intended Act, be entitled to be exempted from contribution to the cost of any works executed under the provisions of section 150 of the Public Health Act, 1875, in the same manner and to the same extent as they are by section 22 of the Private Street Works Act, 1892, exempted from contribution to the cost of works executed under the last-mentioned Act, in districts in which that Act has been adopted.

To transfer to and vest in or provide for the transfer to and vesting in the Company of the undertaking, Railway works, lands, buildings, plant, rolling stock, machinery, stores, property, assets, and effects of the Golden Valley Railway Company, and all powers, rights, and privileges of or belonging to or enjoyed by that Company, of what nature or kind soever, and whether, with reference to their own undertaking or the undertakings of any other Company at such time or times, and upon and subject to such terms and conditions as may have been or may be agreed upon between the Company and the Golden Valley Railway Company or as may be prescribed or authorised, or provided for by the intended Act, and freed and discharged from all or any debts, liabilities, charges, or encumbrances affecting the same, and to provide for the winding-up and dissolution of the last-named Company.

To declare and regulate the capital of the Company, and to make further provisions with reference thereto.

To enable the Company to apply to the purposes of the intended Act, or some of them, such portion of their corporate funds as they shall think expedient, and to raise for such purposes and for the general purposes of their undertaking and for the purposes of any other Acts of the same session additional capital by the creation of shares or stock with or without a preference in payment of dividend, or other rights or privileges, and by the creation and issue of debenture stock, and by borrowing or any of such means.

To enable the London and North Western Railway Company to apply their corporate funds to the purposes of the intended Act in which they are interested or some of them.

To alter, amend, and extend or repeal all or some of the powers and provisions of the several Acts hereinbefore mentioned in this Notice, and also of the several Acts (local and personal) following, or some of them (that is to say):—

The Act 5 and 6 William IV., cap. 107; and any other Act or Acts relating to the Company.

The Act 9 and 10 Vict., cap. 204, and any other Act or Acts relating to the London and North Western Railway Company.

The Act 39 and 40 Vict., cap. 141, and any other Act or Acts relating to the Golden Valley Railway Company.

And Notice is hereby given that maps, plans, and sections relating to the objects of the intended Act, together with books of reference to such plans, and also a copy of the notice of the intended application to Parliament, as published in the "London Gazette," will be deposited on or before the 30th day of November in the present year as follows, that is to say:—

As regards the lands and works in the county of Gloucester, the lands and works partly in that county and partly in the county of Worcester, and the lands partly in the county of Gloucester and partly in the county of Warwick, with the Clerk of the Peace for the county of Gloucester, at his office at Gloucester. As regards the lands and works in the county of Mid-

dlesex, and the works and lands partly in that county and partly in the county of Bucks, with the Clerk of the Peace for the county of Middlesex, at his office at the Guildhall, Westminster. As regards the last-mentioned lands and works and the lands wholly in the county of Bucks, with the Clerk of the Peace for the county of Bucks, at his office at Aylesbury. As regards the lands and works in the county of Worcester, and the lands and works partly in that county and partly in the county of Gloucester, and the lands partly in the county of Worcester, and partly in the county of Warwick, with the Clerk of the Peace for the county of Worcester, at his office at Worcester. As regards the lands and works in the county of Somerset, with the Clerk of the Peace for that county at his office at Frome. As regards the lands and works in the county of Berks, with the Clerk of the Peace for that county, at his office at Reading. As regards the lands and works in the county of Devon, with the Clerk of the Peace for that county, at his office at Exeter. As regards the lands and works in the county of Warwick, and the lands partly in that county and partly in the county of Gloucester, and the lands partly in the county of Worcester, with the Clerk of the Peace for the county of Warwick, at his office at Leamington. As regards the lands and works in the county of Salop, with the Clerk of the Peace for that county at his office at Shrewsbury. As regards the lands and works in the county of London, with the Clerk of the Peace for that county, at his office at the Sessions House, Clerkenwell. As regards the lands and works in the county of Wilts, with the Clerk of the Peace for that county, at his office at Marlborough. As regards the lands and works in the county of Denbigh, with the Clerk of the Peace for that county, at his office at Ruthin. As regards the lands and works in the county of Glamorgan, with the Clerk of the Peace for that county, at his office at Cardiff. As regards the lands and works in the county of Pembroke, with the Clerk of the Peace for that county at his office at Haverfordwest. As regards the lands in the county of Cornwall, with the Clerk of the Peace for that county, at his office at Bodmin. As regards the lands in the county of Monmouth, with the Clerk of the Peace for that county, at his office at Newport (Monmouth). As regards the lands and works in the county of Carmarthen, with the Clerk of the Peace for that county, at his office at Llandovery. And as regards the lands in the county of Hereford, with the Clerk of the Peace for that county, at his office at Hereford.

And that copies of so much of the said plans, sections, and books of reference as relates to each of the several areas hereinafter mentioned in or through which the intended works are proposed to be made or lands are situate, together with a copy of the said notice, as published in the "London Gazette," will on or before the said 30th day of November be deposited as follows, that is to say:—

As relates to any district in the administrative county of London, with the Clerk of the Vestry or District Board as the case may be at the office of such vestry or district board.

As relates to any county borough, or other borough, with the Town Clerk of such borough, at his office. As relates to any urban district not being a borough, with the Clerk of the district council of such district at his office. As relates to any parish having a parish council, with the Clerk of the parish council, or if there be no Clerk, with the Chairman of that council. And as relates to any parish comprised in a rural district and not having a parish council with the Clerk of the district council of such rural district at his office.

Any parish named in this Notice (outside the administrative county of London) which is not also a county or other borough, or an urban district, or is not stated to be in a county or other borough, or in an urban district, or in a rural district, is a parish having a parish council with the Clerk or Chairman of which the before-mentioned deposit will be made, and such deposit will be made with the Clerk to the parish council be made at his office, or if he has no office, at his residence, and if made with the Chairman of the parish council be made at his residence.

And Notice is hereby also given that on or before the 21st day of December next, printed copies of the intended Act will be deposited in the Private Bill-office of the House of Commons.

Dated the 9th day of November, 1898.

IN PARLIAMENT.—SESSION 1898.

**SOUTH EASTERN and LONDON  
CHATHAM and DOVER RAILWAY  
COMPANIES.**

(NEW LINES, &c.)

(Power to South Eastern and London Chatham and Dover Railway Companies, or either of them, to construct New Railways in the County of Kent; Declaration; Purchase of lands by compulsion or agreement; Power to take part only of certain Properties; Tolls; Power to two Companies to enter into agreements; Application of Funds; Incorporation and Amendment of Acts; and other purposes.)

Notice is hereby given that application is intended to be made to Parliament in the ensuing Session by the South Eastern Railway Company and the London Chatham and Dover Railway Company (hereinafter respectively referred to as "the South Eastern Company" and "the Chatham Company" and together as the "two Companies") for an Act for the following among other purposes or some of them (that is to say):—

To empower the two Companies or either of them with the consent of the other to make and maintain the railways in the County of Kent next hereinafter described with all proper stations sidings roads approaches works and conveniences connected therewith (that is to say):—

**A Railway (No. 1)** commencing in the parish of Chislehurst by a junction with the South Eastern Company's Railway at a point 50 yards or thereabouts measured in a south-easterly direction along the said Railway from the centre of the bridge carrying the said Railway over Bickley Park-road near Chislehurst Station passing through the parish of Bromley and terminating in the parish of Chislehurst aforesaid at a point 120 yards or thereabouts from the centre of the level crossing by which the road leading to Hawkwood Farm crosses the Chatham Company's Railway measured in a south-easterly direction along the said Railway.

**A Railway (No. 2)** commencing by a junction with the Chatham Company's Railway in the parish of Chislehurst at a point 610 yards or thereabouts from the centre of the level crossing by which the occupation road leading to Hawkwood Farm crosses the said Railway measured in a south-easterly direction along the said Railway passing through the parish of Bromley and terminating in the parish of Chislehurst by a junction with the South Eastern Company's Railway at a point 50 yards or thereabouts from the centre of the bridge carrying the said Railway over the Bickley Park-road measured in a south-easterly direction along the said Railway.

**A Railway (No. 3)** commencing in the parish of Bromley by a junction with the Chatham Company's Railway at or near the easterly face of the bridge which carries Blackbrook-lane over the said Railway and terminating in the parish of Chislehurst by a junction with the South Eastern Company's Railway at a point 400 yards or thereabouts from the centre of the bridge which carries the occupation road leading to Hawkwood Farm over the said Railway and measured in a south-easterly direction along the said Railway.

**A Railway (No. 4)** commencing in the parish of Chislehurst by a junction with the South Eastern Company's Railway at a point 400 yards or thereabouts from the centre of the bridge which carries the occupation road leading to Hawkwood Farm over the said Railway measured in a south-easterly direction along the said Railway and terminating in the parish of Bromley by a junction with the Chatham Company's Railway at or near the easterly face of the bridge which carries Blackbrook-lane over the said Railway.

**A Railway (No. 5)** commencing in the parish of Otford by a junction with the South Eastern Company's Railway at or near the bridge carrying the said Railway over the road leading from Dane Bottom to the village of Otford and terminating in the parish of Seal by a junction with the Chatham Company's Railway at or near the bridge which carries over the said Railway the road leading from the village of Seal to the Pilgrim's-road.

**Railway No. 5** will be situate in pass through or into the several parishes townships extra-parochial and other places following or some of them (that is to say):—Otford Kemsing and Seal.

**A Railway (No. 6)** wholly in the parish of Otford commencing by a junction with Railway No. 5 hereinafter described at a point 6 furlongs and 1 chain or thereabouts from the commencement thereof and terminating by a junction with the South Eastern Company's Railway at or near a point 100 yards or thereabouts measured in a north-westerly direction along the said Railway from the bridge carrying the said Railway over the road leading from Dane Bottom to Otford.

**A Railway (No. 7)** commencing in the parish of St. Peter Broadstairs by a junction with the Chatham Company's Railway at a point 140 yards or thereabouts from the centre of the bridge carrying the said Railway over St. Peter's-road measured in a southerly direction along the said Railway and terminating in the parish of St. Lawrence Intra Ramsgate by a junction with the South Eastern Company's Railway at a point 43 yards or thereabouts from the centre of the bridge which carries the said Railway over the road leading from the Whitehall Water Works to Whitehall Farm measured in a northerly direction along the said Railway.

**Railway No. 7** will be situate in pass through or into the several parishes following (that is to say):—

St. Peter Intra Broadstairs  
St. Peter Extra Broadstairs and  
St. Lawrence Intra Ramsgate.

**A Railway (No. 8)** wholly in the parish of St. John the Baptist Margate commencing by a junction with the South Eastern Company's Railway at a point 247 yards or thereabouts from the centre of the bridge which carries the said Railway over College-road measured in a south-easterly direction along the said Railway and terminating by a junction with the Chatham Company's Railway at or near the easterly abutment of the bridge which carries the said Railway over the South Eastern Company's Railway.

**A Railway (No. 9)** wholly in the parish of Whitstable Urban commencing by a junction with the Chatham Company's Railway at a point 70 yards or thereabouts from the north-east corner of the goods-shed at Whitstable Station on that Railway measured in a north easterly direction

along the said Railway and terminating by a junction with the South Eastern Company's Railway at a point 257 yards or thereabouts from the centre of the bridge which carries the South Eastern Railway over the Chatham Company's Railway measured in a south-easterly direction along the South Eastern Railway.

To deviate laterally from the line of the intended railways and works or any of them to the extent shown on the plans hereinafter mentioned or to be defined by the intended Act and also to deviate vertically from the levels shown on the sections hereinafter mentioned to such extent as may be fixed by the Bill.

To empower the two Companies or either of them to cross stop up alter or divert either temporarily or permanently all such public carriage and other roads streets highways courts passages footpaths ways: canals water-courses rivers streams drains sewers pipes railways tramways subways and telegraphic and telephonic apparatus within the parishes and places aforesaid as it may be necessary or convenient to cross stop up alter or divert in executing the several purposes of the intended Act.

To authorise the purchasing by compulsion or agreement of lands and houses and other property and easements under or over any lands houses or property in the several parishes townships townlands and extra-parochial and other places aforesaid for the purposes of the intended railways and works and of the intended Act or any of them and to alter vary or extinguish all existing rights and privileges connected with such lands houses and other property which would in any manner impede or interfere with the construction maintenance or use of the intended railways and works and to confer other rights and privileges.

To authorise the purchasing and acquiring of a part only of any property (in which expression is included houses buildings and manufactories) and any easement in over or under any property without the two Companies or either of them being subject to the liability imposed by Section 92 of the Lands Clauses Consolidation Act 1845 to purchase and take the whole of such property.

To empower the two Companies or either of them to levy in respect of the intended railways the tolls rates and charges at present authorised to be levied by the two Companies respectively.

To empower the two Companies respectively to apply to all or any of the purposes of the intended Act any capital or funds now belonging to the two Companies respectively or which they are authorised to raise under any previous Act or Acts or under any Act or Acts of the next ensuing Session and which may not be required for the purposes for which such capital was or may be authorised.

To enable the two Companies or either of them to make and carry into effect arrangements and agreements as to the provision of capital required for the purposes of the intended Act.

To provide that any trustee may unless forbidden by the instrument (if any) creating the trust invest any trust funds in any such capital.

The Bill will vary or extinguish all rights and privileges which would in any manner interfere with the objects and purposes thereof and confer other rights and privileges and will incorporate so far as may be necessary for the purposes thereof the Companies Clauses Consolidation Act 1845 the Companies Clauses Acts 1863 and 1869 the Railways Clauses Consolidation Act 1845 and any other Act or Acts amending those Acts respectively and will alter amend enlarge or repeal the provisions of the several Acts of Parliament following or some of them (that is to say) the Act 6 Will. IV. Cap. 75 and all other Acts relating to or affecting the South Eastern Company the Act 16 and 17 Vict. Cap. 132 and all other Acts relating to or affecting the Chatham Company.

And Notice is hereby further given that duplicate maps plans and sections of the works proposed to be authorised by the intended Act and plans of the lands houses and other property proposed to be taken compulsorily with books of reference to those several plans containing the Names of the owners or reputed owners lessees or reputed lessees and occupiers of those lands houses and other property and a copy of this Notice as published in the "London Gazette" will be deposited on or before the 30th day of November instant for public inspection with the Clerk of the Peace for the county of Kent at his office at Maidstone.

And that copies of so much of the said plans sections and books of reference as relates to each of the several parishes and places hereinbefore mentioned in or through which the works are intended to be made or within which lands houses and other property proposed to be taken compulsorily are situate and also a copy of this Notice as published in the "London Gazette" will on or before the 30th day of November instant be deposited for public inspection as follows: as relates to the respective boroughs of Ramsgate and Margate with the town clerks of those boroughs at their offices in those boroughs respectively as relates to the urban districts of Bromley Broadstairs and Whitstable with the clerks to the urban district councils of those urban districts at their respective offices and as relates to the parishes of Chislehurst Otford Seal and Kemsing with the clerks of the parish councils of those parishes respectively at their offices or residences as the case may be.

Printed copies of the intended Act will on or before the 21st day of December 1898 be deposited in the Private Bill-office of the House of Commons.

Dated this 18th day of November 1898.

## SOUTH EASTERN RAILWAY.

(New Railways and Widening and Compulsory Purchase of Lands in counties of London Kent and Surrey; Tolls; Stopping up of Roads and Footpaths and Alterations of Levels of Roads in counties of London Kent and Surrey; Construction of New Road in county of London; Extinguishment of Rights of Way and Vesting Site and Soil in Company; Derivation; Underpinning; Purchase of Additional Lands by Compulsion or Agreement in counties of London and Kent; Stopping up of Roads; Power to take part only of Certain Properties; Power to acquire and hold Lands for Extraordinary Purposes in counties of London Kent and Surrey; Repeal or Amendment of Section 96 of the Charing-cross Railway Act 1859; Extensions of Time for Compulsory Purchase of Lands and Completion of Works in counties of London and Kent; Transfer to Company of Undertakings of Chipstead Valley Railway Company and Epsom Downs Extension Railway Company and Dissolution of those Companies and Release of Deposits; Creation of Capital for Purposes of Transfer; Extending Powers of Company with reference to Construction and Maintenance of Hotels; Power to Croch-hurst Sidley and Bechill Railway Company to raise Additional Capital; Application of Funds; Incorporation and Amendment of Acts; and other purposes.)

Application is intended to be made to Parliament in the ensuing Session by the South Eastern Railway Company (hereinafter called "the Company") for leave to bring in a Bill for the following or some of the following among other purposes (that is to say):—

To authorise the Company to make and maintain the Railways and railway widenings hereinafter described with all proper stations sidings roads approaches works and conveniences connected therewith respectively (that is to say):—

In the county of London:—

**A Railway (No. 1)** commencing in the parish of St. Paul Deptford by a junction with the Company's main line at a point 150 yards or thereabouts from the centre of the bridge which carries the said Railway over Edward-street measured in a north-westerly direction along the said line and terminating in the parish of St. Mary Rotherhithe by a junction with the Company's main line at a point 113 yards or thereabouts from the centre of the signal box known as Corbett's-lane signal-box near Corbett's-lane measured in a north-westerly direction along the said Railway.

**A Railway (No. 2)** wholly in the parish of St. Paul Deptford commencing by a junction with the Company's North Kent Railway at a point 90 yards or thereabouts from the centre of the bridge which carries the said Railway over Edward-street measured in a south-easterly direction along the said Railway and terminating by a junction with the proposed Railway No. 3 (hereinafter mentioned) at a point 140 yards or thereabouts from the centre of the bridge carrying the said North Kent Railway over Rolt-street measured in a north-westerly direction along the southern parapet of the Company's viaduct.

**A Railway (No. 3)** commencing in the parish of St. Paul Deptford by a junction with the London and Greenwich Railway at a point 45 yards or thereabouts from the north-western corner of the Company's engine shed at their Deptford Station measured in a north-westerly direction along the said Railway and terminating in the parish of St. Mary Rotherhithe by a junction with the Company's Railway at a point 113 yards or thereabouts from Corbett's-lane signal-box near Corbett's-lane measured in a north-westerly direction along the said Railway.

In the counties of London and Kent:—

**A Railway (No. 4)** commencing in the parish of Lee in the county of London by a junction with the Company's Railway at a point 140 yards or thereabouts from the southern end of the up platform at Grove-park Station measured in a south-easterly direction along the said Railway and terminating in the parish of Bromley in the county of Kent by a junction with the Company's Bromley Railway at a point 123 yards or thereabouts from the centre of the bridge which carries the said Railway over Milk-street measured in a north-easterly direction along the said Railway.

In the county of Surrey:—

**A Railway (No. 5)** wholly in the parish of Coulsdon commencing by a junction with the Company's Caterham Railway at a point 11 yards or thereabouts from the junction of the Chipstead Valley Railway with the said Caterham Railway measured in a northerly direction along the Company's said Railway and terminating at a point 5 yards or thereabouts from the southern end of the new buildings on the down local platform at Purley Station.

In the county of London:—

**A widening (No. 1)** wholly in the parish of Lewisham on the down side of the Company's Railway commencing by a junction with the said Railway at a point 70 yards or thereabouts from the centre of the bridge carrying the London Chatham and Dover Railway Company's Greenwich Railway over the Company's Railway measured in a south-easterly direction along the Company's Railway and terminating by a junction with the said Railway at a point 80 yards or thereabouts from the centre of the

bridge carrying the said Railway over Brook-bank-road measured in a northerly direction along the said Railway.

A widening (No. 2) wholly in the parish of Lewisham on the up side of the Company's Railway commencing by a junction with the said Railway at a point 118 yards or thereabouts from the centre of the bridge carrying the said Railway over the Lewisham High-street measured in a south-easterly direction along the said Railway and terminating by a junction with the said Railway at a point 120 yards or thereabouts from the junction of the Company's main line with the Company's Lady Well loop line measured in a southerly direction along the said main line.

A widening (No. 3) wholly in the parish of Lewisham on the up side of the Company's Mid Kent Railway commencing by a junction with the said Railway at or near the northern face of the footbridge which connects the eastern and western portions of the Lady Well Recreation-ground and terminating by a junction with the said Railway at a point 220 yards or thereabouts from the centre of the bridge carrying Lady Well-road over the said Railway measured in a north-easterly direction along the said Railway.

A widening (No. 4) wholly in the parish of Lewisham on the up side of the Company's Mid Kent Railway commencing by a junction with the said Railway at a point 157 yards or thereabouts from the centre of the bridge carrying Catford-road over the said Railway measured in a southerly direction along the said Railway and terminating by a junction with the said Railway at a point 253 yards or thereabouts from the southern face of the footbridge which connects the eastern and western portions of the Lady Well Recreation-ground measured in a southerly direction along the said Railway.

A widening (No. 5) wholly in the parish of Lewisham on the down side of the Company's Mid Kent Railway commencing by a junction with the said Railway at a point 253 yards or thereabouts from the southern face of the footbridge which connects the eastern and western portions of the Lady Well Recreation-ground measured in a southerly direction along the said Railway and terminating by a junction with the said Railway at a point 157 yards or thereabouts from the centre of the bridge carrying Catford-road over the said Railway measured in a southerly direction along the said Railway.

In the county of Kent:—

A widening (No. 6) wholly in the parish of Tonbridge on the up side of the Company's Railway commencing by a junction with the Company's Tonbridge Wells and Hastings Railway at a point 156 yards or thereabouts from the centre of the bridge which carries the said Railway over Strawberry Vale measured in a north-westerly direction along the said Railway and terminating by a junction with the Company's main line at a point 112 yards or thereabouts from the western end of the up platform at Tonbridge Station measured in a westerly direction along the said Railway.

To provide that the railways and widenings hereinbefore described shall for all purposes including the levying of tolls rates and charges be deemed to form part of the Company's undertaking.

To enable the Company to execute the following works or some of them or some part or parts thereof and to exercise all or some of the following powers (that is to say):—

In the county of Kent:—

To stop up and discontinue and extinguish all rights of way over the road which crosses the Company's Railway on the level at Barden Park Tonbridge in the parish of Tonbridge.

To stop up and extinguish all rights of way over the land in the parish of St. Lawrence intra Ramsgate at the eastern end of the Company's Ramsgate goods-yard described in section 16 sub-section (9) of the "South Eastern Railway Act 1898."

To alter the levels of the main road in the parish of Tonbridge over the Company's Railway at Tonbridge Station such alteration of levels commencing at or near the junction of the said road with Priory-road and terminating at or near the junction of the said main road with Vale-road.

In the county of Surrey:—

To stop up and discontinue the public footpath at Redhill in the parish of Reigate which crosses the field No. 271 on the 1,2500 Ordnance Map (1894) of the said parish.

To authorise the Company to make and maintain the road hereinafter described (that is to say):—

A road wholly in the county of London commencing in the parish of Christchurch Southwark at a point 37 yards or thereabouts measured in a southerly direction from the north-east corner of Gaubia and George-streets and terminating in the parish of St. Saviour's Southwark by a junction with the Company's Ewer-street goods depot (now in course of construction) at a point 20 yards or thereabouts measured in a northerly direction from the north corner of the eastern abutment of the bridge carrying the Company's Blackfriars loop line over Gravel-lane.

To extinguish or provide for the extinguishment of all rights of way over the public carriage and other roads streets footpaths ways courts alleys and passages or portions thereof which are proposed to be stopped up and discontinued or diverted and in and over any of the lands to be acquired under the provisions of the intended Act and for vesting the site and soil of such roads streets footpaths ways courts alleys and passages or portions thereof in the Company.

To authorise deviations laterally and vertically from

the lines and levels of any of the intended works as shown on the plans and sections to be deposited as hereinafter mentioned and whether within or beyond the limits prescribed by the Railways Clauses Consolidation Act 1845.

To authorise and provide for the underpinning or otherwise securing or strengthening of any houses or buildings which may be rendered insecure or affected by any of the intended railways widenings and works connected therewith and which houses and buildings may not be required to be taken for the purposes thereof.

To authorise the Company to purchase and take by compulsion or agreement and to hold lands houses tenements and hereditaments in the parishes and places hereinbefore mentioned for the purposes of the intended railways widenings and other works and for the purposes of widening enlarging extending and improving their railways and station and siding accommodation and for roads and approaches and for other purposes of their undertaking and also to acquire by compulsion or otherwise and to hold for all or any of the purposes aforesaid the lands and buildings herein-after mentioned or some of them or some part or parts thereof respectively or estates rights or interests in or easements over the same and the Bill will or may extinguish all public and other rights in over or affecting any such lands and buildings (that is to say):—

In the county of London:—

Land and premises in the parish of St. Saviour Southwark being a public-house known as "King Henry the Eighth's Head" and situate in Union-street.

Lands and houses in the parish of St. Mary Rotherhithe being Nos. 292 294 296 298 and 300 Southwark Park-road and yard and premises at rear thereof and lands and houses Nos. 2 4 6 8 10 12 and 14 Raymouth-road Nos. 203 205 207 and 209 Rotherhithe New-road Nos. 4 6 8 10 12 14 and 16 and Nos. 20 22 24 26 and 28 Debnam's-road and the street forming the approach to such houses from Debnam's-road and lands and houses Nos. 15 16 17 and 18 Corbett's-lane and No. 117 Silwood-street and lands and factory at the east end of Debnam's-road in the occupation of Messrs. W. S. Shuttleworth and Company.

Land in the parish of St. Paul Deptford adjoining the northern side of the Company's London and Greenwich Railway between Trundley's-road and the towing-path of the Grand Surrey Canal.

Lands in the parish of Lewisham on the down side of the Company's main line and being the enclosure numbered 127 on the 1,2500 Ordnance Map (1894-6) of that parish.

Lands in the parish of Lee on both sides of the Company's main line and being the enclosures numbered respectively 84 85 89 91 93 95 96 97 98 100 103 104 and 113 on the 1,2500 Ordnance Map (1894-6) of that parish or some part or parts thereof respectively.

In the county of Kent:—

Lands in the parish of Brechley adjoining the Company's Paddock Wood and Maidstone Railway on the down side thereof being parts of the enclosures numbered 136 and 137 on the 1,2500 Ordnance Map (1897) of that parish.

Lands in the parishes of Chiddington and Leigh adjoining the Company's Railway on the down side thereof at Penshurst Station being parts of the enclosures numbered 400 401 and 415 in the parish of Chiddington and 465 in the parish of Leigh on the 1,2500 Ordnance Map (1896) of those parishes respectively.

To acquire and hold for the extraordinary purposes mentioned in the Railways Clauses Consolidation Act 1845 the lands next hereinafter described (that is to say):—

In the county of London:—

Angerstein's Branch Railway wharf and lands adjacent thereto in the parish of Greenwich.

Lands and houses being Nos. 63 65 67 69 71 and 73 Granville-park, Blackheath, in the parish of Lewisham.

In the county of Kent:—

Lands in the parish of Chelsfield on both sides of the Company's main line adjoining or near to the Halstead Station of the Company being the enclosures numbered 168 288 289 293 and 306 on the 1,2500 Ordnance Map (1896) of that parish.

Lands in the parish of Crayford adjoining the Company's North Kent Railway forming parts of the enclosures numbered 105 106 and 107 on the 1,2500 Ordnance Map (1897) of that parish.

Land in the parish of Tonbridge being part of the Liptons estate and two dwelling-houses thereon adjoining the down side of Southborough Station.

Land in the parish of Dartford adjoining the up side of the Company's Railway and being part of the enclosure No. 237 on the 1,2500 Ordnance Map (1873) of that parish.

Land in the parish of Maidstone containing 27 perches and 11 perches respectively adjoining the down side of the Company's station at Maidstone.

Land in the parish of Whitstable Urban on both sides of the Company's Whitstable Railway forming parts of the enclosures Nos. 51 54 55 and 60 on the 1,2500 Ordnance Map (1898) of the said parish.

A strip of land in the parish of Stanford otherwise Stanford adjoining the down side of the Company's Railway near Westenhanger Station forming parts of the enclosures numbered 57 and 58 on the old Ordnance Map of the said parish.

Lands in the parishes of Ashford and Willesborough being parts of the enclosure No. 298 in the parish of Ashford and No. 112 in the parish of Willesborough on the 1,2500 Ordnance Map (1898) of those parishes.

In the county of Surrey:—

Land at Kenley in the parish of Coulsdon adjoining the down side of Kenley Station.

Land containing 1 rood 3½ perches in the parish of Caterham adjoining or near to the Company's Caterham Station.

To empower the Company to cross divert alter and stop up whether temporarily or permanently all such public carriage and other roads highways streets courts passages footpaths ways pipes sewers rivers streams bridges railways tramways and subways within the parishes and places aforesaid as it may be necessary or convenient to cross divert alter or stop up for the purposes of the Bill and to alter and interfere with telegraph telephone electric pneumatic and other wires mains tubes pipes and apparatus.

To empower the Company to take so much only of any property (in which expression is included houses buildings and manufactories) which may be described in the Bill and shown on the deposited plans as they may require for the purposes of the intended Act without becoming subject to the liability imposed by the 92nd section of the Lands Clauses Consolidation Act 1845 to purchase and take the whole of such property.

To extend the period now limited for the completion of the works mentioned in the agreement scheduled to the South Eastern Railway (Confirmation of Cator Agreement) Act 1897.

To extend the respective periods now limited for the compulsory purchase of the lands severally hereinafter mentioned namely:—

(1) Additional lands in the county of Kent described in and authorised by section 14 (c) of the South Eastern Railway (Various Powers) Act 1885.

(2) Additional lands in the county of London described in and authorised by section 20 sub-section (4) of the South Eastern Railway Act 1892.

To extend the period now limited for the compulsory purchase of the lands required for and for the completion of the works described in and authorised by section 7 of the South Eastern Railway (Various Powers) Act 1885.

To extend the period now limited for the completion of the works described in and authorised by section 8 of the South Eastern Railway Act 1888.

To amend alter or repeal in whole or in part section 96 of the Charing-cross Railway Act 1869.

To provide for the transfer to and vesting in the Company upon such terms and conditions as may have been or may be agreed upon or prescribed or provided for by the intended Act of the respective undertakings of the Chipstead Valley Railway Company and the Epsom Downs Extension Railway Company (hereinafter called "the vested Companies") and of all lands works and other property real or personal and effects powers rights privileges obligations and liabilities of the vested Companies respectively and the benefit of all contracts entered into by or with them or on their behalf so that the Company may be enabled to act in all respects with reference to the undertakings of the vested Companies and the construction and maintenance of the railways and works constituting such undertakings and the purchase of lands for the purposes thereof and the levying demanding and recovering of tolls rates and charges in respect to the said undertakings to all intents and purposes as if the powers conferred by Parliament on the vested Companies had been originally conferred on the Company.

To provide if need be for the dissolution and winding up of the vested Companies or either of them and for the realisation of their respective assets and payment of their respective debts and also to provide for the release and repayment to the persons entitled to or liable for the whole or a portion of the deposit of money made respectively in respect of the applications to Parliament for the Chipstead Valley Railway Act 1893 and the Epsom Downs Extension Railway Acts 1892 and 1897.

To empower the Company for the purposes of such transfer to create and issue shares or stock with or without a preference or priority of dividend and to substitute such shares or stock for shares or stock of the vested Companies.

To extend and enlarge the powers conferred upon the Company by the South Eastern Railway Acts 1881 and 1891 respectively with reference to the construction acquisition leasing holding and maintaining of hotels in connection with their undertaking and to empower them to acquire lease hold maintain and build other hotels in addition to those mentioned or referred to in such Acts.

To authorise the Crowhurst Sidley and Bexhill Railway Company (hereinafter called the "Crowhurst Company") to raise additional capital by the creation and issue of shares or stock and by borrowing and by the creation and issue of debenture stock or by either of those means and to attach to the additional capital so raised such priority or preference as may be deemed desirable or expedient or as may be provided by the Bill.

To authorise the Company to apply to all or any of the purposes of the intended Act any capital or funds now belonging to them or which they are authorised to raise under any previous Act or Acts and to raise for such purposes or for the purposes of any other Act or Acts of the next ensuing Session and for the general purposes of their undertaking additional capital by the creation of new shares or stock with or without a guaranteed or preferential dividend or other special rights or privileges attached thereto or by borrowing or by the creation of debenture stock or by any of such means.

To vary repeal or extinguish all existing rights or privileges in any manner connected with the lands

houses and buildings proposed to be purchased or taken or which would in any manner impede or interfere with the purposes of the intended Act and to confer other rights and privileges.

To amend vary enlarge and extend and if need be repeal all or some of the powers and provisions of (in addition to the Acts hereinbefore specified and named) the several local and personal Acts following namely:—The Act 6 Will. IV. cap. 75 and all other Acts relating to the Company the Epsom Downs Extension Railway Act 1892 and all other Acts relating to the Epsom Downs Extension Railway Company the Chipstead Valley Railway Act 1893 and all other Acts relating to the Chipstead Valley Railway Company the Crowhurst Sidley and Bexhill Railway Act 1897 and all other Acts relating to the Crowhurst Sidley and Bexhill Railway Company.

And Notice is hereby further given that maps plans and sections relating to the objects of the intended Act together with books of reference to such plans and a copy of this notice as published in the "London Gazette" will be deposited on or before the 30th day of November instant for public inspection as follows (that is to say):—

As regards lands and works in the county of London with the Clerk of the Peace for that county at his office at the Sessions House Clerkenwell in that county; as regards lands and works in the county of Kent with the Clerk of the Peace for that county at his office at Maidstone in that county; and as regards lands and works in the county of Surrey with the Clerk of the Peace for that county at his office at the County Hall Kingston-upon-Thames in that county; and that on or before the said 30th day of November a copy of so much of the said plans sections and books of reference as relates to each of the county or other boroughs districts parishes and places in or through which the said works or any part thereof are or is intended to be made or will be situate or in which any lands to be taken compulsorily under the powers of the Bill are situate together with a copy of this notice published as aforesaid will be deposited for public inspection as follows:—

As relates to the parish of St. Paul Deptford with the Clerk of the Greenwich District Board of Works at his office at No. 141 Greenwich-road Greenwich; as relates to the parish of St. Mary Rotherhithe with the Vestry Clerk of that parish at his office at the Public Baths Deptford Lower-road Rotherhithe; as relates to the parish of Leo with the Clerk of the Leo District Board of Works at his office at Old Charlton; as relates to the parish of Lewisham with the Clerk to the Lewisham District Board of Works at his office at Rushey-green Calford-bridge; as relates to the parish of Christchurch Southwark with the Clerk of the District Board of Works for the district of St. Saviour's Southwark at his office at No. 3 Emerson-street Bankside; as relates to the parish of St. Saviour's Southwark with the Clerk of the District Board of Works for the district of St. Saviour Southwark aforesaid; as relates to the parish of St. Mary Magdalen Bermondsey with the Vestry Clerk of that parish at his offices at the Town-hall Spa-road Bermondsey; and as relates to the several other county or other boroughs districts parishes and places mentioned in this Notice in the case of each county or other borough with the Town Clerk of each such county or other borough at his office; in the case of each urban district (not being a borough) with the Clerk of such District Council at his office; in the case of each parish having a Parish Council with the Clerk of the Parish Council at his office or residence, or if there is no Clerk, with the Chairman of that Council at his residence; and in the case of each parish as is comprised in a rural district not having a Parish Council with the Clerk of the District Council at his office.

Printed copies of the intended Bill will be deposited in the Private Bill-office of the House of Commons on or before the 21st day of December 1898.

Dated this 18th day of November 1898.

#### IN PARLIAMENT.—SESSION 1899.

### SOUTH EASTERN and LONDON CHATHAM and DOVER RAILWAY COMPANIES.

(Provisions for United Working and Management by the two Companies; Appointment of Joint Board or Managing Committee and Incorporation thereof; Powers and Duties of such Board or Committee; Provisions as to Raising and Application of Capital during Joint Working, and as to Allocation of the Net Earnings received by the Joint Board or Managing Committee; Provisions as to existing Officers and Servants of the two Companies; Tolls and Charges; As to Certain Property of the Chatham Company; Confirmation of Agreements; Incorporation and Amendment of Acts; and other purposes.)

NOTICE is hereby given, that application is intended to be made to Parliament in the ensuing Session by the South Eastern Railway Company and the London Chatham and Dover Railway Company (hereinafter respectively referred to as "the South Eastern Company and the Chatham Company"), for an Act (hereinafter called "the intended Act") for all or some of the following purposes (that is to say):—

1. To provide for the management, working, and

maintenance as one undertaking, on such terms as have been or as may be agreed on, or as may be defined by the intended Act, of the respective undertakings of the South Eastern Company and the Chatham Company (hereinafter called "the two Companies"), such undertakings (in this Notice called "the undertaking or the undertakings" as the case may be) being held to include all railways, stations, docks, harbours, piers, wharves, steam packets, ferries, bridges, and other works and conveniences, and means of conveyance of every description belonging to, or leased, or worked wholly or in part by the two Companies respectively, jointly, or severally, or jointly with any other Company, and all the lands and easements, and all the other property, estate, chattels, and effects, whether real or personal, which at the time of the commencement of the united working, belong to or are vested in the two Companies respectively, jointly or severally, or which they have power, or may hereafter be authorised to acquire, or which are held in trust for them; and also the rights, powers, privileges, interests, property, and estates which the two Companies respectively possess, whether by way of trust or otherwise, in or relating to any railways, docks, wharves, stations, buildings, fixed plant, lands, property, works, and conveniences connected with the respective undertakings of the two Companies or the working thereof, whether jointly or in common with any other company or companies, corporation or person, or otherwise, and also all rights, easements, powers, and privileges which the two Companies respectively enjoy, or are entitled to exercise over or with respect to the undertakings of other companies, subject to such exceptions, limitations, and provisions as the intended Act may provide.

2. To provide that, during the term of such united working, each of the two Companies shall have full power to work over, and use for all purposes of traffic, the undertaking of the other Company.

3. To provide for the management, working and maintenance by means of a joint board or a managing Committee of the undertakings of the two Companies (hereinafter called "the joint board" and "the managing Committee" respectively), consisting of all or such of the Directors of the two Companies respectively as may be provided by the intended Act, and to incorporate the joint board or the managing Committee as may be provided by the intended Act, with powers to sue and be sued, and to vest in them all or some of the powers now vested in the two Companies respectively, and to provide for the appointment of a general adviser with such powers as the intended Act may provide, and also a standing arbitrator, and to confer upon the joint board or the managing Committee such other powers, with regard to the expenditure of capital or otherwise, as may be necessary or expedient, and to regulate the continuance in office, qualification, removal, election, and remuneration of the joint board or the managing Committee.

4. To make such provision as may be necessary or expedient for the appropriation and expenditure by the joint board or the managing Committee of money properly chargeable to capital of the two Companies respectively, and as to the proportions of the same to be raised and provided by the Companies respectively and also for temporarily providing for any such expenditure out of the receipts of the undertakings.

5. To make provision for the continuance or removal, at the discretion of the joint board or the managing Committee, of the officers and servants of the two Companies, and for the payment of superannuation or other allowances to such officers and servants, in the event of their removal, together with such other or further powers as may be considered expedient.

6. To regulate the division of the net receipts accruing in respect of the united working of the undertakings between the two Companies in such proportions as have been or may be agreed upon by the two Companies, or as may be provided by the intended Act.

7. To empower the joint board, or the managing Committee as the case may be, to levy the tolls, rates, fares, and charges at present authorised to be levied by the two Companies respectively.

8. To provide, as regards the separate undertaking of the Chatham Company, that the portions remaining unsold of the superfluous lands described and referred to in the first and second awards by the arbitrators, under the London Chatham and Dover Railway (Arbitration) Act, 1890, shall remain and be dealt with by the trustees, in whom the same are vested, as the exclusive property of that Company, and that the moneys realised by the sale thereof shall be applied by them in manner directed by the said awards.

9. To confirm any agreements which have been or may be made between the two Companies with reference to the matters aforesaid, or any of them, before the passing of the intended Act, and to sanction and confirm anything done under any such agreement.

10. To incorporate all or some of the provisions of the Companies Clauses Consolidation Act, 1845; the Railways Clauses Consolidation Act, 1845; and any Acts amending those Acts.

11. To alter, amend, extend, and enlarge or repeal, so far as may be necessary, the local and personal Acts following, or some of them (that is to say):—6 Will. IV., cap. 75, and all other Acts relating to or affecting the South Eastern Company; 16 and 17 Vict., cap. 132, and all other Acts relating to or affecting the Chatham Company.

12. And Notice is hereby further given, that on or before the 21st day of December next, printed copies of the Bill for the intended Act will be deposited in the Private Bill-office of the House of Commons.

Dated this 19th day of November, 1898.

### GREAT EASTERN RAILWAY (GENERAL POWERS.)

(New Railways in counties of Essex and Norfolk and the Isle of Ely and county of Cambridge; Widening of Company's Cambridge, Colchester, and Tending Hundred lines; Lengthening of bridge carrying Company's Railway at Suzzumundham; Additional lines of rails and diversion of road at Ipswich; Common lands; Diversion of footpaths in parishes of Walton, Suffolk, and Hatfield Peverel, Essex; Tolls; Compulsory purchase of lands; Exclusion of Section 92 of Lands Clauses Consolidation Act, 1845; Purchase of additional lands in counties of Middlesex, Essex, Suffolk, and Norfolk; Diversion of Alders Brook and footpath in county of Essex; Confirmation of purchase of lands in counties of Middlesex, Essex, and Suffolk; Further money powers; Extension of time for completion of works authorised by Company's General Powers Act, 1890; Abandonment of construction of Cromer Junction No. 2, authorised by Great Eastern Railway Company and Midland and Great Northern Railways Joint Committee Act, 1898; Representation of the Company at meetings of Sheffield District Railway Company; Amendment of Acts, &c.)

NOTICE is hereby given, that application is intended to be made to Parliament in the ensuing Session by or on behalf of the Great Eastern Railway Company (in this Notice called "the Company") for leave to bring in a Bill for the following purposes or some of them (that is to say):—

1. To authorise the Company to make and maintain the following railways and works with all necessary stations, sidings, approaches, buildings, roads, and other works, and conveniences connected therewith (that is to say):—

(a) A Railway (No. 1), wholly in the parish of Leyton, in the urban district of Leyton, in the county of Essex, commencing by a junction with the Company's original Cambridge main line at a point about 1 chain north-westward from Quarter Mile lane and terminating by a junction with the Company's Loughton, Epping, and Ongar branch, at or near the western side of the bridge carrying the Leyton-road over that branch.

(b) A Railway (No. 2), wholly in the Isle of Ely and county of Cambridge, commencing in the parish or chapel of Manes in the rural district of North Witchford by a junction with the goods siding on the north-east side of the Company's Ely and Peterborough branch at a point about 26 chains north-westward from the passenger booking office at Manes Station, and terminating in the parish of Upwell in the rural district of Wisbech in the north-western corner of the field numbered 26 on the 1:2500 Ordnance Map (1886) of the last-mentioned parish.

(c) A Railway (No. 3), wholly in the parish of North Walsham, in the urban district of North Walsham, in the county of Norfolk, commencing by a junction with the Cromer branch of the Company's East Norfolk line at a point about 23 chains south-eastward from the goods shed at the Company's North Walsham Station, and terminating by a junction with the said Cromer branch at a point about 18 chains north-westward from the passenger booking office at the same station.

(d) A Railway (No. 3A), wholly in the parish of North Walsham aforesaid, commencing by a junction with the intended Railway No. 3, above described, at a point about 8½ chains southward from the south end of the passenger platforms at the North Walsham Station of the Midland and Great Northern Railways' Joint Committee, and terminating by a junction with the Railway of the said Joint Committee at a point about 3½ chains south from the same south end of the said platforms.

(e) A Railway (No. 4), wholly in the parish of Buntingford, in the rural district of Erpingham in the county of Norfolk, commencing by a junction with the Railway No. 1 authorised by the Midland Railway Act 1896, at a point about 3 furlongs and 6 chains from the authorised commencement of that Railway as shown on the plans deposited for and referred to in the said Act, measuring along the centre line of the said Railway as shown on the said plans, and terminating with the Cromer line of the Midland and Great Northern Railways' Joint Committee at a point about 19 chains, measured along the said Cromer line in a north-westerly direction from the bridge by which the said line is carried over the road numbered 191 on the 1:2500 Ordnance Map (1885) of the said parish of Buntingford.

(f) A widening (No. 1) of the Company's original Cambridge main line between the north-western end of the Company's Temple Mills marshalling sidings, and the bridge carrying the Company's Cambridge main line over the River Lea at Tottenham. The said widening will be made or pass from, in, through, or into the parishes and urban districts of Leyton and Walthamstow, both in the county of Essex and Tottenham, in the county of Middlesex.

(g) A widening (No. 2) of the Company's Cambridge main line, commencing in the parish and urban district of Walthamstow in the county of Essex at a point about two chains south-eastward from the bridge, carrying the said line over the River Lea at Tottenham, and terminating in the

parish of Hoddesdon (urban), in the urban district of Hoddesdon, in the county of Hertford, at a point about 6 chains north-eastward from the junction therewith of the Company's Hertford branch line.

The said widening will be made, or pass from, in, through, or into the parishes following, or some of them, that is to say, the parish of Walthamstow aforesaid, the parishes and urban districts of Tottenham, Edmonton, and Enfield, in the county of Middlesex, the parish and urban district of Cheshunt, the parishes of Wornley and Broxbourne, in the rural district of Ware, in the county of Hertford, and the parish of Hoddesdon (urban) aforesaid.

(b) A widening (No. 3) wholly in the county of Essex of the Company's Colchester main line, between a point about 3½ chains eastward from the western side of the bridge carrying Romford-road over the said main line and the bridge carrying the said main line over South-street at Romford Station.

The said widening will be made, or pass from, in, through, or into, the parish and urban district of Ilford, the parish of Dagenham, in the rural district of Romford, and the parish of Romford (urban) in the Romford urban district.

(i) A widening (No. 4) wholly in the county of Essex, of the Company's Colchester main line, commencing in the parish of Romford (urban) in the Romford urban district at a point about 3 chains westward from the bridge, carrying that main line over South-street at Romford Station, and terminating in the parish of Romford (rural) in the Romford rural district at a point about 9½ chains eastward from the bridge, carrying the Brentwood-road over the said main line at Romford factory.

(j) A widening (No. 5), wholly in the county of Essex, of the Company's Tendring Hundred line, commencing in the parish of Wivenhoe, in the urban district of Wivenhoe, at a point about 6 chains eastward from the passenger booking office at Wivenhoe Station and terminating in the parish of Elmstead, in the rural district of Tendring, at a point about 27½ chains eastward from the same booking office.

(k) A widening (No. 6), wholly in the parish of Saint Mary Stoke, in the county borough of Ipswich, in the county of Suffolk, of the Company's Colchester main line between two points, distant respectively 25 chains and 7 chains (measured in each case along the said main line) south-eastward from the passenger booking office at Ipswich Station, together with the conversion into open cutting of the tunnel, in the same parish, leading to Ipswich Station.

(l) A lengthening, in the parish of Saxmundham, in the rural district of Plumstead, in the county of Suffolk, of the bridge by which the Company's East Suffolk line is carried over High-street (north entrance), Saxmundham, immediately to the northward of Saxmundham Station, for a distance on its south-east side of about 20 ft.

(m) The laying down and maintaining, in the parish of Saint Mary Stoke, in the county borough of Ipswich, in the county of Suffolk, of an additional line or additional lines of rails under and on either side of the London-road, where the same is carried over the Company's main line.

(n) A diversion, in the parish of St. Mary Stoke aforesaid, of the public carriage road called Kneelagh-road, for a distance of about 11 chains north-westward from a point about 10 chains north-westward from the level crossing of that road, over the Company's goods siding at Ipswich Station.

It is intended by the Bill to take for or in connection with the purposes of the intended works certain lands being, or reputed to be, common or commonable lands, of which the following are particulars, and the estimated quantities proposed to be taken, namely:—

Work.	Name by which the lands are known.	Parish and County in which the lands are situate.	Quantity within the limits of deviation.	Estimated quantity to be taken.
Railway, No. 4.	East Rinton Common.	Parish of Rinton, in the county of Norfolk.	a. r. p.	a. r. p.
	Leyton Marshes	Parish of Leyton in the county of Essex.	1 0 4	0 2 0
Widening, No. 1.	Walthamstow Marshes	Parish of Walthamstow, in the county of Essex.	2 2 2	1 0 0
	Tottenham Marshes	Parish of Tottenham in the county of Middlesex.	1 0 28	0 2 28
Widening, No. 2.	Cheshunt Marshes	Parish of Cheshunt, in the county of Hertford.	0 0 14	0 0 14

2. To empower the Company to divert on the lands in the parishes next hereinafter mentioned and in manner to be shown on the plans to be deposited as hereinafter mentioned the following footpaths:—

(a) The footpath crossing on the level the Company's Felixstowe Railway at the north end of the engine shed at or near the Felixstowe Beach Station, in the parish of Walton, in the urban district of Felixstowe and Walton, in the county of Suffolk.

(b) The footpath crossing on the level the Company's Colchester main line, at a point about 25 chains north-eastward from Hatfield Peverel Station, in the parish of Hatfield Peverel, in the rural district of Braintree, in the county of Essex.

And to empower the Company to stop up and to vest in them free from all public and other rights in, over, or affecting the same, the site, and soil of so much of the said footpaths respectively as is on the land or property of the Company, and will be rendered unnecessary by the proposed diversions thereof respectively.

3. To authorise the Company in the construction of any of the works proposed to be authorised by the intended Act to deviate from the lines and levels thereof shown on the plans and sections to be deposited as hereinafter mentioned to any extent to be prescribed by the said intended Act whether within or beyond the limits prescribed in either case by "The Railways Clauses Consolidation Act 1845," and to stop up, alter, or divert temporarily or permanently all or any turnpike or other roads and highways, streets, railways, tramways, bridges, rivers, canals, streams, waters, watercourses, sewers, drains, pipes, telegraphic and other tubes, wires and apparatus, and all other constructions or works of any description which it may be necessary or convenient to stop up, alter, or divert for any of the purposes of the intended Act.

4. To empower the Company to demand, levy, take, and recover tolls, rates, and charges for or in respect of the railways and works to be authorised by the intended Act, and to confer exemptions from the payment of such tolls, rates, and charges respectively.

5. To extinguish all public or private rights of way, or other rights, if any, over, or affecting any road, footpath, or way, or any portion thereof, to be diverted or stopped up under the intended Act, or over any Railway of the Company, at the point or points at which it is now crossed, by any such road, footpath, or way, or portion thereof so proposed to be diverted or stopped up, and to vest in the Company or the adjoining owners, or partly in one and partly in the other, the site and soil of the road, footpath, or way, or portion thereof stopped up, freed and discharged from all or any such rights.

6. To authorise the Company to purchase by compulsion or agreement, lands, houses, and buildings, and rights and easements in, over, or affecting lands, houses, and buildings for all or any of the purposes of the intended Act.

7. To authorise the purchase of so much only of any house, building, manufactory, or property as may be required for the purposes of the intended works, or of the Bill, notwithstanding anything contained in the 92nd Section of the Lands Clauses Consolidation Act 1845.

8. To authorise the Company to purchase by agreement additional lands for extraordinary purposes, and for getting ballast and materials, and any other purposes of the undertaking.

9. To authorise the Company to purchase by compulsion or agreement, for the purposes of extending their stations, sidings, warehouses, wharves, depots, and other accommodation for minerals, goods, and cattle traffic, and for any other purposes connected with their undertaking, the lands, houses, and buildings hereinafter described or referred to, or some of them, or some part or parts thereof respectively, and to sanction and confirm the purchase of any of the lands that may have been purchased before the passing of the intended Act, and to exercise the powers hereinafter mentioned (that is to say):—

In the County of Middlesex.

(a) Lands, houses, and buildings in the parish and urban district of Enfield, lying on the north side of and adjoining Lincoln-road, and on the east side of and adjoining the Company's Enfield branch.

In the County of Essex.

(b)—1. Two pieces of land about 1 chain in width on the north-west of and adjoining the Company's Colchester main line, and lying as to part between the river Boding and Alders Brook, and as to other part to the west of the said brook.

2. Three pieces of land on the south-east side of and adjoining the same main line, and being portions of the properties numbered respectively 25 on the 1,250 Ordnance Map (1896) of the parish of Little Ilford, and 387 and 388 on the 1,250 Ordnance Map (1896) of the parish of Ilford.

The said pieces of land (1) and (2) are respectively situate partly in the parish of Little Ilford, in the urban district of East Ham, and partly in the parish and urban district of Ilford.

And the Bill will or may authorise the Company to divert the Alders Brook aforesaid, and to carry the same from a point about 2 chains northward of the main line aforesaid through the pieces of land (b) 1 above-mentioned into the River Boding aforesaid, and will empower the Company to stop up, and will vest in them the site and soil of so much of the said brook as lies to the south of the point at which the intended diversion thereof will commence, and passes through the lands (b) 1 and 2 above-mentioned through lands now belonging to the Company.

(c) A piece of land in the parish of Downham, in the rural district of Billericay, on the north-east side of and adjoining the Company's Southend line, near their Wickford Station yard, and forming part of the field numbered 266 on the 1,250 Ordnance Map (1896) of the said parish.

And the Bill will or may enable the Company to divert in manner to be shown on the plans to be deposited as hereinafter mentioned, the footpath now crossing on the level the Company's Southend Railway aforesaid, opposite the south-west side of the said piece of land, and to stop up and vest in the Company, free from all public or other rights in, over, or affecting the same,

the site and soil of so much of the said footpath as will be rendered unnecessary by the intended diversion thereof.

(d) Three pieces of land in the parish of Great Clacton, in the urban district of Clacton, on the north-west side of, and adjoining the Clacton branch of the Company's Railway, and forming parts of the properties, numbered 321, 323, and 388 on the 1,250 Ordnance Map (second edition, 1897) of the said parish.

And the Bill will or may empower the Company to stop up and discontinue the level crossing now existing over their said branch at or near the boundary between the properties numbered 321 and 388 as aforesaid, and will extinguish all public or other rights in, over, or affecting the same.

(e) Two houses in the parish of West Ham, in the county borough of West Ham, numbered 111 and 113, in Angel-lane, West Ham.

(f) The house numbered 15, Angel-place, in the parish of West Ham, in the county borough of West Ham, and the soil of so much of Angel-place as adjoins the said house.

And the Bill will declare that the purchase of the said house (15, Angel-place), shall, for the purposes of Section 31 of the Great Eastern Railway (General Powers) Act 1893, be deemed to be a purchase of the same under the powers of the last-mentioned Act:—

(g) Three pieces of land in the parish of Colchester, in the borough of Colchester, on the north side of and adjoining the Company's Colchester main line, and forming parts of the properties numbered respectively 198, 199, and 200 on the 1,250 Ordnance Map (1876) of the said parish.

(h) A piece of land with the malthouse and buildings thereon, in the parish of Mark's Tey, in the rural district of Lexden and Winstree, on the south side of, and adjoining the Company's Colchester main line, and on the east side of and adjoining Station-road, leading to Mark's Tey Station.

(i) A piece of land partly in the parish of Mark's Tey aforesaid, and partly in the parish of Aldham, in the same rural district, adjoining the Company's Colchester main line and forming part of the property numbered 60 in the parish of Mark's Tey, and 297 in the parish of Aldham, on the 1,250 Ordnance Map (second edition, 1897) of the said parishes.

(j) Three pieces of land in the parish of Aldham aforesaid, on the south side of and adjoining the Company's Colchester main line, and forming parts of the properties numbered 301, 302, and 303 on the 1,250 Ordnance Map (1897) of the said parish.

(k) A piece of land in the parish of Copford, in the same rural district, adjoining and on the south side of the Company's Colchester main line, forming part of the property numbered 200 on the 1,250 Ordnance Map (second edition, 1897) of the said parish.

(l) Three pieces of land in the parish of Feering, in the rural district of Braintree, on the south-east side of and adjoining the Company's Colchester main line, being parts of the properties numbered 363, 365, and 377 on the 1,250 Ordnance Map (second edition, 1897) of the said parish.

(m) A piece of land in the parish of Mark's Tey aforesaid on the south-east side of and adjoining the Company's Colchester main line, and forming part of the property numbered 227 on the 1,250 Ordnance Map (second edition, 1897) of the said parish.

(n) Two pieces of land in the parish of Saffron Walden, in the borough of Saffron Walden, on the northern side of and adjoining the Company's Saffron Walden Branch lying between South-road and Thaxted-road, Saffron Walden.

In the County of Suffolk.

(o) Lands and buildings in the parish of Lowestoft, in the borough of Lowestoft, adjoining the sidings and property of the Company on the north side of their Herring Basin at Lowestoft and extending northwards to the road or way leading from Battery Green-road to the beach, and lying between Battery Green-road aforesaid and low water mark of ordinary Spring tides.

(p) A strip of land in the parish of St. Mary Stoke, in the county borough of Ipswich, on the north-east side of the Company's Colchester main line, and abutting towards the south-east on the London-road.

(q) Land and buildings in the parish of Saxmundham in the rural district of Plumstead on the south-east side of and adjoining the Company's Saxmundham Station.

(r) A strip of land in the parish of Walton in the urban district of Felixstowe and Walton on the south side of and adjoining the Company's new station at Felixstowe, and being part of the property numbered 126 on the 1,250 Ordnance Map (1881) of the said parish.

In the County of Norfolk.

(s) A piece of land in the parish of Buckenham in the rural district of Blofield on the north-east side of and adjoining the Company's Buckenham Station on their Norwich, Reedham, and Yarmouth line, being part of the property numbered 48 on the 1,250 Ordnance Map (1882) of the said parish.

(t) A piece of land in the parish of New Hunstanton in the urban district of New Hunstanton on the west side of and adjoining the Company's Hunstanton line, and being part of the property numbered 264 on the 1,250 Ordnance Map (1887) of the said parish.

(u) Lands and houses in the said parish of New Hunstanton on the west side of the Company's Hunstanton line, being part of the property numbered 369 on the 1,250 Ordnance Map (1887) of the said parish.

(v) Land and buildings in the said parish of New Hunstanton on the east side of and adjoining

the Company's Hunstanton line, lying between the road numbered 267 on the 1/2500 Ordnance Map (1887) of the said parish and the Company's Hunstanton line.

10. To sanction and confirm the purchase by the Company, and to enable them to hold and use for all or any purposes of their undertaking the following lands already acquired by them, and to sanction and confirm the expenditure by the Company of money for, or in connection with, the purchase of the said lands, or any of them (that is to say):—

In the County of Middlesex.

(a) A piece of land in the parish and urban district of Edmonton, on the west side of and adjoining the Company's Enfield Branch, about 12 feet in width at its northern end and about 25 feet at its southern end, and extending from Silver-street to Hyde-lane.

In the County of Essex.

(b) A piece of land in the parish of Romford (rural), in the rural district of Romford, on the south-east side of and adjoining the Company's Colchester main line, being part of the property numbered 391 on the 1/2500 Ordnance Map (1871) of the said parish, and bounded towards the north-west by land belonging to the Company, on the west by the Brentwood-road, on the south by the road numbered 395 on the said Ordnance Map, and on the south-east by houses abutting on the road numbered 392 on the said Ordnance Map.

(c) Two pieces of land in the said parish of Romford (rural), with the houses and buildings on one of the same, being the properties numbered 354 and 390 on the said Ordnance Map.

In the County of Suffolk.

(d) Five pieces of land in the parish of St. Mary Stoke in the county borough of Ipswich, lying between the River Orwell and Baneflagh-road, and being the properties numbered 74, 75, 76, and 141, and part of the property numbered 58 on the 1/2500 Ordnance Map (1884) of the said parish.

(e) Two pieces of land in the parish of Walton, in the urban district of Felixstowe and Walton, on the north side of and adjoining the Company's new station at Felixstowe, and now or heretofore part of the properties numbered 125 and 126 on the 1/2500 Ordnance Map (1881) of the said parish.

11. To authorise the Company for all or any of the purposes of the intended Act or other the purposes of the Company or of the Bill to raise or borrow and appropriate any capital which they may have power to raise or borrow, and which may not be required for the purposes for which it is now authorised to be raised or borrowed, and to raise further capital by the creation and issue of ordinary or deferred stock, or by preference stock, or preference stock convertible into ordinary stock, at such times and upon such terms (pecuniary or other) and conditions as the Company may think proper, or the Bill may prescribe, and by debenture stock and by mortgage, or by any or either of such means.

12. To further extend the time now limited for the completion of the widening and improvement authorised by Section 5, Subsection (J), of the Great Eastern Railway (General Powers) Act 1890, of the Company's Felixstowe Railway, the time for the completion of which was extended by the Great Eastern Railway (General Powers) Act 1895, and the Great Eastern Railway (General Powers) Act 1897.

13. To authorise and empower the Company to relinquish and abandon the construction of the Junction Railway authorised by Section 31 (2) of the Great Eastern Railway Company and Midland and Great Northern Railways Joint Committee Act 1898, and therein called "the Cromer Junction No. 2."

14. To make provision for the appointment by the Company whilst shareholders of the Sheffield District Railway Company, of some person, to attend any meeting of the last-mentioned Company, and to vote and otherwise act on behalf of the Company thereat, and so far as may be necessary, to amend the Sheffield District Railway Act 1898, in that behalf.

15. To alter, amend, extend, or repeal the provisions or some of the provisions of the Great Eastern Railway Act 1862, and any other Act or Acts, relating to the Company or their undertaking, and the Great Eastern Railway Company and Midland and Great Northern Railways Joint Committee Act 1898.

16. To vary or extinguish all rights and privileges inconsistent with, or which would in any way interfere with, the purposes of the Bill, and to confer other rights and privileges.

Plans and sections showing the line, situations, and levels of such or so much of the works proposed to be authorised by the Bill (so far as the same are works of the second class mentioned in the Standing Orders of either House of Parliament) and the lands and other property in or through which the same will be made or pass as are or is proposed to be made, or will be situate in any county hereinafter mentioned, and plans also of the other lands and property in any such county intended to be compulsorily taken under the powers of the Bill, together with a book of reference to such plans respectively, containing the names of the owners and lessees, or reputed owners and lessees, and of the occupiers of such lands and other property, together with, in the case of each deposit, a copy of this Notice, as published in the "London Gazette," will, on or before the 30th day of November instant, be deposited for public inspection as follows (that is to say): As regards works and lands in the county of Middlesex with the Clerk of the Peace for that county at his office at the Guildhall, Westminster; as regards works and lands in the county of Essex with the Clerk of the Peace for that county at his office at Chelmsford; as regards works and lands in the county of Suffolk with the Clerk of the Peace for that county at his office at Ipswich; as regards works and lands in the county of Norfolk with the Clerk of the Peace for that county at his office at Norwich; as regards works and lands in the Isle of Ely, in the county of Cambridge, with the Clerk of the Peace for the Isle of Ely at his office at Wisbech; as regards works and lands in the county of Cambridge with the

Clerk of the Peace for that county at his office at Chertsey; and as regards works and lands in the county of Hertford with the Clerk of the Peace for that county at his office at Hertford; and on or before the same day copies of so much of the said plans, sections, and book of reference as relate to each of the areas hereinafter mentioned in or through which the intended works proposed to be authorised by the Bill will be made, or in which any lands or other property intended to be taken compulsorily are situate, together with a copy of this Notice, will be deposited for public inspection as follows (that is to say): In the case of the parishes of Tottenham, Edmonton, Enfield, Leyton, Walthamstow, Ilford, Little Ilford, Romford (urban), Wivenhoe, Great Clacton, Walton, New Hunstanton, North Walsham, Cheshunt, and Hoddesdon (urban), with the Clerk of the district council, for the respective urban district in which the respective parish is above-stated to be situate at his office.

In the case of the parishes of Dagenham, Romford (rural), Feering, Hatfield Peverel, Elmstead, Downham, Mark's Tey, Aldham, Copford, Saxmundham, Runtun, Buckenham, Manea (parish or chapelry), Upwell, Wormley, and Broxbourne, where there is a parish council of the respective parish with the clerk, or if there is no clerk, with the chairman of the respective parish council at his residence, and where there is no parish council of the respective parish, with the clerk of the district council for the rural district in which the respective parish is above stated to be situate at his office.

In the case of the parish of Colchester with the Town Clerk of the borough of Colchester at his office;

In the case of the parish of West Ham with the Town Clerk of the county borough of West Ham at his office;

In the case of the parish of Saffron Walden with the Town Clerk of the borough of Saffron Walden at his office;

In the case of the parish of Saint Mary Stoke, with the Town Clerk of the county borough of Ipswich at his office;

In the case of the parish of Lowestoft with the Town Clerk of the borough of Lowestoft at his office.

Printed copies of the Bill will be deposited in the Private Bill-office of the House of Commons on or before the 21st day of December next.

Dated this 16th day of November, 1898.

EDWARD MOORE,

Liverpool-street Station, E.C.,

Solicitor for the Bill.

Parliamentary Agents.

IN PARLIAMENT.—SESSION 1899.

## LONDON and SOUTH WESTERN RAILWAY.

(Widening extension and improvement of Waterloo Station and Purchase by Compulsion &c. of Lands &c. in parish of St. Mary Lambeth; Stopping up and widening and improvement of and construction of Arches &c. over Streets in same parish; Removal of and special provisions as to Church and Schools of All Saints District parish of St. Mary Lambeth and annexion of district to adjoining parish of St. John Waterloo-road; Powers to Lord Bishop of Rochester the Incumbents of All Saints and St. John and the Ecclesiastical Commissioners; Closing and removal of Station of Necropolis Company at Waterloo and provision of substituted Station; Widening of Company's Basingstoke and Salisbury line; New road and compulsory purchase of Lands in parish of Sunninghill Berks; Common Lands, exchange of Lands with Sunninghill Fuel Allotment Trust; Stopping up of Streets Roads Highways &c.; Tolls; Compulsory Purchase of Lands, and exemption from Section 92 of Lands Clauses Consolidation Act 1845; Purchase by compulsion &c. of additional Lands in counties of London, Wilts, Somerset, and Devon; Confirmation of purchase of Lands &c. in counties of Cornwall Devon Southampton and Surrey; Agreements with Local Authorities as to sites for Labouring Class Dwellings; Use of steam or other mechanical power on Railway and portions of Railway authorised by Acts of 1865 1871 and 1873; Application of Funds and further Money Powers to Company; Amendment of Acts &c.)

NOTICE is hereby given that application is intended to be made to Parliament in the ensuing Session for leave to bring in a Bill for effecting the purposes or some of the purposes following (that is to say):—

1. To authorise and empower the London and South Western Railway Company (hereinafter called "the Company") to widen extend and improve their Waterloo Station in the parish of Saint Mary Lambeth in the county of London and for that purpose or in connection therewith to confer upon the Company the powers hereinafter mentioned or some of them and to make provision with respect to the following matters or some of them (that is to say):—

(a) To acquire by agreement or compulsorily in the parish of Saint Mary Lambeth in the county of London—

(i) Lands houses and buildings (including the district church of All Saints and the schools attached thereto) and also the station works lands and buildings belonging to or held on lease or occupied by the London Necropolis and National Mausoleum Company (hereinafter referred to as "the Necropolis Company") lying to the south-west and south-east of and adjoining the Company's Waterloo Station and between Waterloo-road Westminster Bridge-road Lower Marsh and York-road;

(ii) Lands houses and buildings lying between Waterloo-road and Cornwall-road and on the north side of Peartree-street.

(c) Lands houses and buildings lying between

Waterloo-road Cornwall-road Peartree-street and Lower Marsh.

(d) Lands houses and buildings abutting on the south-east side of Belvedere-road and between Westminster Bridge-road and Guildford-street.

(b) To close and stop up for public and other traffic the following roads and highways in the said parish of Saint Mary Lambeth or parts thereof respectively (that is to say):—Griffin-street Granby-place Granby-gardens Little York-street a street or road (unnamed) leading eastward or south-eastward from Griffin-street to Aubin-street Sapphire-place Shrub-place or Frederick-place Launcelot-street Aubin-street Chartley-place Christie's-place Holmes-terrace and Barnes-terrace;

(c) To widen and improve York-street in the said parish of Saint Mary Lambeth between York-road and Lower Marsh and to cover over by an arch or arches so much of that street as lies between a point about 63 yards south-east of York-road and a point about 53 yards north-west of Lower Marsh;

(d) To cross by an arch Addington-street at its south-eastern corner in the said parish of Saint Mary Lambeth;

(e) To lay down and maintain sidings and works over the arches to be constructed as aforesaid over York-street and a portion of Addington-street aforesaid.

2. To provide if thought necessary or expedient for the removal of the church and schools of All Saints' district in the parish of Saint Mary Lambeth aforesaid and for the discontinuance of that district as a separate district or parish and its annexation to the adjoining district or parish of St. John Waterloo-road and to confer all necessary powers in reference to the matters aforesaid upon the Lord Bishop of Rochester the incumbents of All Saints' and Saint John aforesaid and the Ecclesiastical Commissioners respectively and especially if so agreed or thought expedient to enable the Ecclesiastical Commissioners to sell and convey to the Company or as they may direct or agree the church and schools aforesaid and the sites thereof and any other property belonging to the first-mentioned district or the incumbent or to any trustees in respect thereof and to give effect to discharges to the Company for the consideration for the sale and conveyance and to make provision as to the appropriation and application of any moneys to be paid by the Company in respect of such sale and conveyance.

3. To empower the Company to close and remove the station of the Necropolis Company at Waterloo Station and the line or lines of rails leading thereto and to provide and demise to that Company upon and subject to such terms and conditions (pecuniary or other) as may be agreed between the Company and the Necropolis Company or as may be prescribed by or under the Bill of a substituted station and line or lines of rails for the traffic of the Necropolis Company and to cancel vary or modify all or any agreements subsisting between the Company and the Necropolis Company with respect to the existing station and line or lines of rails aforesaid or the use thereof and especially (but not exclusively) of certain agreements dated respectively the 10th day of October 1876 the 13th day of June 1888 and the 22nd day of February 1889 between the Company and the Necropolis Company and to vary and modify and as so varied and modified to apply to the substituted station and line of rails aforesaid and the traffic of the Necropolis Company thereat and thereover and to the two Companies in respect thereof the provisions or some of the provisions of Sections 21 to 25 of the London Necropolis and National Mausoleum Act 1853 and to confer upon the Necropolis Company all such powers as may be necessary or convenient for the purposes of the Bill and to enable them to give valid and effectual discharges for any purchase money compensation or other moneys which may become payable to them under or by reason of the exercise of the powers to be conferred by the Bill.

4. To authorise the Company to make and maintain the works hereinafter mentioned or some or one of them or some part or parts thereof respectively with all proper and sufficient bridges stations roads buildings and other works and conveniences connected therewith respectively (that is to say):—

(i) The widening of the Company's Basingstoke and Salisbury line on its northern side commencing at or near the mile-post indicating 75 miles from London in the parish of Newton Toney in the rural district of Amesbury in the county of Wilts and terminating at a point about 23 chains measured in an easterly direction along the said Railway from the footbridge at Grately Station in the parish of Grately in the rural district of Andover in the county of Southampton.

The proposed widening will be made or pass from in through or into the parishes following or some of them (that is to say) the parish of Newton Toney in the rural district of Amesbury in the county of Wilts and the parish of Upper or Over Wallop in the rural district of Stockbridge and the parish of Grately in the rural district of Andover both in the county of Southampton;

(2) A new road wholly in the parish of Sunninghill in the rural district of Windsor in the county of Berks commencing by a junction with Station-road (leading to Ascot Station) on its eastern side immediately to the north of the Company's goods-yard and terminating by a junction with the Brockenhurst-road at a point about 2½ chains south of the southern mouth of the culvert under the Company's Staines and Wokingham line about 16 chains eastward from the subway at Ascot Station.

It is intended for the purposes of the said new road to take part of the lands in the parish of Sunninghill aforesaid known as Sunninghill Bog and being or reputed to be common or commonable lands of which

lands about 4a. 2r. 3lp. will be included within the limits of deviation for the said road to be shown on the plans to be deposited as hereinafter mentioned and it is estimated that 4a. 2r. Op. of the said land will be taken and the Bill will or may empower the Company to purchase by compulsion or otherwise;

(3) A piece of land in the parish of Sunninghill in the rural district of Windsor in the county of Berks numbered 334 and marked "Glebe" on the 1/2500th Ordnance Map (1888) of that parish and will or may provide for the transfer of the said piece of land by the Company to the Sunninghill Fuel Allotment Trust and will or may require the said Sunninghill Fuel Allotment Trust to accept the same in exchange for and as the consideration for the conveyance to the Company of the said lands part of Sunninghill Bog.

5. To empower and enable the Company to transfer to the Sunninghill Fuel Allotment Trust lands now belonging to or to be acquired by the Company by way of exchange for and as the consideration or part consideration for the conveyance to the Company of so much as now belongs to the said Trust of the land required for the making of the new road in the parish of Sunninghill in the county of Berks hereinafter described and to enable the said Trust either to accept the same or to accept a consideration in money for the conveyance aforesaid by them to the Company and in the latter case to give a valid and effectual discharge for such consideration.

6. To authorise and empower the Company for any of the purposes of the Bill to stop up and discontinue for public traffic public streets roads or highways or any part or parts thereof where they are or become the owners or occupiers of all lands and houses on both sides of the road or highway or the part or parts thereof intended to be stopped up.

7. To authorise the Company to deviate laterally from the lines of the intended works to the extent shown on the plans to be deposited as hereinafter mentioned or as may be provided by the Bill and also to deviate vertically from the levels shown on the sections to be deposited as hereinafter mentioned.

8. To empower the Company to cross open or break up divert alter or stop up or interfere with whether temporarily or permanently all such roads highways alleys courts squares passages footpaths navigations rivers creeks bridges sidings tramways subways pneumatic tubes watercourses sewers aqueducts gas and other pipes and telegraphic and electric apparatus within the parishes townships extra-parochial and other places as aforesaid or any of them as it may be necessary or convenient to cross open or break up divert alter stop up or interfere with for any of the purposes of the Bill.

9. To authorise the Company to demand take and recover tolls rates and duties upon or in respect of the intended works to be constructed under the powers of the Bill or any part or parts thereof respectively and to confer exemptions from the payment of such tolls rates and duties.

10. To authorise the Company to purchase and take by compulsion or otherwise for the purposes of the intended works and of the Bill lands houses tenements and hereditaments or estates rights interests or easements in over or affecting the same and to vary or extinguish all or any rights and privileges in over or affecting any such lands tenements or hereditaments and to exempt the Company from the provisions of the 92nd section of the Lands Clauses Consolidation Act 1845 as regards any house building or manufactory to be purchased or taken by them under the powers of the Bill.

11. To empower the Company for widening enlarging extending and improving their Railway and stations and siding accommodation and for roads and approaches and for taking and getting ballast and for depositing spoil and for the erection of labouring class dwellings or other buildings and for other purposes of their undertaking to purchase and acquire by compulsion or otherwise the lands and buildings hereinafter mentioned or some of them or some part or parts thereof respectively or estates rights or interests in or easements over the same and the Bill will or may extinguish all public and other rights of way or other rights in over or affecting any such lands and buildings (that is to say):—

(A) Lands and buildings in the parish of Saint Mary Lambeth in the county of London lying between Boniface-street Maxwell-terrace Upper-marsh and Stangate-street;

(B) Lands houses and buildings in the said parish of Saint Mary Lambeth lying between and bounded by Waterloo-road Morpeth-place Cornwall-road and the houses and premises abutting upon the south-eastern side of Sandell-street;

(C) Lands in the parish of Saint Mary Battersea in the county of London abutting on and on the south side of the Company's main line of Railway and lying between Russell-street and Culvert-road.

(D) Lands in the parish of Idmiston in the rural district of Amesbury in the county of Wilts abutting and on both sides of the Company's Railway and lying between the road which passes under the Railway immediately to the south-west of Porton Station and the road which passes over the Railway immediately to the north-east of that station;

(E) Lands in the parish of West Crewkerne and lands partly in the said parish and partly in the parish of Wayford both in the rural district of Chard all in the county of Somerset—

(1) Abutting and on the west side of the Company's Yeovil and Exeter Railway and lying between Hewish-lane and a point about 11 chains distant from Hewish-lane measured in a south-westerly direction along the said Railway;

(2) Abutting and on the east side of the said Railway and lying between Hewish-lane and the road which passes under the Railway about 30

chains in a south-westerly direction from Hewish-lane;

(F) A piece of land in the parish of Charles otherwise Charles the Martyr in the county borough of Plymouth and county of Devon whereon there formerly stood a house known as No. 6 Salem-street Plymouth.

12. To sanction and confirm the purchase by the Company of the following lands houses and property already acquired by the Company (that is to say):—

In the county of Cornwall—

Lands in the parish of Saint Breock in the rural district of Saint Columb Major in the county of Cornwall abutting and on the north-east side of the Company's station at Wadebridge and extending from the creek which passes under the Company's Railway immediately to the north-west of the said station and extending thence for a distance of about 20 chains south-eastward and containing 1 acre 3 roods 27 perches or thereabouts;

In the county of Devon—

Lands in the parish of Broad Clyst in the rural district of Saint Thomas and county of Devon abutting upon and on the north-west side of the Company's Yeovil and Exeter line, and lying between the public road which passes over the said line at Broad Clyst Station and a point about 30 chains in an easterly direction along the said line from the Booking-office at the station and containing 1 acre 3 roods 18 perches or thereabouts;

In the county of Southampton—

Cottage and land in the parish of Eling in the rural district of New Forest in the county of Southampton abutting upon and on the west side of the Junction-road Totton and abutting upon and on the south side of the Company's property at their goods yard at Totton Station;

In the county of Surrey—

(A) Lands in the parish of Kingston-upon-Thames in the borough of Kingston-upon-Thames in the county of Surrey bounded towards the south-east and south-west by Glenbuck-road and on all other sides by the Company's property at Surbiton Station;

(B) Land in the parish of Frimley Hamlet in the urban district of Frimley in the county of Surrey abutting and on the southern side of the Company's Ascot and Aldershot line at Camberley Station and lying between two points distant respectively 2½ chains and 9½ chains or thereabouts westward from the west side of High-street Camberley and containing 22 perches or thereabouts.

13. To empower the Company on the one hand and any district council (as that expression is interpreted by the Local Government Act, 1894) and the London County Council and any district board of works and any vestry within the metropolis or any of them on the other hand to enter into and carry into effect any or recind agreements for or with reference to providing accommodation for the housing of persons of the labouring class who may be displaced by reason of the execution of any works or the taking of any lands by the Company under the powers of any Act or Acts already or to be hereafter passed and as to the sale purchase or leasing of lands and houses and the erection of houses and buildings for any such purposes and the providing of money for any such purposes and to authorise the Company and every or any such council district board or vestry to apply their funds and revenues and raise further money by borrowing on the security of their respective rates and property for the purposes of any such agreement.

14. To authorise and sanction the use by the Company upon—

(A) So much of Railway No. 3 authorised by the Poole and Bournemouth Railway Act 1865 as was not required to be abandoned by the South Western Railway (General) Act 1871 (hereinafter called "the Act of 1871");

(B) So much of Railway (F) authorised by the Act of 1871 as was not required to be abandoned by the South Western Railway (General) Act 1873 (hereinafter called "the Act of 1873"); and

(C) Railway (G) authorised by the Act of 1873; or on any extension of those railways notwithstanding any provision to the contrary contained in the said Acts respectively of steam power or other mechanical power fixed or movable in substitution for or in addition to animal power as may be prescribed or authorised by the Bill.

15. To authorise the Company for all or any of the purposes of the Bill or for the general purposes of the Company to apply their funds and revenues and to enable the Company to raise further moneys by the creation and issue of new shares or stock with or without a preference or guaranteed dividend or other rights or privileges attached thereto and by borrowing and by the creation or issue of debenture stock or by any of such means and to define and prescribe the ranking of any such shares stock or debenture stock.

16. To vary or extinguish all or any other rights and privileges inconsistent with or which would or might interfere with the objects of the Bill and to confer other rights and privileges.

17. And it is intended so far as may be requisite or desirable for any of the purposes of the Bill to amend or repeal the provisions or some of the provisions of the several local and personal Acts of Parliament following (that is to say) 4 and 5 William IV. cap. 88 2 and 3 Vic. cap. 28 34 and 35 Vic. cap. 107 36 and 37 Vic. cap. 161 and all other Acts relating to or affecting the Company or their undertaking and 28 and 29 Vic. cap. 19 and any other Act or Acts relating to the Poole and Bournemouth Railway Company or their undertaking 15 and 16 Vic. cap. 149 18 and 19 Vic. cap. 103 27 and 28 Vic. cap. 57 and any other Act or Acts relating to the Necropolis Company or their undertaking and the Amesbury and Military Camp Light Railway Order 1898.

And Notice is hereby also given that on or before the 30th day of November 1898 plans and sections of such or so much of the works proposed to be authorised by the Bill in respect whereof plans and sections are by the Standing Orders of either House of Parliament required to be deposited as are or is proposed to be made in any county hereinafter mentioned showing the lines and levels thereof and plans also of the lands in any such county to be purchased or acquired by compulsion under the powers of the Bill with a Book of Reference to such plans respectively together with in each case a copy of this Notice as published in the "London Gazette", will be deposited for public inspection as follows (that is to say) as regards works and lands in the county of London with the Clerk of the Peace for that county at his office at the Sessions House Clerkenwell as regards works and lands in the county of Wilts with the Clerk of the Peace for that county at his office at Marlborough in that county as regards works and lands in the county of Southampton with the Clerk of the Peace for that county at his office at Winchester in that county as regards works and lands in the county of Berks with the Clerk of the Peace for that county at his office at Reading as regards lands in the county of Somerset with the Clerk of the Peace for that county at his office at Frome in that county and as regards lands in the county of Devon with the Clerk of the Peace for that county at his office at Exeter in that county and that on or before the said 30th day of November a copy of so much of the said plans sections and book of reference respectively as relates to each of the areas hereinafter mentioned in or through which the said works or any part thereof are or is intended to be made or will be situate or in which any lands to be taken compulsorily under the powers of the Bill are situate together with a copy of this Notice as published in the "London Gazette" will be deposited for public inspection as follows (that is to say):—

In the case of the parish of Saint Mary Lambeth with the Vestry Clerk of that parish at his office at the Vestry-hall, Kennington-green Kennington-road S.E.

#### IN PARLIAMENT.—SESSION 1899.

### LONDON BRIGHTON and SOUTH COAST RAILWAY (VARIOUS POWERS).

(New Railway at Deptford, London, and from Holmwood to Cranleigh, Surrey; Widening and Improvements—Victoria Station, Stratford, Holmwood, Main Line, Brighton and Portsmouth Line, Three Bridges and East Grinstead Branch; Alteration of Streets; Stopping up and Diversion of Roads and Footpaths; Compulsory Purchase of Lands; Additional Lands for Various Purposes in London, Sussex, and Southampton; Prevention of Trespass on Railways; Additional Capital; Tolls, Rates, and Charges; Amendment of Acts, and Sundry Incidental Powers.)

NOTICE is hereby given, that application is intended to be made to Parliament in the ensuing Session by the London Brighton and South Coast Railway Company (hereinafter referred to as "the Company") for leave to bring in a Bill for the following among other purposes, viz.:—

### NEW RAILWAYS, WIDENINGS OF EXISTING RAILWAYS, AND OTHER WORKS.

To enable the Company to make and main-

tain the Railways, Widenings, and Works hereinafter described, or part thereof, with all needful stations, sidings, approaches, works, and conveniences connected therewith, that is to say:—

A Railway wholly situate in the parish of St. Paul, Deptford, in the county of London, commencing by a junction with the Deptford Wharf Branch of the Company at a point thereon 7½ chains or thereabouts measured in a westerly direction along the said branch Railway from where the same crosses Grove-street on the level, and terminating on the south side of Deadman's Dock at a point about 4 chains east of the eastern side of Grove-street.

A Railway commencing in the parish of Capel by a junction with the Company's Horsham, Dorking and Leatherhead line, at a point thereon 19 chains or thereabouts, measured in a south-westerly direction along the said Railway, from the booking-office at Holmwood Station thereon, and terminating in the parish of Cranleigh by a junction with the Horsham and Guildford line of the Company at a point thereon 3 chains or thereabouts measured in a south-easterly direction along the said Railway from the booking-office at Cranleigh Station thereon, which said intended Railway will be wholly situate in the county of Surrey, and will pass through or into the following parishes and places, or some of them—viz., Capel, Ockley, Ewhurst, Hambleton, Wotton, Abinger, and Cranleigh.

#### WIDENINGS OF EXISTING RAILWAYS.

The alteration, widening, and improvement of the undermentioned portions of the existing Railways of the Company, and the laying of additional rails thereon, viz.:—

(1) A widening of the Company's Railway wholly situate in the parish of St. George, Hanover-square, in the county of London, near Victoria Station, on the west side thereof, commencing at a point near the southern end of the Grosvenor Hotel on the east side of the Buckingham Palace-road, and terminating at a point on the north side of Ebury-bridge where the said bridge crosses the Company's Railway.

(2) A widening of the Company's Victoria to Portsmouth main line of Railway on the western side of the down line of rails and on the western side of the up line of rails, such widening to be wholly situated in the parish of Streatham, in the county of London, and to commence at the point where those lines of rails respectively pass under the bridge carrying the road known as Mitcham-lane over the said Railway, and to terminate 1 chain or thereabouts north of the bridge carrying the said Railway over Eardley-road.

(3) A widening of the Company's West-end and Crystal Palace line, on the southern side thereof, situate wholly in the parish of Streatham, in the county of London, commencing at a point 5 chains or thereabouts west of the point where Cavendish-road crosses under the said Railway, and terminating 10 chains or thereabouts east of the said road.

(4) A widening of the Company's Horsham, Dorking, and Leatherhead line of railway, on the western side thereof, situate wholly in the parish of Capel, in the county of Surrey, commencing at a point 3 chains or thereabouts, measured in a north-easterly direction, along the said Railway from the booking-office at the Holmwood station of the Company, and terminating at a point 20 chains or thereabouts, measured along the said Railway in a south-westerly direction from the said booking office.

(5) A widening of the Company's London and Brighton main line on the western side thereof, wholly situate in the county of Surrey, commencing in the borough of Reigate and parish of Reigate (Foreign) at a point 6 chains or thereabouts measured in a southerly direction along the said Railway from the booking-office at the Earlswood station thereon, and terminating in the parish of Horley at a point 5 chains or thereabouts north of the bridge carrying Balcombe-road over the said Railway.

(6) A widening of the Company's London and Brighton main line, on both sides thereof, situate wholly in the parish of Horley, in the county of Surrey, com-

mencing at a point 5½ chains or thereabouts north of the centre of the bridge carrying the Balcombe-road over the said Railway, and terminating at a point 13 chains or thereabouts measured along the said Railway in a southerly direction from the booking-office on the up side at the Horley Station thereon.

(7) A widening of the Company's London and Brighton main line on the eastern side thereof, situate wholly in the county of Surrey, commencing in the parish of Horley at a point 16 chains or thereabouts south of the booking-office on the down side at Horley Station thereon, passing into and through the parish of Charlwood, and terminating in the said parish of Horley at a point 3 chains or thereabouts measured along the said Railway in a northerly direction from the booking-office at Gatwick Station thereon.

(8) A widening of the Company's London and Brighton main line on both sides thereof, commencing in the parish of Horley, in the county of Surrey, at a point 7 chains or thereabouts, measured along the said Railway in a southerly direction from the booking-office at the Gatwick Station of the Company, passing into and through the parish of Charlwood, in the county of Surrey, and terminating in the parish of Worth, in the county of Sussex, at a point 7½ chains or thereabouts, measured in a northerly direction from the booking-office at Three Bridges Station thereon.

(9) A widening of the Company's London and Brighton main line on the eastern side thereof, situate wholly in the county of Sussex, commencing in the parish of Worth, at a point 14 chains or thereabouts measured along the said Railway in a southerly direction from the booking-office at Three Bridges Station thereon, and terminating in the parish of Balcombe at a point 9 chains or thereabouts north of the northern end of the Balcombe Tunnel.

(10) A widening of the Company's London and Brighton main line on both sides thereof, situate wholly in the parish of Keymer and in the urban district of Burgess-hill, in the county of Sussex, commencing at a point 5 chains or thereabouts measured in a southerly direction from the booking-office at the Burgess-hill Station of the Company, and terminating at a point 3 chains or thereabouts measured in a northerly direction along the said Railway from the booking-office on the down side at the Hassocks Station of the Company.

(11) A widening of the Company's London and Brighton main line of Railway on the western side thereof, situate wholly in the county of Sussex, commencing in the parish of Cuckfield, at a point 4 chains or thereabouts south of the southern end of the Ouse Valley Viaduct, and terminating in the parish of Adingly at a point 24 chains or thereabouts south of the southern end of the said viaduct.

(12) A widening of the Company's Brighton and Portsmouth line of Railway on the south side thereof, situate wholly in the parish of Bosham and county of Sussex, commencing at a point 17 chains or thereabouts, and terminating at a point 34 chains or thereabouts, both measured in an easterly direction from the booking-office at the Bosham Station of the Company.

(13) A widening of the Company's Brighton and Portsmouth line of Railway on the south side thereof, commencing in the parish and urban district of Warblington, in the county of Southampton, at a point 2 chains or thereabouts, measured in an easterly direction from the booking-office at the Emsworth Station of the Company, and terminating in the parish of Westbourne, in the county of Sussex, at a point 22 chains or thereabouts measured in an easterly direction from the said booking-office.

(14) A widening of the Company's Three Bridges and East Grinstead Branch Railway on the south side thereof, in the parish of Worth, in the county of Sussex, commencing at a point 4 chains or thereabouts measured along the said Railway in a westerly direction from the booking-office at the Rowfant Station of the Company thereon, and terminating at a point 1½ chains measured in a westerly direction from the said booking-office.

To empower the Company, in connection with the widening (1) hereinbefore described, to alter and reconstruct the Ecclestone and Elizabeth bridges, carrying the Belgrave-road and the St. George's-road respectively over the Company's Railway, and to alter, raise or lower the level of all or any of the following streets, so far as the same may be requisite or desirable in connection with the said widening, that is to say: Belgrave-road, Ecclestone-street, Ecclestone-street East, Ecclestone-place, St. George's-road, Elizabeth-street, Buckingham Palace-road, Cluff's-cottages, and Wise's-yard.

To empower the Company, in connection with the widening (2) hereinbefore described, to remove the footbridge, carrying the public footpath from Potter's-lane on the east side to Eardley-road on the west side of the Company's Railway, and to construct in substitution therefor a subway passing under the said Railway, and also to divert the footpath connecting the footbridge before described with the footbridge over the Company's spur line between Streatham and Streatham-common Stations for the entire length thereof between the said two footbridges.

To empower the Company, in connection with widening (6) hereinbefore described, to stop up the roads crossing the Company's Railway on the level on both sides of the Company's Horley Station, together with the footbridges now crossing over the said Railway at those points, and to substitute therefor:—

(a) A diversion of the road now crossing the Railway to the southward of the said station, commencing in the said road at a point thereon 10 chains or thereabouts eastward from the centre of the said Railway, and terminating at a point 8 chains or thereabouts westward from the centre of the said Railway.

(b) A new road commencing in Station-road immediately to the eastward of the Railway, and terminating by a junction with the diverted road, lastly hereinbefore described, at a point 3½ chains or thereabouts south-eastward from the southernmost of the level crossings proposed to be stopped up.

(c) A subway for foot-passengers under the said Railway from the east to the west sides thereof at or near the point where the level crossing to be stopped up at the northern end of the said station crosses the said Railway.

To authorise the Company to stop up the footpath now crossing the Company's Main Line between London and Brighton on the level, in the parish of Keymer, in the county of Sussex, at a point 31 chains north of the booking-office at the Hassocks Station, and to substitute therefor a new footpath commencing at a point immediately to the west of the level crossing to be stopped up, extending thence in a southerly direction along the western boundary of the said Railway through the bridge under the same at a point 17 chains or thereabouts north of the said booking-office, and terminating at a point 3½ chains or thereabouts east of the said bridge.

To authorise the Company to stop up and divert the occupation, crossing, and right of way in the parish and urban district of New Shoreham, and in the parish of Old Shoreham, in the rural district of Steyning West, in the county of Sussex, now crossing the Company's Brighton and Portsmouth Line on the level at a point about 24½ chains east of the booking-office at Shoreham Station thereon, which said intended diversion will be situate in the parishes of Old Shoreham and Kingston-by-Sea, in the said rural district of Steyning West.

It is proposed to take compulsorily for the following purposes certain lands, reputed to be common or commonable lands, of which the following are the particulars:—

Purpose for which lands are required.	Name by which lands are known.	Parish in which situate.	Quantity within limits of deviation.	Estimated quantity to be taken
Widening (5) hereinbefore described.	Earlswood Common.	Reigate (foreign)	A. B. P. 2 2 0	A. B. P. 2 0 0

#### PURCHASE OF LANDS.

To authorise the Company to purchase lands, houses, and other property compulsorily or by

agreement for the purposes of the said intended railways, widenings, and works.

To authorise the Company (in addition to the lands, houses, and other property required for the said intended railways, widenings, and works) to purchase and acquire by compulsion or agreement and hold the lands (in which term houses, buildings, and other hereditaments are in this Notice included) hereinafter described or some of them, that is to say:—

(a) Lands in the parish of St. Paul, Deptford, in the county of London, on the east side of and adjoining the Company's New-cross Station, and bounded on the east by North-road.

(b) Lands in the parish of Lewisham in the county of London on the east side of the Company's Railway from London-bridge to Croydon, abutting on and bounded on the west by the goods-yard of the Forest-hill Station of the Company.

(c) Lands in the parish of Streatham, in the county of London, on the south side of and adjoining the Company's West-end and Crystal Palace Line, and lying between points 26 chains and 36 chains respectively north of the booking-office at the Streatham-hill Station of the Company.

(d) Lands in the hamlet of Penge, in the parish of Saint Mary, Battersea, in the county of London, on the eastern side of the Company's London and Croydon Railway, and abutting on the southern end of the goods yard at Penge Station thereon.

(e) Lands in the parish of Worth, in the county of Sussex, situate on both sides of the Company's Three Bridges and East Grinstead Line at and adjoining Rowfant Station.

(f) Lands in the parishes of Eastergate and Barnham, in the rural district of West Hampnett, in the county of Sussex, on the south side of the Company's Brighton and Portsmouth Line, at and adjoining Barnham Junction Station thereon.

(g) Lands in the said parish of Eastergate on the north side of the Company's Brighton and Portsmouth Line, at and adjoining the western end of Barnham Junction Station thereon.

(h) Lands in the parish of Billingshurst, in the county of Sussex, on the northern side of the Company's Mid-Sussex Line, at and adjoining the western end of Billingshurst Station thereon.

(i) Land in the parish of Patcham, in the county of Sussex, on the eastern side of and adjoining the Company's London and Brighton Main Line, and immediately south of the southern end of the Patcham Tunnel.

(j) Lands in the parish of Ifield, in the county of Sussex, on the northern side of and adjoining the Company's Three Bridges and Horsham Line, bounded on the eastern end by the High-street, Crawley, and extending about 21 chains in a westerly direction therefrom.

(k) Lands in the parish of Pulborough, in the county of Sussex, on the north-western side of and adjoining the Pulborough Station thereon.

(l) Lands in the parish of Hardham and rural district of Thakeham, in the county of Sussex, on the north-western side of and adjoining the Company's Mid-Sussex Line, and lying between points 10 chains and 29 chains or thereabouts south of Pulborough Station thereon.

(m) Lands in the parish of Itchingfield, in the county of Sussex, on the western side of and adjoining the Company's Mid-Sussex line, and extending between points 18 chains and 40 chains or thereabouts north of Itchingfield Junction thereon.

(n) Lands in the parishes of Rusper and Lower Beeding, in the county of Sussex, on the southern side of and adjoining the Company's Three Bridges and Horsham Line, and extending between points 4 chains and 27 chains or thereabouts east of Fay Gate Station thereon.

(o) Lands in the parish and urban district of Horsham, in the county of Sussex, on the south-western side of and adjoining the Horsham and Dorking Line of the Company, and extending between points 4 chains and 21 chains or thereabouts, measured along the said Railway in a south-easterly direction from the bridge carrying Wimblesbury-road over the said Railway.

(p) Lands in the parish of Keymer, in the county of Sussex, on the west side of and

adjoining the Company's London and Brighton Main Line, and lying between points 12 chains or thereabouts respectively north and south of the bridge over the said Railway known as Folly-bridge.

(q) Lands in the parish and urban district of Bognor in the county of Sussex, situate on the eastern side of the Company's Bognor Branch Railway at and adjoining Bognor Station thereon.

(r) Lands in the parish of Funtington, in the county of Sussex, on the north side of and adjoining the Company's Brighton and Portsmouth Line, and extending between points 4½ chains and 25 chains or thereabouts respectively west of the booking-office of the Bosham Station of the Company.

(s) Lands in the parish of Old Shoreham, in the county of Sussex, on the north side of and adjoining the Company's Brighton and Portsmouth Line, extending from the public road at the west-end of Shoreham Station for a distance of 24 chains or thereabouts, measured along the said Railway in an easterly direction.

(t) Lands in the parish and urban district of Bexhill, in the county of Sussex, on the north side of the Company's Brighton and Hastings line, lying immediately to the west of Pevensey Sluice, and forming part of the field numbered 80 on the 1/2500 scale Ordnance Map of that parish, First Edition, 1873.

(u) Lands in the parish of Piecombe, in the county of Sussex, on the east side of and adjoining the Company's London and Brighton Main Line, lying between the south end of the Clayton Tunnel and the bridge over the said Railway leading to the public roadway at Pangdean Farm.

(v) Lands in the said parish of Piecombe, on the west side of and adjoining the Company's London and Brighton Main Line, extending along the same for a distance of 20 chains south of the aforesaid bridge, near Pangdean Farm.

(w) Lands in the parish and urban district of Warblington, in the county of Southampton, situate on the southern side of and adjoining the Company's Brighton and Portsmouth Line of railway, and extending between points 12 chains and 24 chains or thereabouts respectively west of the booking-office at the Emsworth Station of the Company.

To authorise the Company, in connection with the proposed acquisition of the lands at Bognor hereinbefore described under the letter (q) to stop up and extinguish all rights of way over the same, including the roadway known as Richmond-road, from the junction of Henry-street therewith to a point 4½ chains or thereabouts north of Station-road.

To provide for extinguishing all rights of way over, and to empower the Company to stop up and appropriate the sites of so much of any streets, roads and footpaths, as will become unnecessary by reason of any of the intended works, or as are shown on the deposited plans as intended to be stopped up, or as are included within the limits of the lands shown on the deposited plans as intended to be taken compulsorily under the powers of the Bill.

#### MISCELLANEOUS.

To enable the Company to make more effectual provision for the prevention of and punishment for trespass upon the Railways, now or hereafter belonging to or leased to or worked by the Company, solely or in conjunction with any other Company or Companies, and to enable the Company to make, enforce and rescind by-laws with reference to the matters aforesaid, and to impose and provide for the recovery of penalties for breach of any such by-laws, or of the provisions of the Bill in relation to the matters aforesaid.

To authorise the purchase of part only of any house, building or manufactory which may be required for the purposes of the Bill, without any liability to be compelled to purchase the whole or any greater part thereof.

To make provision as to payment of costs in certain cases of disputed compensation by persons claiming compensation from the Company.

To authorise the levying of tolls and charges in respect of the intended railways, widenings, and works, and the exercise of other rights and privileges.

To authorise the Company to raise further sums of money for the purposes of the Bill, and

also for the general purposes of their undertaking by the creation of new Shares or stock, with or without a guaranteed or preferential dividend, or other special rights or privileges attached thereto, or by borrowing, or by the creation of debenture stock, or by any of such means. And also to authorise the Company to apply to all or any such purposes any capital or funds now belonging to them or hereafter to belong to them, or to be under the control of their Directors.

The Bill will vary and extinguish all existing rights and privileges which would interfere with its objects, and it will, or may, incorporate with itself, with exceptions and modifications, the provisions of the "Companies Clauses Acts, 1845 to 1889," the "Lands Clauses Acts," the "Railways Clauses Acts, 1845 and 1863," and it may extend, amend, vary and enlarge the powers and provisions of the 9 and 10 Victoria, cap. 283, and any other Act relating to the Company.

Duplicate plans and sections, describing the line, situation, and levels of the proposed Railway, widenings, and works, and the lands, houses, and other property in or through which they will be made, and also duplicate plans, showing the lands and property intended to be compulsorily taken for other purposes, under the powers of the Bill, together with a book of reference to such plans, containing the names of the owners and lessees, or reputed owners and lessees, and of the occupiers of such lands, houses, and other property, also an Ordnance Map with the proposed lines of Railway delineated thereon, so as to show their general course and direction, and a copy of this Notice will, on or before the 30th day of November instant, be deposited for public inspection with the Clerk of the Peace for the county of London, at his office at the Sessions House, Clerkenwell-green; with the Clerk of the Peace for the county of Surrey, at his office at Kingston-upon-Thames; with the Clerk of the Peace for the county of Sussex, at his office at Lewes; and with the Clerk of the Peace for the county of Southampton, at his office at Winchester. On or before the same day a copy of so much of the said plans and sections, and book of reference, as relates to the parish of St. Paul, Deptford, will be deposited with the Clerk to the Greenwich District Board of Works, at the Town-hall, Greenwich, S.E.; as relates to the parish of St. George, Hanover-square, with the Vestry Clerk of that parish, at the Vestry-hall, Mount-street, W.; as relates to the parish of Lewisham and hamlet of Penge (parish of Battersea), with the Clerk of the Lewisham District Board of Works, at his office, Rushygreen, Catford, S.E.; and so far as relates to the parish of Streatham, with the Clerk of the Wandsworth District Board of Works, at his office, East-hill, Wandsworth. On or before the same day a copy of so much of the said plans, sections, and book of reference as relates to each of the several areas hereinbefore described, in which the intended works are to be made, or in which any lands to be taken, are situate, will be deposited, together with a copy of this Notice, at the places respectively stated as follows:—

As relates to any county, borough, or other borough with the Town Clerk of such borough at his office. As relates to any urban district not being a borough, with the clerk of the district council of such district at his office. As relates to any parish having a parish council, with the clerk of parish council, or, if there be no clerk, with the chairman of that council, at his office or residence as the case may be. As relates to any parish comprised in a rural district and not having a parish council, with the clerk of the district council of such rural district, at his office.

Any parish named in this Notice which is not also a county or other borough, or an urban district, or is not stated to be in a county or other borough, or in an urban or rural district, is a parish having a parish council.

Printed copies of the proposed Bill will be deposited in the Private Bill-office of the House of Commons on or before the 21st day of December next.

Dated this 15th day of November, 1898.

## Meetings.

### DELHI UMBALLA KALKA RAILWAY.

The half-yearly general meeting was held on Wednesday at Winchester-house, E.C.; Lieut.-General the Hon. Sir ANDREW CLARKE, presiding.

The CHAIRMAN, in moving the adoption of the report and accounts (an analysis of which has already appeared in THE RAILWAY TIMES), said—The capital accounts show that 1,756*l.* has been expended upon new capital works during the year. This expenditure is being met from funds provided under the supplemental agreement of July 24th, 1896, with the Secretary of State, and the sum advanced up to date on this account is shown under the head of "Secretary of State, advances." Since June 30th we have, however, reduced this amount by a payment of Rs.18,368 for works "wholly or partly executed" by the East Indian Railway Company prior to the supplemental agreement of 1896 coming into force. While on this subject I may remark that we have arranged with the East Indian Railway that the cost of all minor works—that is, those costing less than Rs.1,000—executed up to June 30th, 1896, which this company had paid for, shall be borne by the East Indian Railway, who have, therefore, refunded to us Rs.12,213 on account of these works. Since July, 1896, all such works have been paid for by the East Indian Railway out of their portion of the gross receipts of the line. By the above-mentioned agreement the East Indian Railway have, therefore, allowed the effect of the arrangement as regards "minor works," made under the supplemental agreement, to operate as from the date of their taking over the working of the line. The board have, under an arrangement with the Secretary of State, dated January 24th, 1898, authorised an expenditure of Rs.1,22,000 for works urgently required, the funds required being provided by the Secretary of State. From the revenue accounts it will be observed that the number of passengers carried over the line during the year was 1,059,636, against 897,551 carried during the previous year, or an increase of 162,085. The first, second, and intermediate classes show small increases, but 151,000 more third-class passengers were conveyed during 1897-8 than in 1896-7. This is mainly due to the pilgrim traffic on the occasion of the solar eclipse in January last, and from reports which we have received we learn that many more passengers desired to travel at that time than could be accommodated, the railway stock which was provided being totally inadequate to meet the demand, and in consequence thousands of pilgrims could not be conveyed to their destination. The stock of the East Indian Railway was not sufficient to meet this traffic, and I have had in former years to complain of the hesitation on the part of the Government of India and the Secretary of State to allow the necessary expenditure for proper equipment. That being so, when these demands arise the lines in India are severely starved, and I rather wish to emphasise this fact. The receipts from passengers amounted to Rs.10,82,653, against Rs.7,97,955, or an increase of Rs.2,84,698. The average earnings per passenger were slightly higher than for the previous year, being 14*s.* 11*d.*, against 14*s.* 2*d.* The goods traffic also showed a considerable increase. While part of this is due to exceptional traffic in the carriage of stores, &c., for the frontier military operations, a greater quantity of general merchandise was also carried, which appears to me to be a satisfactory feature. The tonnage carried during the year was 157,149 tons, against 135,177 tons in the previous year, or an increase of 21,972 tons. The receipts from this traffic were Rs.7,13,552, against Rs.5,17,129, or an increase of Rs.1,96,423. The average earnings per ton of goods carried works out at Rs.4 8*s.* 7*d.*, against Rs.3 13*s.* 2*d.* for the previous year, being an increase of 11*s.* 5*d.* per ton. This average for the previous year was, however, very low, owing to the carriage of food stuffs at low rates on account of the famine, and the comparison is not quite fair, but in comparison with the year 1895-6 the earnings per ton this year show an increase of about 4 annas per ton. For the whole year the earnings from all sources were no less than Rs.4,81,107 more than the previous year. The dividend for the year amounts to 4½ per cent., or 1 per cent. more than the previous year; but you will observe that while the amount carried forward in 1897 was 220*l.*, the amount we are carrying forward at this time is no less than 9,835*l.*, or an amount almost sufficient to pay an additional 1½ per cent. on the capital ordinary stock of the company. At our last meeting one or two shareholders drew attention to the comparatively small amount we carried forward, and in carrying this amount forward the board, in view of the exceptional earnings of the year, deemed it advisable to make provision for years in which the earnings might not be so favourable. We think that by doing so our property must be increased in value, and we hope the shareholders will support the directors in this policy. ("Hear, hear.") The approximate earnings for the current half-year up to date show a decrease of Rs.1,24,300, attributable not only to comparison with the exceptional traffic of the corresponding period of 1897, but also to the fact that the Government of India have this year delayed their move to Calcutta on account of the plague scare there. Bearing these facts in mind the earnings for the present half-year com-

pare favourably with the corresponding periods of 1896 and 1895, so that our traffic receipts are growing steadily and satisfactorily. The board would have liked to be able to announce that some progress had been made towards commencing work on the construction of the Simla railway during the present cold season. But owing to the completion of the contract being so long delayed the board were unable to get the necessary formalities in connection with the increase of capital completed in time to allow of the balance of the capital required being obtained from the public before the holidays set in, and since then the financial market has been disturbed by political affairs, which has prevented the board putting the new line before the public. Arrangements are, however, now being made to enable us to do so when a favourable opportunity offers.

Mr. J. J. KESWICK seconded the resolution, which was carried.

It was also resolved:—"That a dividend of 2*l.* per cent. for the half-year ended June 30th, 1898, free from Indian income-tax but subject to English income-tax, making with the *ad interim* already paid a dividend of 4*l.* 15*s.* per cent. for the year, be and is hereby declared."

### METROPOLITAN DISTRICT RAILWAY.

A special general meeting was held on Thursday for the purpose of giving final sanction to an agreement with the Whitechapel and Bow Railway Company and the London Tilbury and Southend Railway Company for the maintenance and user of the new connection between the District Company at Whitechapel and the Tilbury Company at Bow, which new line was sanctioned by the Act of last year. Major ISAACS presided.

The CHAIRMAN referred to the unavoidable delays which had taken place with regard to the sanction of this agreement, and said the patience of the shareholders would now be rewarded, for he had to announce that the agreement was now complete and ready for final assent. Mr. Forbes had on previous occasions explained the matter in so much detail that he would not weary them with further remarks, and he, therefore, formally moved that the agreement of September 12th last be approved.

Viscount GORT seconded the resolution, which was unanimously agreed to.

A meeting of the proprietors of the Bow Railway Company was held immediately afterwards, when the same agreement was approved.

## Directors' Reports.

### MIDLAND URUGUAY RAILWAY.

The accounts for the year ending June 30th, 1898, show that the gross receipts amounted to 37,806*l.* (against 35,215*l.* for the previous year), the total expenditure to 33,811*l.* (against 33,699*l.*), and the profit to 3,995*l.* (against 1,516*l.*). Adding to this amount the Government guarantee (55,481*l.*) and deducting the debit balance brought forward from last year (1,358*l.*), and deducting interest on the debenture stock (57,007*l.*), being at the rate of 5 per cent. from July 1st, 1897, to April 30th, 1898, and 4 per cent. from May 1st, 1898, to June 30th, 1898, there was a surplus of 1,111*l.* The total capital expenditure amounted to 1,768,445*l.*, whilst the receipts had been 1,779,462*l.*—viz., ordinary shares, 600,000*l.*; first debenture stock, 1,179,462*l.* The report states:—

"Since the date of the last annual report your directors have found it necessary to approach the debenture stockholders with reference to the interest payable to them under the arrangement, as embodied in the trust-deed, dated May 31st, 1893. Since the payment of 5 per cent. interest on the debenture stock the net earnings of the line, together with the moneys received from the Government of Uruguay in respect of guarantee, have not been sufficient to make up the amount required to pay this interest.

"Owing to the disturbed state of the Republic the expenditure on permanent way and rolling stock has been kept down to the lowest possible limit. In reports received from the general manager great stress is laid upon the absolute necessity, now that peace has been restored, of arranging for extensive renewals of sleepers and expenditure under other heads. As the directors had no funds available for this purpose they communicated with the trustees for the debenture stockholders, and a meeting of the debenture stockholders was consequently held on October 24th, 1898, when the whole position was laid before them. Your board proposed as a means of providing necessary funds—

"That the interest on the debenture stock for the four years from May 1st, 1898, to April 30th, 1902, be at the rate of 4 per cent. per annum, on the understanding that no dividend shall be paid upon the ordinary stock of the company during the said period, after which latter date the payment of interest on the stock shall be at the rate of 5 per cent. per annum."

The debenture stockholders though willing to assist by providing necessary funds for maintenance, were opposed to any permanent reduction of

interest on the stock. After considerable discussion the following resolution was moved:—

“That the interest on the debenture stock for four years from May 1st, 1898, to April 30th, 1902, be at the rate of 4 per cent. per annum, after which latter date payment of interest on the stock shall be at the rate of 5 per cent. per annum, until April 30th, 1907, and thenceforth at the rate of 6 per cent., it being understood that no dividend is to be paid on the ordinary stock of the company until interest at the rate of 6 per cent. per annum has been paid to the debenture stockholders, the company being at liberty to resume payment at 6 per cent. per annum at any time prior to April 30th, 1907.”

This was agreed to subject to your confirmation, and it therefore forms the business of the extraordinary general meeting convened in accordance with the notice attached. The debenture stockholders also consented to withdraw the limitation as to the issue of further debenture stock inserted in the trust-deed and to allow the amount to be increased to 1,250,000*l.*, as provided in the articles of association, should it be necessary to provide further funds for capital expenditure.

“The gross traffic receipts for the year amounted to 37,806*l.*, compared with 35,215*l.* in the previous period, or an increase of 2,591*l.* On the other hand the working expenses amounted to 33,811*l.*, being an increase of 112*l.*, leaving a net profit on working of 3,995*l.* for the year ended June 30th, 1898. Adding to this amount the Government guarantee and deducting the amount of debenture interest (as altered by debenture stockholders’ resolution passed at meeting held October 24th) and balance brought forward from last year’s accounts the revenue account shows a credit balance of 1,111*l.* During the first three months the receipts of the line were seriously affected by the civil war, but the declaration of peace was marked by a considerable increase in traffic receipts, resulting in an increase for the year over the receipts of the corresponding period 1896-7. A special feature of the year’s working has been the very large number of cattle carried, being 40,121*l.*, compared with 15,642*l.* in the previous year.

“The capital expenditure during the year amounted to 420*l.* Since June 30th the two locomotives referred to in the last report have been shipped and are now being erected. In view of the adverse judgment of the Uruguayan Courts in two of the three law suits referred to in previous reports the board considered it advisable to instruct the general manager to arrive, if possible, at a settlement of the one remaining action which was for \$35,000, and costs, which after some delay, has been settled for \$12,000, each side paying its own costs.

“The agreement with Mr. William Warren as general manager terminated on December 31st last, and the board has appointed as his successor Mr. C. J. Albrecht, who has had considerable experience both as an engineer and railway manager in Uruguay and elsewhere.

“During the year the Company received \$49,897 Government of Uruguay 6 per cent. war bonds (1897), in payment of \$39,918 in respect of Government traffic. These bonds have all been realised, but the low price obtainable for them has resulted in a net loss of 2,013*l.*, which has been charged against the reserve account.”

### SOUTHERN BRAZILIAN RIO GRANDE DO SUL RAILWAY.

The directors announce that they are only able to declare an interim dividend for the half-year ended June 30th, 1898, at the rate of 3 per cent. per annum, or 6*s.* per share, free of income tax. “Shareholders are no doubt aware that the Brazilian Government, instead of paying the guaranteed interest in cash as heretofore, announced that, for a term of three years from July 1st last, such interest would be paid in 5 per cent. funding bonds, secured on the customs receipts. This announcement was made without the consent of the board, no opportunity was offered for discussion between the Brazilian Government and the company, either directly or through the authorised agents of the Government, Messrs. N. M. Rothschild and Sons. The working of the line for the first six months of 1898 produced a surplus of Rs.123,493, about 4,100*l.* at 8*d.* exchange, which the directors, in compliance with the regulations issued by the Brazilian Government, have paid into the Treasury in Brazil as heretofore. The directors are of opinion that any surplus earned by the company during the period that the guaranteed interest is not paid in full and in gold should, up to the balance remaining unpaid, belong to the company, in compensation for the deficiency created by the funding scheme; they are making representations to this effect in Brazil, and they trust that the good will which the Government has always shown towards the company will lead it to admit the justice of this request. The amount received in funding bonds—viz., 53,240*l.*—has been sold at an average rate of about 79½ per cent., and has realised 42,269*l.* net.”

### URUGUAY NORTHERN RAILWAY.

#### CAPITAL.

The capital account to June 30th, 1898, shows an expenditure of 804,587*l.*, whilst the receipts have been 822,649*l.*—viz., ordinary shares, 100,000*l.*; preferred shares, 7 per cent., 250,000*l.*; perpetual debenture stock, 3½ per cent., 449,400*l.*; prior lien 5 per cent. debenture stock, 23,249*l.*

#### REVENUE.

The accounts for the year ending June 30th, 1898, show a gross revenue of 11,603*l.* (against 10,514*l.*), and an expenditure of 17,028*l.* (against 18,124*l.*), leaving a loss of 5,424*l.* With credit balance from previous account, 1,490*l.*, and Government guarantee 19,977*l.*, and deducting interest on debenture stock, 16,310*l.*, and sundry debits, 2,607*l.*, there is a balance at debit of net revenue account of 2,873*l.* The report states:—

“The available current balances are applicable for interest on advances and prior lien scrip, and for the purchase of sleepers and other necessary supplies in Uruguay. The political disturbances in Uruguay have greatly interfered with the railway business during the year under review, and the position of affairs is still unsettled. It is hoped that should matters settle down the general traffic would improve. Still the amount of goods carried in respect of the Saladero traffic has been satisfactory, and the proprietors anticipate still better results during the season which is now commencing. The necessary requirements of the permanent way are receiving attention, and 5,984 hardwood and 5,846 creosoted pine wood sleepers have been replaced during the year. The relations of this company with the Midland Uruguay and the North Western of Uruguay railway companies are most friendly. The arrangements mentioned at the last general meeting have been carried into effect, the combined management of this line and that of the North Western of Uruguay being undertaken by the manager of the latter, thus securing a substantial economy in working, and a more efficient service on the above railways. Reductions in the staff have also been made so that the working expenses are now as low as it is possible to bring them with due regard to efficiency.”

## General News.

### THE BUENOS AYRES AND PACIFIC WRANGLE.

In our last issue we reproduced the comments of several of our contemporaries upon a circular which had been addressed to the shareholders of the Buenos Ayres and Pacific Railway Company, Limited, by Mr. J. C. F. Lee, the deputy-chairman of the company. We now reproduce Mr. Lee’s circular in full, with the observations of further of our contemporaries.

(Financial News.)

It is only fair to Mr. J. C. F. Lee that, as he asks, the same publicity should be afforded to his reply as was given, in the report of the Buenos Ayres and Pacific meeting, to the remarks of Mr. Philipps, M.P., who asserted (in Mr. Lee’s absence) that a speech of Mr. Lee’s at the meeting in November, 1897, had been made without the authority of the board. Mr. Lee, in a circular to the shareholders, points out that what he said and what the chairman said at the 1897 meeting was practically the same thing, and he asks, “Is it suggested that the chairman also spoke without authority?” After a detailed statement of the whole matter, Mr. Lee says: “It is only twelve months afterwards that the plea of absence of authority is invented, and, as I have shown, without a shadow of foundation to rest upon. . . . Differences of opinion on large questions of policy must arise; but I hope I may appeal to every fair and impartial mind when I claim that the attack made on me in my absence was not warranted.”

(South American Journal.)

As might have been anticipated, Mr. J. C. F. Lee has not been content to remain silent under the imputations which were made with regard to him at the recent general meeting of the Buenos Ayres and Pacific Railway Company. He was, unfortunately, prevented by illness from attending that meeting, or doubtless he would have replied at once, and emphatically, as is his habit. He has, however, now taken the only other course open, and has addressed a circular-manifesto to the shareholders of the company, and has favoured us with a copy. The document has some very important statements, and it is to be hoped that this controversy, and the particulars contained in Mr. Lee’s communication to the shareholders, will lead to a rectification of any faults existing in respect to the management. A policy of extravagance, as regards a line so circumstanced as the Buenos Ayres and Pacific, is unquestionably reprehensible, and while deprecating a hasty judgment, we certainly think that the actual position of affairs should be made the subject of serious consideration by the proprietors. In a case of this kind, where so much depends upon a verification of facts, it is, of course, superfluous to express an outside judgment; but all must be agreed that it is a primary duty of the directors to husband the financial resources of the company. What Mr. Lee describes as a policy of adventure is obviously inimical to its solid and substantial prosperity. No one will contest that it is necessary to maintain the permanent way in a state of efficiency, but wasteful expenditure is inexcusable. And this is the issue in a nutshell. Is the expenditure upon the permanent way wasteful? It would appear, by consent on both sides, to have been considerably in excess of what was anticipated. It is very much to be regretted that the necessity for this controversy should have arisen. The Buenos Ayres and Pacific Railway is located in one of the most favourable positions, topographically, ever occupied by a railway, and, under efficient management, has the elements of a most prosperous undertaking.

(Money.)

There appears to be divided counsels at the Board of the Buenos Ayres and Pacific Company. Mr. J. C. F. Lee, the deputy-chairman, who was not present at the recent meeting,

has had occasion to issue a circular to the shareholders in his own defence. To our mind he makes good his case, which is that the expenditure on permanent way which he supported had the approval of the other directors. He further points out that the expenditure on that account would have been far greater but for his opposition to the general manager's proposition, and that in consequence thereof that functionary has considerably modified his demands on the company's purse.

MR. LEE'S CIRCULAR.

42, Gloucester-gardens, London, W.,  
November 17th, 1898.

To the Shareholders of the

Buenos Ayres and Pacific Railway Company.

Ladies and Gentlemen—I was unfortunately prevented through illness from being present at the ordinary annual meeting of shareholders on October 25th last, when Mr. Bruce Gardyne quoted some expressions from a speech I had made at the annual meeting on November 12th last year, replying to the criticisms of some influential shareholders on the increasing expenditure on renewals of permanent way. On the occasion in question, the chairman had asked me as deputy-chairman to make the replies for him, and I am surprised to find that Mr. W. J. Philipps, M.P., who, at the time, had only been a member of the board about a week, stated, in my enforced absence from the meeting of October 25th last, that I had made the speech in question without the authority of the board. What I said on the occasion mentioned is reported in the company's published report of the proceedings on November 12th last year. I adhere to every word I then said, and add that it represented at that time the unanimous mind of the board; in speaking as I did of the expenditure on permanent way being in excess of needs, I was referring to these wholesale special renewals, not to ordinary maintenance. The board some time before the meeting of last year, at which the speech was made, had actually instructed the general manager to suspend all expenditure on permanent way renewals, a fact which the chairman, in his opening speech at the same meeting, referred to in the following words:—"As a necessary corollary of the decreased receipts lately, we have suspended the outlay for the present, except what was necessary for safety." The words I used on the same occasion referring to suspension of works were as follows:—"But I may tell the meeting that we have stopped that expenditure which we have been more or less compelled to incur, and do not mean to go any further with it, except, as the chairman has said, for the purpose of safety." It will be seen that the chairman and I both said practically the same thing—the only difference being that I, in the remarks which preceded the above quotation, gave, as my reason for stopping the expenditure, that it was unnecessary, and the chairman gave as his reason the decreased receipts. Is it suggested that the chairman spoke also without authority? I have a very large stake, over 21,000*l.*, of my own money invested in the various securities of the company; this fact, and regard for your permanent interests, induce me to break silence; but I am afraid that I must tax your patience somewhat, for, to make the case intelligible and complete, I must bring under review the whole subject of expenditure referred to in Mr. Harrison Hodgson's report. The facts are as follows:—Mr. Harrison Hodgson, in March last, recommended the taking up and renewal with 70*lb.* rails the 40 kilometres to complete the relaying of the Mercedes section, and, in addition, the relaying of certain portions of the Salt region with 50*lb.* rails taken up from the Mercedes section; the total cost of both works he estimated at 66,000*l.*, but which would fall to be reduced by the amount realised from the sale of the old materials left over when sold. The case was represented as so urgent, and the danger so imminent, that the rails were telegraphed for in March last, but, owing to my strong opposition, the rails were not sent, and now, nine months afterwards—notwithstanding no rails are sent—we have the general manager stating at the meeting that the line was never in a better condition for business; and in his annual report, dated August 18th last, he says the permanent way is in good working condition; and, further, the resident engineer, in his certificate of August 17th last, says the permanent way has been maintained in good and safe condition. What are we to think of all this? The accounts for the year ending June 30th last show that the general manager had expended upwards of 22,000*l.* in special renewals; thus it would seem that for the year 1898 the company's commitments on permanent way renewals would, if the general manager's demands and Mr. Hodgson's recommendations had been acted on, have amounted to 88,000*l.*, all this in addition to regular maintenance; and it was seriously proposed to charge much of it to a revenue suspense account. On Mr. Hodgson's return to England a conference was held with him, at which I was present, and I pointed out to him the severe burden he was proposing to place upon our slender revenues; whereupon he explained that if that were so the expenditure on the Mercedes section (41,000*l.*) might be suspended for two or three years, inasmuch as the rails in that section had been so reinforced by additional sleepers as to be trustworthy for that period, and that he had recommended the immediate renewal mainly in order to use the rails of the Mercedes section in relaying the Salt districts. To take up 40 kilometres of sound road, upon which a good deal of money has been expended to make it safe, two or three years before it is absolutely needed, would be an extravagance even for the London and North Western Railway. But what shall we call it for a railway like our own? I admit to feeling doubts about the matter, and an occasion offering to meet Mr. Woodhouse, who is an able and reliable engineer of recognised standing, and who was for twelve years chief resident engineer of the Buenos Ayres and Pacific Railway, and well acquainted with every detail of our road, I consulted him on a method of meeting our difficulty suggested to me, and we exchanged the undermentioned letters:—

W. M. Woodhouse, Esq.

May 26, 1898.

Dear Sir—As you were for upwards of twelve years chief resident engineer of the Buenos Ayres and Pacific Railway Company, I hope you will allow me to ask you to give me your frank opinion in a proposal which has been made for reinforcing the worse portions of the permanent way in what is called the Salt District, the length of line to be treated being about 32 kilometres—observing

that the company is stated to have in stock about 1,870 tons of serviceable pot sleepers, and 650 tons of serviceable rails, taken up on the renewal of some portion of the Mercedes Section.

It has been suggested that the whole of the sleepers should be utilised by laying them under the 60*lb.* rails above mentioned in the Salt District, and that the 650 tons of serviceable rails should be used to replace any rails found defective from rust or other cause as the work of reinforcement proceeds.

The question I wish to put to you is this one, Do you think that if this work were to be carefully done the 32 kilometres could be rendered practically secure for several years? Your intimate acquaintance with the whole of our permanent way in detail seems to indicate that you could give a reliable and sound opinion, and, whichever way it may be, I should be obliged for an expression of it.—I am, dear sir, yours truly,

(Signed) J. C. F. LEE.

J. C. F. Lee, Esq.

Dear Sir—I have much pleasure in replying to your favour of yesterday's date as regards the permanent way of the B. A. and Pacific Railway.

At present there are on the average 1,588 pot sleepers per kilom. An additional two per length of 24-feet rail would amount to 548 per kilom., or, say 20 tons in weight, and if three sets of pots were put in, the extra numbers would be 822, or 30 tons per kilom., so that there is in stock plenty of material with which to do the work.

Three sets of additional pot sleepers per length of rail (24 feet) is as many as can be put in, the cost of labour will be very little more for putting in three sets than for putting in two sets per length of rail, as all the present pot sleepers will have to be moved more or less.

It is my firm opinion that if three extra pairs of pots are put in per length of 24-feet rail the road will be greatly strengthened, and that the present rails will be serviceable for several years, and that the cost of maintenance will be slightly less.

As regards the cost of putting in the extra pots I should say that the work could be done for 100*l.* per kilom., especially if the present permanent way gang could be engaged on the work with the aid of a few extra hands.

Trusting you will be satisfied with the above reply, I remain, dear sir, yours very truly,

(Signed) W. M. WOODHOUSE.

I must inform the shareholders that at this time, May last, the general manager had reported that he had 600 tons of serviceable rails in store, and 1,800 tons of serviceable pot sleepers. The existence of all this stock suggested the idea of utilising the materials for this work in the manner approved by Mr. Woodhouse, and this would not have cost more than 4,000*l.* Compare this with Mr. Hodgson's 66,000*l.* I have no doubt at all that Mr. Woodhouse's views are sound, and that the plan he suggests would have carried us through safely on the section in question for at least three to four years, pending the predicted growth of revenue to meet the coming strain of gradual permanent way renewals. I find it impossible to dismiss the evidence of a civil engineer of the recognised standing and ability of Mr. Woodhouse as worthless, backed as it is by his twelve years' experience of maintaining our road, 75 per cent. of which is still laid upon pot sleepers, similar to those he proposed to use in reinforcing the weak spots in the rails in the Salt District. I look upon his retirement as a misfortune for the company. It is well that you should know that probably three-fourths of the total length of rails laid in Argentina are carried successfully upon pot sleepers, similar to those suggested by Mr. Woodhouse in the above letter. Having regard to our still decreasing receipts, I addressed two letters on the subject to the board in May last, protesting against the large expenditure proposed by Mr. Hodgson, and enclosing to the board the letters above quoted referring to Mr. Woodhouse's suggestions above referred to. The assertions I made in those letters have never been contradicted nor refuted. I give below an extract from the letter of May 16th last, because it has an important bearing on Mr. Philipps's statement that I spoke without authority at the meeting of November 12th last year. In that letter I say—"I was made the mouthpiece of the board at the last annual meeting, to give assurances and pledges to the shareholders on the question of permanent way renewals, and I do not feel warranted in going back upon such pledges, without, in my opinion, sufficient cause existing to justify my doing so, and I venture to think that, until the sanction of the shareholders has been obtained before the expenditure is incurred, the board would not be fully justified in proceeding without their sanction." The board did not challenge, let alone repudiate my speech in November last year, nor did they do so on receiving the letter of May 16th last, from which the above is a quotation. The receipt of that letter, reminding them of our pledges, surely offered a fitting occasion for repudiation, could the board have done so, but it could not and, therefore, did not do so; the fact being that the board, in March, believed that no important expenditure on special renewals had taken place. It is only twelve months afterwards that the plea of absence of authority is invented, and as I have shown, without a shadow of foundation to rest upon. I think this occasion should not pass without my stating the grounds of my dissent from other items of expenditure, in addition to the renewals of permanent way referred to by Mr. Harrison Hodgson in his report mentioned involving new works, which would, in my opinion, ultimately cost near upon 500,000*l.* The estimate is less, but we all know the danger there is of estimates being exceeded. The works in question are speculative; they are not indispensable, and even if they were it is not clear where the money is to come from for them. I am of opinion that there will be scarcely 200,000*l.* of the capital authorised by the scheme of arrangement left after all the present capital appropriations have been made. Much of this 200,000*l.* will be required in the future to meet from time to time the proportion of permanent way renewals chargeable to capital, and the main line in many parts will indispensably need what is left. Thus there will be nothing within our present powers for a policy of adventure. With regard to the future of the company it should be remembered that there are hundreds of thousands of acres of good land contiguous to and served by our main line still undeveloped, upon the cultivation and development of which much of our future depends. Would it not be better to try and make what we have got pay rather than engage in new speculative ventures? To my thinking the case is too plain for argument. I regret much that I should have been forced into the necessity of addressing you; but I have no hesitation in saying that, but for my persistent opposition the company would have been committed to the whole of the 66,000*l.* recommended to be spent by Mr. Harrison Hodgson. I think I may claim to have succeeded in my efforts. I ask the shareholders to compare the general manager's more moderate claims as stated to the meeting with the demands he made in March last. He is reported to have stated to the meeting of October 25th last that an expenditure of 15,000*l.* a year for ten years will keep the line

in fair running order. I hope he will adhere to this pledge. Differences of opinion on large questions of policy must arise; but I hope I may appeal to every fair and impartial mind when I claim that the attack made on me in my absence was not warranted. You have now heard—but only now—both sides of the controversy and can judge whether I was not justified in refusing to commit the company to an expenditure of 88,000*l.* in one year on renewals of permanent way. What I claim as to this and all other exceptional expenditure is that you should be fully informed and freely consulted, and your approval be given before it is incurred. Had I been present at the meeting of October 25th last I should have in substance made the foregoing statement, where I will for the present leave the subject.—I am, your obedient servant,

J. C. F. LEE.

### THE RAILWAYS AND THE ARMY.

A correspondent of the *Times* writes:—One feature of the recent military manœuvres has, perhaps, received too little attention. As the Secretary of State for War has pointed out "this is the first time in the history of this country that, at a time of peace, 50,000 British soldiers have taken the field." It is also the first time that our railway companies have been called upon to carry out on a large scale the transport of troops to their points of concentration. Your military correspondent bore striking testimony to the universal good will and resourcefulness displayed by the numerous officials whose services were brought into play. Mistakes were doubtless made; but no one could have studied the arrangements made to meet the additional strain created by the movements of large bodies of troops, at a time when the normal traffic could not be stopped, without realising the immense potentiality for military purposes, of our admirably managed railway systems. On the Continent mobilisations entail the transference of power from railway officials to the military authorities, and consequently a partial dislocation of the peace administration. With us this disadvantage can happily be avoided, and the best results can be obtained by the cordial co-operation of the civil and military element for the national good. In place of superseding trained officials by untrained autocrats, the fullest advantage can be taken of mature experience. I think, therefore, that the excellent relations between the railways and the army which were established during the late manœuvres ought to be permanently maintained and developed. The *entente cordiale* which has been shown to be possible would be invaluable in war and might be extremely advantageous in peace. At the root of the efficiency of the army lies the recruiting question, of which a satisfactory solution depends mainly on the prospect held out to the time-expired soldier on his return to civil life. The railway companies annually require a large number of men of good character trained to habits of discipline. The army annually sheds large numbers of such men. I do not think it is too much to say that our railways could take at least 10,000 men every year, and I need not dwell upon the stimulus, alike to recruiting and to good behaviour while with the colours, which the opening out of so large a field of employment to the soldier would provide. The matter is, however, one which could be dealt with only by the War-office in conference with the directing heads of the railway companies, and the successful co-operation, which was a significant feature of the manœuvres, affords the strongest grounds for believing that the necessary arrangements could be easily made.

### SOUTH EASTERN AND CHATHAM AMALGAMATION.

(*Financial Times*.)

Although the rumour started by a contemporary that friction had arisen between the officials of the South Eastern and the London Chatham and Dover Railways has obtained no credence on the Stock Exchange, some of the public are apparently not so well informed. In order, therefore, to allay any anxiety on the subject, and also to obtain the latest information as to the situation, a representative of the *Financial Times* on Wednesday waited on Mr. Willis, the general manager of the South Eastern Railway. Mr. Willis, although very busy, received our representative with the utmost courtesy.

"There is not the slightest foundation," he said, after the object of the visit had been explained to him, "for the report that friction had arisen between the officials of the two companies. As a matter of fact, matters are running as smoothly as possible, and I am naturally much annoyed that such a statement should have been made. I may say that every suggestion I have offered to the Chatham Company has been readily acquiesced in, and none but the most friendly relations exist between us. Mr. Forbes, indeed, was as much vexed as myself with the publication of the canard, and not only did he send me a private letter expressing his regret and annoyance at the circumstance, but he also sent an official denial to a news agency for the use of the press. So far from there being any friction, the arrangements are progressing favourably; but they, of course, take time, as they naturally involve an enormous amount of work."

"At what date will the new working arrangements commence?"

"On the first of the new year. Trains will then run from Victoria to Hastings, from Cannon-street to New Brompton, and from Victoria to Folkestone. But these are only some of the innovations which will be made. The two roads will practically be run as one company, and the amalgamation, I feel sure, will be a great convenience to the public, especially when all the alterations and extensions we propose to make are completed. At Chislehurst, for instance, where the Chatham line runs under the South Eastern, a new junction will be made which will give passengers another route to the sea. Then we intend connecting by means of a short extension the Maidstone branch of the Chatham (which runs parallel with the South Eastern) with our line between Sevenoaks and Chislehurst, thus forming a third route *via* Maidstone and Ashford to the sea-coast."

"Passengers, I presume, will not be restricted to any particular route?"

"We don't care which route they patronise as long as they pay for their journey. We intend offering every inducement to the public to use our lines. Speaking for the South Eastern, this has been our policy in the past, and we shall continue it in the future."

Mr. Willis's opinion was then asked on a question which has more than once been mooted—that a ticket once bought should be good until used.

"I should have no objection to such an arrangement," he said, "provided railroads were properly protected from fraud, or even if severer penalties were enforced on those convicted of such acts. It is by no means easy to obtain convictions, and when we do, a trifling penalty of 40*s.* has little effect in preventing the recurrence of such offences. Until a change is made in this respect, railway companies must to protect themselves refrain from making this particular concession."

Our representative subsequently ascertained that the new Bills for the amalgamation of the two companies would not be published until December 22nd.

### RAILWAY WAGON SUPPLY IN SCOTLAND.

The Glasgow correspondent of the *Financial Times*, in his weekly review of Scotch trade on Saturday last, says:—"A drawback, which rather increases than otherwise, is the scarcity of railway wagons, and traders have cried in vain for more trucks. Of late years the Scotch railways have gone in largely for wagon stock, and they have bought up most of the private wagons, with the result that they now have the whole trade in their hands. The Caledonian and North British railway companies not long ago ordered 1,000 wagons, and this week the Glasgow and South Western Company has arranged for 1,000 more wagons. These, when fully delivered, should help matters, although a thousand wagons spread over a system is but a small addition after all. The Caledonian and North British companies are building half of their own wagons, and the other half were placed with private firms. The Glasgow and South Western Company's last order was executed at Oldbury, but where the latest additions are to be built has not been allowed to transpire. Those traders who import ore and export coal have agreed to wait upon the railway boards, and this is in the nature of a threat to force matters if they do not get satisfaction. But the railway companies are not wholly to blame. Last week matters were much disturbed by the fog, and, in addition, some favoured firms take advantage of the railway competition in their district to practically use wagons as warehouses for goods. A good number of trucks at this season are diverted to the carriage of potatoes. This grievance of short supply of wagons has been so long-lived that private traders are back in the market again for their own rolling stock."

### PORT TALBOT RAILWAY AND DOCKS.

The following advertisement from the South Wales and West of England papers is interesting as showing the facilities which the newly-opened railway and dock at Port Talbot claim to give for goods and mineral traffic:—"On and from Monday, November 14th, 1898, the South Wales Mineral Junction Railway between Port Talbot and Ton-Mawr Junction, connecting with the South Wales Mineral Railway, will be opened for goods and mineral traffic, giving facilities for traffic to and from the following places:—Cwmavon-yard; Ynysydauid sidings for Rio Tinto copper works, Messrs. Wright, Butler, and Co.'s collieries and works; Blaenavon branch for New Forest Colliery, Llantwit Merthyr Colliery, Marine Colliery, Gwenffrwd Quarry, Ty'nnewm Quarry; Ton-Mawr Junction—exchange junction with South Wales Mineral Railway for traffic from Glyn Corrwg and other places; Whitworth Railway for Mercantile Colliery. Sidings are in course of construction, and will be ready for opening in a few weeks with Craigavon (Messrs. David Rees and Co.); Ynysavon (for Cwmavon Colliery Company). Through traffic with the above stations, &c., can be exchanged with the Great

Western Railway and Rhondda and Swansea Bay Railway, at Port Talbot and Aberavon. New dock.—Nearest port to the world-renowned Rhondda and surrounding South Wales coal-fields. Shortest and most direct railway communication with the Garw, Llynvi, and Ogmore Valleys. Entrance lock—450ft. long, 60ft. wide, 26ft. 6in. depth on dock sill all tides."

### NEW COMPANIES AND NEW ISSUES.

[Applications for shares in limited liability companies may be withdrawn by letter—or by telegram, if confirmed by letter—provided the notice of withdrawal reaches the secretary before the shares are allotted.]

Messrs. Speyer Brothers announce that letters of allotment and regret have been posted for the issue of \$10,000,000 Southern Pacific Railroad Company of California 5 per cent. first mortgage gold bonds.

The directors of the Great Southern and Western Railway Company of Ireland offer an allotment of ordinary stock, in the proportion of 10l. for every 100l. registered on the 3rd inst., at the price of 125 per cent., which was payable 25 per cent. of the capital and premium on acceptance on or before November 24th, and 75 per cent. on December 31st next. Dividend will commence to accrue on January 1st next.

The Himalaya Electric Railway Company, Limited, is the title of a company registered November 15th, by T. T. Hull, 22, Chancery-lane, W.C., with a capital of 3,000l., in 1l. shares. The objects of the company are to enter into an agreement with P. Violi, and to acquire and turn to account an invention known as the Himalaya Electric Railway, carried on at the Tower Grounds, New Brighton, Chester. Table A mainly applies.

The Crystal Palace Light Railways and Tramways Company, Limited, is the title of a company which has been formed with a capital of 5,000l. in 1l. shares, to carry on the business of railway, tramway, omnibus, carriage, and van proprietors, as electrical engineers, carriers of passengers, goods, mails, &c. The directors are to be elected by the signatories. Qualification, 200l. Remuneration, 500l. per annum, divisible. Registered by H. C. Godfray, 42, Finsbury-circus, E.C.

The Orpington Cudham and Tatsfield Light Railway Company, Limited, is the title of a company which was registered on the 16th inst., by Dollman and Co., 39, King-street, Cheapside, E.C., with a capital of 1,000l. in 1l. shares. The objects of the company are to construct, purchase, lease, or otherwise acquire any light railway or tramway in the counties of Kent, Sussex, Surrey, &c., and to carry on the general business of carriers of goods and passengers, van and omnibus proprietors; as builders of motor carriages and other vehicles. Registered without articles of association.

The Rhyl and Prestatyn Light Railway Company, Limited, is the title of a company which was registered on the 17th inst. by W. Webb, Bush-lane House, E.C., with a capital of 2,000l. in 1l. shares. The objects of the company are to construct and work a light railway from Rhyl to Prestatyn by means of electricity, gas, oil, steam, horse, or any mechanical power; and to trade as cab and omnibus proprietors, shipowners, &c. The proposed line will pass through the parishes of Rhuddlan, Dyserth, and Maliden. The directors are to be elected by the signatories. Qualification, 250l. Remuneration to be fixed by the company.

An issue is being made by the British Columbia Electric Railway Company, Limited, of 12,000 non-cumulative preference shares of 10l. each, at the price of 11l. per share, and ranking for additional dividend rateably with the ordinary shares after such shares have received 7 per cent. The prospectus states that the undertaking is an English limited company, carrying on business under special privileges granted by Acts of the Parliament of British Columbia, in the cities of Vancouver, Victoria, and New Westminster and their suburbs, and between Vancouver and New Westminster, and between Victoria and Esquimaux Forts and Dockyards, the headquarters of the British Pacific fleet. On September 30th it was operating 41 miles of fully equipped railway, and 1 mile was in course of construction. The company also carries on an electric light business in Victoria and Vancouver. It has an authorised share capital of 370,000l., of which 200,000l. ordinary capital is issued, and has outstanding 250,000l. 4½ per cent. first mortgage debentures, and 60,000l. 6 per cent. income bonds, the redemption of which at par out of the proceeds of this issue has been assured. A balance of the issue, after providing for extensions and improvements, is reserved for future requirements. The company's net earnings for the past year are stated to have been 27,870l.

### NORTH EASTERN RAILWAY ASSESSMENTS.

At the Ouse and Derwent petty sessions, held at York Castle on Saturday, the North Eastern Railway Company were summoned, at the instance of the overseers of five parishes in the division, to show cause why an order should not be made

upon them for the payment of rates. Mr. R. H. V. WRAGGE, in opening the case for the overseers, dealt first with the parish of Eserick, and said that, owing to the revaluation of property which had been going on in the York Union, the ratable value of the North Eastern Railway Company had been very largely increased. The rate for Eserick was made on May 21st last, at 8d. in the pound, payable in two instalments. A demand for the amount due from the company—211l. 2s. was made upon them, but they had only paid 92l. 12s., the amount which would have been due under the old assessment, leaving a balance of 118l. 10s. Mr. Dunnell, on behalf of the company, applied for an adjournment. Ultimately the Bench made the orders asked for, but refused an application of Mr. Wragge for special costs.

Further summonses against the North Eastern Railway Company in respect of non-payment of rates upon the recent reassessment of property in the York Union were down for hearing at the York Police-court on Monday. Mr. R. H. V. Wragge appeared for the overseers, and Mr. Dunnell represented the railway company. There were nine summonses, and the case of the parish of St. Mary Bishophill Junior was first gone into. It was stated that the total amount due from the company on two half-years was 8,622l., but they had only paid 1,904l. 19s. on the old assessment, leaving 6,717l. still owing. Mr. DUNNELL, in asking the court for an adjournment, remarked that the company's ratable value had been raised from something under 40,000l. to 150,000l. In the parish of St. Mary Bishophill alone it had been raised from 11,000l. to 70,000l. The company were most anxious to have the matter settled, but until the Assessment Committee had given a final decision, it was impossible for them to serve notices of appeal. Mr. WRAGGE replied that it had been clearly indicated to the North Eastern Railway Company that the Assessment Committee had come to a decision. Ultimately the bench decided that a warrant must issue in each case. They refused an application for special costs.

### ELECTRIC TRACTION ON THE METROPOLITAN RAILWAYS.

As briefly announced in THE RAILWAY TIMES about three months ago, the directors of the Metropolitan and Metropolitan District railway companies have decided to undertake at their joint cost a series of experiments prior to the introduction of electric traction on the Inner Circle lines. For this purpose it is proposed to lay down between Earl's-court and High-street, Kensington, an electric installation adequate for the haulage of a train which shall be fully as heavy as those now running at the busiest times of the day on the Metropolitan Railway. This section of the company's line has been chosen for two special reasons—first, because the ordinary service thereon is not so frequent as that on other sections; and, in the second place, because it contains some steep gradients—as sharp as 1 in 40—which will enable the new electrical system to be tested under the severest conditions that would be experienced in regular working. Each company has agreed to put down the sum of 10,000l. to defray the cost of the experiments, and those will be carried on, without any interruption of the present steam locomotive traffic, for eight or ten months—a period sufficiently long to demonstrate the practicability of the principle thereafter to be introduced generally on the lines of the Metropolitan and the Metropolitan District railways. The contract for the experimental work has been let, and it will be executed forthwith under the direction of Sir John Wolfe Barry, the consulting engineer to the Metropolitan Company, with whom is associated Mr. W. H. Preece, the engineer-in-chief and electrician to the General Post-office. In the first instance, the generating station, erected on land belonging to the Metropolitan District Railway Company at Earl's-court, will, in all respects save foundations for boilers and dynamos, be temporary in character. Two conductors are to be laid parallel between each of the lines of the permanent way between Earl's-court and High-street, Kensington, and these will be permanently available when the electric system is introduced generally on the two railways. The contractors have been instructed to build for the purposes of the experiments two motors, so designed as to form part of the permanent plant, and the train used will be similar to those now running over the Inner Circle. It is expected that the preparations for the trials will be completed during the summer of next year.

### CHINESE RAILWAY QUESTION.

A Reuter's telegram from Pekin states that negotiations are in progress between the American Syndicate for the construction of the Hankau-Canton railway, the Hong Kong and Shanghai Bank, and Messrs. Jardine, Mathieson, and Co. with a view to amalgamating for the purpose of constructing the line in question.

The Paris correspondent of the Times announces that the

French Government has accepted in principle M. Doumer's scheme for a loan of 200,000,000f. for the construction of a railway system in Indo-China. The State will guarantee the loan, although the resources of the colony will suffice for the construction of the railways. Among the lines under consideration are one from Haifong to Lao-kai, and advancing thence into Chinese territory, a coast line towards Anam, and a line towards Cochinchina. The Governor-General and the Government are now studying the entire scheme, notably that portion of it which concerns the line of penetration into China, and it will shortly be presented to Parliament.

The Peking correspondent of the *Daily Mail* announces that the British-Chinese Railway Syndicate has obtained a concession for a railway to run from Canton to Chengtu. This line will cross the Yangtse river, probably at Suifu, and will run up the Mine Valley to Chengtu, a most important city in the wealthy province of Szechuen. At Suifu it will bisect the future Yunnan railway, now being surveyed, which will be an extension of the Burmah Railway. The Chengtu-Canton concession is a highly important one, the correspondent says. He adds that, in view of pushing British interests in China, it would be well for the various syndicates and companies to join together and work in unison. The number of British companies seeking for railway concessions is puzzling to the Chinese Government. They must also be embarrassing to the British Ambassador, who has to advocate their claims, and must fear to lay himself open to the charge of unduly favouring one at the expense of another. The *Mail* summarises the railway concessions to date as follows:—

- |  |  |
|--|--|
| 1. <i>British</i> —<br>Kowlung to Canton.<br>Shanghai to Wu-Sung.<br>Shanghai to Chin-Kiang, Nan-king, Hang-Chow, and Wenchow.<br>Kunlong Ferry to Talifu, Yunnan, Suifu, and Chung-King.<br>Moulmein to Yunnan.<br>Shan-hai-kwan to Newch-wang, and<br>Canton to Cheng-too. | 4. <i>German</i> —<br>Kiau-chau to Tsi-nan.<br>Kiau-chau to Ichow.   |
| 2. <i>Anglo-German</i> —<br>Tientsin to Chin-kiang.  | 5. <i>French</i> —<br>Langson to Yunnan.<br>Langson to Canton.<br>Nanning to Pakhoi.<br>Laokai to Yunnan.  |
| 3. <i>Anglo-Italian</i> —<br>Tal-yuen to Si-ngan and Siang-yang.   | 6. <i>Belgian</i> —<br>Ching-ling to Hankow.   |
|  | 7. <i>Russian</i> —<br>Port Arthur to Novo Tsuruk-haitul.<br>Vladivostok to Nguta and Manchurian main line.<br>Kipin to Manchurian main line.<br>Pao-ting to Tai-Yuen. |
|  | 8. <i>American</i> —<br>Wu-chang to Canton   |

The Chinese Government has received three separate offers of foreign financial assistance for improving the navigation of the Yellow River. None of these offers came from British syndicates.

#### THE PEKIN SYNDICATE, LIMITED.

A good deal of amusement was excited in the City last week by the letter from Li Hung Chang read at the meeting of this concern. It is, indeed, a very funny letter, so funny that we print it this week along with the concluding portion of the report of the meeting. It will be found on another page. Somebody must have written it for the old man with his tongue lolling out. About that meeting itself we have very little to say now, because the opinion held by us regarding this enterprise has already been frankly expressed, and we see no reason to change it. The method of finance followed by the syndicate is purely and simply Rhodesian. There is the same inflation of capital without warrant, the same favouritism shown to holders of deferred or founders' shares, the same attempt to discount the future on most extravagant terms. So remarkable is the slavish copying of Rhodesian methods that we reprint a portion of the best report we could find, that of the *Financial Times*, so that the public may trace it out for themselves. Some day, perhaps, China will have great coal mines and many railways, and these railways might yield a profit, but the railways will neither be built nor the profit earned by financial methods such as those the syndicate follows. It is adding to its capital, issuing shares at a fanciful premium, and has nothing whatever to show for its industry in scrip manufacture except concessions and the promise of a survey. But for the mischief likely to be done to legitimate enterprises in China by ongoings of this description the thing would be an exquisite joke. One point, we note, is never dwelt upon in these public gatherings, and that is the shortness of the syndicate lease or concession. It is only for sixty years. At the end of that term, as the United States Consul at Tientsin has pointed out in a report to his Government, "all machinery, plant, buildings, mines, railways, &c., revert gratis to the Chinese Government." If the syndicate does not change its methods and forsake stock-jobbing for hard work, there will not be a great deal to hand over.—*Investors' Review*.

#### RAILWAYS AND ROAD LOCOMOTIVES.

Clause 6 of the Act of Parliament recently passed at the instance of the Lancashire County Council provides that a county council may contribute or join with other local authorities in contributing to the rebuilding, widening, or improvement of any bridge in the county belonging to a railway, canal, or other company, corporation, or person, and to the widening and improvement of the approaches to the bridge, and charge the expenditure to the county fund. The Executive Council of the County Councils Association addressed a circular to county councils asking whether railway companies has prohibited the passage of locomotives across overline bridges, and if so, whether any inconvenience has arisen from such prohibition, and also, whether in the opinion of the council it would be desirable to promote a Bill applying to counties generally the principles of the clause quoted above. Twenty-eight councils have replied to the circular. In Berks, Bucks, Carnarvon, Derbyshire, Dorset, Isle of Ely, Gloucestershire, Hants, Herts, Kent, Lincoln (Holland), Lincoln (Lindsey), Middlesex, Monmouthshire, Montgomeryshire, Oxfordshire, Suffolk (West), Surrey, Sussex (East), Sussex (West), Warwickshire, and Worcestershire no notices of the kind referred to have been posted, or, if any such notices have been posted, no inconvenience has been found to arise therefrom. In Lancashire notices have been issued by canal companies, but it is not stated whether any inconvenience has been caused or not. In Bedfordshire, Cumberland, Northumberland, Notts, and Yorkshire (North Riding) notices posted by railway or canal companies have been found to cause inconvenience. Bucks, Cumberland, Derbyshire, Dorset, Herts, Kent, Lancashire, Lincoln (Holland), Middlesex, Northumberland, Surrey, Sussex (East), Warwickshire, and Worcestershire approve of the promotion of a Bill in Parliament; but Bedfordshire, Berks, Carnarvon, Isle of Ely, Notts, Oxfordshire, and Suffolk (West) disapprove of the adoption of such a course. Gloucestershire thinks that, if fresh legislation is necessary, it should not be obligatory; that the contribution should be deemed a special county purpose, as in the Lancashire Act.

#### RAILWAY PATENTS.

[This list is specially compiled for THE RAILWAY TIMES by Messrs. Rayner and Co., registered patent agents, 37, Chancery-lane, London, W.C., from whom all information relating to patents, designs, trade marks, copyrights, &c., may be obtained.]

- 24,000. J. H. Warren, W. M. Wignall, E. C. Treloar, and John Flynn—Improved attachments to railway carriages for the simultaneous closing and locking of the doors.
- 24,018. M. Waterhouse, J. B. Michell, and L. E. Robinson, 30, Park-row, Leeds—Improvements in fog signalling apparatus for railways.
- 24,019. Z. J. Parkes—Improvements in or relating to the permanent way of railways.
- 24,020. James Simpson, B. Wrigley, and Frederick Wrigley—Improvements in brakes for railway platforms, trolleys, or trucks, and other similar vehicles.
- 24,041. Eli William Parrett—Improved compensating apparatus for signal wires.
- 24,042. G. H. Trow, 2, Thornton-road, Canterbury-road, Croydon—An improved brake for station trolleys or other vehicles.
- 24,052. John McLeod Murphy—Improvements in electric railway systems.
- 24,053. John McLeod Murphy—Improvements in road way structures for electric railways.
- 24,098. Ernest Holland Ryan—Improvements in railway fog signalling apparatus.
- 24,119. John William Thomas—Utilising worn-out railway rails.
- 24,153. T. H. Michell and E. Michell, 232, Wellington-road, Eccles, Manchester—An automatic brake for railway and other platform trucks, barrows, and the like.
- 24,222. F. J. Whitehead, J. M. Stubbs, and H. Rogerson, Winsford Cycle Works, Winsford, Cheshire—The Whitehead and Stubbs patent for automatically locking and securing railway carriage doors whilst in motion or stationary.
- 24,227. John Whittle, Union Railway Wagon Works, Chorley—Improvements in railway platforms.
- 24,248. E. A. Thompson, Eastwood Level Crossing, Parkgate, near Rotherham, Yorks—The Don electric fog alarm.
- 24,252. J. Reeve and J. Fairfield, 30, Copy Nook, Blackburn—Self-acting brake for railway platform trolleys and other vehicles moved by hand.
- 24,319. W. S. Jervois, 24, Waltham-terrace, Blackrock, Co. Dublin—A new or improved method for signalling to trains when in motion by means of a semaphore fixed on the engine.

## GREAT WESTERN RAILWAY.

The Directors of this Company are prepared to receive TENDERS for the supply of UNIFORM CAPS and HATS, for alternative periods of one or three years, commencing in either case on the 1st of February, 1899.

Patterns may be seen at the Stores Warehouse, Paddington Station, between the hours of 10.0 a.m. and 5.0 p.m., from the 5th to the 9th of December, inclusive.

Forms of Tender (upon which alone Tenders will be received) may be obtained on application to the Secretary of the Company at Paddington, or to the Stores Superintendent at Swindon Station.

Tenders, addressed to the undersigned, and marked outside "Tender for Caps and Hats," will be received on or before Tuesday, the 13th proximo.

The Directors do not bind themselves to accept the lowest or any Tender.

G. K. MILLS, Secretary.

Paddington Station, London, 22nd November, 1898.

## IN PARLIAMENT.—SESSION 1899.

## GREAT CENTRAL RAILWAY.

(*New Railways in the County of Derby; Lengthening or Reconstruction of Bridge in County Borough of Sheffield; Compulsory Purchase of Lands and Houses; Deviations; Additional Lands in Counties of Lincoln and Nottingham, and County of the City of Lincoln; Stopping-up and Diversion of Footpaths in the County of the City of Lincoln, and the Counties of Lancaster, Nottingham and Northampton; Exemption from Private Street Work Expenses; Running Powers to Company over North Staffordshire Railway from Egginton to Burton and Pinxton Colliery Private Railway, and Running Powers to North Staffordshire Railway Company over Railway No. 4 authorised by the Manchester Sheffield and Lincolnshire Railway Act, 1895; Abandonment of Diversion of Railway authorised by Sheffield and South Yorkshire Navigation Act, 1889, and release of deposit in respect thereof; Extension of Time for Completion of the Widening of the Company's Main Line between Gorton and Hyde Junction; Extension of Time for Compulsory Purchase of Lands for and Completion of Railways 2, 3, 4, and 5 authorised by the Manchester Sheffield and Lincolnshire Railway (New Railways) Act, 1888; Extension of Time for Sale of Superfluous Lands of the Cheshire Lines Committee, and Sheffield and Midland Railway Companies Committee; Extension of Time for Completion of Railways authorised by the Cheshire Lines Act, 1890; Extension of Time for Completion of Railways authorised by the Wirral Railway Certificate, 1883, the Wirral Railway Act, 1884, and other Acts relating to the North Wales and Liverpool Railway Committee; Extension of Time for Powers of Wrexham, Mold and Connah's Quay Railway Company to form Junctions with the London and North Western Railway Company; Extension of Time for Compulsory Purchase of Lands for and for the Completion of Railway No. 2 authorised by the Manchester Sheffield and Lincolnshire Railway Act, 1894; Extension of Time for Completion of Deviation Railway No. 3 authorised by the Manchester Sheffield and Lincolnshire Railway Act, 1894; Tolls, Rates and Charges; Application of Funds; Additional Capital; Amendment of Acts; and other purposes.)*

NOTICE is hereby given, that application is intended to be made to Parliament in the ensuing Session for an Act (hereinafter called "the intended Act") for the following, among other, purposes (that is to say):—

To empower the North Staffordshire Railway Company, and all companies and persons lawfully working or using the Railways of the North Staffordshire Railway Company, or any of them, or any part or parts thereof, to run over and use with their engines and carriages, officers and servants, and for the purposes of their traffic of every description, upon such terms and conditions, and upon payment of such tolls, rates, charges, or other remuneration as may be agreed upon, or settled by arbitration, or prescribed or provided for by the intended Act, the Railway hereinafter mentioned, or some part or parts thereof, together with the stations, sidings, roads, watering-places, water supply, booking and other offices, warehouses, sheds, junctions, points, signals, landing-places, works, conveniences and appliances on or connected therewith respectively (that is to say):—

The Railway No. 4 authorised by the Man-

chester Sheffield and Lincolnshire Railway Act, 1895, and by virtue of the Great Central Railway Act, 1898, now vested in the Nottingham Joint Station Committee incorporated by the Great Central Railway Act, 1897, and which Railway the Company and the Great Northern Railway Company severally and jointly are entitled to use as if it formed part of the undertaking of those two Companies;

and to require and compel the Great Central Railway Company, and the Great Northern Railway Company, to afford all requisite facilities for such traffic as aforesaid, and to enable the North Staffordshire Railway Company and all such Companies and persons as aforesaid to levy tolls, rates and charges in respect of all traffic conveyed by them over the before-mentioned Railway No. 4, and the said stations, sidings and conveniences, or any part or parts thereof, under the powers of the intended Act, and if need be to alter and vary the tolls, rates and charges now leviable, and to fix and determine the tolls, rates and charges to be hereafter taken upon or in respect of the said Railway, or any part or parts thereof, and the stations, works and conveniences connected therewith.

To extend the time limited by the Great Central Railway Act, 1897, for the exercise of the powers granted to the Wrexham, Mold and Connah's Quay Railway Company, to form junctions with the London and North Western Railway Company, near Connah's Quay, in the county of Flint, authorised by and described in sub-sections 8 and 10 of section 4 of the Wrexham, Mold and Connah's Quay Railway Act, 1882.

And Notice is hereby further given that the Notice for the intended Act has been published in full or sent for publication in full in the "London Gazette" in this present month of November.

Printed copies of the Bill for the intended Act will, on or before the 21st day of December next, be deposited in the Private Bill Office of the House of Commons.

Dated this 14th day of November, 1898.

R. B. M. LINGARD-MONK,  
7, Victoria-street, Westminster,  
and Manchester,  
Solicitor for the Bill.

## IN PARLIAMENT.—SESSION 1899.

## LONDON, CHATHAM, and DOVER RAILWAY.

(*Regulation of Company's Capital; Additional Capital; Power to raise same by the issue of Debentures, Debenture Stock, or by Preference Stock; Power to make Agreements with South Eastern Railway Company as to raising additional Capital; Repeal or Modification of Provisions to Section 6 of the London, Chatham, and Dover Railway (Capital) Act, 1885, and to Section 4 of the London, Chatham, and Dover Railway (Capital) Act, 1890; Additional Lands in the County of Kent; Extension of Time for Sale of Superfluous Lands; Extension of Time for Widening of Company's Railway, authorised by the London, Chatham, and Dover Railway Act, 1879; Extension of Time for Completion of Gibbon-road Bridge, authorised by the London, Chatham, and Dover Railway Act, 1892; Amendment of Acts.)*

NOTICE is hereby given, that application is intended to be made to Parliament in the ensuing Session by the London, Chatham, and Dover Railway Company (hereinafter called "the Company") for an Act (hereinafter called "the intended Act") for all or some of the following purposes:—

1. To enable the Company to raise additional capital for the purpose of their undertaking, and to raise such additional capital, in whole or in part, by means of ordinary stock, preference or guaranteed stock, debenture stock and debentures, or by all or any of such modes, and to make such provision with respect to the interest payable on such stocks and debentures respectively, and the rights of priority or preference in the payment thereof as may be authorised by the intended Act, and to alter or vary the nominal amount of the capital and borrowing powers of the Company.

2. To make arrangements and agreements with the South Eastern Railway Company with respect to the raising of such capital, and to the payment of interest on the same.

3. To amend or repeal the proviso to section 6 of the London, Chatham, and Dover Railway (Capital) Act, 1885, and the proviso to section 4 of the London, Chatham, and Dover Railway (Capital) Act, 1890, with respect to the redemption and cancellation of the Arbitration Preference Stocks authorised to be raised and raised under the powers and provisions of the said Acts of 1885 and 1890 respectively, and to free and discharge the said stocks and the Company from the conditions of the said provisos respectively.

4. To empower the Company for the purposes of their general undertaking to purchase by compulsion or agreement, or to confirm any contract or agreement, entered into or to be entered into by the Company, for the purchase or acquisition of all or some of the following lands or properties shown on the plans to be deposited as hereinafter mentioned, namely:—

Certain lands, houses, and buildings in the borough of Faversham and parish of Faversham within, in the county of Kent, known as Delbridge House, and lying on the north side of the Railway.

Certain lands, houses, and buildings in the urban district and parish of Herne Bay, in the county of Kent, adjoining the Herne Bay Station of the Company, and lying on the north side thereof.

Certain lands in the parish of Herne, in the county of Kent, adjoining the Herne Bay Station of the Company, and lying on the south side thereof.

Certain lands, houses, and buildings in the parish of Newington, in the county of Kent, adjoining the Newington Station of the Company, and lying on the south side thereof.

Certain lands, houses, and property in the urban district and parish of Sevenoaks, in the county of Kent, near the Bat and Ball Station of the Company, now in the occupation of Mrs. Wood, and abutting on the approach to the station.

Certain lands and buildings and foreshore in Dover Harbour, in the borough and parish of Dover, or adjacent thereto, between the Dover Harbour Station of the Company and the Admiralty Pier.

5. To extend the time limited by the London, Chatham, and Dover Railway Act, 1894, for the sale of all or any of the superfluous lands of the Company, and to confer upon the Company further powers with reference to the retention, sale, or disposal of such lands; and to alter, amend, and extend, with reference thereto, the provisions of the Lands Clauses Consolidation Act, 1845.

6. To extend the time limited by the London, Chatham, and Dover Railway (Further Powers) Act, 1896 (hereinafter called the Act of 1896), for the completion of the widenings Nos. 1, 2, and 3 of the Company's Railway authorised by the London, Chatham, and Dover Railway Act, 1879.

7. To extend the time limited by the Act of 1896 for the completion of the widening of the bridge carrying the Company's railway over Gibbon-road, Nunhead, authorised by the London, Chatham, and Dover Railway Act, 1892.

8. To make all necessary provisions for the purposes aforesaid, or any of them, and to confer, vary, or extinguish all rights and privileges which it may be requisite to confer, vary, or extinguish for the purposes of the intended Act, or any of them, and to confer other rights and privileges.

9. For the purposes of the intended Act to alter, amend, extend, and enlarge, and, if need be, to repeal the powers and provisions, or some of them, of the local and personal Act, 16 and 17 Vict., cap. 132, and all other Acts relating to or affecting the Company.

10. And Notice is hereby further given, that plans of the lands, houses, and other property proposed to be taken compulsorily, with a book of reference thereto, containing the names of the owners or reputed owners, lessees or reputed lessees, and occupiers thereof, and a Copy of this Notice, will be deposited on or before the 30th day of November instant with the Clerk of the Peace for the county of Kent at his office at Maidstone.

11. And that copies of so much of the said plans and book of reference as relates to the several areas hereinafter mentioned within which the lands, houses, and other property proposed to be taken compulsorily are situate, and also a copy of this Notice will on or before the 30th day of November instant be deposited for public inspection as follows: as relates to

the boroughs of Dover and Faversham, with the Town Clerks of those boroughs, at their offices in those boroughs respectively; as relates to the Urban Districts of Herne Bay and Sevenoaks, with the Clerks to the District Councils of those Urban Districts respectively at their respective offices; and with the Clerks to the Parish Councils of the parishes of Newington and Herne at their respective offices, or if there be no Clerk with the Chairman of the Council at his residence.

12. Printed copies of the Bill for the intended Act will be deposited in the Private Bill-office of the House of Commons on or before the 21st day of December next.

Dated this 18th day of November, 1898.

## GREAT NORTHERN RAILWAY.

*(Deviations and Alterations of Levels of Loop Line—Enfield to Stevenage; Abandonment of Parts of Authorised Line; Widening between Finsbury-park and Harringay; Widening at Hornsey; Widening and Improvement at Peterborough; Diversion of Roads, Construction of Bridges by Company and the Midland Railway Company, and Abolition of Level Crossings at Peterborough; Diversion of Roads at Highbury; Extension of Bridge at Hatfield; New Roads, Stopping-up of Roads and Footpaths, and Abolition of Level Crossings at Stevenage; Bridge over River Welland at Deeping; New Road and Stopping-up of Roads at Leicester; Widening of Bridges and Stopping-up of Footpath at Grantham; Covering over Portions of Nottingham Canal; Taking Water from River Trent; Laying of Tolls, Rates, and Charges; Compulsory Purchase of Lands; Exemption from Section 92 of Lands Clauses Consolidation Act, 1845; Purchase of Additional Lands in Counties of London, Middlesex, Hertford, Bedford, Huntingdon, Leicester, Northampton, Lincoln, Nottingham, Derby, York (West Riding), and Lancaster, and Power to Hold for General Purposes of their Undertaking those already Purchased; Further Extension of Time for Purchase of Lands at Finsbury-park, Hornsey, and Leeds; Power to Invest any Funds belonging to the Company, and any part of their Superannuation, Guarantee, or Savings Bank Funds respectively, in the Preference or Loan Capital of the Company, or in Capital of any other Undertaking on which they Guarantee the Dividend or Interest; Power to Vary from time to time the Scheme for Establishing a Guarantee Fund authorised by the Great Northern Railway (Various Powers) Act, 1872; Sub-lease or Assignment of part of Land adjoining to Bay of Nottingham Canal; Maintenance of Diverted or Substituted Roads; Agreements with Local Authorities; Appropriation of Lands of Company for Labouring Class Dwellings; Extension of Time for Sale of Superfluous Lands; Power to Corporation of Peterborough to enter into Agreements as to Contribution, and to Contribute Funds; Power to enter into Working and Traffic Agreements with the Deane Valley Railway Company; Provision as to Special Constables; Additional Capital; Application of Funds by Company; Incorporation, Repeal and Amendment of Acts.)*

NOTICE is hereby given, that application is intended to be made to Parliament in the ensuing session by or on behalf of the Great Northern Railway Company (hereinafter referred to as "the Company") for leave to bring in a Bill for the following purposes, or some of them (that is to say):—

In this Notice any township or other place for which a separate Poor-rate is or can be made, or for which a separate overseer is or can be appointed, is referred to as a parish; and the term "district," with respect to the administrative county of London, means any parish in Schedule (A) and any district in Schedule (B) of the Metropolis Management Acts, 1855 to 1893, as amended by any subsequent Act.

To authorise the Company to exercise the

following powers, and to make and maintain the deviation Railways, alterations of levels of Railways, widenings of portions of their existing Railways (including in the expression widenings the alteration and improvement of and the laying down of additional lines of rails on Railways), and other works hereinafter described, with all needful stations, sidings, approaches, works, and conveniences connected therewith respectively (that is to say):—

**Deviations and Alterations of Levels of Loop Line—Enfield to Stevenage.**

A deviation (No. 1) of a portion of the Railway No. 1 of the loop line, Enfield to Stevenage (hereinafter referred to as "the said loop line"), authorised by "the Great Northern Railway Act, 1898" (hereinafter referred to as "the Act of 1898"), such deviation to commence in the parish and urban district of Enfield, in the county of Middlesex, at a point on the centre line of that Railway, as shown on the plans of the said Railway deposited in the month of November, 1897, with the Clerk of the Peace for the county of Middlesex, for the purpose of the application for the said Act (which plans are hereinafter referred to as "the plans for 1898"), about 34 yards, measured along the said centre line in a north-westerly direction from the centre of the public road known as Lavender-hill, and to terminate in the parish of Northaw, in the rural district of Hatfield, in Hertfordshire, at a point on the said centre line, about 237 yards, measured along the said centre line in a northerly direction from the centre of the public road known as Cuffley-hill. The deviation will be wholly within the said two parishes.

An alteration, wholly in Hertfordshire, of the levels of so much of Railway No. 1 of the loop line, Enfield to Stevenage, authorised by the Act of 1898, as lies between points on the centre line of the said Railway, 4 miles 5 furlongs 6½ chains, and 8 miles 6 furlongs or thereabouts respectively from the commencement of the said Railway, as shown on the plans for 1898. The intended alteration will be situate in the following parishes and places, or some of them, that is to say:—the parishes of Northaw and Hatfield, both in the rural district of Hatfield, the parish of Cheshunt, in the urban district of Cheshunt, and the parishes of Bayford and Brickendon rural, both in the rural district of Hertford.

A deviation (No. 2), wholly in Hertfordshire, of a portion of Railway No. 2 of the said loop line, such deviation to commence in the parish of Watton, in the rural district of Hertford, at a point on the centre line of the said Railway No. 2, as shown on the plans for 1898, about 240 yards measured along the said centre line in a south-easterly direction from the centre of the public road, dividing the said parish of Watton from the parish of Aston, and to terminate in the parish of Knebworth, in the rural district of Hitchin, at a point in the field numbered 3, in the said parish of Knebworth, on the plans for 1898, about 80 yards south-west of the point marked 7 miles 4 furlongs on the centre line of the said Railway No. 2.

The deviation will pass from, in, through, or into the parishes of Watton, Aston, and Datchworth, all in the rural district of Hertford, and the parish of Knebworth, in the rural district of Hitchin, or some of them.

A deviation Railway No. 3, commencing in the said parish of Knebworth, at the point above described as the termination of the deviation of Railway No. 2, and terminating in the parish and urban district of Stevenage by a junction with the down lines of the Company, at or near the southern face of the bridge, at or about 26½ miles from London, carrying the public road from Knebworth to Stevenage over the Company's main line.

A deviation Railway No. 4, also commencing at the termination of the deviation of Railway No. 2, and terminating in the said parish of Stevenage by a junction with the up lines of the Company, at or near the southern face of the said bridge.

The deviation Railways No. 3 and 4 will be

wholly in the said two parishes of Knebworth and Stevenage.

**Widening between Finsbury Park and Harringay.**

A widening of the main line of the Company, on the down side thereof, wholly in the parish and urban district of Hornsey, in the county of Middlesex, commencing by a junction with the down goods line, at a point about 178 yards south of the bridge carrying Upper Tollington Park over the Railway of the Company, and terminating by a junction with the said down goods line, opposite, or nearly opposite, the northern end of the down platform at Harringay Station.

Widenings at Hornsey.

A widening, No. 1, of the main line of the Company, on the down side thereof, wholly in the said parish and urban district of Hornsey, commencing about 77 yards south of the southern end of the down platform at Hornsey Station, and terminating about 120 yards north of the bridge carrying the Railway of the Company over Turnpike-lane.

A widening, No. 2, of the said main line, on the up side thereof, wholly in the said parish and urban district of Hornsey, commencing about 6 yards south of the footbridge at Hornsey Station, and terminating about 190 yards north of the said bridge over Turnpike-lane.

**Widening and Improvement at Peterborough.**

A widening and improvement of the main line and station of the Company, in the parish of Peterborough Within, in the city and borough of Peterborough, in the Soke of Peterborough, commencing at the northern end of the bridge carrying the said main line over the River Nene, and terminating at the south face of the bridge carrying Westwood-road over the railway of the Company.

To empower the Company to abandon so much of Railway No. 1 of the said loop line as lies between the said points of commencement and termination of the deviation No. 1, and so much of Railway No. 2 of the said loop line as lies between the said point, marked on the said plans as 5 miles and 1 furlong from the commencement of that Railway and the termination thereof; and also the whole of the Railways No. 3 and No. 4 of the said loop line; and to release the Company from all penalties and liabilities and all obligations under which they now are with reference to the said portions of railway and railways so to be abandoned.

To enable the Company and the Midland Railway Company, or either of them, to execute the following works, or some of them, or some part or parts thereof, and exercise all or some of the following powers (that is to say):—

In connection with the said widening and improvement of the main line and station at Peterborough, to empower the Company and the Midland Railway Company, or either of them, to construct a bridge or viaduct in lieu of the level crossing of the Railway of the Company and of the Railway of the Midland Railway Company by the Thorpe-road, and to divert and alter the gradients of Thorpe-road and Cowgate, such diversion to commence about 90 yards west of the western end of "The Crescent," and to terminate in Cowgate, about 100 yards east of the junction therewith of Sweet Briar-walk, and also to divert so much of St. Leonard-street as lies between its junction with Cowgate and its junction with Milton-street, also to divert and alter the levels of River-lane, such diversion and alteration to commence at a point therein about 60 yards south of its junction with Thorpe-road, and terminating at that junction. And the Bill will enable the Company and the Midland Railway Company, or either of them, to stop up and to extinguish all rights of way in and over the portions of roads so diverted between the respective points of diversion thereof, and in and over the level crossings of the Railway of the Company and of the Railway of the Midland Railway Company by Thorpe-road; and the Bill will vest in the Company the site and soil of so much of the said roads so stopped up as lies within the boundaries of the Company's property, and in the Midland Railway Company the site and soil of so much as lies within the boundaries of that Company's property.

To enable the Company to execute the following works, or some of them, or some part or parts thereof, and exercise all or some of the following powers (that is to say):—

**Division of Roads at Highbury.**

To enable the Company, in the parish and district of St. Mary, Islington, in the county of London, to divert a portion of the public roads, known as Drayton-park and Gillespie-road respectively, such diversion to commence in the said Drayton-park, at its junction with Elfort-road, and to terminate in the said Gillespie-road, at its junction with Highbury-hill, and to authorise the Company to stop up and to extinguish all rights of way in and over so much of the said Drayton-park and Gillespie-road as lies between the commencement and the termination of the proposed diversion. And the Bill will vest the site and soil of the roads so stopped up in the Company.

**Extension of Bridge at Hatfield.**

To enable the Company, in the said parish and rural district of Hatfield, in Hertfordshire, to construct additional openings under the public road leading from the North-road to St. Albans, at the western end of the bridge carrying the said public road over the Railways of the Company immediately north of Hatfield Station.

**New Roads and Footpath, Stopping-up of Roads and Footpaths, and Abolition of Level Crossings at Stevenage.**

To enable the Company, in the parish and urban district of Stevenage, and in the said parish of Knebworth, in the said rural district of Hitchin, in Hertfordshire, to construct a new road (No. 1), commencing in and out of the said public road leading from Knebworth to Stevenage, at a point about 550 yards measured along that road in a westerly direction from the centre of the bridge carrying the road over the Railway of the Company, and terminating in High-street, Stevenage, on the western side thereof, about 130 yards south of its junction with Orchard-road, otherwise Railway-street.

Also to construct, in the said parish and urban district of Stevenage, another new road (No. 2), commencing in and out of the public road leading from Norton-green to Stevenage, at a point about 420 yards measured along that road in a westerly direction from the centre of the bridge carrying that road over the Railway of the Company, and terminating by a double junction with the Great North-road at two points, respectively 190 yards south and 150 yards north of the junction of the said public road with the Great North-road.

Also to construct, in the said parish and urban district, a footpath, commencing in the road known as Green-street, at or near the eastern boundary of the Railway of the Company, and terminating in the existing footpath leading from the footbridge that crosses over the Railway of the Company near Orchard-court to Green-street, at a point thereon about 70 yards from the eastern end of the said footbridge.

The Bill will also enable the Company, partly in the said parish of Knebworth, in the rural district of Hitchin, and partly in the parish and urban district of Stevenage, to stop up and to extinguish all rights of way in and over so much of the said public road leading from Knebworth to Stevenage as lies between the point described above as the commencement of the proposed new road (No. 1) and the Great North-road.

Also, in the said parish and urban district of Stevenage, to stop up and to extinguish all rights of way in and over so much of the public road leading from Norton-green to Stevenage as lies between the point described above as the commencement of the proposed new road (No. 2) and the Great North-road, and in and over so much of the occupation road which crosses the Railway of the Company, on the level, about 200 yards north of the bridge, carrying the said road from Norton-green to Stevenage over the said Railway as will lie between the proposed new road (No. 1) and the Great North-road, and in and over so much of the public roads known as Water-lane and Brick-lane respectively as will lie

between the proposed new road (No. 1) and the said Railway.

And the Bill will vest in the Company the site and soil of so much of the public roads so stopped up as lies within the boundaries of the property of the Company.

The Bill will also enable the Company, in the said parish and urban district of Stevenage, to abolish the following level crossings of their Railway, and will vest in the Company the site and soil of the said level crossings.

The level crossing of the said occupation road that crosses the Railway of the Company about 200 yards north of the bridge carrying the public road from Norton-green to Stevenage over the said Railway.

The level crossings of the public roads known as Water-lane and Brick-lane respectively.

The level crossings of the occupation roads, 190 yards south and 315 yards north of the said Brick-lane crossing respectively.

And the Bill will extinguish all rights of way in and over the following footbridges crossing over the Railway of the Company, in the said parish and urban district of Stevenage.

The footbridge on the southern side of, and immediately adjacent to, the said Water-lane level crossing.

The footbridge on the northern side of, and immediately adjacent to, the said Brick-lane level crossing.

The footbridge at the occupation level crossing, 315 yards north of the said Brick-lane level crossing.

The footbridge about halfway between Water-lane and Brick-lane level crossings.

And the Bill will enable the Company to stop up, in the said parish of Stevenage, so much of the public footpath crossing the last-named footbridge, and leading from Broom-green to Stevenage, as lies between Water-lane and a point about 100 yards measured along the said footpath from its termination in Brick-lane, and so much of the footpath crossing the footbridge 315 yards north of Brick-lane, and leading from Symonds-green to Stevenage, as lies between Brick-lane and the Railway of the Company, and to stop up the public footpath leading from Green-street to Orchard-road, and so much of the existing footpath leading from Green-street to the above-mentioned footbridge near Orchard-court as lies between Green-street and the point above described as the termination of the footpath proposed to be constructed.

**Bridge over the River Welland at Deeping.**

To enable the Company, partly in the parish of Northborough, in the rural district of Peterborough, in the Soke of Peterborough, and partly in the parish of St. James, Deeping, in the rural district of Bourne, in the parts of Kesteven in Lincolnshire, to construct a bridge or viaduct across the River Welland, at a point about 130 yards below the bridge or viaduct that carries the Lincolnshire Loop Line of the Company across the said river.

**New Road and Stopping-up of Roads at Leicester.**

To enable the Company, in the parish and county borough of Leicester, to construct a new road, commencing in and out of the road known as Great Northern-road, at a point in that road about 110 yards measured in a westerly direction from the centre of the bridge carrying that road over the Company's Leicester Branch, and terminating in the road known as Ulverscroft-road, leading from Great Northern-road to Catherine-street, at a point in that road about 80 yards from its junction with Great Northern-road, and to authorise the Company, in the said parish of Leicester, to stop up and to extinguish all rights of way in and over so much of the said Great Northern-road as lies between the commencement of the proposed new road and Catherine-street, and in and over so much of the said Ulverscroft-road as lies between its junction with Great Northern-road and the termination of the proposed new road. And the Bill will vest the site and soil of the roads so stopped up in the Company.

**Widening of Bridges and Stopping-up of Footpath at Grantham.**

To enable the Company, in the parish of Spitalgate Within, in the borough of Grantham, in the parts of Kesteven, in Lincolnshire, to widen on the western side thereof the bridge carrying the Railway of the Company over the public road known as Brickkiln-lane, and to alter the gradients of the said Brickkiln-lane for a distance of about 100 yards, measured in a westerly direction from the eastern side of the said bridge.

Also in the said borough of Grantham to widen on both sides thereof the bridges carrying the said Railway over the public roads known as Hurlaxton-road, Wharf-road (both of which are partly in the said parish of Spitalgate Within and partly in the township or parish of Grantham), Dysart-road (wholly in the said township or parish of Grantham), and Barrowby-road (wholly in the parish of Little Gonerby), and to alter the gradients of the said Barrowby-road for a distance of about 50 yards, measured in a westerly direction from the western side of the existing bridge.

And to authorise the Company to stop up in the said parish of Spitalgate Within, in the said borough of Grantham, so much of the footpath leading from Grantham to Stroxtan, and crossing under the said Railway as lies between Station-road and Workhouse-lane.

**Covering over a Portion of the Nottingham Canal.**

To enable the Company, in the parish of Nottingham, in the county borough of Nottingham, to cover over a portion of the Nottingham Canal, extending from the west side of the bridge carrying Carrington-street over the said canal, for a distance of 24 yards in a westerly direction, and also a portion of that canal extending for a distance of 24 yards in an easterly direction from the eastern side of that bridge.

**Taking Water from the River Trent.**

To enable the Company, wholly in the parish of South Muskham, in the rural district of Southwell, in the county of Nottingham, to make and maintain—

An aqueduct or line of pipes, commencing in and out of the River Trent at a point 10 yards or thereabouts measuring along the northern side of that river from the western side of the Trent Viaduct carrying the main line of the Company over that river, and terminating at or near the northern end of the said viaduct, and about 10 yards west of the down main line.

And to authorise the diversion and the taking of water from the River Trent, by means of such aqueduct or line of pipes, the waters of which river flow into the River Humber and thence into the sea.

To authorise the Company, in the construction of any of the works proposed to be authorised by the Bill, to deviate from the lines and levels thereof shown on the plans and sections to be deposited as hereinafter mentioned, to any extent to be prescribed by the Bill, whether within or beyond the limits prescribed in either case by "The Railways Clauses Consolidation Act, 1845," and to stop up, alter or divert, temporarily or permanently, all or any turnpike or other roads and highways, streets, railways, tramways, bridges, rivers, canals, streams, waters, watercourses, sewers, drains, pipes, telegraphic and other tubes, wires and apparatus, and all other constructions or works of any description which it may be necessary or convenient to stop up, alter or divert for any of the purposes of the Bill.

To authorise the Company to demand, levy, take and recover tolls, rates and charges for or in respect of the works to be authorised by the Bill, and to alter existing tolls, rates and charges, and to confer exemptions from the payment of such tolls, rates and charges respectively.

To empower the Company to divert and stop up all streets, roads and footways, shown on the deposited plans as intended to be diverted or stopped up, or included within the limits of the lands to be acquired, and to extinguish all public or private rights of way, or other rights, if any, over or affecting any road, footpath, or way, or any portion thereof, to be diverted or stopped up under the Bill, or over any Railway of the Company, at the point or

points at which it is now crossed by any such road, footpath, or way, or portion thereof, so proposed to be diverted or stopped up, and to vest in the Company, or the adjoining owners, or partly in one and partly in the other, the site and soil of the road, footpath, or way, or portion thereof, stopped up, freed and discharged from all or any such rights.

To authorise the purchase of so much only of any house, building, manufactory, or property as may be required for the purposes of the intended works of the Bill, notwithstanding anything contained in the 92nd section of the Lands Clauses Consolidation Act, 1845.

To authorise the Company to purchase, by compulsion or agreement, and to hold lands (including in that word, where used in this Notice, houses, buildings, easements and other property) for the construction and maintenance of the said intended Railways, widenings and other works, and any other purposes of the Bill, and for getting ballast and materials, and for the purposes of extending their stations, sidings, warehouses, coal wharves, depôts, and other accommodation for minerals, goods and cattle traffic, and for other purposes connected with their undertaking, and also to purchase, take or acquire, by compulsion or agreement, and to hold for the purposes aforesaid, and for the general purposes of their undertaking, or any of them, the lands hereinafter described or referred to, or some of them, or some part or parts thereof respectively, and to exercise the powers hereinafter mentioned (that is to say):—

#### In the County of London.

Certain lands in the parish and district of St. Leonard, Shoreditch, in the county of London, being the houses and premises known as numbers 235 and 237, in Old-street.

Certain lands in the said parish and district of St. Mary, Islington, bounded on the west and north by the property of, or reputed to belong to, the Company, and on the south-east by an imaginary line drawn from the south-western corner of Elfort-road at its junction with Drayton-park to the north-eastern corner of Highbury-hill at its junction with Gillespie-road.

#### In the County of Middlesex.

A strip of land in the parish and urban district of Hornsey, about 35 yards wide and 150 yards long, bounded on the south-east and north-east by the property of, or reputed to belong to, the Company, and on the south-west by the back premises of the houses in Rathcoole-avenue.

A triangular piece of land, partly in the parish and urban district of Wood Green and partly in the parish and urban district of Southgate, bounded on the south-west and north-west by the property of, or reputed to belong to, the Company, on the south-east, by the occupation road leading from the Bounds-green-road at the north-west corner of Bounds-green Farm to land on the western side of the Company's Railway, and on the north partly by the south-western boundary fence of the Bounds-green-road and partly by a line drawn in continuation thereof to the private road leading to the Gasworks.

Certain lands in the parish and urban district of Friern Barnet, bounded on the south-west and north-west by the property of, or reputed to belong to, the Company, on the north-east by Stanhope-road, and on the south-east by the back premises of the houses on the north-west side of Holmsdale-road.

Certain other lands, also in the said parish of Friern Barnet, being the houses and premises known as numbers 12 and 13 in Holmsdale-road.

A strip of land in the parish and rural district of South Mimms, of an average width of about 45 yards, adjoining the main line of the Company on the western side thereof at Potter's-bar Station, bounded on the north-east and north by the property of, or reputed to belong to, the Company, and on the south by the premises of Manor Farm, and extending northwards to a point on the western boundary of the Company's property, about 170 yards north of the mile-post denoting 13 miles from London.

Another strip of land, also in the said parish and rural district of South Mimms, bounded on the south, south-west and north-west by the property of, or reputed

to belong to, the Company, and on the north-east by an imaginary line drawn parallel with the centre line of the Company's main line of railway, and at a distance therefrom of about 40 yards, and extending from a point on the eastern boundary of the Company's property about 200 yards south of the said mile post to a point on the same boundary about 50 yards north of the said mile post.

#### In the County of Hertford.

Certain lands in the parish of East Barnet, in the urban district of East Barnet Valley, bounded on the north and east by the property of, or reputed to belong to, the Company, on the south by the public road known as Long-street, and on the west by the public road known as York-road.

Another piece of land, also in the said parish of East Barnet, bounded on the north, south and east by the property of, or reputed to belong to, the Company, and on the west by York-road.

A strip of land in the parish of North Mimms, in the rural district of Hatfield, of a maximum width of about 100 yards, adjoining the main line of the Company, on the western side thereof, bounded on the north, south and east by the property of, or reputed to belong to, the Company, and extending from a point midway, or nearly so, between the mile-posts denoting 14 miles and 14½ miles respectively from London, to a point about 100 yards north of the mile-post denoting 14½ miles from London.

Another strip of land, also in the said parish of North Mimms, of an average width of about 100 yards, adjoining the said main line on the eastern side thereof, bounded on the south and west by the property of, or reputed to belong to, the Company, and on the north by the approach to the bridge that crosses over the said main line at a point about 70 yards north of the mile-post denoting 14½ miles from London.

Certain lands in the parish and rural district of Hatfield, adjoining the Hatfield Station-yard of the Company, at its northern end, bounded on the south and west by the property of, or reputed to belong to, the Company, on the east by the public road known as the North-road, and on the north by the road leading from the said North-road to St. Albans.

Certain other lands, also in the said parish of Hatfield, and also adjoining the northern end of the Hatfield Station-yard, bounded on the south and east by the property of, or reputed to belong to, the Company, on the west partly by the road known, or lately known, as White-wash-alley, and on the north by the said road leading to St. Albans, and extending along that road for a distance of about 50 yards measured along its southern fence from the western boundary of the Company's property.

A strip of land, also in the said parish of Hatfield, of an average width of about 80 yards, adjoining the Company's St. Albans Branch, on the south-western side thereof, and extending from the above mentioned road leading from the North-road to St. Albans to the occupation bridge crossing over the said St. Albans branch, at a point about 5 chains north of the mile post denoting 18 miles from London.

A strip of land in the said parish of Knebworth, in the rural district of Hitchin, of an average width of about 80 yards, adjoining the main line of the Company on the western side thereof, and extending from a point about 500 yards, measured along the boundary of the Company's railway in a southerly direction from the mile-post denoting 26 miles from London, to the said mile post on the north-eastern side of the land, and for about 700 yards on the south-western side of the said strip of land.

A triangular piece of land, also in the said parish of Knebworth, bounded on the north-west by the boundary between the parishes of Knebworth and Stevenage, and extending along that boundary from a point about 125 yards south-west of the centre of the main line of the Company, for a distance of about 360 yards in a

south-westerly direction. The said piece of land extends southwards to a point on the public road leading from Broadwater to Knebworth, about 230 yards south-west of the centre of the said main line.

Certain lands in the said parish and urban district of Stevenage, of an average width of about 350 yards, adjoining the main line of the Company, on the western side thereof, and extending from the said boundary between the parishes of Knebworth and Stevenage to the public road known as Water-lane.

Another piece of land, also in the said parish and urban district of Stevenage, of an average width of about 200 yards, also adjoining the said main line, on the western side thereof, and extending from the said Water-lane to the occupation road that crosses over the said main line by a bridge at or near the mile post denoting 28½ miles from London.

A strip of land, in the parish of Hitchin Urban, in the urban district of Hitchin, of an average width of about 27 yards, bounded on the south-west and north-west by the property of, or reputed to belong to, the Company, and on the south-east by the public road known as Walsworth-road.

Another piece of land, also in the said parish of Hitchin Urban, bounded on the south-east and south-west by the property of, or reputed to belong to, the Company, and on the north-east partly by the property of the Company and partly by the boundary between the parishes of Hitchin Urban and Walsworth.

A triangular piece of land in the parish of Walsworth, in the rural district of Hitchin, adjoining the last described piece of land, on its northern side, bounded on the south and west by the said parish boundary, and containing an area of about 18 perches. This piece of land is a part of Walsworth Common, and is or reputed to be common or commonable land. The whole of the 18 perches will be required to be taken.

#### In the County of Bedford.

Certain lands in the parish of Luton Urban, in the borough of Luton, bounded on the north and north-west by the property of, or reputed to belong to, the Company, and on the south-west by the public road known as Guildford-street.

A strip of land in the parish of Arlesey, in the rural district of Biggleswade, of an average width of about 17 yards, adjoining the main line of the Company, on the western side thereof, and extending from a point about 180 yards south of the mile-post denoting 36½ miles from London, to the public road crossing the said main line, on the level, at Arlesey Station and leading from Baldock to Shefford.

A triangular piece of land, also in the said parish of Arlesey, bounded on the north by the said public road, and extending eastwards along the said road from a point on the southern boundary thereof about 40 yards east of the centre of the said main line for a distance of about 30 yards. The said piece of land extends southwards from the said road for a distance of about 220 yards, and is bounded, or partly bounded, on the west by property of, or reputed to belong to, the Company.

A strip of land in the parish of Langford, in the said rural district of Biggleswade, of an average width of about 30 yards, adjoining the main line of the Company, on the western side thereof, bounded on the south and east by the property of, or reputed to belong to, the Company, and extending northwards from the entrance to the Company's Langford goods station, to a point on the western boundary of the said property about 40 yards south of the mile-post denoting 39 miles from London.

A strip of land in the parish and urban district of Biggleswade, of an average width of about 60 yards, adjoining the main line of the Company, on the western side thereof, and extending in a southerly direction from the southern side of the George Inn in Station-road to the occupation road, crossing the said main line of the Company on the level, at or near the mile-post denoting 40½ miles from London.

A strip of this land is an unfenced footpath

leading from Station-road to Biggleswade-common, and is known as "Common Balk," and is reputed to be commonable land, and the estimated quantity thereof proposed to be taken is 5 perches.

Another strip of land, also in the said parish of Biggleswade, of an average width of about 16 yards, also adjoining the said main line, on the western side thereof, and extending in a southerly direction from the said occupation road for a distance of about 360 yards.

A strip of land of an average width of about 45 yards, in the parish of Sandy, in the said rural district of Biggleswade, adjoining the main line of the Company, on the western side thereof, bounded on the south and east by the property of, or reputed to belong to, the Company, and extending southwards from a point on the western boundary of the said property, about 100 yards north of the Sandy South signal-box, to a point thereon about 400 yards south of the said signal-box.

In the County of Huntingdon.

A strip of land in the parish of Yaxley, in the rural district of Norman-cross, of an average width of about 55 yards, adjoining the main line of the Company, on the eastern side thereof, bounded on the south and west by the property of, or reputed to belong to, the Company, and on the north by the boundary of the said parish of Yaxley.

Another piece of land, also in the said parish of Yaxley, adjoining the Yaxley Station of the Company, at the south-western corner thereof, bounded on the east and north-east by the property of, or reputed to belong to, the Company, and on the north-west by the public road leading from Yaxley to Farcet.

A strip of land in the parish of Fletton Rural, in the rural district of Norman-cross, of an average width of about 27 yards, adjoining the main line of the Company, on the eastern side thereof, and extending southwards from the public road leading from Fletton to Woodstone for a distance of about 240 yards.

In the County of Leicester.

Certain lands in the said parish and county borough of Leicester, bounded on the south and south-west by the property of, or reputed to belong to, the Company, on the north-west by Catherine-street, and on the north-east by Ulverscroft-road.

In the County of Northampton.

A strip of land in the parish of Northborough, in the rural district of Peterborough, in the Soke of Peterborough, of an average width of about 17 yards, adjoining the Lincolnshire loop line of the Company, on the eastern side thereof, and extending from the north bank of the River Welland to the south bank of the River Welland.

In the County of Lincoln.

Certain lands in the parish of St. James, Deeping, in the rural district of Bourne, in the parts of Kesteven in Lincolnshire, bounded on the south-west and south-east by the north bank of the River Welland, and being the lands and property numbered 3, 4, 5, 7, 8, 12, 14, 20, and 26 on the Ordnance map of 1887 of the said parish to the scale of 1 inch = 1 mile.

A strip of land, about 20 yards wide, in the borough of Grantham, in the parts of Kesteven, partly in the said parish of Spitalgate Within, and partly in the said township or parish of Grantham, adjoining the main line of the Company, on the western side thereof, and extending from Wharf-road to Dysart-road.

Certain other land, also in the borough of Grantham, partly in the said township or parish of Grantham, and partly in the parishes of Grantham Grange and Little Gonerby, and also adjoining the said main line, on the western side thereof, bounded on the south by Dysart-road, and on the east and north by the property of, or reputed to belong to, the Company, and on the west by the property of, or reputed to belong to, the Nottingham and Grantham Railway and Canal Company.

A triangular piece of land, also in the borough of Grantham, partly in the said parish of Grantham Grange, and partly in the said parish of Little Gonerby,

adjoining the said main line, on the eastern side thereof, bounded on the north by the Barrowby-road, and on the east by an imaginary line, drawn from a point on the southern side of the said road, about 15 yards east of the eastern boundary of the said Railway, to a point on the said eastern boundary, about 300 yards south of the said Barrowby-road.

Another triangular piece of land, wholly in the said parish of Little Gonerby, in the borough of Grantham, also adjoining the said Railway of the Company, on the eastern side thereof, bounded on the south by the Barrowby-road, and on the east by an imaginary line drawn from a point on the northern side of the said road, about 15 yards east of the eastern boundary of the said Railway, to a point on the said eastern boundary, about 300 yards north of the said road.

Certain lands in the parish of Clee, in the county borough of Grimsby, in the parts of Lindsey, bounded on the west by the property of, or reputed to belong to, the East Lincolnshire Railway Company, on the south by the public road known as Wellholme-road, on the north by the house and premises situated on the west side of Willingham-street and in the occupation of John Beeley, and on the north by stables in the occupation of Thomas Kirman.

In the County of Nottingham.

Certain lands in the parish of North Wilford, in the county borough of Nottingham, about 27 yards in width, bounded on the south by Holgate-road, and on the east by Woolmer-road, and extending along that road for a distance of about 90 yards from Holgate-road.

Certain lands in the parish and borough of Newark, about 48 yards wide, bounded on the south-east by the public road known as Northgate, on the south-west by Trent-road, and on the north-east by the road leading to the malting premises of Messrs. Gilstrap, Earp, and Co.

A strip of land in the said parish and borough of Newark, about 27 yards wide, adjoining the Cross-street branch of the Company, on the eastern side thereof, and extending from the Barnby-road to Massey-street.

Certain lands in the parish of Ranskill, in the rural district of East Retford, bounded on the west partly by Sutton Bank-lane, and partly by a fence extending in a southerly direction from the south-eastern corner of the said lane, on the north by Messrs. Skinner and Johnson's works, and on the east by property belonging to, or reputed to belong to, the Company, and extending southwards to a point on the western boundary of the said property, about 537 yards south of the southern end of the platforms at Ranskill Station.

A strip of land in the parish of South Muskham, in the rural district of Southwell, of an average width of about 18 yards, adjoining the main line of the Company, on the western side thereof, immediately north of the Trent Viaduct, and bounded on the south-east, north-east and north by the property of, or reputed to belong to, the Company.

A strip of land in the Liberty of Newstead, in the rural district of Basford, of an average width of about 80 yards, adjoining the Leen Valley Branch of the Company on the south-western side thereof, and extending from the bridge carrying the said branch over the private road leading from Newstead Abbey to the Newstead Station of the Midland Railway Company for a distance of about 500 yards measured in a southerly direction along the said branch.

In the County of Derby.

Certain lands in the parish of Saint Werburgh, in the county borough of Derby, bounded on the south by the property of, or reputed to belong to, the Company, on the west by the skin works of, or reputed to belong to, Alfred George Jones, on the north by Slack-lane, and on the east by Shelton-terrace.

In the County of York (West Riding).

A triangular piece of land in the parish of Stanley, in the rural district of Wakefield, adjoining the West Yorkshire Railway of the Company, on the south-western

side thereof, bounded on the west by the public road known as Lingwell-gate-lane, and extending along the said public road for a distance of about 50 yards from the south-eastern corner of the bridge carrying the said Railway over the said public road.

Certain other lands in the said parish of Stanley, adjoining the said West Yorkshire Railway, on the north-eastern side thereof, bounded on the west partly by the said public road known as Lingwell-gate-lane, and partly by land of, or reputed to belong to, the Company, on the north by the public road known as Lingwell-nook-lane, and on the east by the property of, or reputed to belong to, the Company.

Certain other lands in the parish of East Ardsley, in the urban district of Ardsley, East and West, adjoining the said West Yorkshire Railway, on the north-eastern side thereof, bounded on the east by the said public road known as Lingwell-gate-lane, on the north-east by the Bowling-beck, and on the north-west by the property of, or reputed to belong to, the Company.

A triangular piece of land in the said parish of East Ardsley, bounded on the south-east by the public road known as Ardsley Common-lane, otherwise Dolphin-lane, on the north by the Dolphin-beck, and on the west by the property of, or reputed to belong to, the Company.

Another triangular piece of land, also in the said parish of East Ardsley, bounded on the west and north-west by the said public road known as Ardsley Common-lane, on the east by the property of, or reputed to belong to, the Company, and on the south by the Ardsley Station of the Company.

Certain lands in the parish and urban district of Pudsey, adjoining the Leeds, Bradford and Halifax Railway of the Company at Stanningley Station, bounded on the south by the property of, or reputed to belong to, the Company, on the west by the cottages of the Company, situated on the east side of Station-square, and on the east by the western boundary of premises forming part of the Stanningley Ironworks, and extending along the said western boundary for a distance of about 20 yards from the northern boundary of the Company's property.

Certain lands in the county borough of Leeds, partly in the township of Leeds and partly in the parish of Osmondthorpe, bounded on the west by other lands belonging, or reputed to belong to, the Company, on the south-east by an imaginary line drawn parallel with and 35 yards from the tramway or siding from the Waterloo Pit to the north bank of the River Aire, and adjoining the sewage works of the Corporation of Leeds, and on the north-east by the Knostrop (otherwise Knows-thorpe) Old-road.

Certain lands in the city and county borough of Bradford, bounded on the north-west by Townhill-street, on the north-east by the goods yards of the Company, on the south-east partly by property of, or reputed to belong to, the Company, and on the south-west partly by the Wakefield-road.

Certain lands in the parish and urban district of Clayton, adjoining the western curve at the Queensbury Station of the Company, on the western side thereof, extending from the northern end of the Queensbury Tunnel to the public road, crossing under the said western curve and leading from Clayton to Mountain, and of a maximum width of about 50 yards.

Certain other lands in the said parish of Clayton, adjoining the Railway of the Company, on the eastern side thereof, at or near the northern end of the said Queensbury Tunnel, and bounded on the east by the tramway from Hole Bottom Colliery to Sharket, otherwise Shargate Head Colliery.

Certain other lands, also in the said parish of Clayton, bounded on the west and the north-west by the property of, or reputed to belong to, the Company, on the east by the premises of Willow Hall Farm, and on the south-east by an imaginary

line drawn from a point on the said tramway, about 100 yards south of the centre of the bridge carrying the southern curve at Queensbury Station over the said tramway, to a point on the above-described eastern boundary of the land, about 26 yards from the boundary of the property of, or reputed to belong to, the Company.

In the County of Lancaster.

A strip of land in the parish and urban district of Audenshaw, in Lancashire, about 20 yards wide, bounded on the north-west by the western curve of the Oldham, Ashton and Guide Bridge Junction Railway, on the north-east by the footpath at the back of the houses in Junction-view, and on the south by Poland-street.

To further extend the powers of the Company for the compulsory purchase of lands for the purposes of the Railways, at Finsbury Park, Nos. 1, 2, 3, 4, and 5, authorised by the Great Northern Railway Act, 1894, and extended by the Great Northern Railway Act, 1897.

To further extend the powers of the Company for the compulsory purchase of lands in the parish of St. Mary, Hornsey (that is to say):—

Lands lying between the eastern boundary of the property belonging, or reputed to belong, to the Company, and lying parallel to and about 20 yards west of the west side of Clarendon-road,

authorised by the Great Northern Railway Act, 1893, and extended by the Great Northern Railway Act, 1896.

To further extend the powers of the Company for the compulsory purchase of the lands, numbered 1 and 2, in the parish of Leeds, on the Plans deposited in the month of November, 1893, with the Clerk of the Peace for the West Riding of the county of York, in respect of the Great Northern Railway Act, 1894, and extended by the Great Northern Railway Act, 1897.

To authorise the investment of any funds belonging to the Company, and any part of their superannuation, guarantee or savings bank funds respectively, in the preference or loan capital of the Company, or in capital of any other undertaking on which they guarantee the Dividend or Interest.

To empower the Company to vary from time to time the scheme for establishing a guarantee fund authorised by the Great Northern Railway (Various Powers) Act, 1872.

To authorise the Company to sub-lease or assign the piece of land situate wholly in the parish and county borough of Nottingham, bounded on the west by the London-road, on the north by the Nottingham Canal, on the east by the Trent-bridge Works, and on the south by the bridge leading from the said London-road to the said works. This land adjoins a bay of the said canal, used as a water access to the basin belonging to the Corporation of Nottingham, and the Bill will take power to cover over part of the said bay and to narrow the water-way thereof, commencing at its junction with the said canal in the said parish of Nottingham, and terminating in the same parish at the said basin, or may take power to close a portion thereof.

The Bill will or may provide that every diverted or substituted road or footpath shall be maintained and repaired by the same body or persons as are now liable to maintain and repair the roads and footpaths for which they are respectively substituted, and that every new road shall be maintained and repaired by the same bodies or persons as are liable to maintain and repair the other streets, roads, footpaths, or highways in the parishes, townships, or places within which such new road or footpath will be situate, or as to all such new, diverted, or substituted roads or footpaths by such other bodies or persons as the Bill may define or Parliament prescribe; and it will or may also provide that as respects the said intended railways the Company shall not be liable under the 46th section of the Railways Clauses Consolidation Act, 1845, to maintain the surface of any turnpike, highway, or public carriage road which shall be carried over the said intended railways or widenings, or any of them, by a bridge or bridges, or the immediate approaches thereto, the levels of which said road or roads or approaches shall not be permanently altered so as to increase the gradient of any part thereof.

To empower the Company on the one hand, and any local authority (including in that expression any county, municipal, urban or rural district, or parish council, or any municipal, highway, or other public authority), and any company or person or persons, and the owners, lessees, and occupiers of any lands taken under or affected by the powers of the Bill on the other hand, to enter into and fulfil contracts and agreements for or in relation to the execution of any works, and the taking of any lands in or by which they may respectively be interested or affected, and the contributing to the cost of such works and lands, the construction, maintenance and repair of any roads or footpaths, and to enable any such local authority to provide the necessary funds for the purposes aforesaid, or any of them, by borrowing and by the levying of rates, or by either of those means, and the Bill will or may confirm any such contract or agreement which may already have been or which at any time hereafter may be entered into for or in relation to any of the matters aforesaid.

To authorise the Company to appropriate any lands for the time being belonging to them for the erection thereon of and to erect dwellings for the labouring classes, and to appropriate for such dwellings any buildings for the time being belonging to the Company, and to sell or let such dwellings.

To enable the Company as to lands acquired by them alone, and the Company and any other Company as to lands acquired or held by them jointly, under any Act relating to the undertaking of the Company, or of such other Company or Companies, to retain and hold, for a term or terms to be prescribed by the Bill, such of those respective lands as are not yet used or applied by them respectively.

To empower the Company on the one hand, and the Corporation of Peterborough on the other hand, to enter into agreements respecting contribution by the Corporation towards the costs of and incidental to the abolition of level crossings, and the diversion and construction of roads in the city and county borough of Peterborough.

To empower the Company and the Dearne Valley Railway Company (incorporated by the Dearne Valley Railway Act, 1897) to enter into and carry into effect agreements with respect to the construction, working, use, management, and maintenance of the Dearne Valley Railway and works, or any part or parts thereof, the supply of rolling stock and machinery, and of officers and servants for the conduct of the traffic on the said railway, the costs, charges, and expenses of such construction, working, use, management, and maintenance, and to the regulation, management, and transmission of the traffic of the railways of the contracting Companies, and the collection, payment, division, apportionment, and distribution of the tolls, rates, and charges arising from any such traffic, and the Bill will or may confirm any agreement or agreements which have been, or hereafter may be, entered into with reference to the matters aforesaid, or any of them.

To make provision for the appointment (by any two Justices) of special constables, to act within, upon, and near to all or any of the railways, stations, and works of the Company, with all the powers, protection, and privileges by law attaching to constables.

The Bill will authorise the Company to raise further capital for the purposes of the Bill, and also for the completion of the lines of railway, widenings, and other works already authorised, and also for the general purposes of and incident to their undertaking, by the creation of new shares or stock, with or without a guaranteed or preferential dividend, or other special rights or privileges attached thereto, or by borrowing, or by the creation of debenture stock, or by any of such means, and also to apply to all or any such purposes any capital or funds now belonging to the Company or hereafter to belong to them, or under the control of their directors respectively.

The Bill will vary and extinguish all existing rights and privileges which will interfere with its objects, and it will incorporate with itself certain of the provisions of the Companies Clauses Acts, 1845, 1863, 1869; the Lands Clauses Acts; the Railways Clauses Consolidation Act, 1845; and the Railway Clauses Act, 1863; and it will or may repeal, alter and enlarge such of the powers and provisions as may be deemed necessary of the following

Local and Personal Acts, that is to say:—The Great Northern Railway Act, 1846, 9 and 10 Vict., cap. 71; 7 and 8 Vict., cap. 18; the Dearne Valley Railway Act, 1897; and the Ambergate, Nottingham and Boston and Eastern Junction Railway Act, 1846; and every other Act relating to the Company, the Midland Railway Company, the Dearne Valley Railway Company, and the Nottingham and Grantham Railway and Canal Company respectively, or to their respective undertakings, and of any other Act or Acts which would interfere with the objects of the Bill.

Duplicate plans and sections, describing the lines, situations and levels of the proposed Railways and other works, and the lands, houses and other property in or through which they will be made, and also duplicate plans, showing the lands and property intended to be compulsorily taken for other purposes under the powers of the Bill, together with a book of reference to such plans, containing the names of the owners and lessees, or reputed owners and lessees, and of the occupiers of such lands, houses and other property; also an ordnance map with the lines of railway delineated thereon, so as to show their general course and direction, and a copy of this Notice will, on or before the 30th day of November instant, be deposited for public inspection, as regards the works to be executed, and the lands to be taken in the several counties or divisions hereinafter mentioned, with the respective clerks of the peace thereof, at their respective offices, also hereinafter mentioned (that is to say):—For the county of Middlesex, at the Guildhall, Broad Sanctuary, Westminster; for the county of Hertford, at Hertford; for the county of Northampton, at Northampton; for the Soke of Peterborough, at Peterborough; for the county of London, at the Sessions House, Clerkenwell; for the county of Leicester, at Leicester; for the county of Nottingham, at Nottingham; for the county of Derby, at Derby; for the county of Bedford, at Bedford; for the West Riding of the county of York, at Wakefield; for the parts of Kesteven in Lincolnshire, at Stamford; for the parts of Lindsey in Lincolnshire, at Lincoln; for the county of Huntingdon, at Huntingdon; and for the county of Lancaster, at Preston; and on or before the same day a copy of so much of the said plans, sections and book of reference as relates to the areas hereinafter mentioned, in or through which the intended Railways and other works will be made, or in which any lands, houses or other property are intended to be taken, and a copy of this Notice will be deposited with the officer respectively hereinafter mentioned (that is to say):—In the case of the said parish of St. Leonard, Shoreditch, with the clerk of that parish, at his residence; in the case of the said parish of St. Mary, Islington, in the administrative county of London (outside the City of London), with the clerk of the vestry of that parish, at his office; in the case of any county borough or other borough, with the town clerk of such borough, at his office; in the case of any urban district not being a borough, with the clerk of the district council, at his office; in the case of any parish having a parish council, with the clerk of the parish council, or if there is no clerk, with the chairman of that council; and in the case of any parish comprised in a rural district and not having a parish council, with the clerk of the district council, at his office. Any parish named in this Notice (outside the City of London, or the administrative county of London) which is not a county or other borough, or an urban district, or is not stated to be in a county or other borough, or in an urban district, or in a rural district, is a parish, having a parish council, with the clerk or chairman of which the before-mentioned deposit will be made, and such deposit will, if made with the clerk to the parish council, be made at his office, or if he has no office, at his residence, and if made with the chairman of the parish council, will be made at his residence.

Printed copies of the proposed Bill will be deposited in the Private Bill Office of the House of Commons, on or before the 21st day of December next.

Dated this 14th day of November, 1898.

## Meetings.

### MIDLAND URUGUAY RAILWAY.

An extraordinary general meeting of the proprietors was held on Monday, at Winchester-house, Old Broad-street, E.C.; Mr. CHARLES GREY MOTT presiding.

The CHAIRMAN, in opening the proceedings, said: Gentlemen, it is necessary that we should hold the special meeting first, because the accounts we present at the annual meeting are based upon the arrangement we have made with the debenture-holders, and it is necessary that the should be confirmed first, before we pass the accounts. Therefore I call upon the secretary now to read the notice convening the special meeting.

The SECRETARY (Mr. Vernon Hinde) having read the notice,

The CHAIRMAN said—You will recollect that a year ago we had to present to you a very disappointing report. Civil war, locusts, and drought had so injured the traffic of the railway that all we could do, and had been doing for some time past, and all that it was possible to do, was to keep down the expenses on the line to the lowest possible point, until some brighter gleam of hope was seen in the political horizon. Well a year ago I was able to tell you that the civil war was at an end and that the traffic had begun to show symptoms of decided improvement. We had hoped that that improvement would have continued, but I am sorry to say that the state of political unrest and the general condition of the country which is still existing has prevented the traffics from showing the increases which we had hoped they would do after peace had taken place. The consequence was that we found ourselves face to face with the arrears of work in the renewal of the line, and, in addition, with a strong urging on the part of our manager that very considerable sums must be spent in the next few years on the sleepers and the rolling stock, as they were both showing symptoms of giving way. It was necessary for the safety of the line, especially as regards the sleepers, that very considerable sums should be spent within the next three or four years. Well, you will recollect that at the meeting after the rearrangement for the liquidation of the company, which took place some years ago in consequence of the Government failing to pay their guarantee, except as to one-half of it, the debenture-holders insisted that no further borrowing by debentures should take place. They left an amount of funds in hand, but they cut down the borrowing powers authorised by the articles of association to the amounts then issued. The consequence was, all our borrowing powers for capital purposes became exhausted, and we had no money from revenue sources to devote to the repairs of the line, which properly belonged to them. We felt this could not go on, and that some arrangement must be come to with the debenture-holders that the line might be kept in proper order, as that was their principal security. In consequence, we had a meeting of the debenture-holders called, and represented the case to them, and stated that it was absolutely necessary that they should provide in some way the funds, or a portion of the funds, that were necessary to put the line in a proper state of repair. It was suggested also that in order to make their debentures more valuable in the market they should agree permanently not to take more than 5 per cent., because you know that debentures, if they have an uncertain and fluctuating dividend, always suffer much in their capital value on the market. Their market value depends very much on the absolute security of their receiving the dividend, and it was thought it would be in their interests that the amount of the interest should be cut down to such a point that they were pretty certain to receive it regularly in the future. They did not take the same view as we did. They said they would rather have all they could get, even if it were uncertain; but they did agree that they would forego a large amount of that interest which would otherwise be payable to them in order to put the line into good repair. Now I will show you what the result of the actual arrangement came to is. They said, of course, in allowing this deduction to be made from their interest they would not consent to any of the saving being paid as dividend to the shareholders, but that whatever was saved should be put into the line itself. The arrangement they have come to is for nine years, from May 1st last. They have agreed to take 4 per cent. for four years, and 5 per cent. for the five years following—that is, nine years in all; and then the interest is to revert to the 6 per cent. During the nine years under the existing arrangement there would have been three years of it at 5 per cent., which is the rate which we have been paying in the last year or two, and which would have come to 176,919l. For three years, then, we should have had to pay 5 per cent. For the following six years of these nine we should have had to pay 6 per cent., which would have been 424,602l., making a total during the nine years under the existing arrangement for interest to the debenture-holders of 601,521l. Well, under the new arrangement, we are to pay 4 per cent. for four years, which is 188,716l., and 5 per cent. for 5 years, which is 294,865l., making a total of 483,581l. There is, consequently, a saving of 117,940l., or practically 118,000l. less than we should have paid under the existing arrangement. Well, now, this, of course, looks a large sum for the debenture-holders to forego. It is not so large a concession as it appears, because it was quite impossible for them to have got the full amount they would have been entitled to under the old arrangement. The position we are in now is this—that supposing the Government guarantee is regularly paid and that the traffic of the railway keeps up, we shall have, we estimate, sufficient during the next four years to put a very large amount of new sleepers into the line, and also to put the rolling stock to some extent into an improved condition. So that, on the whole, I think you will recognise, that although we did not get from the debenture-holders all that we could have wished in the interests of the shareholders, yet they did meet us to a considerable extent, and that the arrangement on the whole is a fairly satisfactory one. Of

course, the stipulation that no dividend was to be paid to the ordinary shareholders was one that we should have been glad to avoid, but it was not an unreasonable proposition; and we have this right—that during the next term of nine years, at any time if the revenue of the company is large enough to admit of doing so, and we can revert to the 6 per cent., which at present we are under obligation to pay, then the stipulation as to the payment of dividend to the shareholders will be done away with. Well, it is very difficult to prophesy, and it is unsatisfactory to prophesy in regard to a country like Uruguay; but, provided that peace continues, and we have no abnormal seasons such as we have had in some years past, there is a prospect that this line may so far increase its traffic and receipts, with the line put into good working order, as it will be, that we may look forward to being able to resume the 6 per cent. before the time expires. I hope we shall before long, and then be able to pay some dividend to the ordinary shareholders. In the meantime the only other option was to allow the debenture-holders to go without their interest. We had no power to pay their interest, as the revenue was not sufficient, and, therefore, it would have meant another liquidation, which would have been most disastrous to all concerned. I think under those circumstances we have made the best arrangement that the circumstances would admit of, and I therefore beg to move:—

“That the interest on the debenture stock for four years from May 1st, 1898, to April 30th, 1902, be at the rate of 4 per cent. per annum, after which latter date payment of interest on the stock shall be at the rate of 5 per cent. per annum until April 30th, 1907, and thenceforth at the rate of 6 per cent., it being understood that no dividend is to be paid on the ordinary stock of the company until interest at the rate of 6 per cent. per annum has been paid to the debenture stockholders, the company being at liberty to resume payment at 6 per cent. per annum at any time prior to April 30th, 1907.”

Mr. S. A. SILLEM—I have much pleasure in seconding that.

The resolution was put and carried unanimously, without discussion.

The CHAIRMAN—That concludes the business of the special meeting.

#### THE ANNUAL GENERAL MEETING.

The tenth annual general meeting was then held, Mr. C. G. MOTT again presiding.

The SECRETARY read the notice convening the meeting. The report and accounts (an analysis of which has already appeared in THE RAILWAY TIMES) were taken as read.

The CHAIRMAN—Gentlemen, I now beg to move—“That the report of the directors and the accounts of the company for the year ending June 30th, 1898, now presented to the meeting, be received and adopted.” The accounts, as you will see, show the following results:—As regards revenue, the receipts from passengers show a decrease of 1,097*l*. That is very disappointing, but it arose from causes I have already referred to. Parcels show a decrease of 26*l*.; luggage, a decrease of 3*l*.; goods, an increase of 4,161*l*.; animals, an increase of 1,855*l*.; telegrams, an increase of 47*l*.; hire of rolling-stock, an increase of 217*l*.; wharfage, an increase of 61*l*.; and sundry receipts, a decrease of 1,995*l*. That shows a net increase in traffic receipts of 3,220*l*. That, on the whole, is satisfactory, but it arose principally in the early part of the year. I am sorry to say that the same increases have not continued throughout the latter part of the year. There is a decrease in transfer fees of 12*l*., and there is also a decrease in the interest on investments which have had to be sold out of 617*l*., making the net increase 2,591*l*. On the other hand, the expenditure has been as follows:—In maintenance there is an increase of 464*l*., in locomotive expenses there is a decrease of 1,221*l*., in repairs and renewals of carriages and wagons there is an increase of 695*l*., in general charges there is an increase of 249*l*., and in traffic expenses there is a decrease of 80*l*., making a net increase of 112*l*. Deducting that from the increase in receipts leaves the net income 2,479*l*. Well, we have under the new arrangement a decrease in debenture interest of 1,966*l*. That applied only to two months of the year; therefore it is only 1,966*l*. It makes a total increase to the good of 4,445*l*. On capital account the expenditure was only 420*l*. We had no money to spend upon it, but we have had liabilities, unfortunately, which we have had to clear off. We had two locomotives, which were ordered a year and a half ago, but were delayed, and they have since been sent out, the cost being 5,800*l*. Then there is the loss to which we refer, 2,850*l*., and we have a loss on the Government bonds of 2,013*l*. On the other hand we have a profit on investments sold of 983*l*.; so that whatever balance there was to capital account has been absorbed by these payments, and it has left us without any capital at our disposal, or very little. I may mention in connection with this loss on the Government bonds, to show the kind of treatment to which we are exposed in that country from the Government, that in the first place, we have to carry their troops and stores under the laws at half-price. Then we have difficulty in getting payment, and they finally give us bonds on which we have to lose a further sum. These are the difficulties we have to contend with. These difficulties are not improved by the general political aspect of the Government of the country. We are hoping that some day or other experience will teach a better lesson, and that they will learn that good government means prosperity, and bad government the reverse. (“Hear, hear.”) I don’t know that there are many other things I need mention. I have mentioned the more important matters at the special meeting. But there are symptoms in the country that if we get peace and quiet times a steady improvement will take place, and I hope that the time will yet come, in spite of all our difficulties, when we shall by hard work and careful nursing bring this line out and make it yet a good concern. (“Hear, hear.”) With these observations I beg to move:—“That the report of

the directors and the accounts of the company for the year ending June 30th, 1898, now presented to the meeting, be received and adopted.”

Mr. S. A. SILLEM—I have much pleasure in seconding that.

The resolution was put and carried unanimously without discussion.

On the motion of the CHAIRMAN, seconded by Mr. T. C. TATHAM, Mr. E. M. Underdown, Q.C., was re-elected a director of the company; and on the proposition of the CHAIRMAN, seconded by Mr. SILLEM, Mr. T. C. Tatham was also reappointed to a seat at the board.

Mr. W. S. SELBY LOWNDES proposed the reappointment of the auditors, Messrs. Deloitte, Dever, Griffiths, and Co., at a remuneration of 50*l*.

Mr. C. BENNETT seconded the resolution, which was agreed to.

A vote of thanks to the chairman and directors for their past services, proposed by Mr. LOWNDES, and seconded by Mr. BENNETT, terminated the proceedings.

#### LEOPOLDINA RAILWAY.

The first ordinary general meeting was held at Winchester-house, E.C., on the 25th ult.; Mr. E. HERDMAN presiding.

The CHAIRMAN said—The last meeting of the company was the statutory meeting held on March 29th last. This meeting is held solely in order to comply with the articles of association, which require that a meeting of the company should be held during the year 1898. We are unable to present any accounts, the financial year of the company only terminating on December 31st; but there are certain explanations which it is due to the shareholders that I should make on this occasion, although, as you will observe by the notice, there is no business before you beyond the election of directors and auditors. We have been steadily carrying out our policy of improving the lines and adding to our rolling stock. We are sending out 300 new wagons from this country, besides passenger carriages and a considerable number of locomotives. The effect of these improvements will, we are sure, soon be felt in the economies effected. This year, I think, is generally regarded as our year of probation, and not much could have been expected from us inheriting, as we did, a line in very bad condition, very much undersupplied as regards rolling stock, and requiring considerable economies to be effected. When we met last year both coffee prices and the rate of exchange were low. The gold price of coffee has not much varied, but exchange has risen some 30 per cent. and, in consequence, the currency price of coffee has declined in the same ratio. The result to us would have been advantageous had the quantity of coffee remained the same as last year, which, however, was a record year; but there has been a marked falling-off in the receipts during the later months. Up to the middle of the year our traffics showed an increase over last year; since then the falling-off represents a deficiency on the ten and a half months of this year of 84 per cent. Whether this falling-off is due to a short crop of coffee, or to coffee being held back on account of the low prices, in the hope of improvement in the foreign markets, I am not able to say. Both reasons are assigned for the present deficiency. On the other hand, it is reported to us that the prospects for the next crop are very good. The deficiency in coffee, and the serious fall in the currency price is a double misfortune for the country, and reduces its purchasing power; and this reflects upon our company by reducing the amount of merchandise to be carried to the interior. There is, undoubtedly, a better feeling as regards Brazil. Credit has improved, and much is expected from the relief to the country by the breathing space allowed under the funding scheme of which you are all aware, and it is generally hoped that by economy and good government a financial equilibrium may be established and maintained. At our last meeting I referred to litigation regarding two of our lines. This is not yet decided. The lines in question are the Campos and Carangola and Juiz de Fora. In the case of the latter we had a decision in our favour, which is appealed against by the other side. Other litigation—a legacy from the old company—is going on, and of a kind to show how baseless a claim may be and yet give ground for action in the courts. There have been two decisions against us, and we have had to make judicial deposits of a large sum to enable us to carry the cases to the higher courts, where we are confident of success, as we have faith in the justice of the Supreme Court. I am afraid this may be thought not very encouraging, but we expect better things in the future. I put the worst information first, and I hope what I have to say now will be found a little more encouraging. Experience has taught us that it is necessary to have as our general manager in Brazil a gentleman with a status of director resident there to enable him suitably to represent our important company vis-à-vis the Governments general and local. Mr. F. W. Barrow, whose name in connection with South American railway enterprise is a household word, has been appointed managing director of the company, and combines all the qualities required to bring round our railway to a prosperous condition. (“Hear, hear.”) I have the satisfaction of informing you that I am told at the last moment it is probable, through the courtesy of the Great Southern Railway, with which Mr. Barrow has been hitherto connected, that he may be allowed to leave their service and join this company much earlier than was expected, and be able to take charge of our line at the beginning of next year. The consequence of the appointment of Mr. Barrow will be the retirement of Mr. Colman from the management. We have not the slightest doubt that the appointment of Mr. Barrow as our managing director will be amply justified by events. One of our colleagues (Mr. Wicks) has gone out to Rio to look after our interests, and to relieve for a time our president of the local committee. Mr. Barrow went out at the same time and will spend a fortnight at Rio looking about him before finally taking charge. Mr. Barrow has been elected to a seat at our board, and we believe that you will approve and confirm his appointment. There are

various matters of interest that should be mentioned. On June 3rd an issue of 4 per cent. debenture stock for 1,300,000*l.* at the price of 85 per cent. was brought out, and, owing to adverse influences at the time, was not a success. A Stock Exchange quotation has been obtained, and the portion not applied for has since been largely placed. We have not been idle, and our representatives in Brazil have made good progress in the negotiations they have had in hand. With the State of Minas we have made a new contract for the unification of all our concessions in that State for a period of fifty-two years, and the confirmation of the guarantees of interest for ten years. With the State of Rio de Janeiro, according to a telegram received yesterday, the contract has been signed. The conditions are not yet fully known to us, but we have a very good idea of them, and they are described by our own people there as satisfactory. The general Government has given us the confirmation of concessions and renewed the guarantees of interest, and, in fact, all concessions are fully confirmed. As regards our guarantees of interest, both of the general and State Governments, we are in the position of being exempt from payment in funded bonds, which applies only to gold guarantees payable in Europe. Ours are payable out there, and in paper. Two directors retire under the articles on this occasion; they are Mr. Benson and myself. The proposition for the election of the auditors will come from the meeting. I should mention that the conversion of bonds for shares in our company is proceeding satisfactorily. The amount converted altogether here and at Rio has reached 81 per cent. of the whole. The dissenting holders of the 1884 loan, who have omitted so far to bring their bonds for conversion, represent only 18 per cent.; so that nearly three-fourths are already converted. The conversion is going on steadily day by day. If any gentleman has any questions to ask I should be pleased to answer, but that is the whole statement I am prepared to make to the meeting at present. As I say, we have no accounts, as we have only lately got a thoroughly efficient accountant, who is putting our accounts in order. The accounts have not been neglected; they have been kept up, but are not put in proper order, and therefore we are without certain figures which shareholders, like ourselves, might like to have. However, these accounts are being rapidly put in order, and will in a short time be available. It is the intention of the board, as mentioned in the circular calling this meeting, to have our regular meeting as early next year as we possibly can, and then, of course, we should have the accounts and give you full satisfaction. The retiring directors and auditors were re-elected.

#### ROHILKUND AND KUMAON RAILWAY.

The half-yearly general meeting was held on Tuesday, at the offices, 237, Gresham-house, E.C.; Sir CHARLES TURNER presiding.

The accounts for the half-year ending June 30th, 1898, showed that the gross earnings amounted to Rs.2,34,244 (against Rs.2,07,878), and the expenses to Rs.1,07,117 (against Rs.1,15,527), leaving a profit of Rs.1,27,127, which, less a subscription of Rs.635 to the provident fund, realised 8,433*l.*, at an exchange of 1*s.* 4*d.* Owing, moreover, to an exceptionally prosperous half-year's working of the Lucknow-Bareilly State Railway, the company received as its share of surplus profits the sum of Rs.68,058, or 4,537*l.* After bringing forward the balance of last half-year and making other adjustments, including setting aside 991*l.* as the Secretary of State's share of profits over 6 per cent., there remains for disposal a net sum of 11,569*l.* The board recommend the payment of the usual dividend of 2*l.* 11*s.* 9*d.* per cent., free of Indian but subject to English income-tax, or 2*l.* 10*s.* net; this will absorb 5,000*l.* Owing to an abnormally heavy rainfall, the station of Naini Tal and communications therewith have suffered severely from landslips during the late monsoon; this may affect the receipts of the company during the current half-year as well as in future years. In the current half-year, moreover, a considerable decrease is to be anticipated in the receipts from military traffic, which in the corresponding half-year of 1897 were abnormally large. The board, therefore, propose to place 5,000*l.* to the reserve fund, leaving 1,569*l.* to be carried forward to the current half-year's account. The capital account showed a total expenditure of 174,107*l.*, whilst the receipts had been 200,000*l.*, wholly from the issue of shares of 5*l.* each.

The CHAIRMAN said—The half-year under review has been a prosperous one. The receipts have been good, and show a considerable increase, and you will doubtless have observed that this increase of receipts has been earned with only a trifling addition to the working expenses, and in this respect our able agent and staff have surpassed their own previous excellent efforts. I also think, gentlemen, that Government have reason to be satisfied with the result of our working the Lucknow-Bareilly Railway on their behalf—for with earnings of only Rs.102 per mile per week to have worked at a per-centage of only 46 per cent. of the gross receipts, and to have earned a net profit at the rate of 7 per cent. per annum on the capital expended, is, I should say, almost a record even in the annals of the excellently worked Indian railway system. ("Hear, hear.") You will have noticed from the report that, in consequence of the good results obtained from the State Railway, we have received a substantial sum from its surplus profits, after paying 4 per cent. on the total capital of that line. We have now been working the State Railway for nearly eight years, and during that time the total amount received on this account has been, including the half-year under notice, 9,255*l.*, an average of 1,157*l.* per annum, not, surely, a very extravagant reward for working 231 miles of railway thoroughly well and economically. It is satisfactory to note that we are at last beginning to reap some return for our patience and for the risks we have undergone—for the development of the State Railway has been slow, too slow when you have only a ten years' tenure to work on. And I may now mention that at the time the contract was entered into, our then chairman, the late General

Trevor—one of the ablest of Indian railway administrators—had grave doubts as to whether we were justified in accepting the terms offered by Government, which entailed a somewhat unequal method of division of working expenses, and certain risks with regard to exchange on the guaranteed debentures. However, gentlemen, this last risk has been happily reduced of late; this half-year we have brought home our earnings at the satisfactory rate of 1*s.* 4*d.*, and we may hope that the labours of the Currency Commission now sitting may result in the establishment of a fairly stable rate in the future. Altogether, gentlemen, the results of the half-year are such that we are able to recommend the declaration of your usual dividend at the rate of 5*l.* per cent. per annum, free of income-tax, the carrying forward of 1,568*l.*, and the placing of the substantial sum of 5,000*l.* to reserve. You are entitled to know the reasons which have influenced the directors in making the last recommendation. Your board have long been impressed with the importance of building up a substantial reserve for a rainy day, and the results of this policy may be seen in the position your stock holds in the market. In fact, it is so favourably regarded by investors and is held so firmly that it can rarely be purchased. A rainy day, moreover, in its literal sense is sometimes a serious business for the Rohilkund and Kumaon Railway, of which we have had an unpleasant illustration in the course of the current half-year, for in August last our hill station of Naini Tal—on the popularity of which we to a great extent depend for our traffic—the brewery and the roads thereto, suffered considerable damages from landslips, due to heavy rain, and this may affect our receipts in the current and future half-years. But I must also remind you, gentlemen, that our contract for working the State Railway terminates at the end of 1900, and although we trust that the excellent results which have been achieved for the Government will secure for us, as indeed they merit, a renewal of the contract, we must not forget that the Government may not renew it without the imposition of additional obligations on us. Should this prove to be the case, we think it wise to be in a strong position to meet a period of transition from old to new conditions. We trust, therefore, gentlemen, that you will endorse our proposals in this respect. As regards the current half-year, we have lost some traffic from the rainfall and landslips above alluded to, and we also miss the abnormal receipts of the corresponding half-year of 1897 due to the frontier campaign. The State Railway has, however, done fairly well, and an estimate of the probable results of the working of the current half-year has just been received by telegram from our agent, which indicates that the half-year will turn out better than we anticipated. Anyhow, gentlemen, your usual dividend is well assured. I now move:—

"That the report of the directors, with statement of accounts and balance-sheet to June 30th, 1898, as presented to this meeting, be and they are hereby received, approved, and adopted."

Sir GEORGE ALLEN seconded the motion, which was carried.

It was further resolved:—

"That the payment of a dividend of 2*l.* 11*s.* 9*d.* per cent., free of Indian, but subject to English income-tax, for the half-year, as recommended in the directors' report, be and the same is hereby sanctioned and authorised to be declared."

"That, in consideration of the excellent and economical way in which the line has been worked last half-year, the board be requested to consider the question of making a special recognition of the same by an addition to the Provident Fund of the railway or in some other manner."

#### LEA BRIDGE LEYTON AND WALTHAMSTOW TRAMWAYS.

The annual general meeting was held yesterday at the offices, 7, Poultry, E.C.; Mr. HENRY J. CARTER presiding.

The SECRETARY (Mr. J. Barber Glenn) read the notice convening the meeting, and affixed the seal of the company to the register of shareholders. The report and accounts were taken as read.

The CHAIRMAN then said—Gentlemen, I rise to move the adoption of the report and the declaration of the dividend, and before doing so I may observe that I think there is very little to remark upon beyond what I said last time. The directors think, and they hope the shareholders will agree with them, that the accounts show a very satisfactory state of things. The season-tickets, which to a certain extent were rather an experiment with us, have gone on very well; there are upwards of 1,500 season-tickets taken. I think we are the first line in the metropolis that has got to that.

A SHAREHOLDER—What price do you charge for the season-tickets?

The CHAIRMAN—It depends upon the route. It is from 7*s.* 6*d.* on short routes up to a guinea per quarter.

A SHAREHOLDER—Where would that extend to? From the terminus to the forest, or in what direction?

The CHAIRMAN—From the forest to where?

The SHAREHOLDER—Just by Lea-bridge Corner to the forest.

The CHAIRMAN—That would be 12*s.* 6*d.* per quarter—from the forest to Lea-bridge Corner. Then we are endeavouring to induce the parish authorities to pave the margins of the road where they are still unpaved. The roads are in a very unsatisfactory state where the macadam meets our paving. Of course, the stone wears much longer than the macadam. If they would do that, that would prepare the way for electric traction, which we have had under consideration, and which, I think, most other companies have been giving attention to. I do not think that I need detain you longer, except to formally move the adoption of the report.

A SHAREHOLDER—Is there any possibility of the North Metropolitan joining with our company?

The CHAIRMAN—You see the Lea-bridge Corner blocks the way at present—two or three houses there. It would be of enormous importance

to widen that corner, and we have been endeavouring to induce the Hackney Vestry to do that.

A SHAREHOLDER—You mean the widening would facilitate the junction?

The CHAIRMAN—The Hackney Vestry are alive to the necessity of it, and they have called the attention of the London County Council to it. It is really very necessary, in order to get the communication from the forest to all parts of the City.

A SHAREHOLDER—And it would be beneficial to the company.

The CHAIRMAN—Certainly.

A SHAREHOLDER—You have exhausted your capital account, I see.

The CHAIRMAN—Yes, sir.

The SHAREHOLDER—And the capital charges, I suppose, are paid out of revenue. Is that so?

The SECRETARY—As far as we are expending any capital.

A SHAREHOLDER—But you cannot help spending capital.

The SECRETARY—A certain amount of capital, of course.

The CHAIRMAN—We adopt the system in the ordinary way—that is to say, when we have to charge anything to capital we pay it out of revenue and write it off in a liberal way. For instance, you will notice the item of paving in the Leyton district, 636*l*. We write that off in four instalments, and we have only one more instalment to pay.

A SHAREHOLDER—That would not go to capital account, would it?

The CHAIRMAN—Practically it would. If you pave a road entirely afresh, it will last at least ten years, and we are paying it off in four. It will stand you in nothing when we have paid that 636*l*. next year.

Mr. PENNY—It must be gratifying to the shareholders to notice the progressive character of our tramways, the receipts rising each successive year. I see by the reports for 1895 and 1896 our earnings were 32,000*l*.; next year they were 35,000*l*.; and by the last report they are nearly 42,000*l*. But I also notice that the profits have been diminishing. In 1895-96 our profits were returned as 5,400*l*.; in the following year they were 4,220*l*.; and this report shows they are 4,145*l*. Are not our expenses increasing in too great a ratio?

The CHAIRMAN—In the first place it is necessary in an increasing tramway business to put out feelers, and we have started a number of new omnibus routes. That causes a number of poor relations for a time, which reduce our profit. Then there is another important item—namely, labour. Those who know the state of the labour market will admit that the price of labour has very much increased. On labour this year we have paid 1,100*l*. more than last year, and including stables, the amount would be 1,561*l*. That is a large proportion of our expenses, and it has to be paid, and still we have been able to continue our dividend all right. ("Hear, hear.")

Mr. J. J. GRIFFITHS—I have great pleasure in seconding the resolution for the adoption of the report.

The resolution was then put and carried unanimously.

The CHAIRMAN moved the re-election of the retiring director, Mr. W. T. Douglass, remarking that he took the place of a director who had retired, Mr. Aynsley.

Mr. J. J. GRIFFITHS—I have great pleasure in seconding that. We have found Mr. Douglass a most valuable addition to the directorate, as was also Mr. Aynsley, who retired owing to pressure of business. Mr. Douglass has taken his place in a most commendable way to the board, and I am sure also to the shareholders.

The resolution was agreed to *nem. con.*

Mr. DOUGLASS—I thank you very much for having re-elected me a director of the Lea Bridge Leyton and Walthamstow Tramways Company, and I can assure you I will always endeavour to make your interests my interests. ("Hear, hear.")

On the motion of Mr. KRISCHE, seconded by Mr. HUDSON, the auditors (Messrs. Barrow and Carr) were also reappointed.

Mr. DREW—I think before we part we should pass a vote of thanks to the chairman and the directors, for their services during the past year. It is the first time I have had the opportunity of attending these meetings, although I have been a shareholder for some time, and am now rather a considerable shareholder. But it is always a pleasure to see business men on a board, and men who can devote their business capacity to the business arrangements that are required always in a company like this. The continued success of the company is an evidence that they continually have given attention to it, and I think it will be gratifying to them to know that they have the confidence of their shareholders, and that we look to them for the continued advancement of the company. ("Hear, hear.")

Mr. PENNY seconded the resolution, which was carried with acclamation, and the CHAIRMAN having briefly acknowledged the same, the proceedings terminated.

## Directors' Reports.

### EGYPTIAN DELTA LIGHT RAILWAYS.

The accounts to September 30th, 1898, show a capital expenditure of 447,813*l*., whilst the receipts have been 449,594*l*.—viz., preference shares (210,000*l*., less calls in arrear 406*l*.), 209,594*l*.; deferred shares, 70,000*l*.; 4 per cent. debentures, 170,000*l*. The directors' report states:—

"Beherah District.—The following sections were opened for traffic prior to September 30th:—Damanhour-Delingat, 26 kilometres, opened April 7th, 1898; Delingat-Tod, 11 kilometres, opened May 15th, 1898; Tod-Teh el Barud, 13 kilometres, opened June 5th, 1898; Damanhour-Hess, 14 kilometres, opened June 5th, 1898; Damanhour-Afteh, 18 kilometres, opened July 6th, 1898; Teh el Barud-Shibriket, 17 kilometres, opened

September 25th, 1898; Chandid-Kafr Awanah, 6 kilometres, opened September 25th, 1898—total, 105; and since that date the sections Hess-Hosh Isa, 13 kilometres, opened October 30th, 1898; Damanhour-Shibriket, 18 kilometres, opened November 13th, 1898, have been opened, making the total now open 136 kilometres—say 85 miles. The construction of the remaining 40 miles of line in Beherah is being taken up, as Government sanction to the plans is obtained.

"Gharbieh District.—Work on the lines in this district has now been commenced and will be pushed vigorously during this cold season, so as to have as much line as possible open for the cotton season of 1899.

"Revenue Account.—Although the statement above shows that 105 kilometres of line were opened on September 30th, yet the average kilometrage open for traffic during the six months was only 62 kilometres, say 40 miles. The lines were opened whilst in a very unfinished state simply to accustom the people to their use as soon as possible, and to train the staff, so as to get them into fair working order before the busy season. Under these circumstances, and taking into account that scarcely any goods were moving at this season, the board consider the receipts satisfactory and promising well for the future. The receipts from April 7th to September 30th were—from coaching, 2,406*l*.; from goods traffic, 903*l*.; total, 3,309*l*.; or about 3*l*. 3s. 6d. per mile open per week. The line carried 120,789 passengers (of whom 114,357 were third-class) and 8,165 tons of goods; each passenger on an average travelled 9 miles and each ton of goods was carried 11 miles. Since September 30th the weekly returns of traffic have been published, and as cotton is now coming in, are steadily improving, and for the last five weeks have averaged 5*l*. 9s. 9d. per mile open per week, the highest for any one week having been 6*l*. 7s. 6d.

"Additional Lines Required.—It was originally proposed to construct 400 kilometres, say 250 miles, of line, about equally divided between the Beherah and Gharbieh districts. Further examination of the country has shown that, as soon as the sanction of Government can be obtained, it will be desirable at once to construct as part of the system 31 kilometres more in Beherah, and 114 more in Gharbieh, making a total of, say, 550 kilometres, or 350 miles of line. These new lines are required to connect, as far as circumstances will permit, isolated sections which would otherwise be expensive to work and difficult to supervise, and to open up important marts now unserved by railways. The board desire to construct these additional 100 miles, estimated to cost about 1,500*l*. per mile—say 150,000*l*.—as soon as Government sanction can be obtained. For reasons given in paragraph 5 of circular of June 20th, 1898, an additional amount of 250*l*. per mile for the 250 miles now under construction, as well as a small amount of working capital, are also required. The board are of opinion that eventually, to complete the system and fully develop the traffic of these districts, it will be advisable, with the permission of Government, to construct another 150 miles of line, making, with the 250 miles now under construction and the 100 miles above mentioned, a grand total of, say, 500 miles. The board, therefore, propose to take power to raise the additional capital needed for these works—say 500,000*l*. This capital will only be issued from time to time as required and as circumstances render it desirable. The necessary resolutions will be submitted to the meeting."

In a circular accompanying the report, the secretary announces that as the board find that there is a great desire on the part of the shareholders of the company in Egypt that they should have the opportunity of converting their present registered shares into shares represented by warrants to bearer, the directors have determined to issue the same to all holders of fully paid shares who may so desire. These warrants to bearer will be for one or five shares—that is, of the nominal amounts of 10*l*. and 50*l*. respectively—and will be issued upon the terms that the applicant pays the Government stamp duty of 3s. per 10*l*. share—say, at the rate of 1*l*. 10s. per 100*l*. of the nominal value of the shares—and the company's fee for issuing the same of 1s. per warrant.

### CORDOBA AND ROSARIO RAILWAY.

#### CAPITAL.

The capital account shows a total expenditure to June 30th, 1898, of 2,074,854*l*., whilst the receipts have been 2,131,827*l*.—viz., 4 per cent. first debenture stock, 710,000*l*.; 6 per cent. debenture stock, 529,827*l*.; cumulative 6 per cent. preferred shares of 100*l*. each, 600,000*l*.; deferred 100*l*. shares (issued to the contractors), 292,000*l*.

#### REVENUE.

The accounts for the year ending June 30th, 1898, show gross receipts amounting to \$1,505,192 (against \$1,785,755), and expenses amounting to \$1,138,144 (against \$1,148,780), leaving a profit of \$367,047, equal to 28.010*l*. Adding transfer fees 86*l*., and sundries 197*l*., the total net revenue is 28,293*l*. Interest on 4 per cent. debenture stock to June 30th, 1898, absorbed 28,384*l*., and general interest 158*l*., leaving a deficit of 249*l*. The balance of 850*l*. remaining in net revenue after payment of the dividend of 3*l*. 15s. per cent. out of the profits of last year on the 6 per cent. debenture stock has, in accordance with the scheme of arrangement, been transferred to the credit of 6 per cent. debenture stock dividend account.

#### TRAFFIC, &c.

The number of passengers carried during the year was 47,768 (against 47,324); the quantity of goods carried 277,690 tons (against 306,196 tons); the train mileage, 310,624 (against 321,297); the receipts per train mile, \$4.85 (against \$5.56); the expenses per train mile \$3.67 (against \$3.58); the profit per train mile, \$1.18 (against \$1.98); the ratio of working expenses to receipts, 75.61 per cent. (against 64.33 per cent.); the length of line worked, 180 miles. The report states:—

"The rate of working expenses has risen from 64.33 per cent. last year, to 75.61 per cent. of the receipts, which is due to the smaller quantity of

goods carried, and to a reduction of 5·32 per cent. in the average receipts per ton mile, the tariffs on many items of through traffic having been lowered in consequence of a fall in the gold premium. No effort has been spared by the general manager to keep down expenses, but the expenditure has in previous years been so moderate that further appreciable economy was found to be impossible; the company has practically two terminal stations to maintain in Rosario, without which the export and import business could not be handled, and has also to contend with keen competition for all classes of traffic. Competition has, unfortunately, not always been carried on in a legitimate way by rival lines, one company having during the year resorted to rate cutting, by which means a considerable portion of the Tucuman traffic was diverted. In April last this system was ended, the several companies interested having entered into an arrangement to maintain rates.

"Foreign traffic amounted to 151,534 tons, or 54·57 per cent.; transit traffic to 63,832 tons, or 22·99 per cent.; and local traffic to 62,324 tons, or 22·44 per cent. of the total tonnage. As compared with the figures of the previous year, foreign traffic decreased \$259,807, transit traffic decreased \$64,630, and local traffic increased \$111,695. The decreases in foreign and transit traffic are due to a serious falling off in the tonnage of the high-paying items of traffic, notably wines and liquors, sugar, and general goods. Sugar decreased 29·62 per cent., the output having been limited in consequence of over-production in previous years, and the receipts were further affected by necessary reductions in the tariffs. The decrease under the head of wines and liquors is principally in alcohol, due to the production of the sugar factories being lessened and to an increased tax imposed by Government. The small demand for general goods was consequent upon the condition of the sugar industry and a partial failure of the tobacco crop in Tucuman. Local requirements for imported articles also fell off.

"When the last report of the directors was issued it was expected that the cereal crop, which was then in excellent condition, would exceed that of any previous year, but at the last moment about two-thirds of the crop was lost through damage by hailstorms, late frosts, and excessive rains. Although the harvest sufficed to provide a substantial increase in receipts from cereals it was insufficient to enable the colonists to make any considerable purchases of general goods, they having suffered from a succession of bad harvests. As a natural result of this depression in business all classes of traffic have been affected.

"From July 1st last the decrease in the gross receipts is almost entirely due to the smaller amount of sugar carried, the cane having been considerably damaged by frost; the latest advices from the manager, however, give the satisfactory assurance that the wheat and linseed are in splendid condition, everything indicating a good crop, which, if secured, will cause greatly improved receipts during the second half of the current financial year. Some other items of traffic also promise increases, large contracts having been entered into for the supply of wood paving-blocks and sleepers.

"The board much regret that the profits of the year will not enable any payment in respect of interest on the 6 per cent. debenture stock; the amount of arrears due on this stock at June 30th last was 52,994l."

### SOUTHERN MAHRATTA RAILWAY.

#### CAPITAL.

June 30th, 1898.—Received—shares, 3,500,000l.; debentures 2½, 3, and 3½ per cent., 1,043,100l.; advances by the Secretary of State, 3,314,073l.; sundries, 30,206l.; total, 7,887,379l. Expended—(including stores), 7,695,104l. Credit balance, 192,275l., of which 133,362l. was represented by stores. The expenditure during the half-year amounted to 54,841l., of which 18,628l. was on lines opened for traffic and 36,213l. on working stock.

The capital account of the Mysore State Railway shows an expenditure (excluding stores) of 1,111,831l., while the receipts have been 1,224,000l., viz.—Debentures, 1,200,000l.; sundries, 24,000l. The amount expended during the half-year was 10,163l.

In addition to the above expenditure a sum of Rs.1,12,50,017 has been spent by the British, Mysore, and Kolhapur Governments upon the construction of 215½ miles of other railways worked by this company, in the net receipts of which it does not participate.

#### REVENUE.

The receipts of the entire undertaking for the half-year ended June 30th, 1898, amounted to Rs.41,00,417 (against Rs.49,11,057), the expenses to Rs.26,78,049 (against Rs.26,13,438), and the profit to Rs.14,22,368 (against Rs.22,97,619). The company's quarter share of the net receipts of the Southern Mahratta and Mysore Railways for the half-year amounted to Rs.3,09,652. The sum required to make up the dividend to the rate of 5 per cent. per annum for the half-year is 26,250l.; the company's quarter share of the net receipts of the Southern Mahratta and Mysore State Railways amounted to Rs.3,09,651, and has realised 20,577l., thus leaving 5,673l. to be met from the reserve fund. The directors recommend a dividend of 15s. per cent. for the current half-year, in addition to the 1½ per cent. due from Government, making the payment on January 2nd next 2½ per cent., subject to English income-tax.

#### TRAFFIC.

The average length of road operated during the half-year was 1,556½ miles (against 1,556½ miles); the number of passengers carried, 2,245,354 (against 3,465,711); the quantity of freight carried, including company's materials and revenue stores, 528,834 tons (against 543,531 tons); ratio of expenses to receipts, 65·31 per cent. (against 53·22 per cent.). The lines open to public traffic and worked by the company during the half-year were:—Southern Mahratta Railway, 1,045 miles; Mysore Railway, 296 miles; Nanjangud Extension, Mysore Railway, 154 miles; Guntakul-

Bangalore Railway, 171 miles; Kolhapur State Railway, 29 miles. Total open on June 30th, 1,556½ miles. No additions have been made to the company's system of railways during the half-year, nor are any under construction. The report states:—

"The falling off in third-class passenger traffic is due to the continued prevalence of bubonic plague in the Bombay Presidency. As compared with the corresponding period of 1897, the decrease is 35·48 per cent. in numbers and 32·53 per cent. in receipts. Receipts on account of the transport of public merchandise show a falling off of 11·59 per cent., and a decrease in weight of 2·70 per cent. This is due chiefly to there having been an exceptionally heavy traffic in food grains in the previous corresponding half-year. The most important decrease is in grains other than wheat; cotton, salt, timber, and miscellaneous also show decreases. On the other hand, there is a marked improvement under the head of oils and oil seeds and wheat; dyes and tans, metals and sugar also show increases.

"There is a net increase of 81,991 tons in the traffic interchanged with other railways during the half-year, the export traffic having increased by 52,694 tons, and the import traffic by 29,297 tons; these increases are apparent at all our junctions with other railways, except that with the East Coast Railway. The increases in exports are chiefly in wheat *via* Poona and Hotgi; food grains *via* Bangalore, Hotgi, and the Portuguese frontier; seeds *via* Poona, Hotgi, Guntakul, and Bangalore; and miscellaneous articles all junctions except that with the Nizam's State Railway. The decreases are principally in cotton at Poona and food grains at Poona and Guntakul. Imports have increased in food grains at Guntakul and from the East Coast Railway; kerosine oil *via* the Portuguese frontier, and miscellaneous at all junctions except Dharmaravam and Bezawada (East Coast Railway). Decreases have occurred in food grains at Poona, Hotgi, Bangalore, and Dharmaravam."

### BOMBAY BARODA AND CENTRAL INDIA RAILWAY.

#### CAPITAL.

The capital expenditure during the half-year ending June 30th, 1898, amounted to 78,693l. The aggregate expenditure to date was 9,494,671l., whilst the receipts were as follows:—Shares and stock (including converted debenture bonds) 7,550,300l.; loans and debenture stock, 1,937,900l.; capital not bearing interest, 26,248l.; total, 9,514,448l. Credit balance, 19,777l.

The net total expenditure on capital account at June 30th last, allowing for suspense accounts, and including 311,818l. representing stores and materials on hand or in transit in India, was 9,806,489l. The capital raised up to the same date amounted to 9,514,447l., the difference being temporarily advanced by the Secretary of State. A further issue of 3 per cent. debentures to the amount of 400,000l. nominal, was, however, made in July last, for which a small premium, amounting in all to 1,483l., was realised. Of the debentures thus issued, 198,800l. run for three years, 100,500l. for five years, and 100,700l. for seven years. Debentures for 20,500l., bearing 3½ per cent. interest, which matured on August 1st last, were paid off at that date. The Act sanctioning an increase of borrowing powers from one-third to one-half of the amount of the subscribed capital—that is, from 2,516,767l. to 3,775,150l.—received the Royal Assent on July 1st last.

#### REVENUE.

The receipts on this account for the half-year ending June 30th were as under:—

	1897.	1898.
Coaching .....	£205,669	£158,701
Goods .....	528,654	669,270
Telegraph .....	2,729	2,507
Sundries .....	13,613	20,587

Total receipts .....

The expenditure on revenue account during the same period was as follows:—

	1897.	1898.
Maintenance of way .....	£131,112	£110,803
Locomotive expenses .....	117,867	119,497
Carriage and wagon expenses .....	27,125	43,384
Traffic expenses .....	46,079	46,908
General charges .....	27,172	24,201
Special and miscellaneous expenditure .....	3,089	13,020

Total expenditure .....

The net earnings for the last half-year were thus 493,243l., in comparison with 398,221l. Compared with the corresponding half-year, the gross receipts show an increase of 100,401l., the expenditure an increase of 5,378l., and the net earnings an increase of 95,023l. After providing for interest on guaranteed capital stock and bonds and on overdrawn balances, the amount, in Indian currency, of surplus profits, divisible equally between the company and the Government, is Rs.29,52,106. The company's share amounts to Rs.14,76,053, and after payment of Indian income-tax (Rs.24,780, being the amount due in respect of the year 1897) the available balance represents Rs.14,51,273 (against Rs.9,25,718).

The gross earnings of the Rajputana-Malwa, the Cawnpore-Achnera, and the Godhra-Rutlam lines amounted to Rs.1,24,44,451 (against Rs.1,03,05,885 for the corresponding half of 1897), the expenses to Rs.50,90,921 (against Rs.48,43,909), and the net earnings to Rs.73,53,530 (against Rs.54,61,976). Allowing for collected outstandings of the previous half-year, and for unrealised earnings, the balance remaining is Rs.73,61,532. From this amount Government are entitled to Rs.36,50,238 for interest, in respect of the half-year, at 5 per cent. per annum on their capital outlay (Rs.13,48,79,111) in connection with the Rajputana-Malwa Railway (including the Godhra-Rutlam Railway and its extension to Nagda), and at 4 per cent. per annum on their capital outlay

(Rs.1,26,75,335), in connection with the Cawnpore-Achnera Railway. The balance remaining—viz., Rs.37,11,301, is divisible between Government and the company, the company being entitled to one-fifth (Rs.7,42,260), which has been placed accordingly at its disposal. After payment of Indian income-tax (Rs.7,386 being half the amount due in respect of the whole year 1897), the net amount available is Rs.7,34,874 (against Rs.3,44,785).

The total amount of surplus profits of the half-year available for distribution to the proprietors is as follows, namely:—From the company's line, Rs.14,51,273; from the State lines worked for Government, Rs.7,34,874—Rs.21,86,147—besides outstanding items collected in India since the accounts were closed there. The sum of Rs.21,50,000 has been withdrawn from India, realising 143,244. The directors now recommend, as was announced at the general meeting in June last, the payment of a dividend in January next from surplus profits of 2l. 2s. 6d. per 100l. on the consolidated stock, which will require 160,444. This payment will make, with the guaranteed interest, a total distribution to the proprietors in January next of 4l. 12s. 6d. per cent., as compared with 3l. 12s. 6d. per cent. in January last, and with 4l. 15s. per cent. in January, 1897. After this payment has been made, the balance of surplus profits remaining undivided, in Indian Government securities and cash, will represent a value of about 57,000l.

#### TRAFFIC, &c.

The number of passengers carried on the Bombay Baroda and Central India Railway was 4,048,048 (against 4,608,939); the quantity of goods carried 1,148,358 tons (against 964,961 tons); the number of train miles run 1,332,831 (against 1,322,373); the ratio of expenses to receipts, 42.04 per cent. (against 46.95 per cent.); the receipts per train mile, 12s. 9d. (against 11s. 4d.); the net earnings per train mile 7s. 5d. (against 6s.); the length of line owned, 461 miles (in both half-years).

The quantity of goods carried on the Rajputana-Malwa and Cawnpore-Achnera Railways was 1,046,548 tons (against 839,227 tons); the ratio of expenses to receipts 40.91 per cent. (against 47.00 per cent.); the length of line owned, 2,125 miles (against 2,077½ miles).

The total length of railway forming the system worked by the Bombay and Baroda Company was 2,586 miles. This mileage includes the company's own broad gauge line, 461 miles; the Rajputana-Malwa and Cawnpore-Achnera metre-gauge State railways, 1,674 miles; the Godhra-Buland-Nagda broad-gauge State railway, 141 miles; the Nagda-Ujjain broad-gauge line, 34½ miles; his Highness the Gaekwar's railways, 183 miles (of which 13½ miles are broad, 92 3-5 metre, and 78 4-5 are 2ft. gauge); Ahmedabad-Prantij Railway (metre gauge), 54½ miles; and the Pahlapur-Deesa metre-gauge railway, 17½ miles. The report states:—

Coaching traffic shows a decrease of 46,968l., and telegraph earnings of 222l.; but goods traffic an increase of 140,616l., and sundries of 6,974l. These coaching traffic figures indicate the continued effects of the plague, and the consequent restrictions on travel enforced by the public authorities, upon the passenger traffic of the company's line outside of Bombay. These restrictions have, the board understand, been recently considerably modified and relaxed, and the local and season-ticket traffic of Bombay itself showed a very fair increase during the half-year. The goods traffic of the half-year, however, both local and through, for export, showed a marked improvement and compares as under with that of the corresponding period of 1897. This satisfactory change was due to improved crops and an extended demand for Indian produce in European markets, nearly three-quarters of the increase shown in earnings from general goods and merchandise having arisen from wheat and oil seeds exported from Bombay and reaching the company's line *via* Sabarmati from the northern districts, or *via* Godhra from Central India.

#### PROVIDENT FUND.

The board have been informed by the Secretary of State that the Government of India have proposed a revision of the conditions of the State Railway Provident Funds, and are of opinion that it would be advantageous if a similar revision were adopted, where necessary, by the several Indian railway companies in regard to their own provident funds, with a view to bringing all the funds into closer harmony as regards their regulations, and rendering them more equally beneficial, whilst providing a more satisfactory prospect to the members generally on retirement from active service. The board consider the changes proposed to be desirable in the interests of the staff, and also of the company in view of its intimate connection with State railways. Increased convenience in administration would result from the adoption of similar rules, as regards subscription and bonuses, in the provident funds of the State railways worked by the company and of the Bombay Baroda and Central India Railway. The revision proposed will involve, in the case of this company's fund, raising the subscriptions of its members from 5 to 8½ per cent. of their salaries, and the addition, under certain limitations, of an equivalent sum to the subscription of each member as a maximum contribution from revenue, instead of the 1 per cent. of the net earnings now contributed to the fund under the present rule. The change in the distribution of grants from revenue between the members of the fund resulting from adoption of the revised rules will directly tend to benefit all those who now receive, by credit from revenue, less than they subscribe to the fund. A certain number, comprising the more senior members of the fund, are, however, already entitled, or will before long become entitled, under present rules, to a larger individual share of the contributions from revenue than the proposed new rules would give them, and would consequently suffer loss by the substitution of the revised rules for those now existing. The equitable claims thus arising, and also those put forward for protection of members of the fund not domiciled in India from undue loss by exchange

in withdrawing, on retirement from the company's service, their respective shares of the fund, form, in the view of the board, a fair charge upon revenue, to the extent that may be approved by the Secretary of State. A resolution to authorise the directors to make the necessary alterations in the rules of the provident fund will be submitted to the meeting.

### SOUTH INDIAN RAILWAY.

#### CAPITAL.

The paid-up capital of the company is 1,000,000l. The capital expenditure on the undertaking, from funds provided by the Secretary of State for India, amounted, on June 30th, 1898, to Rs.7,66,13,490. This is less by Rs.33,369 than the capital expenditure shown at the end of December, 1897, due to a decrease in the stores suspense account during the half-year. The actual outlay on capital account for the half-year has been only Rs.72,887.

#### REVENUE.

The total revenue earnings for the half-year ending June 30th, 1898, were Rs.43,49,053 (against Rs.46,24,064), and the working expenses Rs.23,10,950 (against Rs.23,96,752). The net earnings were Rs.20,38,105 (against Rs.22,27,312), and, after making adjustments for expenses and credits appertaining to previous half-years, the amount standing at the credit of this account for the half-year is Rs.20,27,873. After allowing Rs.12,11,855 for interest charges—including 3 per cent. on the capital of the Government and of the company—and a contribution of Rs.8,026 to the provident fund, there remains as the surplus divisible between the Government and the company, Rs.8,08,022, of which the latter's share is Rs.1,47,653. This amount, less Indian income-tax and expenses, has realised at the rate of exchange of 1s. 4½d. per rupee, 9,612l., which, with 6,524l. brought forward, and 103l. interest, gives a total at the credit of surplus profits account, say, 16,240l. The directors recommend that a dividend for the half-year to June 30th, 1898, of 1 per cent., free of income-tax, be paid on January 22nd, 1899, out of this fund, making, with the guaranteed interest of 1½ per cent., a total of 2½, or equal to a rate of 5 per cent. per annum. This will absorb 10,000l. of the surplus profits, leaving a balance of about 6,240l. (less English income-tax) to be carried forward.

#### TRAFFIC, &c.

The number of passengers carried was 5,949,495 (against 6,493,337); the quantity of freight carried 372,028 tons (against 445,961 tons); the mean mileage worked was 1,128 miles (against 1,103½ miles); the percentage of working expenses was 53.14 per cent. (against 51.83 per cent.). The report states:—

The length of State line worked by the company throughout the half-year to June 30th, 1898, remained the same as in the previous half-year—viz., 1,041.59 miles. In addition to this, the company works the Pondicherry Railway, 7.80 miles; the Karaikkal Railway, 14.45 miles; and the Mayavaram-Mutpet line, 53.99 miles; making the total length of line worked 1,117.83 miles. The French Government Railway from Karaikkal to Peralam, 14.45 miles in length, was opened for traffic on March 14th, 1898. Pending the receipt of formal orders from the Government, preliminary arrangements are being made for the commencement of construction upon the branches to Quilon and Pamban, to which reference was made in the last report of the board. The survey of the projected Erode-Nanjangode Railway is still in progress. With reference to this latter, a proposal has been made by the Government of Madras that a portion of the Madras Railway Company's south-west main line should be converted into the metre gauge, and that the construction on the metre gauge, and the working of this essential link in the through communication between this company's system and that of the Southern Madras Company, should be intrusted to the Madras Company. The board are of opinion that the intervention of a third company between the two great narrow-gauge systems of Southern India is strongly to be deprecated as damaging to the interests of this company and of the public, and they have accordingly entered a protest against the proposals of the Madras Government. The scheme in question embraces other proposals to which the board also take exception, and they have conveyed their objections to the Government of India through the company's agent in India.

### BENGAL AND NORTH WESTERN RAILWAY.

#### CAPITAL.

The expenditure on capital account to June 30th, 1898, amounted to 2,955,787l., and the receipts to 3,568,021l., of which 2,749,972l. was from the issue of ordinary shares, 779,048l. from the issue of 3½ per cent. preference shares, and 39,001l. from premiums. Credit balance, 612,233l. The capital expenditure on the main lines during the half-year amounted to 52,501l., principally on the extensions commenced in 1894. This brings up the total expenditure, inclusive of stores, Rs.8,51,214, or 53,977l., to Rs.3,65,23,375, or 2,720,184l. The expenditure on the Ganges Gogra Doab lines amounted to 193,346l. for the half-year, bringing up the total expenditure thereon, inclusive of stores, Rs.33,57,927, or 211,279l., to Rs.80,31,436, or 500,859l. The amount expended during the half-year on the Tirhut State Railway, from funds supplied by Government, was Rs.2,17,176 on the open line, and Rs.16,64,640 on the Hajipur-Katihar extensions. The total expenditure upon the Tirhut line on the Government books now amounts to Rs.2,66,04,244 on the open line, and Rs.65,42,091 on the new extensions, making a grand total of Rs.3,31,46,385.

#### REVENUE.

The accounts for the half-year ending June 30th, 1898, show a gross revenue of Rs.35,98,139 (against Rs.33,09,864), and an expenditure of Rs.13,32,603 (against Rs.13,13,446), leaving net earnings of Rs.22,65,536. This amount has to be divided between the Government and the com-

pany, the basis of division being broadly the respective capitals of the Tirhut State Railway, and the Bengal and North Western Railway at the close of the half-year, modified as prescribed in the contract. The company's share is Rs.12,28,610, which has been brought home at the exchange of 1s. 3 31-32d., and realised 81,747l. Adding the balance from previous account 797l., and sundry credits 346l., and deducting interest, income-tax, &c., the sum available for dividend is 76,839l. As the adjustments between capital and revenue on account of the net earnings of the opened sections of the 1894 extensions have not yet been made, and the dates have not yet been settled from which the capital of each section opened becomes entitled to a share in the profits, the board have placed in suspense a sum of 10,000l. to meet any charge against revenue which may arise. This and other adjustments leave the amount of 66,839l. 3s. 8d. available for dividend. The directors recommend a dividend of 3l. per cent. for the half-year, free of Indian, but subject to English income-tax, or the same as for the corresponding half of 1897. This will absorb 63,800l., and leave a sum of 3,039l. to carry forward to next half-year.

#### TRAFFIC.

Length of line in operation—owned 583 (against 473) miles; worked for the State, 342 miles. Number of passengers carried, 3,217,093 (against 2,985,122); tons of freight carried, 524,158 (against 535,458), of which 78,106 (against 82,770) tons was construction and revenue material. Total train mileage, 1,150,366 (against 1,008,386). Proportion of working expenses to receipts, 37.04 per cent. (against 39.68 per cent.).

### BENGAL-NAGPUR RAILWAY.

#### CAPITAL.

The total expenditure on capital account to June 30th, 1898 (excluding extensions), amounts to Rs.9,98,52,240, whilst the receipts have been Rs.10,14,68,968—viz., shares, 20l. each, guaranteed 4 per cent. by the Secretary of State in Council for India, 3,000,000l.; debentures 3 per cent., 1,500,000l.; advance by the Secretary of State at 3½ per cent., 2,760,000l.; sundries, 5,781l.—together, 7,265,781l., equal at Rs.13 to the pound to Rs.9,44,55,151. Adding loan at 2½ per cent., Rs.21,21,801; premium on same, Rs.38,186; and Rs.48,53,830 advanced by the Secretary of State and expended on the Bilaspur-Etawah State Railway, the total expenditure was Rs.10,14,68,968. The capital expenditure in the past half-year amounted to Rs.1,40,399, of which Rs.1,58,789 was on lines open for traffic, Rs.7,859 on lines in course of construction, and Rs.7,531 on working stock.

As regards the Sini-Midnapur-Calcutta-Cuttack extensions, the amount of capital provided in England and in India is as follows:—Advances by Government (in India), Rs.2,38,96,119; loans, 2½ per cent. (Extension portion 975,000l.), Rs.1,62,30,110; premiums, Rs.89,954; total, Rs.4,02,16,183. The amount expended is Rs.3,91,42,173, leaving a balance of Rs.10,74,010. The amount received on January 3rd, 1898, in pursuance of the arrangements for the issue of debentures for 200,000l., mentioned in the last report, is included in the present accounts.

#### REVENUE.

The accounts for the half-year ending June 30th, 1898, show a gross revenue of Rs.41,47,129 (against Rs.35,91,962), and an expenditure of Rs.17,16,304 (against Rs.16,54,114), leaving a profit of Rs.24,30,825 (against Rs.19,37,848). Under the contract with the Secretary of State, surplus profits depend on the net earnings for a whole year exceeding the guaranteed interest for the same period. The net earnings for the past half-year fall short of the guaranteed interest for the half-year (taken at 15 2769 pence per rupee) by Rs.2,43,337. It may be mentioned, however, that the amount for 1897 includes Rs.2,82,006, and that for 1898 Rs.5,51,871, interest on capital for the extensions, which is as yet mainly unproductive.

#### TRAFFIC.

The mean length of line worked was 879 miles (against 862 miles); the ratio of expenditure to receipts 41.39 per cent. (against 46.05 per cent.); the number of passengers carried was 1,169,630 (against 1,098,952); the quantity of goods carried 808,859 tons, including 69,765 tons of railway materials and revenue stores (against 779,963 tons, including 80,060 tons of railway materials); and the number of train miles run, 1,053,345 (against 845,779). The report states:—

“Passenger Traffic.—In the first-class there was a small decrease in the number carried, but an increase in the earnings due to a greater number of through passengers. The decreases in the second and intermediate classes are unimportant. In the third-class there was an increase in the numbers, accompanied by a fall in the earnings. The former is chiefly due to the movements of numerous marriage parties over short lengths. The continued prevalence of the plague in the Bombay Presidency and its appearance in Calcutta, and the regulations imposed with a view to check its spread, have had a deterrent effect on passenger traffic; there was also less activity in the despatch of emigrant coolies to Assam.

“Goods Traffic.—An abstract of the principal commodities carried forms part of the accounts, page 16. The net result, as compared with the corresponding half of 1897, is an increase of 39,191 tons carried, and of Rs.4,86,700 earned. Coal shows a decrease in tonnage, partly attributable to a strike, but an increase in the earnings traceable to long lead consignments from Radhanagar to the Great Indian Peninsula Railway, *via* Katni and Nagpur. Wheat shows a gratifying increase both in tons and earnings, due to good crops. Rice shows a decrease, traceable in part to the import of Burma rice into the Central Provinces being no longer required. Oil seeds, sugar, stone and lime also show good increases.

#### GENERAL.

“On the main line no capital works of any importance were undertaken in the half-year. Progress has been made with the earthwork on the Raipur-Dhantari branch line, and the expenditure is included with that

of the main line. The rate of exchange adopted for this and other transactions during the half-year was 15.2769d. per rupee. It is, however, subject to correction. The expenditure in India on the Sini-Midnapur-Calcutta-Cuttack extensions was met, as before, by rupee advances from the Government, and the expenditure in England by the proceeds of an issue of debentures. Work on the extensions continues to be prosecuted vigorously. The section from Sini to Khargpur (near Midnapur), 99½ miles in length, was opened for goods traffic on June 1st, and for passenger traffic on September 20th. The rails are laid from Kola on the banks of the Roopnarain River, about 35 miles from Calcutta, to Midnapur and Cuttack, and this section is likely to be ready for opening shortly, with temporary diversions at the large bridges; good progress has also been made on these bridges, which must be completed before the new lines can be opened throughout. Arrangements have been made for the carriage, after the opening to Kola, of consignments from that place to Calcutta by steamer until such time as the completion of the Roopnarain Bridge will give direct access to Calcutta. During the rains of 1899 (June to September) it may be necessary to close a section of about 60 miles, in which the heaviest bridging is situated, as the bridges will not then be finally completed, but the through route should be reopened directly the rains cease. The arrangements in regard to the terminal station at Calcutta are still under consideration. The entire system as originally designed, together with the branch to Sambalpur, was open for traffic during the whole of the half-year, and the Sini Khargpur section of the extensions from June 1st.”

### SOUTH BEHAR RAILWAY.

The report states that the length of line under construction is 78.82 miles. It has now been divided into four sections, and the latest reports show that the following proportions of each have been completed:—Luckeesraï section, 36.62 miles, or 98 per cent.; Nawadah section, 32.90 miles, or 92 per cent.; Gya section, 8.86 miles, or 81 per cent.; Phulgu-bridge section, 0.45 miles, or 47 per cent.; total, 78.83 miles. It thus appears that 87 per cent. of the whole of the works of the line have been completed. The capital expenditure during the year has amounted to 244,266l., of which 159,221l. was expended in India, and 85,045l. in England. The total sum expended to the end of June, 1898, was 506,743l. It has been estimated that the cost of the line will amount to 717,341l. This estimate is subject to confirmation, but there is no doubt that the present authorised capital will be insufficient to meet the expenditure. The remaining 40,000l. of the 3½ per cent. debenture stock will, therefore, at once be issued, and offered, in the first instance, to the shareholders and debenture stock-holders, any further capital that may be required being raised, as provided in the contract, on the requisition of the Secretary of State. The excess over the original estimate is due to the cost of additional bridges and increased waterways, which it has been found necessary to provide, and to the lengthened period occupied in the construction of the line, during which interest has to be paid out of capital. The line which, as the shareholders know, is being constructed under the supervision of the Government of India, through the agency of the East Indian Railway Company, is now approaching completion, and it is expected that, with the exception of the Phulgu Bridge, it will be opened for traffic early next year. The Phulgu Bridge will, it is stated, be finished before the end of June. The sum of 19,728l. realised from interest on unemployed capital during construction up to June 30th, 1898, has been credited to capital account as a set-off against interest payable out of capital, and the board have arranged with the Government that payment of interest out of capital shall, if necessary, be extended from June 30th last to June 30th, 1900. The directors have also arranged with the Secretary of State that the sum of 15,000l. derived from the premiums on the issue of the 250,000l. debenture stock shall be added to the capital account and expended under the authorisation of the Government. This sum will be in the form of capital not bearing interest, and will be paid back to the company by the Secretary of State when the contract is determined by notice of purchase.

## General News.

### RAILWAYS IN CHINA.

Regulations concerning the conduct of mining and railway enterprise in China have just been issued by the Mining and Railway Board. They comprise twenty-two clauses, and the chief points of interest are:—First—The exemption of Manchuria, Shantung, and Lung-chow from the application of the regulations, on the ground that there international relations are involved. Second—That railway agreements are in future not to include mining rights, while mining concessions will not include power to construct railways except for purely mining purposes. Third—Every mining and railway concessionaire will be obliged to provide schools for the instruction of the people. Fourth—In the case of each enterprise Chinese capital must form three-fifths of the whole. Fifth—The sanction of the board will be necessary for the employment of foreign capital, and the control of the enterprises, irrespective of the foreign capital employed, must remain in Chinese hands. Sixth—The proportion of profit payable to the Chinese Government will be 40 per cent. in the case of railways and 25 per cent. in the case of mines. Reuter's agent at Peking says:—“No doubt these regulations, when they are officially promulgated, will be found to have

been modified if they are meanwhile met by foreign opposition." The *Times* correspondent says:—"They will not be accepted by the foreign Ministers," and adds—"An attempt is being made to oust Hu Yu Fen from the directorship of railways. He has already been removed from the governorship of Peking, and was appointed instead Minister of the Yamèn and immediately dismissed. The same terms were employed as in the case of Li Hung Chang. An explanation widely credited is his association with the Hong-kong Bank during the recent railway negotiations."

#### BUENOS AYRES AND PACIFIC RAILWAY.

In our last issue we reproduced a letter which had been addressed to the stockholders of this company by Mr. J. C. F. Lee, one of the directors. To this letter the board on Wednesday issued the following reply:—

"Dashwood House, 9, New Broad-street, London, E.C.,  
November 30th, 1898.

"Dear Sir (or Madam)—A circular, dated 17th instant, has been addressed to you by Mr. Lee, one of the directors of this company, in which he suggests that a speech he made to the shareholders at the general meeting of November 10th, 1897, was made by the authority of the board. This statement is wholly incorrect.

"Four days before that meeting Mr. Lee telegraphed that he was indisposed and would be unable to make a speech. The day before the meeting he called at the office and stated he would most probably be unable to attend the meeting at all. Eventually, however, he came to the meeting.

On the subject of the permanent way, the then chairman, Sir Gabriel Goldney, in his speech, made the following statement:—

"The question of the permanent way deserves some comment. In common with nearly all Argentine railways, we find that the increased traffic and the necessity for increased haulage power, and, therefore, heavier engines, are demonstrating the advisability of strengthening the road bed. As a necessary corollary of the decreased receipts lately, we have suspended the outlay for the present except what was imperatively demanded for the safety of working, but as soon as times become better and traffic increases, we must go on strengthening the line, as I have said, for the safety of the public, and for the protection of the company itself."

Mr. Lee afterwards rose and, in the course of some replies to questions, said:—

"Now we come to the question of the permanent way. I am personally of opinion that we have done far more in that direction than we should have been called upon to do, and there again the Government had a finger in the pie. I should like to know what would be said by the chairman of the London and North Western here if the Board of Trade asked him to renew the way from London to Rugby. The Argentine Government has not only been asking for renewals of this sort, but endeavouring to enforce them. I think this renewal has taken place far in excess of the needs, and I think we should have been justified in coming before you and asking you to sanction the whole of this expenditure being placed to capital account. I speak as a man who was acquainted with railways in my early days, and I think we should have been well justified in that course, because the traffic, although considerable and growing, has been safely carried on on a 50lb. rail. But I will tell the meeting that we have stopped that expenditure which we have been more or less compelled to incur, and we do not mean to go any further with it, except, as the chairman has said, for the purpose of safety."

"Mr. Lee's statement was made without consultation with his colleagues and without authority from them. Sir Gabriel Goldney, as shown above, had spoken on behalf of the board as to the advisability of going on with the strengthening of the road-bed. Mr. Lee pointedly called attention to the fact that he was expressing his own personal opinion that far more in that direction had been done than we should have been called upon to do, and also that this renewal had taken place far in excess of the needs.

"You will see how widely this statement differs from that of the chairman, and, with the evidence that was before the board at the time in letters and telegrams from the responsible officials in charge of the railway, it is impossible to understand Mr. Lee's reasons for the speech he delivered.

"Mr. Lee has now quoted a recent letter from Mr. Woodhouse to the effect that, with a little strengthening, the line would do very well as it is, and he also states that he looks upon Mr. Woodhouse's retirement as a misfortune for the company. Mr. Woodhouse was for twelve years engineer of the company, but resigned in May, 1896, under circumstances within Mr. Lee's knowledge. Mr. Lee fully concurred in the action of the board at that time. It is, therefore, strange that Mr. Lee should now so greatly deplore the loss of Mr. Woodhouse's services.

"There are two ways of managing the property. One is to neglect the permanent way, to take every available penny for

revenue, and to cause, perhaps, a temporary appreciation in the price of our stocks. The second way is gradually to strengthen the road. This way may not, at the moment, favour a speculative movement, but it will, in the long run, be to the benefit of *bona fide* permanent stockholders in the company. It is to their interests that the directors look, and you may be assured that the board will continue to carry out this policy.—By order of board,  
"F. O. SMITHERS, Secretary."

#### NEW CAPE CENTRAL RAILWAY.

In the matter of the New Cape Central Railway Company, Limited, Mr. Stewart Smith moved before Mr. Justice Kekewich for leave to register a contract under section 1 of the Companies Act, 1898, which provided that where there had been omission to file a sufficient contract, a person interested in the shares or the company might apply to the court for relief. This application was made on behalf of the company. In 1883 the old company was incorporated, and in 1887 there was an order for winding up. On August 12th, 1892, a contract was made, which was approved by the court in the winding-up proceedings, by which the undertaking was sold to a new company in consideration of 19,336 fully paid-up shares in the company. This contract was duly adopted by the new company after incorporation; but that contract was not filed. A contract was filed dated February 9th, 1893. Dividends were now being paid on the ordinary shares of the company, which had become prosperous, and had applied for a Stock Exchange quotation. The Stock Exchange Committee, which was an unappealable body, had expressed doubt whether the contract filed was sufficient, there being a difficulty that some considerations in the issue of the shares were not therein mentioned, and the company now asked permission to register the original contract of August 12th, 1892. Mr. Justice Kekewich gave leave to register the contract within a month.

#### BRAVE CONDUCT ON A CHANNEL STEAMER.

The Board of Trade inspection of the damage to the London Chatham and Dover Company's mail-boat *Dor* was made on Saturday. The steamer left Calais on Thursday in the evening service, Chief Engineer Downes being in charge of the engine-rooms. When the vessel was about half-an-hour out, Mr. Downes detected a sound which he believed to be caused by a leakage, and an inspection proved that a slight fracture had developed in the crown of the high-pressure cylinder. The vessel was going at full speed, and there was a pressure on the cylinder of 100lb. to the square inch. Not an instant was lost in doing everything to avert the catastrophe that would have occurred had the crown of the cylinder blown out with this great pressure of steam behind it, the cabins and their occupants being alongside. The chief engineer set himself to reduce the pressure, and with the utmost coolness he and his assistants kept at the task, although the fracture in the cylinder head extended 18in. while they were at this work, and they had full knowledge that if it blew out they would meet with a shocking death. Eventually the pressure was brought down, and the captain, in consultation with the chief engineer, decided to endeavour to return to Calais. This they did, exercising the utmost precaution, a constant watch being kept on the fractured cylinder. Steaming very slowly, the *Dor* reached Calais in an hour and a half, the passengers knowing only that an accident to the machinery had prevented their continuing the voyage.

**London Tilbury and Southend Railway.**—An extraordinary general meeting will be held on the 15th inst. for the following purposes, viz.:—(1) To sanction the creation and issue of the capital authorised by the London Tilbury and Southend Railway Act, 1898, the exercise of the borrowing powers, and the creation and issue of debenture stock. (2) To authorise the company to subscribe towards the undertaking of the Whitechapel and Bow Railway Company, and to guarantee the payment of interest upon the debentures or debenture stock of that company. (3) To sanction and approve an agreement, dated September 12th, 1898, made between the Whitechapel and Bow Railway Company, the Metropolitan District Railway Company, and the London Tilbury and Southend Railway Company, relating to the capital, construction, working, maintenance, management, and user of the Whitechapel and Bow Railway, and for the division of the receipts from traffic thereon.

**EPPE'S COCOA.**—GRATEFUL AND COMFORTING.—"By a thorough knowledge of the natural laws which govern the operations of digestion and nutrition, and by a careful application of the fine properties of well-selected Cocoa, Mr. EPPE'S provided for our breakfast and supper a delicately flavoured beverage which may save us many heavy doctors' bills. It is by the judicious use of such articles of diet that a constitution may be gradually built up until strong enough to resist every tendency to disease. We may escape many a fatal shaft by keeping ourselves well fortified with pure blood and a properly nourished frame."—*London Service Gazette*.—Made simply with boiling water or milk.—Sold only in packets and pound tins, by Grocers, labelled—"JAMES EPPE and Co., Ltd., Homeopathic Chemists, London."

## Notices to Readers.

The Offices of THE RAILWAY TIMES are at 2, Exeter-street, Strand, W.C.

Telegraphic Address:—RAILWAY TIMES, LONDON. Telephone No.:—1967 GERRARD.

All communications bearing upon literary matters should be addressed to the Editor.

Letters relating to Subscriptions, Advertisements, and other business matters should be addressed to the Publisher.

## TERMS OF SUBSCRIPTION.

Post-free to any address in the United Kingdom.

Three Months .....	£0 7 0
Six Months .....	0 13 0
Twelve Months .....	1 5 0

A special discount of 6d. on quarterly, 1s. on half-yearly, and 2s. on annual subscriptions will be allowed for payment in advance.

THE RAILWAY TIMES may be had at all bookstalls, and of any newsagent throughout the kingdom, at 6d. per copy.

Back numbers will be charged for as follows:—If dating back more than a year, 1s. per copy; if more than two years 2s. per copy.

## REMITTANCES.

Money Orders, Cheques, &c., should be drawn in favour of Lionel Bridgland, and should invariably be crossed "London and County Bank." Stamps will be taken in payment of small sums, say under 10s.

## EDITORIAL.

All communications must be authenticated with the name and address of the writer, which will be received in strict confidence.

## Forthcoming Meetings.

- Dec. 6—Bengal and North Western Railway (Half-yearly), Winchester-house, at 12.
- Dec. 6—Cordoba and Rosario Railway (Annual), Winchester-house, at 2.
- Dec. 6—South Indian Railway (Half-yearly), 55, Gracechurch-street E.C., at 1.30.
- Dec. 6—Nizam's Guaranteed State Railways (Half-yearly), Winchester-house, at 12.
- Dec. 7—Great Eastern Railway (Preference Stock Holders), City Terminus Hotel, at 2.
- Dec. 7—South Behar Railway (Half-yearly), 44, Finsbury-circus, E.C., at 3.
- Dec. 7—Southern Mahratta Railway (Half-yearly), 44, Finsbury-circus, E.C., at 12.

## FRENCH COLONIAL ENTERPRISE.

So France is going to take a leaf out of the book of the firm of John Bull and Co., and commence to develop her colonial empire by the building of railways. A railway is slowly crawling inland from the coast of Madagascar. The Trans-Saharan line is an obvious rejoinder to our Soudan railway, but the Sahara is hardly an ideal colony. And now a credit of over 10 millions sterling to begin with in Indo-China is asked for. This is not so bad, even if 50 per cent. be taken off the eventual result as representing a present means of stopping the loud complainings of the somewhat discredited colonial party. We can wish the project nothing but good even if we consider that there is an element of rashness in embarking upon so large a scheme without that tentative and step by step advance which has characterised and brought to such successful results British railway schemes in uncivilised countries. Tonking is, of course, no acquisition of yesterday for the French nation, and has not proved thus far a possession which has brought much material return for the blood and treasure expended upon it and the high reputations which have paid the penalty for ill-considered schemes of empire. Poor Jules Grévy, "le Tonquinois," made the mistake of thinking that to colour territory on the map was to create a colony. He fell before he could retrieve his error. French Indo-China has not suffered from lack of propositions, but whether from distrust of local opinion or from sheer inability to grasp the rudiments of colonial development, practically nothing has yet been done. Of the great scheme of 1888 to create a main trunk line from Saigon to Lunchau, the short length from Saigon to Mytho, is all that has been laid. The remainder is, we gather, now to be taken in hand, at least in part, while a branch from Mytho to Cantho is on the programme. These will open up a country capable of a considerable trade, and are expected to make some return upon the cost of their construction. As with most lines in far Eastern parts, we fancy that this will depend upon the extent to which a settled rule can be established. At present it is as difficult to gauge the temper of the inhabitants as it is to pronounce the local names. Perhaps the most interesting from an international point of view of the railways scheduled for construction with the money now voted is that from Hanoi towards Yunnan. Some time ago a survey party under M. Guillemot traced a route up the Red River through Mengtse into the Yunnan province, and it was stated that no great difficulties were discovered in the way of a railroad. As we have said in a previous article on the railway position in China, Yunnan-Fu seems to be destined to be the Clapham Junction of the South, and it will be remembered that in the first days of the rush for concessions France obtained way for this line at the cost of a missionary or two. For a good many years to come, however, such a line can have little commercial value, and must be regarded as the strategic element in the scheme now put forward. British engineers have left India to work towards the same point from Kunlon Ferry, the terminus of the Burmah system. The race for arrival will be interesting. Perhaps the most noteworthy feature of the present French programme is the omission to provide for any consummation of the various smaller concessions obtained on the northern frontier of Tonking, and calculated to bring that state into touch with the neighbouring Chinese province of Kwang-si. It is not improbable that this inaction is due

to the rivalry of the treaty port of Pak-hoi, which, with improved communications with the interior, might rival Hong Kong, but would, at any rate, be an instance of the "open-door" so objected to by our protectionist neighbours. It is more than likely also that the Hanoi-Nanning concession was never meant to be exercised, since the natural flow of traffic would be towards the West River, now opened by the efforts of Sir Claude Macdonald, and thus adding to the stream which pours in upon Hong-Kong. If this surmise is correct the policy which obtained such a concession can only have been adopted to keep others out. The more the map is studied the more obvious it is that all the strategic points of Chinese trade are not in foreign hands. "Festina lente" is the best advice to give to British enterprise in railway construction in that country. It will be strange if some of France's ten millions does not benefit us in the long run.

### THE DISTRICT RIG.

In the Stock Exchange account which ended this week the biggest upward movement shown in the home railway section was one of  $5\frac{3}{4}$  points in District ordinary stock, which rose from 27 to  $32\frac{3}{4}$ , having at one time in the interval momentarily touched 35. In the absence of any new development in connection with the future of this unfortunate and sadly mismanaged undertaking such a rise is certainly extraordinary, especially as there have been no indications of an unusual public demand for the stock. From a careful examination of the markings, representing business done, in the Official List, we are unable to discover that the business transacted has been at all commensurate with the nominal and rapid advance in the price of the stock. There are fairly clear indications that it is merely being "manipulated," and it behoves prudent people to stand clear. From what we are able to gather the present operation is not unconnected with a similar advance engineered just two years ago, and as an example of what may happen again we will recount the circumstances of the former movement. In August, 1896, Districts were quoted at the not inadequate figure of  $24\frac{5}{8}$ . In the next month the manipulation began, and the stock was carried up to  $33\frac{1}{2}$ . In October last it was hoisted still higher to  $34\frac{3}{4}$ —a rise from the lowest of 10 points in about two months—or a relative appreciation in market value of 40 per cent. A good deal of talk went on during this time in relation to electric railway developments, and that wonderful scheme for the construction of the "sub-District" railway from Earl's-court to Mansion-house was made a great deal of. In the District report to December 31st, 1896, Mr. Forbes said:—"The subject of a deep-level line or other improvement of the access into London, though not new, has been quite recently revived and urged upon the board by a combination of shareholders largely interested in the ordinary stock of the company, and in order that this important question should be dealt with in a business fashion, and its practicability rest upon engineering authority, the board have concurred in the necessary preliminary measures being taken." Under very singular conditions—as revealed in the remarkable case of *Ellis v. Pond*—the board brought in the necessary Bill in the 1897 session, and obtained powers to construct the "Sub-District" Railway, and to introduce electrical traction on the existing lines. For these purposes the company was authorised to raise 1,700,000*l.* of share capital, and 566,000*l.* of loan capital. The difficulty of raising the large sum necessary was discussed at the time the rig was in full swing, but it was stated that the "syndicate" would advance it. Anyway, the estimated cost was bound to be much greater than had at first been

supposed, and, as might have been anticipated, nothing whatever has been done to carry out the schemes sanctioned in 1897. And what about the price of the stock? Well, after having been lifted to  $34\frac{3}{4}$  in October, 1896, "ratting" seems to have taken place, and the price in November fell to 26. All that has been done by the company has been to join with the Metropolitan in instituting experiments with the view of testing the practicability of introducing electricity as a motive power as applied to trains of the present size and weight run on the underground system. A very meek and mild attempt to stir up some energetic policy was made at the meeting in February last. At that meeting perhaps the most interesting episode was the disclosure of the fact that Mr. Forbes held 1,000*l.* ordinary stock (the bare amount of his qualification) in the company, that Mr. Murray Griffith was the largest holder of ordinary stock, and that Mr. Charles Pond, whose name has come prominently forward in connection with these electrical developments, held none whatever. From the point of view of actual merits it would be difficult to conceive a more inopportune moment for putting up the price of District ordinary stock. Last year, by the aid of the large Jubilee traffics, the company managed to pay  $3\frac{3}{8}$  per cent. out of the 5 per cent. attached to its extension preference stock. That was the best dividend for many years, and is certainly not likely to be repeated this year. For the first half of 1898, it is true, it maintained a 4 per cent. dividend, as in the corresponding half of 1897. But this half-year it has to date a traffic decrease of nearly 10,000*l.*, and at the very least this will render necessary a reduction of 1 per cent. in its preference dividend for the current period, for such a reduction represents only 7,500*l.* This will bring down the distribution for the year 1898 to only  $2\frac{1}{2}$  per cent., and still further widen the gap which comes between the ordinary stock and a dividend. And this is not all. The company is spending a considerable sum on capital account just now, and on June 30th it had already raised temporary loans to the extent of 47,000*l.* So the raising of capital, apart from the big electrical schemes at present in the air, must be faced before long; and for a company in the unfortunate position of the District it is a decidedly disturbing matter. After all, the bold electrical schemes also depend on the ability of the company to raise money, and, so far, the inducements afforded by the experience of existing electric lines are not very great. It would be well, therefore, for those who are out of Districts to keep out, and for actual holders to take the present opportunity of realising at what is purely a "fancy" price.

### THE NITRATE CIRCUS.

After being comatose for months, not to say years, on end, "Nitrates" seem to be waking into life—with sadly shattered constitutions it is true, yet just able to crawl out of their enforced obscurity. It would take a Sloan and Madden rolled into one to raise a hand gallop out of most of the spavined Woolpack outsiders, and there are no "stable commissions" to set the ball rolling on the Stock Exchange, the present managers of the Nitrate stud being entirely devoid of the old-time sporting spirit and mostly occupied with the "collection" of commissions. For all that there is a rise in some of the shares, and it behoves us to record the fact. Interest naturally enough centres at the moment in Nitrate Rails, which, besides representing the largest individual capital, are kept in evidence by fortnightly traffic returns, with an occasional investigation and revelations thrown in. Readers of THE RAILWAY TIMES were some time ago prepared for the recent advance in the shares, attributable

to increased receipts, which latter were bound to accompany the expanding exports of nitrate. The shipments from Chili, which in the two months October and November, 1897, were 260,000 tons, reached 400,000 tons this year, and the December total is estimated at 180,000 tons, against 150,000 last year. At the rate of sixpence per quintal, the carriage by the Nitrate Railways Company of one-half of the above increase of 170,000 tons would yield about 45,000*l.*, and this increase of traffics will continue into 1899, as the production of nitrate is now on an unprecedented scale. The company's ability to pay at least 5 per cent. for 1898 on its ordinary and preferred shares being assured, the present quotation may reasonably be expected to improve, especially that of the "preferred," returning 10 per cent. on the money. The deferred shares are still out in the cold, but offer even a relatively wider margin of enhancement in value as the prospect of a dividend becomes less remote. Faithful to their principles, the directors of the Nitrate Railways are keeping up their sleeve the scheme for the readjustment of capital account, evidently considering that too many plums at a time would be bad for the shareholders' digestion, unless it be because they are personally short of the shares, the holdings of the entire board being a mere bagatelle. The depreciation of the Chilian currency is working wonders for the nitrate producers, and to a large extent compensating for low selling prices. For this reason some of the nitrate companies which are not too glaringly over-capitalised will be able to pay respectable dividends next year. The "San Jorge" is perhaps the pick of the basket, combining, as it does, a large output at low cost, with a comparatively moderate capital (as joint-stock nitrates go.) There is, however, considerable dissatisfaction among the shareholders at the non-performance of the promise, distinctly made to them by Mr. Harvey two years ago, of a return of 1*l.* per share out of the reserve fund available for the purpose. The large profits now being made by the company render this course on the part of the board all the more inexcusable and irritating, and the chances are that there will be ructions in the camp unless the shareholders soon come by their own. The "Liverpool" Company, *facile princeps* in the nitrate bunch, has unfortunately struck a snag which may knock the bottom out of dividend prospects. Encouraged by the success of its incursions over to Chilian Government lands, it has tried the same game with its "Santiago" neighbour, the result being an uncommonly nasty claim. On the seamy side, alas! comprising three-fourths of the nitrate concerns once known on the Stock Exchange, poor Paccha has landed in Queer-street, the renovation having fallen through owing to the refusal of the shareholders to throw good money after bad. We really did not credit that body with so much common sense! Mr. Gamble North (brother of the defunct warrior who vended the Paccha and Jaz Pampa properties for 340,000 golden sovereigns) can perhaps find consolation in Great Boulder and Klondyke; Mr. George Lockett, whilst losing the agency, wears the fresh laurels of Lagunas (won by a mere fluke), but poor Mr. Manby, the last of the directorial trio, where does he come in? The Bank of Tarapacá, too, forced to repay itself out of pledged iodine by monthly instalments! We pause out of sheer want of breath, awaiting the next "turn" in the Nitrate Circus by the ringmaster, Mr. Robert Harvey, at the meeting of the Lagunas Syndicate.

### MILFORD DOCKS AND CANADIAN SHIPPING.

It will have rejoiced the long-suffering shareholders of the Milford Docks to hear that at last a transatlantic company is about to take pity on their property. The Canadian

Steamship Company has announced a fortnightly sailing between Milford and Paspébiac, at the mouth of the St. Lawrence River, which, if successful, will be the prelude to a more extended service. The route is said to show a saving of two days as against Liverpool, and various other advantages are claimed. Whether these turn out to be all that is expected is another matter, but the fact remains that yet another link has been added to the bonds which tie together the parts of this great empire of ours. The scheme is noteworthy also as bringing into the Canadian trade the influence and energy of the Great Western Railway Company. It has been arranged to quote through rates, which cannot but facilitate and stimulate traffic by this route. Arrangements with steamship and foreign railway companies by which through bills can be issued carry contingent advantages which can hardly be over-estimated. In this connection it is possible to hope that the temporarily abandoned scheme of the London and North Western to quote through rates to the Cape and Transvaal will be revived before long. To return, however, to the Milford Docks. This unfortunate company, incorporated in 1874, has a total capital of 1,500,000*l.*, including debentures and a special mortgage of 70,000*l.* created in 1894. In 1892 default was made on the 411,000*l.* A debenture stock, which nominally carries 6 per cent. payable out of profits, and accumulative. Considering the absolutely impecunious condition of the company it is unnecessary to mention the remaining classes of securities. It will be remembered that a change of administration was effected not long ago; and at the meeting last February, the chairman, Mr. Newbon, put forward proposals for fresh increase of capital, assuring the lugubrious shareholders, as they had been assured twenty times before, that there was a strong expectation of at length inducing an American company to accept their hospitality as a paying guest. The assurance was received with the incredulity due to hopes abandoned through long deferment. It is true that the chairman then mentioned the month of May for the inception of better times, and it is sincerely to be hoped that they have come at last. That the company can ever prove a success in the ordinary sense is more than doubtful; but the spectacle of a genuine liner lying at the wharves in place of the usual trawlers and fishing smacks will be at least encouraging. The whole story, however, is one of reckless expenditure, absolutely unjustified by the most speculative anticipations.

### EGYPTIAN RAILWAYS AND FINANCE.

We have more than once had occasion to refer to the unbusinesslike system on which the financial control of the State Railways of Lower Egypt is administered. One of the few sound assets to show for the reckless expenditure which culminated in national bankruptcy and the dual control, it was natural that the railways should have been seized upon by the commission appointed to manage the vast public debt which had accumulated. Treated as part of a bankrupt estate, they were placed under an administrative committee consisting of an Englishman as president, a Frenchman, and an Egyptian, responsible to the Commission of the Debt for every piastre they received. No less than 57 per cent. of the gross receipts were, and are, hypothecated to the service of the debt, and the railway administration has to carry on the working and maintenance as best it can on the strength of the balance. It can be well imagined to what state of deterioration the permanent way and rolling stock have sunk when all that could be spent on these essentials had to be secured out of the paltry sum available for all purposes. The Commission of the Debt, an international body unable to act unless unanimous, which it seldom is, has

hitherto refused to release from its surplus, lying idle, the necessary sums to make much needed railway extensions, or even to allow the existing railways to develop their facilities *pari passu* with the great increase in the traffic waiting to be carried. The shortage of rolling stock is a by-word, and the absurdly inadequate accommodation of the port of Alexandria, which is included with the railways in this scheme, would have stifled any less sturdy trade movement than that which has been fostered by British determination to surmount all obstacles. The policy is the more ridiculous when it is remembered that vast sums have been and are being spent in increasing the productive power of the country by irrigation and similar means, and that private corporations, such as the Delta Light Railways Company, have had to largely increase their original schemes. The result upon Lower Egypt is akin to the description of London street traffic recently given by Sir John Wolfe Barry at the Society of Arts. By railways, above and below ground, we increase the area from which is drawn the crowds who pour into the heart of London; yet the measures we take to carry that traffic, by wider and more commodious streets, are out of all proportion insufficient. So in Egypt. The cotton crop has been trebled; imports as well as exports of all kinds are growing; and the Commission of the Debt has hitherto refused to adopt the natural corollary to irrigation expenditure, which is to provide the means of bringing to market the very goods it has called into being. No wonder Sir Edward Dicey, in the *Nineteenth Century* of this month, exclaims that the system of international control of the most valuable asset of Egypt next to the Nile itself is an anomaly and must be swept away. Under its present constitution the Commission of the Debt must be unanimous in sanctioning any grant from its accumulated millions. It is superfluous to name the Power whose representative has hitherto blocked every proposal calculated to increase the prosperity of the country, and incidentally the security of the bondholders for whose protection the Commission exists. We have used the word "hitherto," for there are signs that recent events have shown that it is unwise to push obstruction too far. The demand of Major Girouard, the recently appointed president of the railway administration, for a million and a-half sterling, is likely to be shortly sanctioned. This, it is understood, is to be expended principally upon additions to the rolling stock of the State lines and in increasing the dock and wharf space at Alexandria. This is a step in the right direction, but it is only a step. We look to the time when the railways will be organised under an independent Ministry, responsible only to the Government of the Khedive and his advisers.

### ANOTHER RAILWAY "GRIEVANCE."

In referring last week to a case on the Metropolitan Railway of a passenger who defended his action of travelling in a second-class carriage with a third-class ticket by stating that it was a "protest" against the absence of cushions in the former, we said:—"Obviously the case cannot be left in its present position, or numerous other travellers will be adopting this convenient method of 'protest' as an excuse for escaping payment of higher fares." Curiously enough another case in which this line of defence has been adopted came before the Lord Mayor at the Mansion-house on Wednesday. This time it was the District Company, who brought two summonses against a passenger who had travelled first-class with a workman's ticket on at least two occasions. The facts do not seem to have been disputed, but the defence again was that no fraud was intended—merely a protest—this time the complaints being that in the third-class all the passengers smoked, and that the passenger had formerly

been a first-class season-ticket holder, but finding the compartments were overcrowded with third-class passengers had adopted this means of raising the question. As in the case we commented on last week, the summonses were dismissed, though costs were asked for on defendant's behalf and declined. We may point out that if magistrates will not convict when cases of travelling in a superior class are brought before them by the companies, there is no way in which the complaint raised in this instance can be remedied, and instances of "protest" such as these two can only tend to aggravate the injustice done to passengers who pay their proper fares and rightly expect that the accommodation for which they pay higher rates shall not be used by those paying for an inferior class.

### BALTIMORE AND OHIO.

Of all the reorganisation schemes, that of the Baltimore and Ohio has probably been the most successful, viewed from the standpoint of the reorganisers. The undertaking had been looked upon by British investors as one of the most substantial American railroads, as it is the oldest, and its financial methods were supposed to be of a higher order than those adopted by the majority of United States enterprises. Consequently the receivership announced in February, 1896, was probably the rudest shock to the British investors produced by the vagaries of American railroad finance in recent years, particularly as it came after all the other receiverships and therefore at a time when it looked as if the Baltimore and Ohio, with others of the larger roads, had weathered the storm successfully. These hopes were doomed to be disappointed, and the situation was aggravated by the disclosure of faulty book-keeping methods in the course of the investigations which followed the appointment of the receivers. Up to June 30th last the road has been operated by the receivers, and the report for the year to that date has lately appeared. During the period of their control of the property the receivers seem to have made very free use of the powers vested in them to raise money by the issue of "receivers' certificates." As a matter of fact, the balance-sheet at June 30th last shows that no less than \$7,319,600 had been issued in this way, mostly at 5 per cent. These obligations, which are really a species of floating debt, are issued under the authority of the court, and have priority over all other charges, and their issue practically meant a corresponding addition to the funds to be raised by the reorganisation scheme. In fact, the total floating debt which had to be provided for was something like \$30,000,000, or say 6 millions sterling. The policy of spending money freely, adopted by the receivers, though unusual, has been justified by the contention that it was necessary to bring the line up to the standard which would place it in a position to compete with the other trunk lines. Anyway the result has been a large increase in revenue and also in net profit, despite the fact that since the receivers have been in authority the expenditure of capital moneys on the property have been supplemented by increased charges to revenue. For the year to June 30th last the gross earnings increased by \$2,140,665. Expenses increased by only \$263,997, however, so that the addition to net profits was \$1,876,668. Allowing for miscellaneous income, the increase in net earnings was \$1,742,777. The actual amount of net earnings was \$8,336,768, and the ratio of expenses was 73.14 per cent., against 78.23 per cent. in 1896-7. In the reorganisation plan issued in June last the net earnings for the year were estimated at \$7,975,785, so that actually they were nearly \$400,000 more than had been foreshadowed. The fixed charges under the plan were cut down to \$6,252,351 including rentals of leased lines. Thus there was a surplus in the last financial year of \$1,725,000 over the new charges,

an amount sufficient to provide the full dividend of 4 per cent. on the \$40,000,000 of new preferred stock, and leave a balance of \$125,000. At the time the reorganisation scheme appeared in June we said:—"The shares stood at 67½ in the year preceding the crash, and only in 1893 stood at par, and at the present quotation of 17, plus say 10 for the assessment, they compare favourably with some of the other speculative rubbish in the Yankee railway market." In putting the assessment at 10 we assumed that the \$20 of preference stock received in exchange for the total assessment of \$20 per share would realise 50 per cent., whereas it now stands very much higher. From 17 the shares with assessment paid have lately risen to 62, and in the past account Baltimore and Ohio common headed the list of rises in the American market with an advance of no less than 14½ points. That is to say, that in less than five months the market value of this security has more than trebled, even allowing for the net payment which the assessment involved, and the price now stands at nearly the level it did before the road fell into bankruptcy. This splendid record should surely satisfy the wily reorganisers, and also President J. J. Hill, of the Great Northern, who lately seems to have been having a finger in this pie. Since June 30th last we note there has been a slight decline in net profits, so that there is really no margin over the preferred dividend at present. A share at over 60 which is not even showing a margin of net profit is obviously one to be avoided. But it is merely an extreme example of what has been happening all round in Americans of late, and it behoves British investors to be very chary of buying stocks which have undergone such a rapid advance with such slender justification.

### CUBAN AND MANILAN RAILWAYS.

British holders of railway securities issued by companies located in Cuba and in the Philippine Archipelago cannot fail to be deeply interested in the negotiations between Spain and the United States with the view of settling their future proprietorship. By "right of conquest" the Americans have, of course, acquired the reversion to these Spanish possessions, and, whatever be the eventual result of the rather protracted peace negotiations, it may be taken for granted that British capitalists interested in either Cuba or the Philippines would welcome the more enlightened Government which is likely to follow their transfer to the United States. The three leading undertakings concerned in this question are the Manila Railway, the Western Railway of Havana, and the United Railways of the Havana and Regla Warehouses. All these companies have suffered severely in the last two years or so, not merely from the hindrances to trade induced by the war between the United States and Spain, but by the serious internal rebellions which preceded the war, and which, indeed, formed, so far as Cuba was concerned, the basis of the intervention of the United States. This internal strife of course caused an almost entire loss of trade in everything except the necessities of life, and, in addition, the railways suffered damage to their property at the hands of the rebels. The only set-off against these losses was the extra income derived from the transport of Spanish troops which were imported in vast numbers in the vain attempts to put down the rebellions. The Western Railway of Havana has a claim of 51,000*l.* against the Spanish Government as compensation for damages, and it is satisfactory to know that this claim is being followed up by our Foreign-office. Whether it will have any result is perhaps doubtful, and it is just as well that the company is taking credit in its accounts for no part of this sum, so that if anything should be eventually realised it will come rather as a windfall and

a surprise. The Spanish Government seems to have promptly paid its bill for transport of troops, and in the circumstances that is as much as can be expected at the moment. For the years to June 30th, 1897 and 1898, the Western Railway of Havana barely managed to earn its debenture interest, though down to 1895 moderate dividends on its share capital were being paid. In addition to suffering loss of traffic, the company has been put to great expense in order to replace rolling stock, stations, &c., destroyed by the insurgents. It is a little disturbing, not to say unconventional, to read of the difficulties encountered by the railways during the recent disturbances in Cuba. Bombs were exploded under engines, trains derailed, carriages overturned, several passengers killed; these things happening on various dates extending from September, 1897, down to June last. Permanent-way gangs, we learn, had to work throughout the line "with the assistance of a special train carrying an escort of soldiers." The wonder is that under such disturbing circumstances it was found possible even to earn the debenture interest. The more settled state of affairs which has resulted from the American victories is seen in the fact that this company for the period from July 1st last reports an increase in its gross receipts of 10,470*l.* The Manila Railway went into voluntary liquidation in 1896 for the purpose of passing a scheme of arrangement with its 6 per cent. debenture holders. Litigation took place as to the position of the prior lien bonds, "B" series, but the House of Lords in December, 1896, gave its judgment in favour of the "B" bonds, and interest upon them and the "A" has been regularly paid up to date. Owing to the outbreak of the rebellion in the Philippines it was thought well to let the scheme stand over in 1897, and this year the war between Spain and the United States again rendered it useless to discuss the matter until some settled political situation were arrived at. The position is that the company for the last two years has earned and paid its prior lien debenture interest with 14,000*l.* to spare in 1896 and 6,700*l.* to spare in 1897. But arrears of 39 per cent. had accumulated to December 31st last on its 6 per cent. debentures, the amount of which in issue is 730,000*l.* These arrears to the end of 1897 thus amounted to 284,700*l.*, and the scheme will have to provide for the settlement of this sum. This year the 6 per cent. debentures have been quoted as low as 19½, but have latterly advanced to 55. We have from time to time recommended these at lower prices, and as a lock-up for a year or two they look a good enough speculative investment in spite of the advance already shown. There is every prospect of traffic expanding to a large extent if the United States takes over the islands; and though it is possible that the company might lose its present guarantee, this would be a small price to pay for a stable government with favourable conditions for traffic development. Besides this, if the Government "guarantee" be lost, it is fair to assume that the irksome restrictions under which the line is at present worked will also be removed. Recent traffic returns have been excellent, and in spite of the loss during the first part of the year, the total to date of currency earnings is nearly equal to that of last year. The United Railways of the Havana and Regla Warehouses Company in its present form only appeared in February last—too recently for any results yet to be rendered by it. It is satisfactory to know that the "A" debenture stock, then issued at the price of 98, now commands 115, and the 5 per cent. bonds of the new company, into which the old securities were to be converted, have also risen in value, the option of conversion having been very largely exercised. The old bonds were as low as 77 this year, whereas the new issue into which they were convertible stands at par. The shares are not known in the London market, the

company having its headquarters at Havana. The position of the Manila Railway may be summed up in a sentence: If the American monetary standard be adopted in the Philippines, the company's 6 per cent. debentures are worth par, and the 42 per cent. of arrears are worth 20s. in the pound; in the alternative the debentures are a fair speculation at their present price.

### PASSING NOTES.

The traffic receipts for the week ending November 27th, on thirty-three of the principal lines of the United Kingdom, amounted to 1,623,578*l.*, which was earned on 19,253½ miles. For the corresponding week in 1897 the receipts of the same lines amounted to 1,568,467*l.*, with 19,034½ miles open. There was thus an increase of 55,111*l.* in the receipts, and an increase of 219 in the mileage. The aggregate receipts for twenty-two weeks to date amounted on the same thirty-three lines to 39,753,516*l.*, in comparison with 38,517,579*l.* for the corresponding period last year; increase, 1,235,937*l.*

The Midland Railway Company have published a schedule in book form, embodying the result of the general reduction of rates applicable to the conveyance of parcels from London by passenger train. The reduced rates, so far as they relate to English towns, came into operation on May 1st, and to Scotland on July 1st. Commencing with the 1st proximo a further alteration will come into force—viz., that the minimum weight which formerly applied to the despatch of parcels at "owner's risk" will be abolished. In addition to a complete list of stations, the books contain other particulars relating to the conveyance of bicycles and other articles usually forwarded by passenger train, and may be had on application to any of the Midland Company's agents.

The Birmingham Railway Carriage and Wagon Company, Limited, is the title of a company registered November 22nd, with a capital of 300,000*l.* in 10*l.* shares, divided into 10,000 ordinary, 10,000 ordinary second issue, and 10,000 preferred shares taken up to November 22nd, 1898; 10,000 ordinary, 8,739 ordinary second issue, and 10,000 preferred, the amount called and paid on the above being—Ordinary, 10*l.*; ordinary second issue, 4*l.*; and on preferred share, 10*l.* Originally incorporated under the Joint Stock Companies Act, 1856, on September 13th, 1856. Original capital, 100,000*l.* in 10*l.* shares.

Major Sir Francis Arthur Marindin, Senior Inspector of Railways, held an inquiry at the Board of Trade offices on Monday evening respecting the possibility of running earlier workmen's trains on the Inner and Outer Circle of the Metropolitan Railway. Sir John W. Barry, C.E., and witnesses on behalf of the National Association for the Promotion of Earlier Workmen's Trains, together with counsel for and servants of the Metropolitan Company, having been heard at length, Sir Francis promised to submit his report without delay to the Board.

At the monthly meeting of the council of the Huddersfield Chamber of Commerce, the secretary read a letter from Mr. J. A. Beale, on behalf of the Midland Railway Company, in which he said:—"I laid your letter of the 11th inst. before the directors of the Midland Railway Company at their meeting on Friday last, and was instructed to inform you in reply that they are not prepared to entertain the suggestion that their proposed line from Mirfield to Huddersfield should be continued to Thoruhill."

At an influential meeting, held at Ballina on Saturday, it was resolved to bring pressure to bear on the Government to give a free grant towards the construction of a line of railway from Ballina to Belmullet, the supplemental grant of 500,000*l.* voted for light railways in the session of 1896 having already been appropriated to the two light railways proposed to be immediately built in co. Donegal. The Earl of Arran, K.P., presided, and a deputation was arranged to wait on the Chief Secretary.

It is announced, with regard to the new issue of the Great Southern and Western Railway original stock, that the directors

will allow one splitting of allotment letters (without limit to number of names) into sums of not less than 10*l.*, but no second splitting. Separate receipts will be issued to each person named in allotment letters, when they are sent to the secretary fully paid, and accompanied by a registration fee of 2s. 6d. for each name inserted after the first.

An official contradiction is given to the published statement that Mr. James Shaw, J.P., who for many years held the position of superintendent of the northern district of the London and North Western Railway system, has given up that post, and will be succeeded by Mr. Goulbourn, of the London office. Mr. Shaw does not even contemplate taking such a step.

A Crewe correspondent states that the London and North Western Railway Company are pensioning a number of their old employés—engine-drivers and workmen—with allowances according to length of service. These range from 5*s.* to 15*s.* a week. In cases where the service has not been of an extended character gratuities are given of 20*l.* and upwards.

We understand that Mr. Robert Miller has joined the board of the Pekin Syndicate, Limited. We congratulate the syndicate and are sorry for Mr. Miller. Mr. Carl Meyer has also, we understand, joined the board. Our opinion of the Pekin Syndicate was expressed in pretty plain language in THE RAILWAY TIMES of August 13th.

At a meeting of the Court of Common Council, held at the Guildhall on Thursday, in reply to a question by Sir Albert Altman, Mr. Turner, chairman of the Streets Committee, said they had applied to the Board of Trade to hold a provisional inquiry into the alled deplorable condition of Ludgate-hill Railway Station.

The proceedings at yesterday's meeting of Cheque Bank shareholders were of an uproarious character, but the chairman claimed that the reconstruction resolutions were carried. It has been a dubious business all throughout the piece, and we should like to see a Board of Trade inquiry into the past administration.

A lot of obviously exaggerated, and in some cases absurd, rumours in regard to the Costa Rica Railway Company are flying about the Stock Exchange and finding their way into the press. We would counsel the shareholders to pay no heed to these wild stories and to stick to their shares.

The Poplar District Board on Monday passed a resolution in favour of more and later workmen's trains. Mr. Valentine "declared it was a scandal that so many young women, to use the cheap fares, had to wait as much as an hour for their factories to open."

The directors of the London Brighton and South Coast Railway Company have appointed Mr. T. N. Wylie, of the London Chatham and Dover Railway Company, Continental traffic manager, in place of Mr. Victor Gerard, who has resigned.

It is understood that the capital required for the Brixton extension of the City and South London Railway is now being underwritten. It is also understood that the capital of the Bow and Whitechapel Railway has been fully underwritten.

## Money and Stock Markets.

*The monthly settlement in Consols takes place on the 1st prox.; the fortnightly settlement in other Securities commences on the 13th inst.*

CITY, FRIDAY EVENING.

During the past week the MONEY MARKET has taken on a somewhat firmer aspect, and discount rates have stiffened appreciably, the current quotation for three months' bills being 3 11-16ths per cent., as against 3¼ per cent. a week ago, whilst short loans have gone up from 2½ per cent. to 2¾ per cent. and call money from 2 per cent. to 2¼ per cent. The Indian Council renewed and lent a large amount this afternoon till the 16th to 23rd inst. at 3 per cent. No

more gold was taken from the Bank for Germany or elsewhere, and the Continental Exchanges kept fairly steady. No bullion operations were reported at the Bank to-day, but 296,000*l.* in German gold coin was sold yesterday. The Bank Return issued yesterday shows a decrease, chiefly due to gold exports, of 1,196,000*l.* in the reserve, which now stands at 21,819,000*l.*; its proportion to the current liabilities is 5 lower at 49½ per cent. Yesterday's borrowing by the market is shown in an increase of 2,636,000*l.* in the "other securities," while an increase of 385,000*l.* in the Government securities is probably caused by the return of Consols pawned by the Bank. Government disbursements have diminished the public deposits by 151,000*l.*, and the "other deposits" are 2,036,000*l.* higher on balance.

The Bankers' Clearing-house return for the week ending November 30th, 1898, shows a total of 168,820,000*l.*, as compared with 171,792,000*l.* for the corresponding period last year.

Subjoined is a comparison of the present position of the Bank of England, the Money Market, the prices of Consols, French Rentes, &c., with the position at the corresponding period of last year:—

	At Present.	Same Week last Year.
Coin and Bullion .....	£32,189,673	£32,377,370
Total Reserve .....	£21,819,598	£21,834,530
Proportion of Reserve to Liabilities...	49½ per cent.	49 per cent.
Notes in Circulation .....	£27,171,075	£27,342,840
Bank Rate of Discount .....	4 per cent.	3 per cent.
Open Market ditto .....	3½ per cent.	2½ per cent.
Consols (account) .....	110½	113xd
French Rentes (account) .....	102f. 67c.	103f. 95c.
Paris Cheque Exchange .....	25f. 31c.	25f. 22½c.
New York 60 days ditto .....	\$4.81½	\$4.83½

Silver bars are now quoted at 27 7-16d. per oz., being 5-16d. lower on the week. A year ago the price was 27 9-16d.

Eastern exchanges are telegraphed as follows:—Bombay, 1s. 3 31-32d.; Calcutta, 1s. 3 31-32d.; Hong Kong, 1s. 11 5-16d.; Shanghai, 2s. 8½d.; Singapore, 1s. 11 13-16d.

The premium on gold at Buenos Ayres has fallen during the week from 123-50 per cent. to 113-00 per cent., making the paper dollar (nominally worth 4s. 2d.) now actually worth 1s. 10-35d. A year ago the premium was 179 per cent., and the value of the paper dollar 1s. 5-04d.

The Valparaíso 90-day exchange comes over to-day at 12 15-16d., being 3-16d. lower on the week. A year ago it was 17 11-16d.

The Rio de Janeiro exchange on London is 8 3-16d., being 11-32d. lower on the week. A year ago it was 7 3-16d.

The STOCK MARKETS this week have shown a good deal of irregularity, but to-day displayed a fair degree of strength, though the closing prices were not quite the best. There is now less apprehension of further withdrawals of gold for the United States and Germany, and an absence of disturbing news from the Continent also imparts strength to the markets. In *Consols* to-day there was quite a rush to buy back, and the price closed ¾ higher. Bank of England stock has risen 3. Excepting Spanish and Portuguese, most Foreign Government bonds are higher. The feature in British railway issues is the rise in District ordinary, which is enjoying the doubtful blessings of a well-engineered "rig," among the endless rumours put about being one to the effect that the company is about to form an "intimate alliance" with one of the important trunk lines. There is no saying what manipulation may do with a stock, but Districts would be dear at 25, and cannot, therefore, be safe to hold at present prices. City and South London continues to drop away, and it is to be feared that the board is getting the company into somewhat of a muddle. In Yankee Rails Baltimore and Ohio, Central Pacific, and Union Pacific have been the rage, but the majority of stocks in this section are rather off colour, and realisations of Trunks and Canpacs have also caused a reaction in that direction. At present figures they are all very dangerous to touch either way. Indian Rails have mostly put on a

point or two during the week. The Foreign Railway market has this week attracted rather more attention than of late, and it is in this section that money will probably be made during the fall. To-day, the feature was Nitrate issues, which again sprang into demand on the splendid traffic return—which was quite in accord with our recent forecasts. These shares should touch materially higher prices yet, their only weak point being the lack of "inside" support. The board is pursuing a policy of masterly inactivity, but probably that is better than meddling which would probably only mean muddling also, at the hands of such a motley crowd. Manila issues continue their upward course, the debentures having put on a further 7½ points this week, the A bonds 2 and the B issue 5. Even the preference shares have been inquired for at 2 to 2½. They are of 10*l.* each, with about 6*l.* of dividend arrears per share, and a year ago (could not be sold for 5s. each. The issued amount is 300,000*l.*, and immediately in front of them is 730,000*l.* of debentures earning about 1½ per cent., with something like 300,000*l.* of coupons in arrear. The company is referred to in our leader column. Costa Rica shares are fairly steady, on a traffic return somewhat better than the market anticipated. South West of Venezuela first mortgage may be worth watching, in view of possible default on the next coupon due January 1st. In the Miscellaneous market a move will probably soon be made in nitrate producing company's shares, and a buy of, say, San Jorge at 3½, or Salar del Carmen at 3¼ or thereabouts, should prove profitable.

The principal movements on the week, so far as they relate to securities in which the readers of this journal are likely to be most interested, are set forth in the following table:—

Name of Stock.	Rise.	Fall.	Name of Stock.	Rise.	Fall.
<i>British Funds, &amp;c.</i>					
Consols, 2½ per cent. ....	—	—	Denver & Rio Grande Com. ....	—	—

Applications have been made to the Stock Exchange Committee to appoint a special settling day in and to grant a quotation to—Jura-Simplon Railway Company (Compagnie des Chemins de Fer Jura-Simplon), 20,000,000*fr.* (part of 60,000,000*fr.*) 3½ per cent. bonds. Southern Pacific Railroad Company (of California), \$10,000,000 (part of \$20,344,000) 5 per cent. consolidated mortgage gold bonds (1937). The committee has further been

requested to allow the following securities to be quoted in the Official List:—Entre Rios Railways Company, Limited—1,558,505*l.* ordinary stock and 1,648,330*l.* 5 per cent. cumulative preference stock, in lieu of the ordinary shares and 5 per cent. cumulative preference shares now quoted.

The transfer books of the Burma Railways Company will be closed from December 17th to December 31st for the preparation of interest warrants, which will be posted on January 2nd.

Messrs. Thackeray and Co., of Cardiff, under date December 1st, report as follows:—Barry Railway undivided, 262½ (unchanged); Barry preferred, 122 (unchanged); Barry deferred, 141 (unchanged); Cardiff preferred, 111½ (a fall of 1); Port Talbot, 9½ (a rise of ½); Rhondda and Swansea Bay, 5½ (a rise of 1½); Rhymney undivided, 259 (a fall of 1); Rhymney preferred, 119½ (a rise of ½); Rhymney deferred, 143½ (unchanged); Taff Vale, 75 (a rise of ½); Vale of Glamorgan, 124 (a fall of 1½). This market still continues very quiet, and shows but little tendency to any immediate improvement. Vale of Glamorgan have fallen away further on account of the uncertainty of their relations with the Barry Company. Rhondda ordinary shares have been well inquired for and show an important advance.

### THE STOCK EXCHANGE SETTLEMENT.

The making-up prices for the principal railway stocks, and the extreme rates of continuation current at the Stock Exchange settlement on Monday, are shown hereunder:—

Making-up Price.			Stock.	Continuation rate.
Oct. 25.	Nov. 9.	Nov. 28.		
144	148	150	Caledonian .....	—
50½	52½	53½	"    deferred .....	1 6 to 2½ con.
19½	20	21	Great Central deferred ...	3d. to 1 3 con.
114½	118½	120½	Great Eastern .....	3 9 to 1 3 bk.
53	55½	59½	Great Northern defd. ord.	1 3 to 2 6 con.
162½	164½	168	Great Western .....	2 6 bk. to 2 6 con.
145½	147	148	Lancashire & Yorkshire ...	2 6 to 5½ con.
50½	51½	55	Hull and Barnsley .....	1½ to 1 6 con.
177½	178	178½	London and Brighton "A" ..	1 3 to 6 3 con.

## Law Intelligence.

### COURT OF APPEAL.

(Before Lord Justice A. L. Smith, Lord Justice Rigby, and Lord Justice Collins.)

SMITH AND ANOTHER v. THE LANCASHIRE AND YORKSHIRE RAILWAY COMPANY.

This was an appeal by the defendants from the decision of Judge Bompas, Q.C., sitting at the Colne County Court, on proceedings taken under the Workmen's Compensation Act, 1897, to recover compensation for accidental injuries suffered by a workman in the course of his employment, and resulting in his death. The deceased man Smith was a platelayer in the employment of the defendants, the Lancashire and Yorkshire Railway Company, and he was also sometimes employed to collect tickets at Nelson Station. The evidence was that on the night of the day of the accident the deceased had been engaged in collecting tickets from the last train passing along the line that night. While the train was still standing at the platform a constable named Lightowler came on the platform in order to travel by the train. It appeared that passengers travelling from Nelson were required to give up their tickets before the train started. The deceased, having let Lightowler into the train, asked whether he had given up his ticket, and shouted along the platform to a porter the question whether the ticket had been given up, to which the answer was returned that it was all right. The deceased then, standing on the footboard, said to a lady passenger, "I wish I was going with you to Colne." There was some uncertainty as to whether the deceased was already on the footboard when he asked the question about the ticket, or whether he got on to the footboard afterwards merely for the purpose of speaking to the lady. The train was then in motion, and in getting off the footboard he in some way caught his foot and fell, and was crushed between the platform and the train, and was killed. The county-court Judge arrived at the following finding of facts:— (1) That the deceased was on the day in question in the employment of the defendants, and his day's duty was not finished at the time of the accident. (2) That after he had finished collecting the tickets he stood on the platform and he let Lightowler into the carriage and asked and was answered with respect of his ticket before the train was started. (3) That after the train was started, and probably in consequence of its starting, he got on to the footboard to say to the lady, "I wish I was going with you to Colne." (4) That this was not obviously dangerous, and did not amount to wilful and serious misconduct of the deceased. The county-court Judge also found as a fact that the deceased did not get on to the footboard for any object of the defendants', but only for his own pleasure. The Judge held that the accident arose in the course of the deceased's employment, because it was during the time he was being paid for attendance at the station, and while he was not neglecting in any way his duty for purposes of his own. He also held, though with doubt, that the accident arose out of the deceased's employment, because it was an accident happening to him from the train about which his duties were concerned, and that, though the danger was increased by the mode in which he was behaving, this in the absence of wilful and serious misconduct did not prevent its arising out of his employment. The County Court Judge accordingly awarded to the plaintiffs 160*l.*, the sum which had been agreed upon between the parties. The plaintiffs were the widow and the stepdaughter of the deceased. Section 1, sub-section 1, of the Workmen's Compensation Act, 1897, is as follows:—"If in any employment to which this Act applies personal injury by accident arising out of and in the course of the employment is caused to a workman, his employer shall, subject as hereinafter mentioned, be liable to pay compensation in accordance with the first schedule to this Act."

Lord Justice A. L. SMITH said that, in his opinion, in cases under the Workmen's Compensation Act, the Court of Appeal only had jurisdiction to entertain questions of law. Here the County Court Judge had found certain facts, and the company appealed on the ground that on those facts the deceased was not brought within the Act. One of those findings was that the deceased did not get on to the footboard for any object of the defendants but only for his own pleasure. The Act made masters insurers against accidents happening to their workmen, but only in the case of events mentioned in the Act. Section 1 began with the words "If in any employment to which this Act applies." That led them to section 7, which said that the Act should apply to employment by the undertakers as thereinafter defined, on, or in or about a railway, &c. The deceased was employed on or about a railway, and he was therefore in an employment to which the Act applied. Section 1 then proceeded, "personal injury by accident arising out of and in the course of the employment is caused to a workman," then his employer

shall be liable. It must be shown that the accident arose both out of and in the course of the employment. He would not decide whether or not in this case the accident arose in course of the employment of the deceased. But having regard to the finding of the Judge that the deceased got on to the footboard not for any object of the defendants' but for his own pleasure, it seemed to him impossible to say that the accident arose out of his employment. He therefore thought the appeal must be allowed.

Lords Justices RIGBY and COLLINS delivered judgment to the like effect.

### QUEEN'S BENCH DIVISION.

(Before Mr. Justice Channell without a Jury.)

BRITTEN v. GREAT NORTHERN RAILWAY COMPANY.

This was an action brought by Mr. T. W. J. Britten, of Glendalough, Streatham, against the Great Northern Railway Company, claiming a declaration that on October 23rd, 1897, the plaintiff, as a passenger by the railway of the defendant company who had duly paid for his ticket as such passenger, was entitled to have the plaintiff's bicycle carried by the defendant company to the plaintiff's destination free of charge as ordinary personal luggage; for damages for the refusal of defendant company to carry the plaintiff's bicycle free of charge; and for the sum of 6d., being money wrongfully demanded by the defendant company for the carriage of the said bicycle and paid by the plaintiff to the defendant company under protest on the said October 23rd, 1897. The following admissions were made by the parties for the purposes of the action only:—That on October 23rd, 1897, the plaintiff became a second-class passenger on the railway of the defendant company from King's-cross Station to East Finchley Station and duly paid his fare and received his ticket as such passenger, and thereby became entitled to be carried by the railway of the defendant company from King's-cross Station to his said destination. As such passenger the plaintiff was entitled to have his "ordinary luggage," up to and within the weight allowed by the Acts and the by-laws and regulations of the company, carried by the train in which he was travelling free of any charge beyond the charge paid by the plaintiff for his ticket. The sole object of the plaintiff's journey to East Finchley was to enjoy a ride there with a friend and then return to London, and the plaintiff brought his bicycle with him to King's-cross Station with the object of carrying it with him to East Finchley aforesaid in the train by which he was to travel. The weight of the said bicycle was about 30lb., which weight is less than the weight of the ordinary luggage which under the said Acts and the by-laws and regulations of the defendant company a passenger by the defendant company's trains is entitled to have carried free of charge. The plaintiff had no other effects with him on the occasion aforesaid. It has in recent years, since the introduction of bicycle-riding as a recreation and amusement, become a constant practice for persons to travel by train into the country, and for their bicycles to be carried in the same train, with the object of enjoying bicycle rides in the country, and the defendant company and other railway companies now frequently carry very large numbers of such passengers and their bicycles by the same train. The number of bicycle-riders has greatly increased in the last two or three years, especially on holidays and in holiday season. The plaintiff, on becoming a passenger by the defendant company's railway on the day aforesaid, requested and claimed to be allowed to take his bicycle with him and have the same carried in and by the railway train of the defendant company as part of his personal luggage, free of any charge beyond the charge paid by the plaintiff for his ticket. The defendant company refused to allow the plaintiff to take with him his bicycle or to carry the bicycle free of charge as part of his ordinary luggage, and demanded the sum of 6d. (in addition to the sum paid by the plaintiff for his ticket) as a charge for carrying the said bicycle in the train by which the plaintiff was going to travel. The defendant company refused to carry the said bicycle unless the plaintiff paid the additional sum of 6d. The plaintiff paid the additional sum of 6d. under protest. The measurements and weight of an ordinary bicycle are as follows:—Length, about 6ft.; height, 3ft. 6in. to 3ft. 9in.; width across handle bar, 18in. and 21in.; width across pedals, 12in. and 15in.; average weight, 25lb. and 30lb. The dimensions of an ordinary express van on the defendants' railway are:—Length, 28ft. 6in. and 31ft. 6in.; breadth, 7ft. Not more than six bicycles can be placed in the width of a van to enable any one or more of them to be taken in or out during a journey. Thus six bicycles would occupy a space of (6ft. by 7ft.) 42 square feet in a luggage van. Bicycles cannot be safely laid down, as (apart from the oil in the lamp) damage would result to the spokes, tires, &c. An ordinary express van, if reserved exclusively for cycles, would not hold more than thirty. In busy times it frequently happens that cycles have to be taken out of

the van to allow luggage to be sorted and packed, or the luggage has to be taken out to enable the bicycles to be securely fixed and to be got in and out. Since the year 1895 the number of bicycles carried by railways has enormously increased, charges being made by all the railway companies for the carriage thereof. Bicycles unpacked are all conveyed by passenger trains, mainly by the express trains carrying the greatest amount of passenger luggage. They require exceptional care, and are exceptionally difficult to deal with. The following difficulties occur in connection with the transit of bicycles by railway:—(1) An exceptional amount of portage work is involved in moving the vehicles on to or off cabs or other road vehicles and taking them to the vans; (2) exceptional care is required owing to the fact that cycles will not stand alone, but require to be held or to rest against a wall or some other support; (3) there is great difficulty in packing the bicycles in the vans with ordinary luggage, and great care is required to prevent them from shifting and rubbing against one another; (4) an exceptionally large amount of floor space is required in the vans owing to the length of the bicycles and the tendency of the pedals and handle-bars to interlock with those of other machines; (5) great difficulty is experienced in getting at any particular bicycle or bicycles required to be taken out at intermediate stations, and great care is required in getting them in and out owing to the ease with which the steering wheel turns. These difficulties are greatly increased when there is a large amount of ordinary traffic in a train. The cycle requires floor space, and luggage cannot be placed upon them, and if the luggage and bicycles are not amply secured the luggage may shift on the journey and damage the cycles. In many instances there is no room in the ordinary luggage-van for cycles, and the latter have had to be placed in third-class compartments specially reserved for the purpose.

Mr. JOSEPH WALTON, Q.C., for the plaintiff, said that the question was whether the bicycle was "ordinary luggage" within the meaning of the Great Northern Railway and East Lincolnshire Railway Acts Amendment Act, 1850 (13 and 14 Vict., cap. 61, section 17), which was as follows:—"And be it enacted that every passenger travelling upon the said railways in a first-class carriage may take with him his ordinary luggage not exceeding 112lb. in weight, and every passenger travelling in a second-class carriage may take with him his ordinary luggage not exceeding 60lb. in weight, and every person travelling in a third-class carriage may take with him his ordinary luggage not exceeding 40lb. in weight without any charge being made for the carriage." The bicycle was used for a man's personal use just as much as a man's walking-stick or umbrella. The expression "ordinary luggage" was not limited to clothes that he wore. Here the journey was made for the purpose of a bicycle ride. Suppose a man took a pair of large modern roller skates. They would clearly be personal luggage, and there was no distinction between such skates and a bicycle. It was said that a bicycle took up a great deal of space. That was true, but so did things which were clearly personal luggage; for example, a lady's trunk.

Mr. C. A. RUSSELL, Q.C., for the defendants, said the Act they were dealing with was passed in 1846; and although he would not deny that there might be development in these matters, he submitted that a bicycle did not come within the definition of luggage. It was impossible to describe a bicycle as luggage at all, as it was a vehicle; and although the modest Cyclists' Union, Limited, had gone no further than to claim that a bicycle was luggage, if a decision were given in their favour it would include other vehicles, such as tandems, and motor bicycles and tricycles, &c. It did not matter to the railway company whether a passenger had a pair of skates in his hand or not, and he did not suppose that they were ever asked to put a pair in the luggage-van. (Laughter.) Therefore he need not deal with that part of his learned friend's argument. Supposing his learned friend were right, and it became the habit of boating men to carry their own boats, were the railway company to have 40ft. boats tendered as personal luggage? (Laughter.) Bicycles occupied an unusual and excessive amount of space, and required great care in handling, much beyond that required by ordinary luggage. Thirty bicycles, it was admitted, filled an express van, and, therefore, the occupants of third-class compartments would, according to his learned friend, be entitled to have an express van set apart for their bicycles. If any of these persons had a portmanteau, that would have to go elsewhere. He submitted that the synonym of luggage was baggage, and that denoted something in the nature of a bag, or something which might be packed in packages, boxes, or bags. The bicycle did not come within that definition, and might, moreover, be rejected by the railway company on the ground of inconvenience of handling.

Mr. LUSH followed on the same side, and said that bicycles could not be said to fall within the meaning of the word luggage as that word was used by the Legislature. It had been held in

Canada that sewing-machines were not luggage, and it was doubtful whether in the United States a concertina was luggage. (Laughter.) In the latter country, however, it was held that rifles and revolvers were luggage. (Laughter.)

Mr. Justice CHANNELL, in giving judgment, said—I am clearly of opinion that a bicycle cannot be considered as ordinary luggage within the meaning of the statute. It is far easier to say what is not than what is ordinary luggage within the meaning of the section. I think that there are certain requirements which articles must meet in order that they may be ordinary luggage. First, they must be for the personal use of the passenger; secondly, they must be for use in connection with the journey—i.e., must be something habitually taken by a person when travelling for his own use, not necessarily during the actual journey, but for use during the time he may be away from home. I do not think that it was intended, for instance, that the passenger should be allowed to take as ordinary luggage such things as furniture or things intended for permanent use. It is not necessary to say that the expression "ordinary luggage" includes everything which is taken by the passenger for his personal use. I think that in the word "luggage" is involved the idea of a package or something of that sort. A bicycle requires special care, and is not packed in that way, and I think that a thing taken loose like a bicycle is subject to rather different considerations. I do not think that a passenger could require a gun apart from the case to be taken as ordinary luggage, although if packed up it might be ordinary luggage. The things must be those kind of things usually treated as luggage in addition to being for personal use. The expression "ordinary luggage" conveys the idea of things carried about in a box or a bag, or in something of that sort. If such a package is lost, and it is proved that it had not contained things for personal use, the company may be responsible for the loss. The defendants are, I think, entitled to say that a bicycle is not of the character which was intended by the expression "ordinary luggage." In one sense I do not think that the date of the Act of Parliament is very material. The habits of people alter. But when it is considered that a bicycle is an article of a totally different character from any of those which could have been included in the expression "ordinary luggage" at the date of the passing of the Act it becomes clear that it is excluded. A bicycle cannot be said to be carried about as personal luggage is.

Judgment for defendants.

#### CHANCERY DIVISION.

(Before Mr. Justice Romer.)

GREAT CENTRAL RAILWAY COMPANY v. METROPOLITAN RAILWAY COMPANY.

This was a motion by the plaintiffs for an interim injunction raising the question, amongst others, whether an agreement between the two companies made in 1890 had yet come into force, and, if so, what were the plaintiffs' rights thereunder. By the agreement of 1890, which was scheduled to the plaintiffs' Act of 1893, it was provided that when and so soon as the proposed physical connection between the undertakings of the Great Central Company and the Metropolitan Company at or near Quainton-road, Bucks, had been effected and authorised to be open for public traffic, the Great Central Company should be entitled for the consideration therein mentioned to run over and use the railway of the Metropolitan Company between Quainton-road Junction and Baker-street. The Quainton-road Junction had been inspected and passed by the Board of Trade as fit for mineral traffic only, and the plaintiffs had endeavoured to run a coal train along the defendants' line as far as Aylesbury Junction, and from there on to the Great Western Railway line. This was objected to by the defendants on the ground that the proposed physical connection was the completion of the line between Annesley and Quainton Junction for passenger traffic, and that until such opening for public passenger traffic there was no obligation upon the defendants to permit mineral traffic to pass over their railway. Letters passed between the managers of the companies, which, as the plaintiffs contended, constituted a licence by the defendants for the use by the plaintiffs of the defendants' line between Quainton-road and Aylesbury for the passage of coal traffic. The plaintiffs moved for an interim injunction restraining the defendants from preventing their engines and wagons, &c., from passing and repassing at all reasonable times along and over the defendants' railway between Quainton-road junction and the junction of the defendants' railway with the undertaking of the Great Western Railway Company at or near Aylesbury for the purpose of interchange between the plaintiff company and the Great Western Railway Company of goods and minerals.

Mr. Justice ROMER said that the first question which he had to decide was whether what had been called a licence, being an

arrangement contained in the correspondence between the managers of the two companies, was or was not irrevocable. In his lordship's opinion it was not irrevocable. It was clearly intended to be only temporary, and there was no such consideration passing which could make it irrevocable in the eyes of the court. There was no such consideration on the face of the correspondence. The rent—or what was in the nature of rent—payable thereunder was clearly not inconsistent with the licence being determinable at the option of either party. The plaintiffs had suggested that there was some waiver of rights on their behalf which amounted to consideration for the arrangement. He was, however, satisfied that in point of fact there was no waiver by the plaintiffs of their right of making a junction at Quainton-road or otherwise. The arrangement under which the licence was claimed was termed in the correspondence a temporary one, and the suggestion of waiver was an afterthought due to the ingenuity of counsel. The arrangement, moreover, was not under seal, and did not purport to be a solemn binding contract between the two companies in their corporate capacities. If it was something more than a temporary arrangement it should have been under seal. That objection would in itself be fatal to the plaintiffs' contention. Nor was there anything in the nature of part performance which in equity would validate it or which enabled him to say that there was any such probability of the plaintiffs enforcing specific performance at the trial as would justify the court in now making an order on an interim application. In the next place, with regard to the agreement of 1890. Its wording was not very clear. But looking at the circumstances as existing at the time when it was made, and construing the agreement as a business document, the plaintiffs' view of the construction to be put upon it did not seem to him to be a correct one. Their construction was that the agreement came into operation when the Quainton-road junction was made and passed by the Board of Trade. What was contemplated by the agreement when it spoke of the proposed physical connection at Quainton-road being authorised to be open for public traffic was the well-known authorisation which the plaintiffs had to obtain from the Board of Trade before their line could be opened for passenger traffic, and he could not think that the words merely intended to refer to a mere authorisation of a junction at Quainton-road with the Metropolitan line, under the Regulation of Railways Act, 1871, section 5. It was contemplated that, as soon as the agreement came into force, passenger carriages would pass and that passenger traffic would be in existence, and not that the agreement should come into operation piecemeal, first as to mineral traffic and afterwards as to passenger traffic. In his view, therefore, the agreement of 1890 has not yet come into force, and the plaintiffs failed in the construction they had endeavoured to put upon it. It was unnecessary to consider any other points. He made no order on the motion for an interim injunction except that the costs of the application be those of the defendants in any event. There was a question, perhaps, whether the plaintiffs might not, under the provisions of the Railway Clauses Act, 1845, be entitled as of right to use the defendants' line for the purposes of goods traffic. This point was very properly withdrawn by the plaintiffs as not being material to the present application. He only referred to it in order to say that it was unaffected by the decision he was now giving, and that on that point he had decided nothing hostilely to the plaintiffs.

## American & Canadian Railways.

### BALTIMORE AND OHIO.

The report of this company for the year ending June 30th shows:—

	1896-7.	1897-8.
Freight earnings.....	\$18,336,852 ...	\$20,000,215
Passenger earnings .....	5,059,002 ...	5,247,159
Mails, express, &c. ....	2,186,269 ...	2,475,413
Total earnings.....	\$25,582,123 ...	\$27,722,787
Total expenses.....	20,012,094 ...	20,276,092
Net earnings .....	\$5,570,029 ...	\$7,446,695
Other receipts .....	1,040,716 ...	1,017,478
Total net income .....	\$6,610,745 ...	\$8,464,173
Deduct net earnings Washington Branch .....	16,755 ...	127,406
Available income .....	\$6,593,990 ...	\$8,336,767
Int. on bonds, rentals, taxes, &c. ...	7,771,111 ...	8,146,727
Balance .....	Dr. \$1,177,121 ...	Cr. \$190,040

Deducting from the above \$190,040 the Somerset and Cambria Railroad traffic bond, \$9,500 (against \$9,500), and the Wheelage

Car Trust payments, \$168,404 (against \$135,631), the net surplus was \$12,136 (against a net deficit of \$1,316,251).

The balance-sheet at June 30th, 1898, shows a common capital of \$25,000,000; second preferred, \$2,000,000; first preferred, \$3,000,000; bonds secured by mortgage lien on main line, \$21,579,500; receivers' certificates, \$7,319,600; bonds secured by mortgage lien and collateral, \$30,452,000; bonds secured by collateral, \$20,744,000; terminal bonds due 1934, \$8,500,000; Baltimore Belt first mortgage bonds, \$6,000,000; car trust bonds and lease warrants, \$11,277,536; bonds assumed by the company, \$672,000. Bonds and stocks are held by trustees as security for the bonded debt to the amount of \$39,560,186, and bonds and stocks are owned by the company to the value of \$12,806,739.

The length of line operated was 2,047 miles (against 2,046 miles); the number of passengers carried 8,569,546 (against 8,344,078); the quantity of freight carried was 21,986,220 tons (against 18,716,655 tons); the ratio of expenses to receipts 73.14 per cent. (against 78.23 per cent.). President J. K. Cowen, in his report dated November 30th, 1897, says:—"The cash appropriations to the sinking funds of the sterling loan due in 1927 and the P. and C. consolidated mortgage loan due in 1926 now aggregate \$1,763,396. The investments for the appropriations and increments of the main line sinking funds, in pursuance of the agreement to that effect, have been made in the consolidated mortgage 5 per cent. 100-year bonds of this company. These investments in the hands of the trustees of the main line sinking funds now amount to \$10,637,212—viz., \$6,848,000 consolidated mortgage 5 per cent. 100-year bonds of the company, \$3,365,228 of other interest-bearing bonds, and \$423,984 of cancelled bonds of the 1902 and 1910 loans."

### SOUTHERN PACIFIC OF CALIFORNIA.

Under the laws of the State of California, the Southern Pacific Railroad Company, the Northern Railway Company, the Northern California Railway Company, and the California Pacific Railroad Company, by articles of consolidation dated April 12th, 1898, amalgamated and consolidated their capital, stocks, debts, properties, assets, and franchises, and vested the same in an amalgamated and consolidated corporation designated as the Southern Pacific Railroad Company. The first annual report of the consolidated company shows:—

Passenger earnings	\$4,459,860
Freight earnings	9,222,504
Mail, express, car mileage, &c.	1,395,662
<b>Total earnings</b>	<b>\$15,078,026</b>
<b>Total expenses</b>	<b>8,746,510</b>
<b>Net earnings</b>	<b>\$6,331,516</b>
Add rental Mojave division	218,133
Miscellaneous rentals	7,260
Miscellaneous interest	124,577
<b>Total net increase</b>	<b>\$6,681,426</b>
Interest on bonded debt	\$4,014,401
Sinking fund	215,000
Taxes	457,084
Miscellaneous	164,701
<b>Total disbursements</b>	<b>\$4,851,186</b>
<b>Surplus</b>	<b>\$1,830,240</b>

The balance-sheet shows a capital stock of \$100,924,000 and a funded debt of \$72,907,000.

The following statement shows the earnings and expenses of the properties of the companies recently consolidated, for seven calendar years from 1890 to 1896, when the company's fiscal year was changed to June 30th, and for two fiscal years ending June 30th, 1897 and 1898:—

Years.	Miles of road operated.	Gross earnings and other receipts.	Earnings over operating expenses.	Fixed charges, including sinking funds.	Surplus.
1890	1,851	\$13,264,287	\$5,343,742	\$4,313,935	\$1,029,807
1891	2,033	14,321,992	6,497,691	4,298,720	2,198,971
1892	2,095	14,979,625	6,723,042	4,401,502	2,321,539
1893	2,178	15,217,269	6,795,891	4,460,940	2,334,951
1894	2,193	15,141,988	5,340,123	4,542,620	797,503
1895	2,325	14,280,409	5,546,323	4,686,228	860,094
1896	2,289	14,056,455	5,752,321	4,832,788	919,533
1897	2,281	13,792,295	5,849,289	4,721,107	1,128,182
1898	2,300	15,427,937	6,681,426	4,851,187	1,830,239

### CENTRAL PACIFIC.

Mr. W. C. Gunner, secretary of the Central Pacific Shareholders' Combined Protection Committee of 1894 and 1898, informs us that Mr. Walter Morshead has addressed a letter to the Committee of the Stock Exchange on behalf of the Protection Committee, transmitting for the information of the House, as financial advisers of English investors in Central Pacific stock, prints of two further documents which were on

Saturday mailed to the Protection Committee's American counsel at Rochester, New York, and San Francisco, for submission to the authorities at Washington in the pending contest between the Central Pacific shareholders and the Huntington-Speyer-Banbury-Requa party. Mr. Gunner adds that similar notices and enclosures have been, or will be, sent to the Stock Exchanges of New York, Berlin, Frankfurt, and Amsterdam, and that the enclosures referred to will be forwarded to all Central Pacific shareholders on application.

The Central Pacific Railroad Company announces that the principal of the first mortgage bonds of the company, series A, maturing December 1st, 1898, will not be paid at their maturity, but it is intended that until such principal shall have been paid, or readjustment of the company's affairs arranged, interest from December 1st, 1898, shall be paid to the holders of such bonds semi-annually at the rate of 5 per cent. per annum. In view of this notice Messrs. Speyer and Co., of New York, inform holders of their certificates, issued on deposit of above bonds, that they are prepared on and after December 1st, 1898, until further notice, to purchase at par and interest at the rate of 5 per cent. per annum from that date, upon presentation thereof at their office, such of said certificates as the holders may desire to sell. It is expected that a plan for the readjustment of the company's affairs, providing for the exchange of new securities against Messrs. Speyer and Co.'s certificates of deposit, will before long be announced. Meanwhile they will adopt such course as may seem desirable for the protection of the interest of the bondholders. Referring to Messrs. Speyer and Co.'s notice, Messrs. Speyer Brothers, of London, announce that they are prepared to purchase, until further notice, any of the above-mentioned certificates at par and interest at the rate of 5 per cent. per annum (New York terms) at the current rate of exchange.

### GRAND TRUNK OF CANADA.

The Grand Trunk Railway Company of Canada has issued the following statement of revenue receipts and expenditure for the month of October:—

Grand Trunk Railway Company of Canada.				Chicago and Grand Trunk Railway Company.			
Month of October.	Inc.	July 1 to Oct. 31.	Inc.	Month of October.	Inc.	July 1 to Oct. 31.	Inc.
1898.	1897.	or dec.	1898.	1897.	or dec.	1898.	1897.
Gross receipts	\$382,258	\$404,290	-\$22,032	\$1,407,861	\$1,501,374	-\$93,513	\$238,513
Working expenses	237,759	245,363	- 7,604	892,316	942,883	- 50,567	50,567
<b>Net earnings</b>	<b>\$144,499</b>	<b>\$158,927</b>	<b>-\$14,428</b>	<b>\$515,545</b>	<b>\$558,491</b>	<b>-\$42,946</b>	
Detroit Grand Haven and Milwaukee Railway Company.				Grand Trunk and Chicago Railway Company.

<b>Net earnings</b>	<b>\$5,508</b>	<b>\$7,050</b>	<b>-\$1,542</b>	<b>\$22,759</b>	<b>\$25,825</b>	<b>-\$3,066</b>	

### LATEST EARNINGS.

Third week of November.—Cleveland Cincinnati Chicago and St. Louis, \$285,000—increase, \$6,000; Denver and Rio Grande, \$203,000—increase, \$17,000; Norfolk and Western, \$160,000—increase, \$21,000; St. Louis and San Francisco, \$160,000—increase, \$3,000; Southern Railway, \$555,000—increase, \$63,000; Louisville and Nashville, \$486,000—increase, \$60,000; Baltimore and Ohio South Western, \$140,000—increase, \$15,000; Chicago and Great Western, \$116,000—increase, \$3,000; Chesapeake and Ohio, \$234,000—decrease, \$8,000; Northern Pacific, \$688,000—increase, \$93,000; St. Louis South Western, \$154,000—increase, \$22,000; Wabash, \$288,000—increase, \$31,000; Denver and Rio Grande, \$203,000—increase, \$7,000; Kansas City Pittsburg and Gulf, \$75,000—decrease, \$2,000; Mexican Central, \$277,000—increase, \$13,000; Missouri Kansas and Texas, \$297,000—decrease, \$52,000; Missouri Pacific, \$564,000—decrease, \$14,000; New York Ontario and Western, \$83,000—decrease, \$1,000; Northern Pacific, \$625,000—increase, \$35,000; Oregon Railroad and Navigation, \$188,000—increase, \$19,000; Louisville and Nashville, gross, \$2,103,000—increase, \$234,000; net, \$811,000—increase, \$193,000. New York Ontario and Western, gross, \$368,000—decrease, \$2,000; net, \$110,000—decrease, \$9,000. The gross earnings of eighty roads in the second week of November show an increase of 2.36 per cent.

Month of October.—Chicago Milwaukee and St. Paul, gross, \$4,078,000—increase, \$500,000; net, \$1,920,000—increase, \$307,000. Chesapeake and Ohio, gross, \$1,085,000—increase, \$85,000; net, \$364,000—increase, \$41,000. Northern Central, gross, \$670,000—increase, \$24,000; net, \$243,000—increase, \$24,000. St. Louis and San Francisco, gross, \$711,000—increase, \$27,000; net, \$337,000—increase, \$9,000. Wabash, gross, \$1,313,000—

increase, \$8,000; net, \$394,000—decrease, \$95,000. Atchison Topeka and Sante Fé, gross, \$3,995,000—increase, \$300,000; net, \$1,516,000—increase, \$227,000. Central of New Jersey, gross, \$1,245,000—increase, \$14,000; net, \$546,000—increase, \$32,000. Northern Pacific, gross, \$3,049,000—increase, \$265,000; net, \$1,845,000—increase, \$177,000. Mexican National, gross, \$575,000—increase, \$50,000; net, \$171,000—increase, \$69,000. Chicago Burlington and Quincy, gross, \$4,634,000—increase, \$277,000; net, \$2,239,000—increase, \$199,000; surplus, \$1,360,000—increase, \$199,000. Oregon Railroad and Navigation, gross, \$567,000—increase, \$42,000. Union Pacific, gross, \$2,069,000—increase, \$267,000; net, \$1,045,000—increase, \$308,000. Erie, gross, \$3,116,000—decrease, \$153,000; net, \$998,000—decrease, \$43,000. Lehigh Valley Railroad, gross, \$2,333,000—decrease, \$10,000; net, \$951,000—increase, \$72,000. Lehigh Valley Coal Company, gross, \$2,235,000—decrease, \$302,000; deficit after charges, \$47,000—increase, \$219,000. Pennsylvania Railroad, lines east of Pittsburgh and Erie, gross increase, \$5,000; net increase, \$68,700; lines west of Pittsburgh and Erie, gross increase, \$4,300; net increase, \$121,400; net increase of the whole system, \$190,100.

### RAILROAD NOTES.

It is now rumoured that the control of the Chicago and Alton will be acquired by a syndicate acting on behalf of the Lake Erie and Western, whose system it joins at Bloomington, Illinois. The Chicago and Alton will be a valuable acquisition to the Lake Erie, as it will give the latter through connections long wanted, and also be of benefit to the recently secured Pittsburg and Western, and to the Buffalo Rochester and Pittsburg and the Toledo St. Louis and Kansas City, with which the Lake Erie has trackage agreements. The purchase price for the Chicago and Alton stock, it is said, will be about 165.

The officials of the east-bound roads met to-day at Chicago, and formed an agreement to restore freight rates on December 12th. The meeting was the culmination of the demoralisation in the eastern freight rates, which are in a worse condition than they have been in for years. The session was very stormy, and while an agreement was finally reached, little faith is entertained in its stability. President Stickney, of the Chicago Great Western, asserts that Western tariffs are in very bad shape, especially grain rates.

The date for the resumption of the conference between the Northern Pacific and the Oregon Railroad and Navigation is still fixed for Monday, but latest rumours put the prospect of a settlement on the points in dispute as more distant than was at first hoped. Northern Pacific officials regard the reopening of negotiations as a practical victory for their company.

The report of the Baltimore and Ohio South Western Railway for the year ended June 30th shows:—Gross earnings, \$6,904,000—increase, \$764,000; net earnings, \$1,990,000—increase, \$107,000; deficit after fixed charges, \$100,000—decrease, \$170,000. This deficit is explained by the strike in the Ohio coalfields in March and April.

The Union Pacific Railroad Company has decided to issue \$27,460,000 new stock to give in exchange for the outstanding minority holdings of the Oregon Short Line. The John Hopkins University suit against the company will be dismissed on account of the recent agreement to accept the reorganisation proposition.

The following dividends have been announced:—Cleveland Cincinnati Chicago and St. Louis—1½ per cent. quarterly on the preferred stock, payable January 20th; books to close December 31st. Delaware and Hudson Canal—1½ per cent. quarterly, payable December 15th; books to close November 30th.

With reference to the New York Central and Hudson River Railroad Company's new bonds, 1897, Messrs. J. S. Morgan and Co., of 22, Old Broad-street, E.C., and Messrs. J. P. Morgan and Co., of New York, announce that their offer to exchange various bonds for the above-named issue is now closed.

Senator Foraker says he does not believe that there will be any important legislation on the Pooling Bill at the coming short session of Congress. If nothing is done on the Bill in the short session he will, in the event of an extra session, endeavour to procure its early passage.

The directors of the Chicago and North Western Railway have declared the regular dividends of 1½ per cent. quarterly on the preferred stock and 2½ per cent. half-yearly on the common stock, payable January 6th.

President Spencer, of the Southern Railway, officially denies the report that his company has purchased securities of the Louisville Evansville and St. Louis Railroad.

Last week's East-bound all-rail freight tonnage from Chicago amounted to 106,000 tons, against 45,000 tons in the corresponding week last year.

Mr. E. H. Harriman has been elected chairman of the executive committee of the Oregon Short Line Railroad.

Mr. James J. Hill has, it is said, sold out his holding of Northern Pacific.

## General News.

### NITRATE NOTES.

The Nitrate Railway traffic, issued yesterday, was a bumper, and fully up to expectations. The shares smartly responded, and closed 6¼, 5¼, and 1½ for the ordinary, preferred, and deferred respectively. By the way, the estimate of current year's results, given in our last issue, has excited a good deal of comment, and the probability of a gross take of 492,000l. has been questioned. On the statistical position of nitrate itself the figure should be accurate if the Nitrate Railways Company be getting a fair share of the traffic. But that seems doubtful just now, and possibly the gross take may be only about 475,000l. At 50 per cent. expenses this would leave 95,500l. net, after debenture and other prior charges. To pay 6 per cent., or 12s. per share, for the year, requires about 99,360l. But we must not forget the 136,000l. brought forward from last year's accounts.

The following letter speaks for itself:—"The shareholders of the Paccha and Jazpampa Nitrate Company, Limited, have shown their wisdom by neglecting to contribute to the reconstruction proposed by the board. According to a circular dated 23rd Nov., the liquidator of the old company intimates that a sufficient number of shares in the new company to afford the necessary capital has not yet been taken up, and he appeals to shareholders to send in offers to purchase the unapplied-for shares without delay. More than three-quarters of the new capital to be provided by the reconstruction is destined to pay off outstanding liabilities, so that the reconstructed company would remain with a cash balance of something under 5,000l., together with a considerable area of worked-out grounds and a complete but, under the circumstances, worthless plant. Even assuming that new grounds, as hinted by the directors, were available in the vicinity—an assumption not readily digested by those acquainted with the locality—it still remains to be shown that the Chilean Government is willing to sell such grounds within a reasonable period of time; and should even this point be satisfactorily disposed of, what extent of new grounds can the board reasonably expect to acquire with the paltry sum of about 4,000l., out of which provision has also to be made for working capital? The whole scheme is a preposterous one, and predestined to failure. The only parties who could possibly benefit by the subscription of the new capital would be, firstly, the creditors of the old company, who would thereby save themselves from an otherwise inevitable loss; and, secondly, the directors, who would have in prospect funds to provide them with fees for two or three years."

In reference to the dividend prospects of the Nitrate Railways Company, the *Financial Times* of Wednesday has the following:—"Nitrate Rails have been much more active lately, and the prices are higher than for some months past, though, of course, a good deal below the figures reached in the more palmy days. For this advance there appears to be a good deal of justification. Last year, it will be remembered that though 4 per cent. was earned, only 3 per cent., or 6s. per share, was paid, on account of the curious position whereby a large amount of revenue had been locked up in capital outlays. The accumulated balance available for distribution at the end of last year, after paying that dividend, was 136,000l., equal to 8 per cent. on the ordinary shares, or 16s. per share. It is possible that this year the company will earn about 5 per cent., as good traffics are to be looked for till the close of the year. If this prove to be the case there should thus be available in all about 13 per cent., or 26s. per share, for distribution on the ordinary shares, including arrears from former years. A scheme may be put forward soon to place the capital account on a proper footing, and thus permit of the distribution of this surplus standing on revenue account. There is thus a substantial 'plum' in store for the ordinary shares, and though they stand at 6, they include practically 1½ representing surpluses over former dividends, and in effect stand accordingly at over 50 per cent. discount."

A Reuter's telegram, dated Valparaiso, November 29th, says:—"A fire broke out to-day at the Lagunas Nitrate Works, near Iquique. Damage was done to the extent of over \$100,000." Up to the time of going to press we can get no confirmation of this report, and even if it be accurate—which seems doubtful—it is still not clear whether the fire has taken place on the property of the Lagunas Company or the Lagunas Syndicate. In either case, it is said, the loss would be fully covered by insurance, but we should doubt the readiness of any sound fire office to take such a risk as is here involved.

We shall be glad if any of our readers can furnish us with a copy of the directors' report and accounts of the Arauco Company, Limited, for the year 1887. At the company's office applicants are told that no such document was ever issued, but we have reason to think otherwise.

The directors of the Anglo-Chilian Nitrate and Railway Company, Limited, have resolved to make an interim payment of 7s. per share, or 3½ per cent., on account of dividend on the 7 per cent. preference shares. Warrants will be posted on December 19th to all preference shareholders on the register on December 8th.

Our excellent contemporary the *Investors' Review* will persist in taking hold of the wrong end of the nitrate stick. It actually discourses on the dividend prospects of the *Colorado Nitrate Company, Limited*!

The numbers are published of the first mortgage bonds of the Nitrate Railways Company, Limited, which have been drawn for redemption at the rate of 105 per cent., on January 2nd next, when the interest thereon will cease.

An article on the Nitrate situation will be found in our leader columns.

## RAILWAYS IN AUSTRALASIA.

### VICTORIA.

In the Victoria Legislative Assembly it was recently decided to refer the question of a railway from Melbourne to Collingwood to the standing committee for report. A motion was carried in favour of constructing a railway from Jeparit to Albacutya. In committee a long discussion took place on the attempt to fix a possible minimum wage of 6s., with the butt gang system. This was negatived. An attempt to fix a minimum price for sleepers was also negatived.

### SOUTH AUSTRALIA.

In the South Australia Legislative Assembly Mr. Solomon proposed a motion in favour of the construction of the Transcontinental Railway, on the land-grant system. He stated that Mr. Price Williams had estimated the cost, including alterations to the present gauge so as to leave 5ft. 3in. from Adelaide to Port Darwin, at eleven millions sterling.

### QUEENSLAND.

A Brisbane telegram states that the Rockhampton Mount Morgan Railway was opened on the 25th ult. The Minister of Railways, in a speech, hoped that the Central Railway would shortly be connected with Brisbane.

Mr. Robert L. Jack, Government Geologist of Queensland, who visited the mining district of Chillagoe and the region lying between it and the Etheridge goldfield for the purpose of reporting on the prospects of the railway, and, conversely, on the influence of the railway on the mines, has now presented his conclusions to the Minister. The extensive and rich Etheridge goldfield has hitherto been worked under exceptional difficulties, chief among which has always been the want of railway communication. The nature of the auriferous ore itself offers a difficulty scarcely less formidable. But the complex sulphide ores could not only be treated with ease if mixed with the metallic ores of Chillagoe, but would actually, owing to their gold contents, be a valuable acquisition to the works. "The freight charges to the works," says Mr. Jack, "would be very much less than the cost of local treatment—that is, of a treatment equal to the full extraction of the gold. At present local treatment is not only costly, but is chargeable with the loss of a large per-centage of gold." To all the mines of the Etheridge field the railway would prove an exceedingly useful auxiliary. As regards the construction, most of those who have travelled over this bush track in a coach carry with them for the rest of their lives unpleasant recollections of jolting and bumping, and in these circumstances it would not be an unnatural thing for the stranger to conclude that the country was hardly suitable for a railway. As a matter of fact, however, there are no engineering difficulties of any consequence, the region being entirely free from steep acclivities or descents. The country is an elevated plateau, the trouble of reaching which has already been overcome by the Government railway

already built. The obstacles to construction are so very slight that Mr. A. S. Frew, the engineer in charge of the surveys, has estimated the cost of laying down the line at only 3,072l. per mile. Mr. Jack's report is, on the whole, of a favourable character.

### NEW SOUTH WALES.

The Railway Commissioners of New South Wales having just completed their first ten years of office, the present seems a fitting opportunity to review the progress made by the Department in the intervening period:—

PARTICULARS.	1888.	1898.
Total spent in construction and equipment .....	£27,722,748	£37,719,402
Total debentures paid off .....	1,017,875	1,902,975
Total cost per mile open for traffic (including workshops, rolling stock, &c.) .....	13,114	14,015
Total mileage open for traffic .....	2,114	2,691½
Average miles open for year .....	2,044	2,659
Gross revenue .....	£2,295,124	£3,026,748
Working expenses .....	1,530,551	1,614,605
Net profit on working (after paying working expenses) .....	764,573	1,412,143
Per-centage of working expenses to revenue .....	66.69	53.34
Earnings per average mile open .....	£1,123	£1,138
Working expenses per average mile open .....	749	607
Net return per average mile open .....	374	531
Gross earnings per train mile .....	6 10½	7 3
Working expenses per train mile .....	4 7	3 10½
Net profit per train mile (after paying working expenses) .....	2 3½	3 4½
Per-centage of profit to capital invested .....	2 17 0	3 15 0
Number of passenger journeys .....	15,174,115	23,233,206
Goods tonnage .....	3,331,671	4,463,728
Live stock tonnage .....	68,101	166,836
Train mileage .....	6,689,313	8,340,338

### INTERCOLONIAL RAILWAY CONFERENCE.

The intercolonial railway conference—consisting of the Railway Commissioners of New South Wales, Messrs. Oliver, Fehon, and Kirkcaldy; Victoria, Mr. Mathieson; Queensland, Mr. Gray; and South Australia, Mr. Pendleton—met at the office of the New South Wales Railway Commissioners on Saturday, September 17th, and brought their deliberations to a close. The chair was taken by Mr. Oliver. During the three days the conference sat the Commissioners have dealt with a large number of subjects, several of them being of considerable importance both from a public as well as a purely railway point of view, with the result that an agreement was arrived at by which uniformity of railway practice and administration will be secured in several instances. It was decided that annual conferences should be held, the meetings to take place alternately in the capital of each colony, the next conference to be held in Brisbane. It was also arranged that each conference will be preceded by a meeting of the heads of the Railway Departments, who will discuss matters in advance of the railway conference, and thus enable the latter body to consider the questions for final decision. Several matters relating to passenger traffic across the borders and the handling of their luggage were considered with a view of facilitating the interchange of passengers from one system to another where a break of gauge exists, especially when there is a heavy rush of traffic, as, for instance, prior to and after the Melbourne Cup carnival. Another question dealt with related to the periodical excursions now run in conjunction with Messrs. Cook and Sons, tourist agents, who are paid a commission for organising the business. It was decided that next year this business should be controlled entirely by the Railway Commissioners. Matters were discussed in regard to passenger business, and an agreement was arrived at in regard to the currency of intercolonial tickets and fares. One matter that caused considerable discussion related to the loss sustained by the railway departments through the improper operation of "scalpers"—namely, individuals who buy the return halves of tickets from people who find they do not require the use of them, and then sell them at a reduced price to other people. A good deal has been done to limit the operations of "scalpers," particularly in New South Wales. It was decided by the conference that their operations should be further restricted by adopting an altered form of ticket, and also by arranging to allow a refund to a person who does not require to use a return half of a ticket. The Queensland Railway Commissioner (Mr. Gray) strongly urged the adoption of a popular through fare from the Southern colonies to North Queensland, *via* Gladstone. In support of the suggestion he urged the fact that a large amount of development had taken place in North Queensland, and that the commercial relations of his colony with the other colonies had greatly increased. It was decided that Mr. Gray should submit a proposal as to the basis for the proposed alteration. Mr. Gray also strongly pressed for an accelerated mail service between Sydney and Queensland. There appeared, however, to be a number of objections to the proposal, particularly on

account of the dislocation of the local railway business of New South Wales, but it was arranged to give further consideration to the matter. The question of luggage allowances and privileges to persons attending conferences, to judges attending agricultural shows, concessions on press tickets, and a number of cognate matters were considered, and a uniform practice decided upon. A number of technical railway matters, such as the use of side chains for safety and screw couplings, led to a satisfactory understanding being arrived at. At the meeting three important matters received full consideration. The first related to the arrangements that would have to be made, if the necessity arose, for transporting large bodies of troops between the colonies. It was recognised that some inconvenience would be entailed in the transport of troops and their impediments between Melbourne and Sydney and *vice versa*, owing to the break of gauge at Albury. The decision of the commissioners is withheld from publication. The question of a uniform railway gauge also came under review, and it was decided that the matter must wait until the various Governments have decided what gauge is to be adopted. When the question is settled the various railway administrations would be in a position to build rolling stock in anticipation of the change. The consideration of this matter naturally brought under notice the various mechanical appliances and inventions to enable the rolling stock of a broad gauge to travel over the standard gauge and *vice versa*. The opinion of the conference was emphatically against the appliances that had been tried and discarded. The question of border or competitive railway rates provoked the most discussion. The Commissioners evinced a desire to arrive at some scheme that would be mutually satisfactory. They recognised that it was essentially a matter of compromise; but each, at the same time, sought to protect the interests of his own colony. It was resolved that before finally deciding upon a uniform scheme the full effect of any change should be worked out, and to this end arrangements were made for the traffic managers of the various colonies to meet and prepare a uniform classification of goods, or some such rearrangement of the various rates, so as to put matters on a reasonable competitive basis. It was also arranged that where possible the rates should be based upon a mileage scale, due regard being paid to competition other than by railway. A special point minuted by the conference to be impressed upon the officers empowered to draw up the scheme was that they were to discard all past correspondence on the border rates question, and to approach the subject in a broad federal spirit. The business of the conference was concluded on Saturday morning, September 17th, when the minutes were finally confirmed. As directed by the Commissioners, a conference of the traffic managers was held in Melbourne, commencing on Tuesday, the 11th inst., when there were present the chief traffic managers of the railway systems of New South Wales, Victoria, Queensland, and South Australia. It is understood a long discussion took place on the border rates question, concerning which the managers are to report to their respective commissioners.

#### BILLS AND PROVISIONAL ORDERS FOR 1899.

##### PLANS DEPOSITED.

The time expired on Wednesday for depositing at the Private Bill-office and elsewhere plans and other documents in connection with private Bills to be proceeded with during the ensuing session.

It is announced that the plans deposited number 363, made up as follows:—Railways 58, tramways 14, miscellaneous 102, general provisional orders 75, and electric lighting provisional orders 114. The deposits on the corresponding day of last year for last session were:—Railways 61, tramways 15, miscellaneous 86, general provisional orders 85, electric lighting provisional orders 85; total, 332. Subjoined is a list of Wednesday's deposits; the Bills themselves, including those which have no plans attached to them, and are thus not comprised in the list, will be deposited later on:—

**RAILWAYS.**—Aberdeen Joint Passenger Station, Bexhill and Rotherfield Railway, Brompton and Piccadilly-circus Railway (Extension), Belfast and Northern Counties, Brynmaur and Western Valleys, Birmingham, North Warwickshire and Stratford-upon-Avon, Baker-street and Waterloo Railway, Barry, Cardiff Railway, Charing-cross Euston and Hampstead, Central London, City and Brixton, Caledonian Railway, &c., Caledonian Railway (Grangemouth connecting lines), Douglas and Sanquhar, East and West Wales, Furness, Fishguard and Rosslare Railways and Harbours, Great Northern, Glasgow and South Western, Glasgow Motherwell and Sanquhar, Great Western, Great Southern and Western, Great Central, Great Northern and Strand, Great Eastern, Great Western and Great Central railway companies, Harrow and Uxbridge, Hull Barnsley and West Riding Junction Railway and Dock Company (Various Powers), Kingscourt

Keady and Armagh, Liverpool Overhead, Lancashire and Yorkshire (New Railways), Lancashire and Yorkshire (Various Powers), Lincoln and East Coast Railway and Dock, Llanelly Harbour and Pontardulais Railway, London and South Western, Loughborough and Sheepshed, Londonderry and Lough Swilly, London Chatham and Dover, London and North Western Railway (New Railways), Leicester Groby and Bradgate-park Railway, London and North Western (Additional Powers), London Brighton and South Coast Railway (Harbour Powers), Midland and South Western Junction (Northern Section), Midland and South Western Junction, Midland Railway, North Staffordshire, North West London, North Eastern, North Eastern and Hull and Barnsley Railways (Joint Dock), Paisley and Barrhead District, Port Talbot Railway and Docks, South Eastern and London Chatham and Dover railway companies (new lines, &c.), South Eastern, Taff Vale, Tenterden, Uxbridge and Rickmansworth, West Metropolitan.

**TRAMWAY BILLS.**—Bexhill and St. Leonards, Bradford Trams and Improvements, Dundee Gas Trams and Extension, Gateshead and District Tramways, Great Grimsby Street Trams, Glasgow Corporation, Hastings Corporation, Kirkcaldy Corporation, London United, Newcastle-upon-Tyne Trams and Improvements, Southport and Lytham, Sunderland Corporation, South Staffordshire, Wallasey Trams and Improvements.

**MISCELLANEOUS BILLS.**—Aire and Calder Navigation, Clyde Navigation, Inverness Harbour, Leith Harbour and Docks, Maryport Harbour, Wick and Pulteney Harbours.

**MISCELLANEOUS PROVISIONAL ORDERS.**—Aberdeen Corporation Tramways, Audenshaw District Tramways, Barking-town Urban District Tramways, Blackpool Corporation Tramways, Clayton Tramways, Devonport Corporation Tramways, Fleetwood Pier, Felixstowe Pier, Gravesend Rosherville and Northfleet Tramways, Innellan Pier, Ipswich Tramways, Ilford Urban District Tramways, Ilkeston Corporation Tramways, Lynmouth Pier, Matlock Urban District Tramways, Otter Ferry Pier, Queensbury Tramways, Reading Corporation Tramways, Southport Corporation Tramways, Southwold Pier, Southport and Birkdale Tramways, Wrexham District Tramways, Weston-super-Mare Tramways.

#### BUENOS AYRES WESTERN RAILWAY.

The important case which has been going on for some time between the Buenos Ayres Western Railway and the province of Buenos Ayres has at last come to an end in a verdict unfavourable to the company. It will be remembered that the company brought an action against the Government for damages to the extent of \$1,400,321 gold, or about 280,000*l.* sterling, the suit arising out of the order made by the National Government (at the request of the municipality) for the removal of the company's rails between Once de Setiembre station and the Catalinas and Riachuelo. The company alleged that when it bought the railway from the Government it acquired the right to it in perpetuity, and that the removal of the rails on the section mentioned has impaired its revenue. Furthermore, that as the company had paid for its section of the line with the main trunk line, it considered that it had a right to compensation for that section being taken away from it, and therefore demanded the sum mentioned, plus the damages caused by the stoppage of traffic through the zone in question. The court has, however, decided that it was incumbent upon the company to prove that the National Government in removing the rails and evicting the company from its property was exercising a right possessed by the province at the time of the transfer of the rights of the latter to the nation or was enforcing a pre-existing prohibition which it was the duty of the National Government to declare or cause to be respected. That is to say, if the nation in depriving the company of its branch lines was acting by virtue of powers which the province formerly claimed to have, the company might have sued the province, but as this was not demonstrated by the company, and as, in fact, it alleged that the province had no such claim, the right of action (if any) of the company was against the National Government, for its unlawful act.

#### FOREIGN AND COLONIAL ITEMS.

The directors of the Egyptian Delta Light Railways (Limited) have determined to issue warrants to bearer to all holders of fully paid shares who may so desire.

Captain Twiss, R.E., and Captain Purvis, R.E., sail per s.s. *Himalaya* from Marseilles on the 8th inst. for Hong Kong, en route to Peking, for survey under the Peking Syndicate, Limited.

Messrs. Baring Brothers and Co., Limited, notify that holders of two-thirds of the consolidated scrip of the Western of Santa Fé Railway have already assented to the scheme for the formation of an English company.

An extraordinary general meeting of the shareholders of the Zafra and Huelva Railway Company will be held in Madrid on February 6th, for the purpose of giving an account of the position of the company, and of taking such steps as this position may call for.

The directors of the Donna Thereza Christina Railway Company, Limited, have decided to recommend a dividend on the preferred shares of 6s. per share, free of income-tax, being at the rate of  $1\frac{1}{4}$  per cent. per annum for the year ended June 30th last, carrying forward 15,126l.

The *Brazilian Review* says that the position of the Sorocabana Railway is altogether unsatisfactory, but is glad to hear that it is "likely to be very quickly and radically altered, to the great advantage of Brazilian credit and good name, as well as to that of bondholders both here and at home."

The following information by cable has been received at the London office of the Natal-Zululand Railway, Limited, from the chief engineer:—The whole of the railway—namely, from Verulam to the Tugela river is now completed, and will be opened for traffic on December 1st next. Traffics are improving.

Arrangements have been made by the liquidators of the Buenos Ayres and Ensenada Port Railway Company, Limited, for the exchange of the securities of that company for the equivalent in the securities of the Buenos Ayres Great Southern Railway Company, Limited, and the exchange will be effected by the latter company on or after Monday, the 5th inst.

A violent scene occurred in the Transvaal Volksraad on Wednesday, during the discussion of the route proposed to be adopted for the Rustenburg Railway. The State Secretary made certain statements, which were flatly denied by the President, and the latter ended the dispute by declaring he would resign unless his proposal was agreed to. The members then adopted the President's views, and as a result the new line will be extended from Pretoria.

Apropos of the rig in Ashanti "Goldfields" shares, which is just now a feature on the Stock Exchange, and the promised railway which is to connect the company's property with the coast, the following is taken from the annual report of the acting Colonial Secretary upon the Blue-book of the Gold Coast for 1897:—"Two railway surveys which were commenced in 1896 were completed in 1897, one from Accra to Kumasi *via* Insuaim, and the other from Takoradi Bay to Tarquah. Arrangements have been made for the construction of a line from Sekondi to Tarquah. This line will go through the mining and timber districts, and work was commenced early in 1898."

The offices of the Buenos Ayres Ensenada and South Coast Railway Company, Limited, are temporarily removed to No. 6, Finsbury-circus, E.C., pending the completion of the new offices in River Plate-buildings.

**The Leopoldina Railway.**—Mr. Barrow, late general manager of the Buenos Ayres Great Southern Railway, has been appointed managing director of the Leopoldina Railway Company in Brazil. Mr. Barrow is a practical railway man, who has spent his life in the service of a great line. He has gone through, and is personally acquainted with, every detail of management, from the telegraph, in which he commenced his career, to general management. He has also the great advantage of long residence in South America and thorough acquaintance with the character of the people with whom he has to deal. If any one can lick the Leopoldina into shape, we should think he would, but his task will be no mean one, whatever his abilities.—*Brazilian Review*.

**The Nicaragua Canal.**—President Iglesias, of Costa Rica, and one of his Ministers on Saturday had a two-hours' interview with President McKinley at Washington, and afterwards they had a long conference with Colonel Hay, Secretary of State. President Iglesias fully represented to Colonel Hay the attitude of Costa Rica in the matter of the Nicaragua Canal and the nature of Costa Rica's interests in the scheme. Mr. W. R. Grace, chairman of the New Nicaragua Canal Syndicate, in a recent interview, said:—"A clear, workable concession has been granted by the Nicaraguan Government, ratified by the unanimous vote of the Congress, giving our syndicate the exclusive right to build the Nicaragua Canal. The Government of Nicaragua and its legal advisers considered the concession of the Maritime Company forfeited, but in deference to the rumoured wishes of the Government of the United States it was decided that the Eyre-Cragin concession should take effect from October 10th, 1899, when the Maritime concession lapses by limitation. Until that time no action is required of us beyond that of completing the organisation of the company that will carry out this enterprise."

### METROPOLITAN RAILWAY CARRIAGE AND WAGON COMPANY, Limited.

SALTLEY WORKS, BIRMINGHAM.

Successors to Messrs. Joseph Wright and Sons.

MANUFACTURERS OF RAILWAY CARRIAGES, TRAMWAY CARS, WAGONS, and RAILWAY IRONWORK of every description. Railway Carriages and Wagons built for cash, or upon deferred payments extending over a period of from three to ten years. A large number of Coal, Ironstone, Ballast, and other wagons to be let on hire.

Manufactory and Chief Offices—Saltley Works, Birmingham.

### WEST AUSTRALIAN HARDWOODS.

**LONDON, TILBURY, and SOUTHEAST RAILWAY.**

Notice is hereby given, that an EXTRAORDINARY GENERAL MEETING of this Company will be held in the Boardroom at Fenchurch-street Terminus, in the City of London, on THURSDAY, the 15th day of December, 1898, at 12 o'clock Noon, for the following purposes, viz.:-

1. To sanction the creation and issue of the Capital authorised by the London, Tilbury, and Southend Railway Act, 1898, the exercise of the Borrowing Powers and the creation and issue of Debenture Stock.
2. To authorise the Company to subscribe towards the Undertaking of the Whitechapel and Bow Railway Company, and to guarantee the payment of Interest upon the Debentures or Debenture Stock of that Company.
3. To sanction and approve an Agreement, dated the 12th day of September, 1898, made between the Whitechapel and Bow Railway Company, the Metropolitan District Railway Company, and the London, Tilbury, and Southend Railway Company, relating to the Capital, Construction, Working, Maintenance, Management, and User of the Whitechapel and Bow Railway, and for the division of receipts from traffic thereon.

H. DOUGHTY BROWNE, Chairman.  
H. CECIL NEWTON, Secretary.

Fenchurch-street Terminus, E.C.,  
26th November, 1898.

**GREAT CENTRAL RAILWAY.**

SAILINGS TO AND FROM THE CONTINENT VIA GRIMSBY.

Weather and other circumstances permitting, the Company's vessels sail DAILY TO and FROM HAMBURG (Sundays excepted).

To ROTTERDAM EVERY WEDNESDAY and SATURDAY.

Returning every Tuesday and Saturday.

To ANTWERP EVERY MONDAY, WEDNESDAY, and SATURDAY.

Returning every Tuesday, Thursday, and Saturday.

Trains run in connection with the above steamers at convenient times from all important centres in Lancashire and Yorkshire and the Midland Counties.

Every information as to goods rates, &c., will be given on application to the Shipping Agents, Messrs. John Sutcliffe and Son, Grimsby; or to Mr. C. T. Smith, Goods Manager, Great Central Railway, Manchester. Particulars as to fares, &c., can be obtained from Mr. R. Haig Brown, Superintendent of the Line, Manchester.

WILLIAM POLLITT, General Manager.  
London-road Station, Manchester.

**GREAT WESTERN RAILWAY.**

The Directors of this Company are prepared to receive TENDERS for the PURCHASE of the following MATERIALS, viz.:-

1. Gas Tar and Ammoniacal Liquor.
2. Hydrocarbon from Oil Gas Works.
3. Furnace Slag, Fetting and Mill Scale.
4. Tarpaulin Cuttings and Sheet Ties.

The Materials in each case to be delivered as produced at the Company's Works during the year 1899. Specifications and Forms of Tender (upon which alone Tenders can be received) may be obtained of the Secretary at this Station, or of the Stores Superintendent at Swindon Station.

Tenders, addressed to the undersigned, and marked outside "Tender for Gas Tar," &c., as the case may be, will be received on or before Tuesday, the 13th instant. The Directors do not bind themselves to accept the highest or any Tender.

G. K. MILLS, Secretary.  
Paddington Station, London, 1st December, 1898.

**DROP US A LINE**

COVENTRY

**WANTED, a CITY MANAGER,** for London. Must be thoroughly experienced in railway duties.

State age and salary required to "Rails," c/o. Cowie and Co., 17, Gresham-st., London, E.C.

**CALEDONIAN RAILWAY COMPANY.**

EDINBURGH STATION HOTEL—CONTRACT FOR JOINER, PLUMBER, PLASTER, SLATER, AND GLAZIER WORKS.

The Directors of the Caledonian Railway Company invite TENDERS for the Joiner, Plumber, Plaster, Slater, and Glazier WORKS of the new Hotel to be erected at Prince's-street Station, Edinburgh.

The Drawings and Conditions of Contract may be seen at the Office of Messrs. Peddie and Washington Browne, Architects, 8, Albany-place, Edinburgh, on and after Wednesday, 30th November.

Copies of the Specifications, Schedules of Quantities, and Forms of Tender may be obtained from the Architects on payment of a deposit of £2 2s. per copy for the Joiner and Plumber Works, and £1 1s. per copy for the Plaster, Slater, and Glazier Works respectively.

Sealed Tenders, addressed to the undersigned, and marked "Tender for Edinburgh Station Hotel," must be lodged with him on or before Saturday, the 17th December, 1898.

The Directors do not bind themselves to accept the lowest or any of the Tenders.

J. BLACKBURN, Secretary.  
Caledonian Railway Company's Offices, Glasgow,  
29th November, 1898.

**BURMA RAILWAYS, COMPANY, Limited.**

The Board of Directors of the Burma Railways Company, Limited, is prepared to receive TENDERS for:-

- (a) BRIDGEWORK.
- (b) PAINTS.
- (c) WROUGHT IRON.
- (d) METALS.

Specifications and Forms of Tender can be obtained at the Company's Offices, 76, Gresham House, Old Broad-street, E.C.

For each Specification a fee of 10s. will be charged, which will not be returned.

Tenders to be delivered not later than Noon on Monday, 19th December, 1898.

The Directors do not bind themselves to accept the lowest or any Tender.

By order of the Board,  
A. G. BEGBIE, Managing Director.  
1st December, 1898.

**"DUDBRIDGE" GAS ENGINES.**

In all Sizes from 1/4 to 65 H.P.

HUMPIDGE, HOLBOROW & CO.  
STROUD, GLOS.

London Office: 139, Cannon Street, E.C.

**BLAENAVON COLD BLAST PIG IRON**

(MADE WITH THE CELEBRATED BLAENAVON CHARCOAL COAL).

**No. 1 Foundry.**—A Dark, Grey, Soft Iron, used for Castings, where toughness and strength are required, such as Toothed Wheels for Agricultural, Cotton and other Machinery; also by various Governments, for Guns and other superior work.

**No. 2 Foundry.**—A more Open Quality, used for similar purposes, and largely by nail makers.

**No. 3 Foundry.**—An Open Grain, Harder Iron; used for both Foundry and Forge; it has a high transverse strength in Castings, but not so tough as the No. 1 and No. 2; gives a strong fibre in wrought iron.

**No. 4 Gray Forge.**—An Open, Soft Iron; possesses great strength; suitable for toughening and tempering harder qualities; it is a very superior Forge Iron.

**No. 5 Common Forge.**—A Harder, Finer Grain, very Strong Iron; suitable for Heavy Machinery, such as Shafts, Large Wheels, and also for Steam and Blowing Cylinders, Guides, Slides, &c., as well as for Forge purposes in Cable Bolts, Boiler Plate, and B.B. Merchant Bars.

**No. 6 Strong Forge.**—A still harder and Closer quality used for Mill Rolls and for bringing up the strength of weaker Forge Irons.

**MOTTLED.**—Used for Chilled Rolls in tempering; and for other similar purposes. These qualities have a high tensile strength in wrought iron, and are used for bringing up weaker iron to stand the Government tests.

Extract from Report made by the Officers of H.M. Government to the Royal Arsenal on the strength of various descriptions of Iron, showing the general average of a number of Specimens prepared and tested from fifty-seven samples and also from five samples of Blaenavon Iron.—Parliamentary Paper No. 4671, Session 1888.

	Specific Gravity.	Tensile Strength.	Transverse Strength.	Crushing.
Average of 57 sample including Blaenavon	850 Specimens 7.140	850 Specimens 23,257	546 Specimens 7,102	273 Specimens 91,061
Average of 5 samples of Blaenavon only	63 Specimens 7.175	63 Specimens 25,388	46 Specimens 7,488	21 Specimens 109,381

Prices and any further information as to quality suitable for special purposes may be obtained from

## Meetings.

### GREAT EASTERN RAILWAY.

A general meeting of the preference stockholders was held on Wednesday at the Cannon-street Hotel, E.C.; Lord CLAUD J. HAMILTON presiding.

The SECRETARY (Mr. W. H. Peppercorne) having read the notice convening the meeting,

The CHAIRMAN said—Ladies and gentlemen, as you are aware, this is a meeting held in pursuance of the Great Eastern Railway Finance Act of 1867, and we have to submit to you Bills in which we are interested, and also other matters concerning the expenditure of the company. You have all received papers dealing with the various matters which have to receive your authority, and if you will allow me I will take them *seriatim*. The first Bill is the Great Eastern Railway General Powers Bill, and its objects are, first, to construct a short railway at Leyton. This short railway is a curve between the new railway which we are making from Ilford to Loughton, and by means of this railway, after this short curve is constructed, we shall be able to move all the mineral and goods traffic from the Cambridge branch of our system on to the Colchester branch without having recourse to the junction at Stratford. Hitherto all such traffic has had to pass through Stratford, to the great inconvenience of the very large traffic which goes through that centre. By means of that short curve we shall be able to make a connection with the Loughton line, and bring such traffic as we shall obtain from the one main branch of the line to the other without having recourse to the Stratford junction. It will be a very great convenience to us. The next project is to make a short goods line from Manea, in Cambridgeshire, to Tipstend. The length of that line will be 3 miles 9 chains, and it will be entirely on a par with that which we have already constructed, and which is now working—namely, the Benwick line, which is some 4½ miles in length. It is really in the nature of a long, continuous goods-siding. It will be constructed by us in the agricultural interest of the district which we serve. It will convey no passengers, it will have no special engines connected with the branch; it will simply be worked, when the traffic requires it, by an engine to be brought from the main line, and the engine from the main line will be temporarily used. When the traffic, on the other hand, has to be brought from the branch on to the main line, the services of that engine will also be temporarily used. The staff required for this purpose consists of three porters and one clerk. The result of the line already opened has been profitable to the company and exceedingly advantageous to the agricultural interests which it serves. We therefore conclude that a line built on similar principles to the one we are already working, and for which we now ask your authority, will be equally conducive to your interests. The next item is with regard to North Walsham. That is not finally settled yet, but we propose to build a new station in substitution for our existing station at North Walsham, if we can obtain the consent of the Midland and Great Northern railways. We all work there together, under the provisions of an Act passed last session, and, as soon as we obtain their authority, we propose to make this station, which will be conducive to economy and to the efficacious working of the traffic of all three companies. The third item is with regard to Cromer. It is a small curve on our line to Cromer, to enable us, under the powers which we obtained last year, to run direct to Sherringham. Sherringham, as you may be aware, is one of the rising watering-places on the Norfolk coast. At present it is only served by the Midland and Great Northern railways. By arrangement with them this curve will enable us to run there direct, and it will be advantageous to us. We then propose to widen the Cambridge line between Temple Mills and Tottenham and Tottenham and Hertford Junction. Temple Mills is our great goods station for sorting and arranging the goods traffic for stations in the suburbs of London. The amount of coal traffic which we annually bring there is very great, and I am glad to say it is increasing, and we find that the facilities given at present by the double line of rails between Temple Mills and Hertford are quite insufficient for the working of the traffic. We, therefore, propose to go to Parliament for power to make an additional two lines of railway the whole way from Temple Mills to Hertford Junction. It will be a very great advantage to us as regards our goods and mineral traffic, and there is no doubt, also, it will be a great assistance to the passenger traffic. It is one of those things which is becoming necessary, simply and entirely through the very large growth of traffic of all kinds. We then propose to widen the Colchester line between Ilford and Romford factory. That, again, is forced upon us by the increase of our traffic on the Ipswich branch of our service. At the present time we are very much hampered between Ilford and Romford factory, and I have no doubt as time goes on we shall not be satisfied with the increase of the line which we propose to make adjoining the Romford factory, but that we shall have to continue it further still. At Ipswich we have to put in an extra line of rails to enable us to work the dock traffic, which, you will be glad to hear, is increasing very largely at that most enterprising seaport. Then at the Tending Hundred line at Wivenhoe we have to make a small widening for the purpose of altering the position of a signal-box. This is not a matter of any great importance. Then we have to lengthen a bridge at Saxmundham, and to lay down additional lines and to divert a road at Ipswich. These are also small matters. We shall also have to divert some footpaths at Felixstowe and Hatfield Peverel. Then we have to purchase and confirm the purchase of lands at various places. That, of course, applies to the whole of our system. We are always, as time goes on, making small purchases and doing various things which require Parliamentary sanction. Then we propose to extend the time for the completion of the work of the Felix-

stowe Railway. These works mean the widening of the line from Ipswich to Felixstowe. At present there is a double line for a portion of the way, but we do not think it necessary to double the line for over the whole distance at the present time. We are also going to Parliament for power to abandon Cromer Junction No. 2, authorised by the Great Eastern Railway Company and the Midland and Great Northern Railways Joint Committee Act, 1898. That is really to abandon a small bit of line for which we propose to substitute another piece, and then we are going to ask for power to raise 600,000*l.* additional capital, with the usual borrowing powers. Now I come to the Midland Railway Bill. This Bill, so far as it affects the Great Eastern Railway Company, proposes to empower the Norfolk and Suffolk Joint Railways Committee, established under provisions contained in the Great Eastern Railway Company and Midland and Great Northern Railways Joint Committee Act, 1898, to make a deviation of the Cromer and Mundesley Railway now vested in this company, and to abandon a portion of the railway rendered unnecessary by the deviation. There is also power proposed to be given to the committee to purchase lands at Mundesley. This deviation is quite a small matter. It is merely to make a deviation of the line as approved between us for the purpose of avoiding inconvenience to a very important building which has lately been erected there, and the cost will be very little. With regard to Mundesley, we hope to conduct a large traffic to that rising watering-place. Now we come not to a Bill, but to a draft order under the Light Railways Act, 1896. This order is to authorise the construction by an independent company of a light railway about 9 miles in length, between Kelvedon and the River Blackwater. I will state to you, as I informed the ordinary shareholders at our half-yearly meeting, that we laid down the principle upon which we thought it right to act when the Light Railways Act was passed. It is this—we desire on principle to encourage light railways in our district whenever they can be proved to be necessary to the service of those districts and to the advantage and promotion of agriculture, but we felt bound in your interests and also in the interests of the ordinary shareholders to put a limit upon any expenditure which we were prepared to undertake in that respect, and we told the promoters—several of them have come to us in the past few years—of those railways that we would not be prepared to go beyond this—that where a sum was named as necessary for the construction of a railway, if one-half of that sum could be handed to us as a free gift, either out of public moneys or money subscribed by proprietors, landowners, and occupiers in the district, we, on our part, would be prepared to find the other half of the capital and to construct a line and take it over and work it in perpetuity. Now, of the several projects which are on foot in the eastern counties, the only one which has complied with our requirements is the one I have already mentioned—viz., the Kelvedon Tiptree and Tollesbury Light Railway. They have obtained from the Government and from other sources half the necessary funds for the construction of this railway. That money will be handed to us as time goes on. We find the other half, and we construct and take over the railway and work it in perpetuity. We feel quite convinced that it is a line which is necessary for the benefit of the district which it serves, and which at the present time is very much out in the cold, and we feel quite convinced on those terms it is a line which will be profitable. I will not say largely profitable, but sufficiently profitable to justify us in undertaking it. However, only yesterday a slight difficulty occurred in regard to the completion of our agreement with this company. You, no doubt, followed the debate in Parliament which took place at the time of the passing of the Light Railways Act. It was stated clearly by the Government, and equally clearly understood by the House, that the promotion of these light railways was undertaken by the Government in the hope that they would be of great benefit to the agricultural community, and also that they would encourage the agricultural community to put their hands into their pockets for the construction of these railways, on the understanding that they were not to be hampered with unnecessary expenses imposed upon them by the Board of Trade. You know that on our great main passenger lines the interventions of the Board of Trade in the interests of public safety are necessary. We railway directors have never objected to their intervention in reason, and we know full well that the express trains which run throughout the United Kingdom could not be run with safety unless the restrictions imposed by the Board of Trade were carried out; but it was held by the Government and accepted by the House of Commons that these light railways, if they were to be a financial success, must not be hampered with unnecessary restrictions which would lead to expenditure. In the first place, the railways were supposed to be supplied with light carriages and stock. They were not to run at an excessive speed, they were to serve sparsely populated districts; and it was further held in the House that if in Belgium, France, and Italy, the agricultural population were able to take care of themselves and keep their eyes open, and not get run over, such railways in England would be equally good because the population of our agricultural districts are not more backward than the residents in the countries I have mentioned, and that therefore they would be equally able to take care of themselves. Therefore it was held that these Board of Trade restrictions should not apply to these light railways. However, only yesterday we heard that the Board of Trade proposed to impose upon this light railway the same conditions to a large extent which apply to the heavy railways. We have had a board meeting to-day, and we have adopted a course which I feel sure you will support. We have written to the Board of Trade to say that we really cannot undertake to construct this light railway if we are to have all these liabilities and heavy restrictions imposed upon us, which may cause a heavy expenditure both now and in the future. ("Hear, hear.") I hope the Board of Trade, in the interests of the agricultural community, which has been a long suffering community, will be sensible on

this point, and will meet us in this respect and agree not to impose these conditions. You know full well that we live in England under the public eye. We have a free press and if any real danger arises in the future with regard to the running of these light railways, what with our county councils and local boards and free press, any company owning these railways will soon be compelled by force of public opinion to spend any money necessary for securing the public safety. That is fair enough; but we do not want, knowing the conditions on which the Light Railways Act was passed—we do not want, in the case of a light railway serving a very poor agricultural district, the same expensive conditions imposed upon us that would apply in the case of heavy railways. ("Hear, hear.") And we have written to that effect to the Board of Trade. The only other matter I have to deal with is the additional expenditure asked for—viz., 250,000*l.* This is made up as follows:—100,000*l.* for engines, carriages, and goods and coal wagons and 150,000*l.* for station improvements and goods yards, and the general purposes of the railway. You who watch our traffic returns will have seen with pleasure the continual increases which we derive from all sources of traffic. ("Hear, hear.") It is satisfactory to us, but, of course, it does entail additional expenditure for locomotives, carriages, stock, and wagons. That cannot be helped, but we have during the past many years never exceeded what we considered to be a prudent expenditure. In the present case we do not ask you for one farthing more than we feel we are more than justified in expending—viz., 100,000*l.* for engines, carriages, goods and coal wagons, and 150,000*l.* for station improvements, and goods yards, and general purposes of the railway. Now, some of our stations, notably those at two or three of our leading sea-side places, are absolutely inadequate to work the very large and increasing traffic which we have to deal with during the summer months. The same remark applies to our goods yards. In many places where years ago we had a small tonnage of goods to handle, we now have to deal with thousands of tons, and therefore as our prosperity increases, our expenditure must increase to provide the necessary accommodation for ourselves and the public, and in this case we have not asked you for a penny more than is considered necessary. The only other remark I have to make partakes rather of the character of a funeral oration. I don't know whether you are aware of the fact that under the provisions of the Act under which we assemble here to-day provision is made that when this company has paid a dividend of 3 per cent. on its ordinary stock for three successive years these preference meetings will no longer be necessary. These meetings were instituted at a time when I have no doubt they were necessary, but that time has gone by. Their necessity, perhaps, has not been diminished up to the last few years; but I have now no need to say that our position has so improved and has reached such a condition that we may almost call it prosperous, and we are able to pay the per-centage on our ordinary stock prescribed by Parliament. Therefore, this will be the last occasion on which we shall have to call you together specially to approve of those Bills which we propose to submit to Parliament in the future; but ladies and gentlemen representing the preference shareholders will be treated exactly as the preference stockholders of other great railway companies; that is to say, you will meet us at the half-yearly meetings of the ordinary shareholders. After those meetings, or at some convenient time afterwards, we shall summon Wharcliffe meetings, and we shall then submit our proposals to the ordinary and preference shareholders jointly. We have hitherto met with such kind treatment at your hands that one experiences almost a regret that these meetings are to cease. Although I regret that we shall not have the pleasure of meeting you separately on any future occasion, I feel gratified that our prosperity is the cause of our not having to meet you again. Therefore I think you will agree with me in feeling a certain amount of satisfaction at the reason which has caused the termination of these meetings in the future. I now beg to move:—

"That the draft of a Bill for an Act under the short title of 'The Great Eastern Railway (General Powers) Act, 1899,' now submitted, be approved, subject to such alterations as the directors may think fit to make therein; and that the directors be authorised to affix the seal of the company to the petition for leave to bring in such Bill."

The SOLICITOR having read the heads of the Bill,

Colonel MAKINS seconded the adoption of the resolution.

Mr. NEWBY asked whether the 600,000*l.* would cover all the expenses incurred under the General Powers Act.

The CHAIRMAN replied that the estimates were not actually ready at the present moment, and the board only asked for such money as they thought it necessary to ask for. They always asked for the minimum amount they considered necessary. He further said that he had omitted to state that although the preference shareholders would meet in future with the ordinary shareholders, they would not do so exactly on the same terms as the preference holders in other companies. Some of the preference holders in this company had special rights of voting, and it would be necessary to prepare a scheme for them. The solicitor had told him that the voting of the preference shareholders would be on a scale of half that of the ordinary stockholders. However, they might rest assured that their interests would be fully preserved.

A SHAREHOLDER suggested that in future a map should be exhibited showing the direction of the several lines proposed, in various colours.

The CHAIRMAN said he quite agreed with the suggestion, and it would be carried out in future. On the present occasion all the junctions were so small, except the Kelvedon and Tiptree, that it was not thought worth while to prepare a special map.

The resolution was then put to the meeting, and agreed to.

The CHAIRMAN—I now beg to move:—

"That the draft of a Bill for an Act under the short title of 'The Midland Railway Act, 1889,' now submitted, be approved (so far as the

clauses therein relate to the Norfolk and Suffolk Joint Railways Committee, and the Great Eastern Railway Company, subject to such alterations as the directors may think fit to make or agree to being made therein."

The SOLICITOR having read the heads of the Bill,

Colonel MAKINS seconded the resolution, which was also agreed to.

The CHAIRMAN—I now propose—

"That the (draft) order of the Light Railway Commissioners authorising the construction of a light railway between Kelvedon and River Blackwater in the county of Essex, now submitted, be approved, and that the directors be authorised to apply, if they think fit, to the Light Railway Commissioners to issue the said order in the name of the Great Eastern Railway Company, subject however to such alterations and amendments therein as may be required by, and agreed to by the directors."

Colonel MAKINS seconded the resolution.

Mr. NEWBY desired to know whether the directors were taking a leap in the dark with regard to light railways. He was pleased with the outspoken way in which the chairman had spoken respecting the terms on which the Kelvedon Light Railway would be undertaken, but his own opinion was that light railways would in the future be a source of great trouble to the ordinary railways, especially in regard to level crossings. The light railways were intended to help the Government and poor landowners, and certainly not to impoverish railway companies, as was likely to be the case if the Board of Trade interfered with them.

The CHAIRMAN, in reply, said that by no means was this a leap in the dark, for the directors had carefully considered the question during the last two and a half years. The proposed line started from Kelvedon on the main Colchester branch, and ran to Mersey Island on the North Sea, a distance of 9 miles. At that place there was deep water, and no doubt a seaport would spring up there. The cost of the line would be 33,000*l.*, which was not at all a high estimate, but that was exclusive of the approaches to Kelvedon station, which the company would have to construct themselves. The Great Eastern had agreed to find half of the money, provided the Kelvedon Company would find the other half. On that line there were twelve level crossings, and when the project was first brought before the company the board said that if they had to have as many gates and gate-houses as that they would have nothing to do with the scheme, because it was well known what the expense of building houses and keeping watchmen there would be. After a great deal of negotiation, the board succeeded in having the number of gates and gate-houses reduced to two, and on that estimate they were prepared to go on. If, however, on the remaining ten crossings the Board of Trade had power at any time to require the company to build a bridge or erect gates and gate-houses, all the cream of the undertaking would be skimmed off at once, because the working expenses would be so great that there would be nothing left for the company. It was on those terms the company undertook it, and he hoped the Board of Trade would fall in with their proposal. If they did he felt sure the line would be made at the small cost he had named, and would be of benefit to the company and to the public.

The resolution on being put was carried unanimously.

The CHAIRMAN also moved:—

"That the proposed expenditure of 250,000*l.* on capital account, over and above the Parliamentary limit of 20,000*l.* in any half-year, now submitted by the directors, be approved."

Colonel MAKINS seconded the resolution, which was agreed to.

The proceedings closed with a hearty vote of thanks to the chairman for his able and courteous conduct in presiding over the meeting.

### CORDOBA AND ROSARIO RAILWAY.

The tenth ordinary general meeting of the shareholders of the Cordoba and Rosario Railway Company, Limited, was held on Tuesday, December 6th, at Winchester-house, Old Broad-street, E.C.; Mr. THOMAS WOOD, deputy-chairman, presided.

The SECRETARY (Mr. G. W. Hoghton) read the notice convening the meeting. An analysis of the report and accounts has already appeared in THE RAILWAY TIMES.

The CHAIRMAN said—I presume it is your desire that, as usual, we may take the report as read. The first subject to which I have to refer is the great loss which has come to the company through the death of our late chairman and colleague, Sir Arthur Forwood, which occurred suddenly at the end of last September, and I feel sure that all present will share with the board the deep regret which we feel at the loss which we and the company have sustained through his death. His conspicuous ability and sound judgment, coupled with his wide experience, always proved of great value to the company, and his foresight was exhibited in no small degree when, with the full concurrence of his colleagues, he joined in the important decision which resulted in the purchase of the Embarcadero property. This was a particularly bold procedure, seeing that it absorbed all the available working capital which, at that time, was at the disposal of the board, and this being so, was a step which a weak chairman would have been disinclined to take. The value of the Embarcadero to the company is practically inestimable; the original intention was that this company should have riverside accommodation at the Canals Port, Rosario, the construction of which the financial difficulties of the country eventually prevented, and the company subsequently found itself in a difficult position, seeing that, without sufficient riverside accommodation, we should have been utterly unable to deal with the traffic or hold our own in competition with our neighbours. Apart from the great value of this property to the company for general purposes, it is a most sound investment on its own merits. An analysis of the results of the past five years, during which time only one year has given anything like a fair average wheat crop, shows that the property, which now stands in the books as having cost 68,519*l.*, including new works and extra land not at first purchased, has

given an average net profit sufficient to pay 7·6 per cent. during the five years on the money invested. To fill the vacancy created by the death of Sir Arthur Forwood, we have communicated with Mr. E. B. Merriman, the chairman of the Capital and Counties Bank, who has the very large holding of 12,500*l.* of the preferred shares of this company, and I am glad to be able to announce that this gentleman has consented to join the board as chairman. His standing in the City, his well-known business capacity, and the fact of his large holding in the company will, I am sure, cause this announcement to be considered by you all as entirely satisfactory. I will now proceed to deal with the report. Sir Arthur Forwood, in his address to the shareholders last year, when comparing the results with the previous year's working, expressed the opinion that a railway which could make up in general traffic so large a shrinkage in the receipts, as was shown in the case of the most important traffic of the company—viz., cereals—might be looked upon as in a fairly satisfactory position, and he added that a cable sent by our general manager on November 33rd, 1897, shortly before the meeting, stated "that the cereal crop for the year ending June, 1898"—whose working results we are now met to consider—"was expected to exceed that of any previous year, and that in consequence the passenger and general business should improve when the harvest commenced, which would be the case towards the end of December, 1897." Sir Arthur Forwood then called attention to the serious decreases which had occurred in the gross receipts between July and November, 1897, the first half of the year now under review, which amounted to no less than \$240,000, explaining that this was due mainly to a reduced sugar traffic, the production in previous years having been in excess of the requirements of the country. The proprietors will have gathered from this year's report that the expectations that we were to have a bumper wheat crop have been disappointed, the increased tonnage in cereals only being 25,707 tons, and that the unsatisfactory position of the sugar industry has been confirmed by actual results, there being a decrease for the year of no less than 20,215 tons. The decrease in revenue from sugar is even proportionately larger, the average per ton being \$4·79 compared with \$5·55 last year. During the last four years the tonnage of cereals has been as follows:—1895, 121,093; 1896, 62,187; 1897, 30,245; 1898, 55,952; the tonnage of sugar for the same years being—1895, 36,504; 1896, 57,660; 1897, 68,243; 1898, 48,028. I select these two items of traffic, firstly, because they are the sources from which the company must expect to derive its most important revenue, and, secondly, because the success or non-success of these industries indirectly affects the movement of nearly all other produce, and consequently the prosperity of the company. Since 1895, when the tonnage of cereals carried by the company, as already stated, was upwards of 121,000 tons, the colonists have had disappointing years, and have thus been necessarily limited in their purchasing powers of general commodities. Although cereals for the year ended last June gave a substantial increase as compared with 1897 (the smallest Argentine crop since 1889), the total tonnage was less than one-third of the quantity which the railway would have carried but for the destruction caused at the eleventh hour by serious storms and frosts. Looking at the table given on page 17 of the report, we see decreases in almost every commodity, the only exceptions being cereals, hay, firewood, posts, and bones. Firewood is a low-paying traffic, and the other increases, except cereals, aggregate only a small tonnage. The year has undoubtedly been one of exceptional misfortune, reflected by the much regretted fact that the profits do not enable any distribution to the holders of securities ranking under the 4 per cent. debenture stock. The crisis in the sugar industry and the general falling off in other traffic consequent upon the part failure of the harvest through causes to which cereal growing in the Argentine is always subject—viz., damage by rain, frosts, or locusts—fully explain without further words from me the decrease of \$280,563, or 15·71 per cent., in the gross revenue. The expenses do not call for much comment. The manager, who is second to none in the Argentine, has only been able to reduce these by \$10,636, or under 1 per cent., which, as the report says, is due to the smaller quantity of goods carried, to a reduction of 5·32 per cent. in the average receipts per ton mile, and to the fact that the expenditure has been so economical in previous years that it stands at an irreducible minimum. Owing to competition and the necessity of giving an efficient service, it would have been bad policy for the manager to reduce his train miles to a larger extent than he did—viz., 3·32 per cent. The increase of \$7,869 in the permanent way expenses is due to extraordinary expenditure on new crossing over the Western of Santa Fé Railway in Rosario, and a new cross-over road at the Embarcadero for facilitating shunting operations, and the resetting of buoys at the mole. The decrease in locomotive expenses of \$18,901 is due to economy in fuel and lubricant consumption and to fewer materials employed in engine repairs. There was an increase of \$2,784 in workshop expenses for new machinery added during the year. Carriage and wagon repairs cost \$12,172 more than in the previous year because heavier repairs to coaches, wagons, and travelling water tanks were necessary, a natural result as wear and tear increases with the age of the vehicles. The works and improvements on Capital account, which previous reports explained were necessary, and which were estimated to total 100,000*l.*, are now nearly completed, with the result that the manager is in a position to expeditiously and economically handle any rush of traffic which general development or a large harvest is likely to bring to us for some years to come. With regard to the future, the board may reasonably expect that the sugar industry will before long take a turn for the better. The balance of all the sugar which had accumulated in the fiscal deposits of the Cordoba Central Railway, at Cordoba, in consequence of the over-production in previous years, was withdrawn for consumption in the month of June last, and this year's crop, which began to move last June, not being large,

the factories should find future conditions more favourable than has of late been the case. The prospects regarding the coming cereal crop continue to be entirely satisfactory, and unless, as took place last year, the unexpected happens, the results of the harvest should put a very different complexion upon the position of the company. Such full details are given in the report that I think any figures which I have not dealt with in my remarks explain themselves, but should any proprietor desire to put questions, we on this side of the table will do our best to satisfy him. I have noticed an anonymous letter, which appeared in the issue of the *Financial Times* of December 3, wherein an attack is made upon the directors in connection with the amount of fees drawn by them. The gentleman, whoever he may be, was quite inaccurate as regards the amount accruing to each director. He referred to four directors dividing the sum of 1,850*l.*, which, he remarked, constituted a scandal, such a fee being in excess of what he understands is allowed to directors of our biggest railway systems. The 1,850*l.* for fees, appearing in the accounts as divided by the board, is 150*l.* less than the amount authorised by the articles of association. The board have for many years drawn less than their full fees, and during a number of years were only drawing half thereof, so that I consider any attack upon the directors under this head is most uncalled for. The fees which the directors actually receive bring to each one approximately 325*l.* per annum, an extra 150*l.* going to the chairman and an extra 50*l.* going to the deputy-chairman. When it is considered that the duties of a director not only embody a grave responsibility but absorb a considerable amount of time, and that during unprosperous years the greatest anxiety is involved, I do not appreciate how any reasonable person can consider the figure which this board receives is an excessive one. When the number of directors was reduced in the early part of the financial year under report, the fees of the board were brought down to 1,800*l.*, which will be the figure for the current year. I now beg to move:—"That the report of the directors and the statement of accounts, now presented, be and they are hereby received and adopted."

Mr. WASHINGTON HUME seconded the resolution, which was, without discussion, carried unanimously.

Mr. JOHN A. LE LACHEUR moved the re-election of Mr. Thomas Wood as a director of the company.

Mr. WASHINGTON HUME seconded the motion, which was also carried unanimously.

Mr. VAN RAALTE proposed, and Mr. PEMBROKE seconded, the reappointment of the auditors, Messrs. Turquand, Youngs, Bishop, and Clarke, which was agreed to.

Mr. VAN RAALTE, in proposing a vote of thanks to the chairman, said the shareholders were grateful to him for the manner in which he had explained the position of the company at the present time. He hoped that in a few years they would be more prosperous and be able to pay not only their second debenture dividends, but also a dividend on the preferred shares.

Mr. PEMBROKE seconded the motion, which was agreed to.

The CHAIRMAN having briefly acknowledged the compliment, the proceedings terminated.

### SOUTH INDIAN RAILWAY.

The half-yearly general meeting was held on Tuesday, at the offices 55, Gracechurch-street, E.C.; Major-General J. H. M. SHAW-STEWART B.E., presiding.

The MANAGING DIRECTOR (Mr. Henry W. Notman) read the notice convening the meeting. The minutes of the last meeting and the directors' report were taken as read.

The CHAIRMAN then said—I am sure, gentlemen, you will all agree with me in regretting the absence of our chairman, Mr. Henry Kimber, M.P., and especially the cause of his absence. Mr. Kimber has been in indifferent health for some months, and has been recommended by his medical adviser to go to Egypt for some time. I think this is the first occasion, at a half-yearly meeting, that he has not attended in person. I am sure you will all wish him a happy return and in improved health. ("Hear, hear.") I am not sure that, independent of his illness, he is not better off in Egypt than he would be here, because I think that just now Cairo and the Nile are better than London and the Thames. ("Hear, hear.") I will, before moving the adoption of the report, make a few remarks on the completion and opening of the short bit of French line from Karaikkal to Peralam, 14½ miles in length. Although falling within the half-year under review, it was noticed by the chairman in his speech at the last meeting. This railway, as you are aware, was made by the agency of the South Indian Company and is worked by the South Indian, and it forms a part of our system. The two important extensions from Madura to Pamban, and from Tinnevely to Quilon, have not yet been put in hand, but the preliminaries are in a forward state, and we may be called upon at any time to undertake the work of construction. With respect to the first, from Madura to Pamban, I am glad to say the Government of India have decided, in accordance with the views of the directors, that the line should run wholly on the right bank of the Vigay river, and that the town of Sivigunga shall be served by a branch. That decision necessitates a slight resurvey of a part of the line, and that resurvey is now in progress. As for the line from Tinnevely to Quilon, we are in doubt as to whether it is to go by the north route from Tinnevely by way of Shencotta to Quilon, or by the southern route by way of Nagercoil to Trevandrum. The decision rests entirely with the Travancore Government, and I think it is understood that they are in favour of the northern direction, but this has not yet been decided upon. The short section from Negapatam to Nagore, 4 miles in length, is in progress. The section from Gudur to Nellore, 24 miles in length, was handed over from October 31st

to the State, to form part of the east coast broad-gauge railway, and this company will be credited with something like 23 lakhs of rupees under that head. There is one other part of the report that I should like to touch upon, and that is with reference to the highly important connecting link between Erode and Nanjangode. I can add little to the report; but the Southern Mahratta Company have also entered a strong protest against the somewhat puzzling proposal of the Madras Government that this important link between the two South Indian metre-gauge railway systems should be constructed and worked by the Madras Railway, a broad-gauge line. With respect to our revenue, you will have noticed that the gross earnings have shown a decrease, as compared with the corresponding period of 1897, of no less than 2½ lakhs of rupees, which is at the rate of about 5 per cent. On the other hand, there is a slight saving in the working expenses. They have been reduced, without any sacrifice of efficiency, by something like Rs.90,000. That leaves a decrease in the net traffic earnings of about Rs.1,90,000. It would be unsatisfactory if this decrease admitted of no explanation; but you will see that the agent alludes to two important causes. He says:—"In the first place, the restrictions which Government has been compelled to impose on the movement of passengers by rail, during the prevalence of plague, have not only produced a decrease in passenger traffic, but, by hindering commercial activity, have also led to a decline in the transport of goods." He says, in the second place, that the rice crop and the ground-nut crops have been distinctly unfavourable this year. Those two causes have directly and indirectly affected our traffic. These unfavourable conditions, we believe, are only temporary, and we hope that they will soon disappear; and when this disappearance takes place your directors confidently anticipate that the normal prosperity of this company and its development of the resources of Southern India will continue as before. To the two causes mentioned by the agent I should like to add a third cause, which affects the comparison between the years 1897 and 1898, and that is the great festival at Combaconum, which occurs only once in every twelve years. It did not occur this year, and will not occur for another ten years. As was to be expected under the circumstances, the coaching traffic has suffered most seriously, especially in the third-class, the falling off being no less than 2½ lakhs of rupees out of the net decrease of 2½ lakhs. But, even under these unfavourable conditions we have carried more than 6 millions of passengers, as against 6½ millions in the corresponding period of 1897. Upon the working of the half-year the directors consider themselves justified in recommending the payment of a dividend out of the surplus profits, at a rate which will bring the total dividend to 2½ per cent., or at the rate of 5 per cent. per annum, which has been paid for the last two half-years. It is true that this will trench somewhat upon the profits brought forward from previous half-years, but the directors are confident that the conditions which have affected our traffic are only temporary, and they look forward to a time of prosperity again setting in. These unfavourable conditions are not peculiar to the South Indian railways, but they have affected all the lines in the Peninsula which are near us—the Madras, the Southern Mahratta, and others. But I am pleased to be able to say that the last traffic return which has reached me shows a slightly improved condition of things; instead of a decrease we have a slight increase. With regard to the staff, I am happy to be able to say there has been no death amongst the upper ranks of the staff, and there has been only one retirement, that of my old friend Mr. Atwill Ellis, who has been obliged to leave our service through ill health, caused by an accident. The rest of the staff continue much the same as in recent half-years. You are served by as capable and honourable a body of men in India as any company could wish to have. I have made my remarks as short as possible, and if any gentleman wishes to ask any questions, I shall be happy to answer them. I move—"That the directors' report and statement of accounts for the half-year ended June 30th, 1898, be received and adopted." (Applause.)

Sir DOUGLAS FOX—I beg to second it.

Mr. PERRING—To which body do you give your protest as to the linking up of the two metre gauge lines—to the Governor of Madras, or to the Secretary of State?

The CHAIRMAN—The protest has been sent through the agent to the Government of India. The ultimate decision will rest with the Secretary of State.

Mr. PERRIN—You have that recourse to the Secretary of State?

The CHAIRMAN—Certainly.

The resolution was then put and carried unanimously.

The CHAIRMAN further moved:—

"That a dividend for the half-year ended June 30th, 1898, be declared of 20s. per cent. free of income-tax, and be paid out of the surplus profits, making with the guaranteed interest of 30s. per cent. a total dividend of 2*l.* 10s., or equal to a rate of 5 per cent. per annum, payable on January 2nd, 1899."

Sir JULAND DANVERS seconded the resolution, which was also agreed to *nem. con.*

On the motion of Mr. JAMES, seconded by Mr. BULLOCK, and supported by Mr. PERRING, a hearty vote of thanks was accorded to the chairman and directors and the staff generally in India and in England, for the able manner in which they had conducted the affairs of the company during the past half-year.

The CHAIRMAN briefly acknowledged the vote, and the proceedings then terminated.

### NIZAMS GUARANTEED STATE RAILWAYS.

The half-yearly general meeting was held on Tuesday, at Winchester-house, E.C.; Sir ANDREW SCOBLE presiding.

The accounts for the half-year ending June 30th, 1898, showed a gross revenue (calculated at 1*s.* 4*d.* to the rupee) of 142,758*l.*, against

122,713*l*. (calculating at 1*s*. 3 29-32*d*. to the rupee) for the corresponding half-year, while the working expenses were 58,197*l*. (against 56,510*l*.), leaving a profit of 84,561*l*. The directors recommended payment of the usual dividend at the rate of 5 per cent. per annum. The number of passengers carried was 618,531 (against 680,479), and the quantity of goods carried 398,437 tons (against 356,746 tons), the ratio of working expenses 40·77 per cent. (against 46·05 per cent.); the train mileage 466,714 (against 444,206); and the average length of line worked in the half-year, 354 miles (unchanged). The capital account showed a total expenditure (including 3,066*l*. in the past half-year) of 3,176,734*l*., whilst the receipts have been 3,227,147*l*.—viz., ordinary stock (guaranteed 5 per cent. by the Nizam's Government), 2,000,000*l*.; debenture, 4 per cent. 1,225,000*l*.; premiums, 2,147*l*. On the Hyderabad-Godavery Valley line the expenditure had been 223,433*l*., whilst 940,000*l*. had been received from the issue of 1,000,000*l*. of 3½ per cent. debentures, less discount. The report stated that Sir Andrew R. Scoble and Colonel R. A. Sergeant had been elected to fill vacancies on the board, caused by the deaths of General Fraser and Mr. Waterfield.

The CHAIRMAN, in moving the adoption of the report and accounts, said that with regard to the main line, although there had been some slight falling off in the coaching traffic, owing to the prevalence of the plague, that was to a certain degree compensated from other sources, while as regards goods a very satisfactory increase of Rs.2,89,809 was shown upon the figures of the corresponding period of last year. There had been a general increase in rice inwards from Coconada, rendered necessary by the continuing effects of the famine of the previous year. The drouthy seasons which prevailed for three years were followed last year by a satisfactory monsoon, the consequence being a considerable increase in the produce for export. There was more wheat and seeds, but the greatest increase was in coal. In 1887 the output of coal from the Singareni mine was 3,259 tons; ten years later the output was 365,550 tons, or 120 times as much. The importance of this coal mine to the line was very great, because every ton of coal produced must pass over the railway before reaching its market. The mine was conveniently placed for the supply of steam coal to the different railway systems. The working expenses of the line were a little under 41 per cent. of the earnings. This was a low ratio, but there had been no starving of the line to produce this result. The Nizam's Government guaranteed 5 per cent. on the capital expended by the company, a portion of which was applied to the sinking fund for the reduction of the debentures. Taking the amount appearing for interest, and excluding the sinking fund, the net earnings exceeded the interest on the stock and debentures by no less than 5,865*l*.; while if they included the sinking fund, which was no doubt a proper revenue charge, the net earnings only fell short of the 5 per cent. on the total capital by 260*l*. This was most satisfactory, and pointed to the fact that at no distant future they would earn the full amount guaranteed. Looking at the matter in another way, as far as the existence of the railway affected the Nizam's Government, it would be found that that Government held a certain amount of stock in the company. If they deducted that amount of stock from the stock held outside by private individuals, it worked out in this way—that the Nizam's Government had received in cash, at the current rate of exchange, 80,364*l*., as against 71,875*l*. paid to stockholders other than itself. That left a balance of about 8,000*l*. as interest on their holding in the company, so that it could no longer be said that the Nizam's Railway was any direct drain on the resources of the State, whilst its indirect advantages were, as had always been anticipated, very great.

Mr. JOHN CLEGHORN seconded the motion, which was agreed to.

#### URUGUAY NORTHERN RAILWAY.

The annual general meeting was held on the 2nd inst., at the offices, 35, New Broad-street, E.C.; Mr. E. M. UNDERDOWN, Q.C., presiding.

The CHAIRMAN, in moving the adoption of the report and accounts (an analysis of which has already appeared in THE RAILWAY TIMES), stated that the gross receipts for the year ended June 30th last, exclusive of guaranteed interest, amounted to 11,603*l*., as compared with 10,514*l*. in the previous twelve months. For the same period the expenditure was 17,707*l*., against 18,123*l*. in 1896-97. They had to regret that, excluding the amount received in respect of the guarantee, the result of the year's working of the line was a loss of 5,424*l*., although it should be remembered that in the preceding twelve months the loss was 7,609*l*. The period covered by the accounts had been one of continual disturbance, owing to political troubles. Such a state of affairs had naturally had its effect on the income of all the railways in Uruguay. It was hoped that during the current year things would settle down, and that the general traffic of the railways would improve. That hope was strengthened by the fact that the Presidential election had passed off quietly. Taking into account the amount of the guarantee the gross receipts for 1897-98 aggregated 31,580*l*., and the expenditure strictly on revenue account 17,707*l*., leaving a net balance of 13,873*l*. The available current balances were applicable for interest on advances and prior lien scrip, which, under the new arrangement, they had issued to the debenture-holders in payment of interest. The requirements of the permanent way were still receiving the careful attention of the board. Nearly 6,000 hardwood and 5,886 creosoted pine-wood sleepers had been replaced during the year. In a letter dated October 29th their general manager informed them that the line was in a sound and safe condition, but that the constant renewal of sleepers must go on for some years. At their last meeting he mentioned that the board contemplated making an arrangement for the combined management of the line and that of the North-Western of Uruguay being undertaken by the manager of the latter. That had now been carried into effect, and

was working very satisfactorily. A more efficient service on the railways had been secured in consequence of the agreement, and they had also been enabled to make considerable economies. He was pleased to say that the Government had duly met the service of the guarantee. The company had the power to pay the debenture interest by means of the prior lien issue for seven years, including last year, but the board hoped to be able to provide for the regular payment of the interest as from the 1st prox. It would not require much additional activity on their line to meet the whole of the working expenses, and very little further improvement in their traffic to admit of the payment of a dividend to the shareholders. Everything possible would be done by the directors to develop the business of the railway, and they trusted to be able in the future to submit more favourable results than those obtained during the year under review.

Colonel ERNEST VILLIERS seconded the motion, which was adopted.

#### BOMBAY BARODA AND CENTRAL INDIA RAILWAY.

The eighty-sixth half-yearly general meeting was held yesterday, at the City Terminus Hotel, Cannon-street, E.C.; Lieut.-General C. H. DICKENS, R.A., C.S.I., presiding.

The SECRETARY (Mr. T. W. Wood) read the notice convening the meeting. An analysis of the report and accounts has already appeared in THE RAILWAY TIMES.

The CHAIRMAN said—Gentlemen, you will, I presume, as usual accept as read the report that has been circulated amongst you. I think, gentlemen, that the report and accounts in your hands afford matter for congratulation when we bear in mind the very trying circumstances through which those parts of India with which our system is directly associated passed during the year 1897 and the latter portion of 1896, resulting from the acute incidence of plague in Bombay, and the widespread failure of the crops in Northern and Central India. When we met here in June last we anticipated that the passenger and coaching earnings of the half-year, then near its end, would on our own line be about Rs.6,30,000, and on the State lines that we work for Government about Rs.1,90,000, less than those of the corresponding half-year in 1897. They turned out to be on our own line only Rs.5,12,000, and on the State lines only Rs.8,000, less than in 1897, thus bettering the forecast, which we always desire to be reckoned on the safe side, by Rs.3 lakhs on the combined system. At the same time we looked for an increased earning from goods in comparison with 1897 of Rs. 13,40,000 on our own line and Rs. 17,80,000 on the State lines. The actual result shows an increase of Rs.15,34,000 on our own line, and Rs.21,88,000 on the State lines; so that on the combined system the gross earnings from goods proved to be better than the forecast by over Rs.6 lakhs. ("Hear, hear.") The actual expenses differed but little from the forecast. On our own line they were Rs.36,000 less, and on the State lines Rs.31,000 more than we looked for when I last addressed you. The result practically is that the whole Rs.9 lakhs, by which the gross earnings of the combined system for the half-year exceeded the estimates formed in India in June last, have been net profit, and our share of the surplus profits has consequently been Rs.21,86,000, instead of the Rs.18,60,000 that we then looked for. We shall be able, therefore, as exchange has not failed us, to pay you the dividend of 4*l*. 12*s*. 6*d*. per cent. promised in January next without drawing more than about 14,000*l*. from our reserves, instead of about 38,000*l*., as we anticipated in June last might be required for that purpose. ("Hear, hear.") We are the more pleased to be able to put such a result for the half-year before you, as it has been secured in spite of a falling off in passenger and coaching receipts of 40 per cent. on our own line, and 22½ per cent. on the State lines, representing over Rs.21 lakhs of revenue in comparison with the corresponding period of 1896, before famine and plague had made their baneful influences felt in our districts, and we trust that, when normal conditions of passenger traffic are again fully established, our earnings from it will revert to the former standard. Now, gentlemen, let me draw your attention to the present half-year. The December half is always, on our own line, the period of comparatively light traffic, and, on the average, our gross earnings during that period do not exceed about two-thirds of those of the preceding June half-year. The rainy season practically limits business and travel during July, August, and September to a minimum, and but little produce is exported during the remaining months. The scourge of plague from which Bombay has so severely suffered shows, we hope, signs of diminishing virulence in that city, and the Government regulations for dealing with it, both there and in the country districts, have recently been so modified as to allow greater freedom to the travelling population. The result is that our more recent returns show improvement in the current passenger traffic, but this comes too late to affect materially the results for the half-year, and our agent estimates that the earnings of our own line from coaching traffic will be Rs.2½ lakhs less than they were for the second half of last year; those of the State lines, which have never suffered in the same proportion as our own, remaining about the same. From goods traffic we are led to expect an increase of Rs.3½ lakhs on our own line, and Rs.2½ lakhs on the State lines, due to heavier traffic in grain and sundries. The gross earnings of our own line for this half-year are, therefore, expected to be about Rs.1 lakh only better, and those of the State lines Rs.2½ lakhs better, than in 1897. The working expenses of our own line, including Rs.4½ lakhs spent on replacement of girders, are expected to be about Rs.1 lakh more than those of last year, when the expenditure charged to revenue for new girders amounted to Rs.4,15,000, and the net earnings of the line fell short of the guarantee for the period by nearly Rs.1½ lakhs. We have, however, agreed with the Secretary of State that part of the accumulated assets of the fire insurance fund,

which is much larger than experience has shown to be really necessary, may be applied in reduction of the charges made against revenue in connection with the replacement of girders. The investments of the fund represent a value of fully Rs.10 lakhs, and of this the Secretary of State has agreed that Rs.6½ lakhs shall be so applied and placed to the credit of revenue in the accounts of this half-year. Allowing for this special credit, the expenditure of the half-year is expected to show a reduction of about Rs.5,40,000, in comparison with 1897. The working expenses of the State lines are expected to be Rs.2,10,000 more than in 1897. We are, consequently, led to expect that our share of the surplus net earnings for this half-year will be about Rs.3½ lakhs in all, of which Rs.1½ lakhs will come from our own line, and Rs.2 lakhs from the State lines. This, gentlemen, would represent, if exchange keeps at approximately the present rate, about 6s. per 100l. on your stock. It will, however, be in your recollection, gentlemen, that, when addressing you in June last, I stated that, under arrangement with the Secretary of State, we proposed to apply, in paying your dividend in July, 1899, so much of our undivided reserves as might be in excess of 30,000l. which would be kept in hand for future contingencies. When I spoke it appeared likely that only about 5,000l. would have to be so distributed, but, owing to the revenue of the second half of 1897 having turned out better than we then anticipated, we shall probably have about 27,000l. from this source to add to your dividend in July, 1899. ("Hear, hear.") We expect, therefore, to be able to pay to you in July next, 13s. 6d. per cent. upon your stock in addition to the guaranteed interest then due, or 3l. 3s. 6d. per cent. in all, which will compare with 2l. 17s. 6d. per cent. paid to you in July last. (Applause.) Your subsequent dividends will depend upon the current net earnings. Before I sit down, gentlemen, I would like to say a word or two on a small matter of administration on which we have failed to convince the authorities of the India-office. We have on our London office establishment two or three valuable and efficient officers whose long service with the company deserves, in our opinion, somewhat larger remuneration than the Secretary of State sees his way to sanction. Now it will be in your recollection that, at your meeting in June, 1895, you passed, at the instance of our late chairman, General Trevor, a resolution authorising the payment, from any funds belonging to the shareholders other than the guaranteed interest, of a special allowance of 200l. per annum as additional remuneration to the deputy-chairman, an office then filled by myself. Since General Trevor's lamented death, as I have, by the confidence of my colleagues, taken his place on your board, the office of deputy-chairman has not been found necessary, and this special grant has, of course, not been made use of. We propose, therefore, if the suggestion commends itself to you, to apply a portion of this unused grant in making such additions as the directors deem reasonable to the pay of the officers I have referred to. ("Hear, hear.") I beg, gentlemen, to move:—"That the report of the directors, with the accounts for the half-year ended June 30th, 1898, now presented, be received and adopted."

Mr. S. J. WILDE seconded the resolution, which after a few congratulatory remarks by Mr. HALL, was carried unanimously.

The dividend recommended in the report was also approved and declared.

The CHAIRMAN—I wish now, gentlemen, to draw your special attention to the paragraph, the concluding one of the report in your hands, which relates to the provident fund that, with your cognisance and sanction, has been in operation since 1872 for the benefit of the staff of our own line. For many years after its establishment the fund received no assistance from the company's revenue, the rules providing that before any assistance could be so given 6 per cent. for the year must first be earned and divided between the company and Government upon the company's capital. For nine or ten years the net revenue did not reach the necessary point. For the last fifteen or sixteen years, however, the net earnings have sufficed to provide the regular annual contribution to the fund originally authorised; but the growth of the fund has been slow, and the operation of its rules has not been so satisfactory to the members generally as we could desire, the grants from revenue up to the end of last year not having equalled 83 per cent. of the members' subscriptions. The fund being invested, moreover, in rupee securities, not only has their sterling value been very seriously affected of late years by the fall in the exchange value of the rupee, to the detriment of retiring European members, but their local value has also been materially depreciated, as a result of the adverse circumstances that have caused so much distress in India during the last two or three years. So severely has the fund suffered from this depreciation that for the year 1897 the contribution from revenue and the current income of the fund from its investments, which are all of an excellent description, were almost entirely absorbed by the fall in the value of its securities during that year, so that the members of the fund only received a net addition of 1½ per cent. for the year to their respective shares in it, and practically no recovery in prices has occurred during the present year. This is not a desirable or satisfactory condition for such a fund to be subject to. We may, indeed, hope that the present depreciation in values will not be permanent, but it is a fact that we have to recognise, although no thoroughly effective remedy may be immediately and directly attainable. We think, however, that the rules of the fund may be improved, without undue cost to the company, for the material advantage of the valuable non-pensionable staff employed in working your railway. It is not, we think, reasonable that contributions to the fund should be entirely dependent upon the contingency of the line earning 6 per cent. upon its cost, and we also regard the principle on which such contributions, when made, have, under existing rules, to be apportioned amongst the members as not affording sufficient encouragement to those who are junior in length of service.

The Government, as our report tells you, have had their own State railway funds of a similar nature under review and purpose putting them on an improved footing, raising the rate of subscription levied from members and enlarging the present limits of contribution from revenue. They have invited us to reconsider the rules of our own fund with a view to adopting a corresponding revision, and with your approval we propose to do so, making fair allowances, by way of equitable compensation, to those who may be found to have suffered by the change. It is not possible to indicate exactly how the proposed changes will affect the amount to be contributed from revenue to the fund; but I may remind you that, in asking your sanction to alterations necessary to bring the rules of our own fund into practical harmony with the revised rules contemplated by Government for application to the non-pensionable staff of their own State railways, we are acting at the instance of the Secretary of State, who will share with the company any increased charge that may fall upon the revenue of our line in consequence of the revision. I, therefore, beg, gentlemen, to move:—

"That the directors be authorised to revise and amend the rules and regulations of the provident fund of the company in agreement with the Secretary of State for India in Council, and to make such provision as they may think fit for providing for the claims of the present members of the fund who may be prejudiced by the new rules."

Mr. S. J. WILDE seconded the proposition, which, after a short discussion, was carried unanimously.

Votes of thanks to the staff generally and to the chairman and directors terminated the proceedings.

### BENGAL AND NORTH WESTERN RAILWAY.

The half-yearly general meeting was held on Tuesday, at Winchester-house, E.C.; Lieut.-General C. H. DICKENS, C.S.I., R.A., presiding.

The MANAGING DIRECTOR (Lieut.-Colonel E. L. Marryat, R.E.) read the notice convening the meeting and the minutes of the last meeting, which were confirmed. The report and accounts (an analysis of which has already appeared in THE RAILWAY TIMES) were taken as read.

The CHAIRMAN then said—Gentlemen, when last we met I was able to inform you that the prospects for the half-year ended June 30th last were favourable, and I think you will admit that the report now before you bears out my forecast. There was a moderate increase in third-class coaching traffic, even taking into consideration the additional mileage open. It was an auspicious season for Hindu marriages. But the point to note is that the districts seem to have recuperated so rapidly from the effects of the late scarcity, for too often a famine leaves severe traces on the traffic of a district for some time after all distress has actually passed away. As regards goods, the tables in the report give you an idea of the fluctuations, the main feature being the cessation of the import of Burmah rice brought in on account of the famine and only giving us a short lead, and the renewal of our export of local rice northwards which gives us a lead from Tirhut over a long section of the line. The higher price of wheat in England gave a slight stimulus to that traffic, but when we look back to 1886, soon after we opened, and see that we then carried about 50,000 tons on the Bengal and North Western Railway alone, and that such traffic has now become small and uncertain, we may congratulate ourselves that we are no longer dependent on wheat for export to Europe as one of the mainstays of our revenue. But after all, gentlemen, it is little use getting increased gross receipts if the increase is nearly swallowed up by the additional cost of earning the same, as is not uncommonly the case. We may, therefore, congratulate Mr. Izat and our excellent staff that it has only cost Rs.19,157 to earn an additional Rs.2,88,275—in other words, the extra traffic has only cost about 6½ per cent. to work. You will doubtless have noticed that the board have thought it desirable to place a sum of 10,000l. out of the earnings of the half-year into suspense until the final adjustments between capital and revenue on account of the 1894 extensions have been made. We do not anticipate that there will be any very large draft against this amount, but it is as well to be on the safe side, and should our anticipation prove correct we shall have a nucleus for a fund for ensuring equalisation of dividends when bad half-years turn up or other untoward circumstances arise, and may hope thereby to ensure you a regular 5 per cent. dividend per annum. Once that position is made fairly secure we shall hope, if circumstances continue favourable, that the 5 per cent. will increase. As regards our extensions, those of 1894 are now practically complete, and we hope early in the year to have trains running over our fine bridge over the Gogra River at Bahram Ghat, which completes our link with the metre-gauge railway in Rajputana. We had hoped that the retiring Viceroy, Lord Elgin (who, amidst all the troubles of famine, war, and pestilence which have arisen during his period of office, has been a consistent friend to railways), would have been able to do us the honour of opening this bridge before his departure from India. Unfortunately he could not spare the time, so that we have to be content with naming it the "Elgin Bridge." The lines in the Doab will, we hope, all be open for traffic early next year as well as some portions of the Tirhut extensions, and we are making a vigorous commencement with the other two important bridges—namely, those over the Gogra River at Turtipar, and the Kosi River near its junction with the Ganges. The latter bridge will link up our system with the Northern Bengal State Railway. We have already in hand one of the surveys of the branches approved by you at our last meeting, and as soon as we can get the complete surveys, plans, and estimates for the other two, we shall proceed to negotiate with Government for their construction. As regards the current half-year, up to the middle of September we were doing very well, and our receipts had increased by some Rs.1,80,000, say 12,000l., over those of the corresponding half of last year, when unfortunately a tremendous rain-

fall took place in North Tirhut, some 34in. having fallen in three days. The consequent flood seriously breached the low-lying parts of the State railway (not our line) in several places, and owing to the flooded state of the country and continuous bad weather, it was for days impossible either to get labour or materials wherewith to fill up the breaches. One sad accident occurred, the district engineer hearing of a breach went out promptly one night with a ballast train to arrange for its repair. Unfortunately the engine pitched into a new gap and the driver and fireman were drowned. The end of the engineer's carriage was fortunately supported by the engine at the bottom of the gap and he narrowly escaped with his life. The most important breach, which was in the main line connecting the Tirhut State Railway with the Bengal and North Western Railway, took nearly six weeks to close. The traffic has naturally suffered considerably in consequence and wiped out our increased earnings. Moreover, the expense of repairing these flood damages will, we fear, be considerable. On this point we are awaiting a report from Mr. Izat, who returned to India about a month ago. The Segowli Rakhsal branch, which is being built by a subsidiary company, and which was to have been opened for traffic soon after the rains, has also, we regret to say, suffered considerably, and it is to be feared that the opening will be delayed. On the other hand, we learn that the rice crop has not been seriously affected, that the traffic prospects are good, and that owing to the flooded state of the country the traffic could not be moved except by rail, so that we may eventually get the goods traffic, at all events; but it is to be feared that many of our friends amongst the Tirhut indigo-planters have suffered severely. At the same time telegraphic advices just received from our Agent indicate that we shall probably at our next meeting be able to give you the same dividend as for the corresponding half of 1897. I will now move:—"That the report of the directors dated November 26th, 1898, together with the audited statement of accounts and balance-sheet for the half-year ended June 30th, 1898, be and they are hereby received, approved, and adopted."

Mr. GEORGE CHRISTIAN—I beg to second that resolution.

Colonel FROOM—Have we any reserve fund? I see that 10,000*l.* are carried forward to a suspense account; but have we any reserve fund?

The CHAIRMAN—No other than that.

Colonel FROOM—I think it would be better to have a reserve fund and give us less dividend.

The CHAIRMAN—I have just mentioned that we hope to build up one shortly.

Colonel FROOM—But you have 10,000*l.* put to a suspense account.

The CHAIRMAN—The 10,000*l.* is put aside for a particular purpose. If there is a residue, we may be able to use it as a commencement of a reserve fund.

Colonel FROOM—But we have not put by a reserve fund hitherto, have we?

The CHAIRMAN—No; not hitherto.

Mr. TREBLE—I cannot see any item here for directors' fees.

The MANAGING DIRECTOR—It comes under the head of "general charges."

Mr. TREBLE—But the items are all lumped together—Rs.28,000.

The CHAIRMAN—We have always had them put in this way, but we shall be happy to put them separately if it will be more satisfactory to the proprietors. Under abstract "E" that Rs.28,000 includes all the office expenses, as well as the directors' fees.

Mr. TREBLE—I see that last year the amount was Rs.33,000, and this year it is only Rs.28,000.

The MANAGING DIRECTOR—It depends very much on the exchange.

Mr. TREBLE—I think it is very moderate.

The resolution was then put and carried unanimously.

The CHAIRMAN—I now beg to propose:—

"That the payment of a dividend for the half-year ended June 30th, 1898, on the company's capital be at the rate of 3*l.* per cent. for the half-year, free of Indian, but subject to English income-tax, and the same is hereby sanctioned and authorised to be declared."

Mr. CHRISTIAN—I beg to second that.

The resolution was unanimously agreed to.

Mr. LEWIS COHEN proposed a vote of thanks to the chairman and directors, and the staff generally at home and in India, for their past services.

Colonel FROOM seconded the proposition, which was carried unanimously.

The CHAIRMAN acknowledged the vote on behalf of the directors and staff, and the proceedings then terminated.

### NORTH WEST ARGENTINE RAILWAY.

A meeting of first debenture stockholders was held at Winchester House on the 30th ult.; Colonel F. G. OLDHAM presiding.

The CHAIRMAN said—Our last general meeting was held on July 25th; at the time we knew that the crop of 1898—the sugar crop—would be 30 per cent. or 40 per cent. less than that of 1897, and this was explained to the shareholders at the time. Since then, however, the traffic receipts of the railway have shown that the decrease was somewhat more than was anticipated, and the result is that the net receipts of the line for the current year will only amount to about 21,000*l.* The interest on the first debentures and pre-preference bonds amounts to 27,000*l.*, and therefore there will be a deficit of 6,000*l.* The board thinks that it would be very unwise to look forward with any certainty to any great improvement in the coming year—1899—in the net receipts of the railway for the following reasons:—The failure of the sugar crop this year is owing to the cane plants having been destroyed to a great extent by very severe frosts, and it is quite possible that these plants may not be replaced in time for next season's

crop; and, secondly, we have before us a very considerable amount of expenditure owing to the repairs to the Rio Seco bridge. This bridge is a bridge of five spans of 100ft. each, and last year one of the piers of the bridge was found to be in an unsafe condition, and a considerable amount of money—about 1,200*l.*—was expended upon the repairs. This year another of the piers was carried entirely away in a flood, and within the last few days we have received a report from the manager of the line stating that he finds the foundations of the other two piers, on his making borings close to them, only go down to the sand, and not to the level of the solid *tosca*. The protection of those piers and the rebuilding of one which is down will cost us a considerable sum of money, which, of course, will have to come out of revenue. It is particularly unfortunate that the failure of the crop should occur just at the present moment, when we are on the point of giving effect to the scheme of arrangement which was agreed to only a few months ago by all the different classes of stockholders. The position of the first debenture-holders under the scheme is a very good one, and there is no doubt about it that it would be to the advantage of the first debenture-holders to see that scheme carried out. The mainspring of the scheme is the reduction of the interest on the pre-preference bonds from 6 per cent. to 4 per cent., and the increase of the issue to enable certain urgent capital expenditure to be undertaken. The directors have already taken all the preliminary steps necessary with regard to this portion of the scheme; but we feel that it will be almost impossible to bring it to a successful and satisfactory issue if we are obliged to again commence piling up arrears of interest. I may go further and tell you that a few of the very large holders of our first debentures—gentlemen who can speak with great authority on such a subject—have told me that they do not think it will be possible for us to place the 4 per cent. bonds which are to be substituted for the pre-preference bonds if we have to, as I have said before, begin piling up again an accumulation of accrued interest. One of the chief objects of the scheme was to give the company a fresh start unencumbered by liabilities, and that object will be entirely defeated if we are to be at once plunged back again into debt. On the other hand, if we were to leave everything to take its course and not come to you and ask you for your help and advice, then any debenture-holder, as soon as default took place, would be able to put in a receiver, which, I think, generally a very doubtful and, at the same time, a very expensive remedy. This meeting has been called in accordance with the first debenture trust-deed, and under the terms of that deed a quorum consists in holders of 70,000*l.* of debenture stock—that is one-fifth of the total amount of debentures. There is considerably more than that in the room now, and a three-fourths majority of those in the room will carry any resolution. I therefore, in the name of the board, recommend to your favourable consideration the following resolution, viz.:—"That interest at the rate of 4 per cent. be accepted for the year 1898, in lieu of, and in full discharge of, the 6 per cent. interest secured by the trust-deed dated June 27th, 1888, and made between the North West Argentine Railway Company, Limited, of the one part, and Edward Woods and William Paton Sutherland, of the other part."

Mr. W. HENTY seconded the resolution, and a discussion followed, in the course of which strong protests were made against the proposed tampering with the stockholders' security.

The CHAIRMAN, having put the resolution to the meeting, declared it lost on a show of hands, and stated that a poll would be demanded. Thereupon some of the speakers stated that if the board intended to pursue this course they would vote for the resolution. The chairman then put the resolution to the meeting a second time, and upon a show of hands declared it carried by 21 votes to 4.

### WHITE PASS AND YUKON RAILWAY.

The first ordinary (statutory) general meeting was held on Monday at the offices, 17, St. Helen's-place, E.C.; the Hon. S. CARR GLYN presiding.

The CHAIRMAN said he was very pleased to see in the *Times* a few days ago a telegram from Ottawa stating that it was expected that a regulation would be shortly issued in the mining districts of Yukon reducing the royalty from 10 to 2 per cent. Should that take place it would allay a great deal of the excitement now going on there, and would tend to promote the interests of their company.

Mr. GRAVES then spoke at considerable length as to the construction of the railway and the prospects of its being a remunerative undertaking. The laws of the three countries in which they were making the railway—the United States, Canada, and British Columbia—had been complied with, and, after carefully locating the line, the actual work of construction was begun in June last. In August the news of the Atlin gold discoveries reached their camps, and a stampede ensued which reduced the number of their workmen in one day from about 1,700 to a little over 600. As a consequence, instead of reaching the summit of the pass by the end of September, they were only now about getting to it. However disappointing this might be for the moment, it was a small price to pay for the discovery of the Atlin gold-fields within a few miles of their railway. They hoped to be able to push on with the work all through the winter; but, in any case, there should be no difficulty in reaching Lake Bennett long before navigation opened in the spring. As to the prospects of traffic, Mr. Gray, their traffic manager, reported that he had been in communication with some of the largest shipping agents on the Pacific coast, and that he had already arranged rates for a very large amount of freight, and he added that for January, February, March, and April he estimated that the railway would have to carry over 12,000 tons. Although the rates to be charged would produce large returns, they were only about a third of what it had hitherto cost to take goods over the coast ranges. Alluding to the prospects of

the Yukon country, on which the success of the railway must necessarily depend, he said that it was a mistake to suppose that its future was bound up with the discoveries of gold alone. It was, he said, now known to be relatively as rich in copper as in gold, and—from the point of view of the railroad man—copper was, perhaps, even more desirable than gold. Coal had been discovered in several places, and there were good indications of oil. In short, it had become evident that the Yukon was a country of great mineral richness, extending throughout an area nearly as large as Europe. It had also been proved that the climate was healthy and pleasant during the summer, and that, with ordinary food and clothing, the winters were no more to be feared than in Manitoba. They had had only one case of sickness at their railway hospital out of upwards of 5,000 names on their pay roll from June to November. It might be useful to compare the position of their railway with that which it occupied last spring, when he landed in New York. It then had nothing but its charters, and the Canadian Government were actively promoting another line, which, if built, would have diminished the profits of their enterprise. To-day they had the difficult part of their work done, their railway organised for business, and the Governments of Canada, British Columbia, and the United States all most friendly. Their future policy would, of course, largely depend on the discoveries and developments yet to be made in the Yukon country. Having the trunk line between salt water and the river, they would put in branch lines as feeders as fast as they were warranted by the condition of particular districts. Meanwhile the wonderful network of rivers and lakes took the place of branch lines, and would act as their natural feeders. They would foster and develop these water highways, and in that, as in all their other work for the development of the Yukon country, they were assured of the hearty assistance and co-operation of the Canadian Government.

No business resolution was submitted to the meeting.

### SOUTHERN MAHRATTA RAILWAY.

The half-yearly general meeting was held on Wednesday at 44, Finsbury-circus, E.C.; Colonel J. G. LINDSAY presiding.

The CHAIRMAN, in moving the adoption of the report and accounts (an analysis of which has already appeared in THE RAILWAY TIMES), said the report did not afford such pleasant reading as those which had been submitted to the shareholders hitherto, showing, as it did, decreased earnings both from passenger and goods traffic. Although the causes of these declines had arisen from circumstances over which the directors had no control, the fact was none the less disappointing; and there was very little consolation in knowing that at former meetings he had warned them that the famine would have its effects, and that the plague would last for some time. As compared with the June half of 1897, the receipts of the first half of the present year for passengers were less by Rs.4,47,151, while the decline in the goods receipts had been Rs.3,19,281; and there was no doubt that, temporarily, they had returned to the position which they held four or five years ago. The diminution in the receipts from goods was in the local traffic, as in the foreign traffic they obtained Rs.3,28,963 more; while in the same way the falling off in the coaching traffic had been in the short-distance passengers. The per-centage of working expenses to receipts in the past half-year was 65.31, of which, however, 3.60 per cent. was attributable to special charges. As stated in paragraph 10 of the report, the company's quarter share of the earnings for the past half-year fell short by 5,672*l.* of the sum required to meet the dividend at the rate of 5 per cent. per annum, and the directors therefore proposed to make up the sum required from the reserve fund, which was formed for equalising dividends. This amount was very small, and was more than covered by the interest which they derived on their investments. He then referred to the disastrous effects of the plague and to the active measures which had been taken by the company's European and native staff to assist the Government. With reference to the working for the current half-year he regretted that he could only give them a very poor report. The passenger and goods traffic had been very slack, and they anticipated that, as compared with previous half-years, a decrease would be shown in the earnings. According to their latest accounts, a slight improvement was exhibited, but in some districts an immense amount of plague still prevailed. He thought, however, that they might look forward to an improvement in their affairs.

Mr. GERARD NORMAN seconded the motion, which was carried.

Resolutions were afterwards passed declaring a dividend for the half-year ending the 31st inst. of 2½ per cent., sufficient being taken from the reserve fund to make up, with the 1½ per cent. to be received from the Secretary of State for India, the dividend mentioned; and placing to the credit of the reserve fund the quarter share of the profits of the railway for the same period when received.

### SOUTH BEHAR RAILWAY.

The half-yearly general meeting was held on Wednesday at 44, Finsbury-circus, E.C.; Sir JULIAN DANVERS presiding.

The CHAIRMAN, in moving the adoption of the report and accounts (an analysis of which has already appeared in THE RAILWAY TIMES), stated that satisfactory progress had been made in the construction of the line, 87 per cent. of the whole of the works having been completed. The total cost of the railway was estimated at 717,341*l.* The present amount of authorised capital of 600,000*l.* would therefore be insufficient, and they had decided to issue at once the remaining 40,000*l.* of the 3½ per cent. debenture stock. This would be offered in the first instance to the shareholders and debenture stockholders. Any further

capital that might be required would be raised, as provided in the contract, on the requisition of the Secretary of State. The excess over the original estimate was owing to the cost of additional bridges and increased waterways which it had been found necessary to provide, and to the lengthened period occupied in the construction of the line, during which interest had had to be paid out of capital. They hoped that the important Phulgu bridge would be finished before the end of June next, and that the railway, with that exception, would be opened early next year. They had obtained the sanction of the Secretary of State for India for the extension of the period during which interest should be payable out of capital; and the 15,000*l.* which had been obtained as premiums on the issue of 250,000*l.* debenture stock would be expended in this way. This amount would be in the shape of capital not bearing interest, and would be repaid to them by the Secretary of State when the contract was determined. As soon as the line was opened they had every reason to anticipate satisfactory traffic returns.

Sir H. S. CUNNINGHAM seconded the motion, which was agreed to.

## Directors' Reports.

### BUENOS AYRES AND VALPARAISO TRANSANDINE RAILWAY.

The accounts for the year ending June 30th, 1898, show a gross revenue of 11,883*l.* (against 12,077*l.*), an expenditure of 25,900*l.* (against 25,612*l.*), and a loss of 14,017*l.* (against a loss of 13,535*l.*), to which has to be added interest for the year on the A debenture stock 12,407*l.*, making together 26,424*l.* Against this there was received as the net proceeds of interest on £2,000,000 gold rescission bonds 15,873*l.*, interest on funding loan bonds 658*l.*, and general interest 426*l.* (together 16,957*l.*), leaving a deficiency of 9,467*l.* The capital account shows a total expenditure of 1,236,291*l.*, whilst the receipts have been 1,245,332*l.*—viz., 7 per cent. preferred shares 500,000*l.*, deferred shares 125,000*l.*, A debenture stock 4 per cent. 310,166*l.*, B debenture stock 6 per cent. 310,166*l.* The report states:—

"Although actual construction remains limited to the carrying out of small necessary works, the company's engineers have taken part in the important surveys which have been made on the summit sections on both sides of the Andes.

"It must be borne in mind that the line is at present but an uncompleted part of the Buenos Ayres and Valparaiso Railway system, not yet in connection with the Chilean Railways, and hence the proportions of expenses of working and maintenance necessarily contrast unfavourably with the receipts; they also include part of the cost of repairing damages caused by the floods of last year and also of additional protective works.

"The protracted negotiations with the Argentine Government with respect to the guarantee have progressed during the past year. On May 31st last a decree was passed ordering the payment of £2,000,000 gold to be made to the company on account of the total sum of \$6,500,000 payable under the contract for the rescission of the guarantee, signed, *ad referendum*, on October 25th, 1897.

"A general bond for £2,000,000 gold was, accordingly, delivered to the company's representatives in Buenos Ayres on July 8th last, and was duly exchanged in London for the definitive bonds of the guarantee rescission loan to a nominal amount of 396,800*l.*, with coupons from and including January 1st, 1899. An Argentine Treasury Bill for \$80,000 gold, due January, 1899, has also been received in payment of the interest on the \$2,000,000 for the year ending June 30th, 1898.

"The above delivery of bonds on account of the rescission contract was made upon the condition that if Congress should refuse to sanction that contract the company might, at its option, return the bonds, or retain them at their nominal value in payment of arrears of guarantee under the concession. This condition, the directors are advised, will prevent the use of the bonds or their proceeds for the purposes of this company, pending the final decision of the Argentine Congress with regard to the rescission contract, although the interest thereon may be treated as revenue.

"The rescission contract was passed by the Senate on September 30th last, at the end of the ordinary session of Congress, and has been referred to the Chamber of Deputies for consideration in the special, or prorogation, session. Its decision is expected shortly, and the board trust that it will be favourable.

"It is with deep regret that the directors record the loss by death of their esteemed colleagues, the chairman, Mr. O. C. Waterfield, and General Alexander Fraser, C.B., R.E. In exercise of the powers conferred on them by the provisions of article 95 of the company's articles of association, the directors have elected Mr. F. W. Lawrence a director of the company. It is thought undesirable at the present time to fill the remaining vacancy."

EPPS'S COCOA.—GRATEFUL AND COMFORTING.—"By a thorough knowledge of the natural laws which govern the operations of digestion and nutrition, and by a careful application of the fine properties of well-selected COCOA, Mr. Epps has provided for our breakfast and supper a delicately flavoured beverage which may save us many heavy doctors' bills. It is by the judicious use of such articles of diet that a constitution may be gradually built up until strong enough to resist every tendency to disease. We may escape many a fatal shaft by keeping ourselves well fortified with pure blood and a properly nourished frame."—*Civil Service Gazette*.—Made simply with boiling water or milk.—Sold only in packets and pound tins, by Grocers, labelled—"JAMES EPPS and Co., Ltd., Homœopathic Chemists, London."

## Notices to Readers.

The Offices of THE RAILWAY TIMES are at 2, Exeter-street, Strand W.C.

Telegraphic Address:—RAILWAY TIMES, LONDON. Telephone No.:—1967 GERRARD.

All communications bearing upon literary matters should be addressed to the Editor.

Letters relating to Subscriptions, Advertisements, and other business matters should be addressed to the Publisher.

## TERMS OF SUBSCRIPTION.

Post-free to any address in the United Kingdom.

Three Months .....	20 7 0
Six Months .....	0 13 0
Twelve Months .....	1 5 0

A special discount of 6d. on quarterly, 1s. on half-yearly, and 2s. on annual subscriptions will be allowed for payment in advance.

THE RAILWAY TIMES may be had at all bookstalls, and of any newsagent throughout the kingdom, at 6d. per copy.

Back numbers will be charged for as follows:—If dating back more than a year, 1s. per copy; if more than two years 2s. per copy.

## REMITTANCES.

Money Orders, Cheques, &c., should be drawn in favour of Lionel Bridgland, and should invariably be crossed "London and County Bank." Stamps will be taken in payment of small sums, say under 10s.

## EDITORIAL.

All communications must be authenticated with the name and address of the writer, which will be received in strict confidence.

## Forthcoming Meetings.

- Dec. 13—Bengal Nagpur Railway (Half-yearly), 132, Gresham-house, E.C., at 3.
- Dec. 13—Lagunas Syndicate, Limited (Annual), Winchester-house, at 1.
- Dec. 13—Madras Railway (Half-yearly), 61, New Broad-street, E.C., at 1.
- Dec. 14—Bengal Central Railway (Half-yearly), 199, Gresham-house, at 2.30.
- Dec. 14—Egyptian Delta Light Railways (Half-yearly and Special), Winchester-house, at 3.
- Dec. 15—Donna Thereza Christina Railway (Annual), Winchester-house, at 12.

## THE BOARD OF TRADE AND COMPULSORY LEGISLATION.

It is to be hoped that the recent methods of the Board of Trade in connection with compulsory legislation of a far-reaching nature will not become generally adopted. We refer to the proposal of Mr. Maddison, M.P., last session, that automatic couplings should be insisted upon by the Board; to the promise of Mr. Ritchie that the matter should receive attention and that American practice should be inquired into; to the manner in which that inquiry was carried out; and, above all, to the way in which the results of it and the decision of the Board have been made public. To commence with the latter point, the unassuming paragraph in the daily press last week has almost escaped general notice; and it is not improbable that in so doing the wishes of those responsible for its subject-matter have not been disregarded. It is certainly unusual to herald an important piece of official policy by an interview between the head of a Government department and the secretary of a trades union. Yet that is the way in which the Board of Trade announces its intention to promote a short Bill in the next session of Parliament to make the use of some type of automatic coupler compulsory. Mr. Hopwood, the secretary of the railway department of the Board, has recently paid a visit to America, and, in furtherance of Mr. Ritchie's undertaking, has inspected various types of couplings, and has, presumably, inquired into the danger-saving characteristics of the automatic principle generally. The Bill referred to is thus directly to be attributed to the judgment of Mr. Hopwood in this important detail. We have yet to learn that a legal training, combined with official experience, chiefly of an administrative or statistical order, is the best guarantee for accuracy of judgment in an essentially technical matter. Such considerations cannot but engender a certain lack of confidence on the part of those directly responsible before the public—the railway managers and their staff—in the Government department whose business it is to stand between the public and the railways, but without partiality towards either. We cannot disguise from ourselves the fear that hasty and possibly ill-considered action on the one side may endanger the satisfactory relations which have hitherto fostered the desire of the railway companies to meet more than half way any official suggestions put forward in the interests of the travelling public and the railway servants. It might, no doubt, be advanced that the order now under review—that for the compulsory adoption of costly appliances not hitherto held to be necessary for purposes of safety—had been made ten years ago in America, and without serious opposition. Passing by the not unimportant question of the different circumstances involved, it is, however, fair to point out that both principle and detail were submitted by the Congressional Committee to a body of acknowledged experts, the members of the Railway Association, to whose views upon all technical points the committee itself gladly deferred. When the matter was first mooted last summer, we suggested a similar course on this side of the water. That the companies would have honestly applied themselves to the question, and that with a fuller knowledge of the real requirements that can have been at the disposal of the representative of the Board, is not to be doubted. That they will honestly conform to

the wishes of Parliament is equally unquestionable. But the methods are such as to call for genuine regret on the part of those who realise that reciprocity of interest is the leading feature of the higher management of the railway industry.

### GREAT CENTRAL AND METROPOLITAN RELATIONS.

Perhaps the most interesting of the recent notices of Bills to be brought before Parliament next session was that of the joint proposal of the Great Central and Great Western companies. That notice covers the construction of a new line from Grendon Underwood, near Quainton-road, to Acton. A new line from High Wycombe to Acton was authorised by Parliament last session, for construction by the Great Western. A similar scheme, promoted by the District, was thrown out, the Great Western having, of course, much the stronger case, as its new project was intended to reduce the distance to Oxford and points north thereof by utilising the present Thame and High Wycombe line of that company. The saving in distance was to be 8 miles, and the new line is now being proceeded with by the Great Western. The new joint proposals extend to the construction of this new line and also the joint acquisition of a section of the existing Great Western line—namely, that between High Wycombe and Princes Risborough. Further, it provides for the remaining link—an entirely new project—between the Great Central system near its southern extremity and the Great Western Company's existing line at Princes Risborough. It is obvious that the intention of the scheme is to provide the Great Central with an alternative route to the Metropolitan Company's extension, for traffic from the Great Central system to London, and, as such, is likely to be opposed tooth and nail by the Metropolitan Company. Bearing in mind the grandiose way in which Sir Edward Watkin, when installed as chairman of both companies, used to enlarge on the mutual benefits of the London extension of the Great Central, the present situation is extremely interesting. It represents the climax of an unpleasant situation which has developed since the retirement of Sir Edward Watkin in 1894. The relations of the two companies have never been the same since the Metropolitan, with singular foresight, declined to contribute to the construction of the Sheffield Company's London line, as it was authorised to do by that company's Act of 1893, to the extent of 200,000*l*. The doubt which that move on the part of the Metropolitan threw upon the financial success of the London Extension quite upset the equanimity of the Sheffield Company, who have been trying to turn the tables on the smaller company ever since. They had already had several bouts in the Parliamentary Committee-rooms, but a still more serious struggle is apparently in store next session if the Great Western-cum-Great Central proposals are persisted in. From the Metropolitan point of view the loss of the London traffic of the Great Central from Quainton-road to Wembley would be a very serious matter. Under Sir Edward Watkin's guidance the provincial extensions of that company were undoubtedly undertaken with the view of some day forming a connection with the then Sheffield Company, as otherwise the traffic offering for these country lines could not be regarded as sufficiently remunerative. Though the Sheffield extension to London did not receive the Royal Assent till March 1st, 1893, as early as 1890 the two companies came to an understanding as to the terms upon which the Metropolitan Company's system should be used, and the agreement embodying this was scheduled to the Sheffield Company's Act of 1893. In effect it provided that the Metropolitan was to get 66 2-3 per

cent. of its mileage proportion of all traffic for the use of its line, the remainder going to the Great Central for working expenses. These are obviously very liberal terms, for, in addition to working the traffic, the Great Central would have to provide, and is providing, at immense expense all the costly terminal facilities for all classes of traffic in London. Under the circumstances it is not surprising that the Great Central is attempting to wriggle out of the agreement of 1890, and in order to force the hand of the Metropolitan has apparently come to an arrangement with the Great Western on the lines indicated. We have no doubt the Metropolitan will be able to take very good care of itself as it has done in former tussles with its big neighbour, thanks to the hold it was given on the Sheffield Company during Sir Edward Watkin's joint chairmanship. It must be recognised that the Great Central will have a longer route *via* High Wycombe, and that it will be adding still further to its already very burdensome capital charges, and even if successful in ousting the Metropolitan, the Great Central's victory will have grave drawbacks. It is to be noted that, according to the terms of the Parliamentary notice, the supply of the whole of the necessary capital by the Great Western is apparently contemplated, as the following excerpt will show:—"If thought fit, to empower the Great Western Company to provide the whole of the capital for the construction of the intended new works, or any of them, and to make provisions for securing the payment of interest on the capital so provided as a first charge on the Great Central Company's proportion of the gross receipts and for the repayment thereof during and at such times, and in such manner as may be prescribed or authorised by the intended Act." In the Great Central Railway Act of 1897 similar provisions were contained with regard to the proposed connection with the Great Western at Banbury, the rate of interest being fixed at 3½ per cent. It is clear the Great Central itself is not in a position to raise the necessary capital for these works, and what is further evident is that the incurring of these additional obligations means the still further postponement of the rights of the ordinary and junior preference stockholders. The Great Central Company is unable to issue ordinary capital, except at a heavy discount, and has been forced to issue "Lloyd's Bonds" to a considerable extent. Further, its rolling stock is being provided at a rental by a separate undertaking to the value of a million sterling; the Metropolitan is constructing the line from Finchley-road to Wembley, for which the Great Central will have to pay, and now the latter is driven to seek the aid of its partner's new enterprises for raising any further capital, making the interest thereon a first charge on its proportion of the gross receipts. As if this were not enough, it has embarked on a sea of litigation with the Metropolitan, and scarcely a month passes by without witnessing a contest between the two companies in the courts. Altogether the relations of the two companies are about as unsatisfactory as they well could be.

### ELECTRICAL RAILWAY DEVELOPMENTS.

In connection with the recent "rig" in District Railway ordinary stock, attention has again been directed to many electrical railway schemes in the Metropolis. For the most part, these projects have not yet reached the practical stage, and some of the suggested lines probably never will—the principal difficulty arising in connection with the provision of the requisite money. So far it cannot be said that the results yielded by capital embarked in electrical railway enterprises offer the least inducement to investors to provide the wherewithal for further schemes. Take the City and South London, for example. It was opened for traffic in

1890, and, in spite of careful management and astute financing, the company has so far only reached the stage of being able to pay 2 per cent. on its ordinary stock, and that security commands in the market only about 65 per cent. of its face value. The line is now being extended to Finsbury-circus, and an extension to Islington is authorised, whilst a Bill is to be brought in next session authorising it to further take in hand the City and Brixton line, thus providing an extension in the south as well. The difficulty of financing these extensions has been considerable, and is sure to cost the ordinary shareholders some temporary, if not permanent, loss of dividend. Next January the new preference capital issued for the northern extension will carry dividend, and this will require 10,000*l.* a year, whilst some further sacrifice may have to be borne by the present system in connection with the Brixton line. On this idea the ordinary stock has been falling of late, and is now quoted at only 65 against 72, the highest this year. The Central London Railway is rapidly proceeding towards completion. This line has probably the best route for traffic of any of the schemes for underground electric traction in the metropolis, and if it does not succeed there will be but scant chance for the others. The Waterloo and City Railway is open for traffic, and its ordinary stock stands at rather over par. But this is due to the favourable terms of its working agreement with the South Western. Practically the latter company allows a 3 per cent. dividend on the ordinary stock of the Waterloo and City Company to rank ahead of its charge for working expenses. Whether sufficient is being earned in the way of gross receipts to justify the present price may be doubted, but the real position cannot be ascertained whilst the traffic figures are buried in the weekly publications of the South Western Company. The Great Northern and City, it will be remembered, appealed to the public three times. The first two appeals were unsuccessful, and the third only partially so, though arrangements were made to allow of the work being proceeded with. Another scheme, the Brompton and Piccadilly-circus, appealed in July for capital, but did not gain sufficient response to justify going to allotment. Of other authorised schemes the most important are the Charing-cross Euston and Hampstead and the Baker-street and Waterloo. The former appealed for capital in 1894 without success, and the Baker-street and Waterloo was until recently being financed by the London and Globe Finance Corporation, a concern whose principal business appears to be the bolstering up of West Australian and North American gold mines, or properties which pose as such. That Baker-street and Waterloo prospects are not thought much of may be inferred from the rise in London and Globe shares which immediately followed upon the report that it had got rid of its interest in the railway project. Under the circumstances it is not surprising that both the Brompton and Piccadilly-circus and the Baker-street and Waterloo companies in their recent notices intimate that next session they propose to change their names. Whatever electric railways may be from a public standpoint, it is clear that investors have as yet shown no anxiety to furnish the wherewithal to construct them. As a relief to the congestion of traffic in the streets there can be no doubt that these lines would in many instances be a great boon and assist in a solution of the vexed question of reasonably quick transit in the unwieldy metropolis. To get from one side of London to the other is frequently a more tedious process than a journey to the south coast or to the midlands simply because for the most part the journey has to be taken by a road vehicle, or by a more circuitous railway journey. In a sense the large dependence placed by Londoners on their trams and omnibuses accounts for the rather slender attrac-

tions given to private enterprise for the construction of these underground lines. The fares which the latter can charge are of course restricted on account of the very low fares charged by the road vehicles, which have no railway to construct or maintain, and do not even contribute to rates and taxes as the railways have to do. This reduction of charges to the lowest possible level is thus indirectly responsible for the lack of better railway facilities, and, therefore, an aggravation of the vexed question of rapid and convenient travel in London. Of course, electric railway enterprise is, in a comparative sense, in its infancy; and improved and cheapened methods of construction and operation may tend to overcome the obstacles placed in the way of private enterprise referred to. In the case of the Metropolitan and District undertakings, too, the suggested conversion from a steam railway to an electric would undoubtedly be a great public benefit; but whether this change can be effected with due regard to the shareholders' interests has yet to be demonstrated, and with this object in view important experiments are now pending. Another sign of the times is that only two important schemes for electric railways in London were put forward in the recent notices of Bills for next session. One was for a line from the Marble-arch to Cricklewood, and the other from Wood-green to the Strand. In addition to the deterrent influence of inordinate street competition may be mentioned the unfortunate attitude usually adopted by the London County Council and other public bodies to these much-needed schemes. Instead of encouragement being given, obstruction of every kind is placed in their way; in fact, if the actual and glaring needs of the metropolis for proper facilities for transit had to be met under existing conditions, we are afraid the position is such that public funds would have to provide most of the capital, and the ratepayers bear the cost.

### LIGHT RAILWAYS AND RED TAPE.

It is no part of our duty to dwell on the shortcomings or broken promises of this or that administration, but when we see the one beneficent measure passed in recent years for the relief of agriculture in danger of shipwreck through the ill-timed officiousness of the Board of Trade, it is high time we should speak out. We refer to the administration of the Light Railway Act, more especially as regards a little line 9 miles in length between Kelvedon and the River Blackwater, promoted under the auspices of the Great Eastern Railway Company. Up to the present time, the success of the Light Railway Act of 1896 has not been conspicuous, but we are glad to see a decided improvement in the number of applications recently filed. This, however, will prove a mere paper prospect, unless the Board of Trade alters its policy as evidenced in the Great Eastern case. When the Light Railway Act was under discussion, we well recollect the controversy regarding the powers of control to be vested in the Board of Trade. It was feared, and as it now appears not without reason, that the enforcement of ordinary railway restrictions would kill light railway enterprises, as the cost of construction, maintenance, and working would be wholly out of proportion to the anticipated traffic. It was represented, however, that the granting of full powers to the Board of Trade was a pure matter of form; that these powers would never, in fact, be used; and that any regulations enforced would be in keeping with the exceptional circumstances. The very wording of the Act, apart from the internal history of the legislation underlying it, bears the impress of the intention, for though sub-section 2 of section 12 states that the general enactments relating to railways apply, sub-

section 4 of section 9 provides that the "Board of Trade" shall modify the provisions of orders for ensuring safety "in such manner as they consider requisite." It was a large discretionary power to vest in any public department, and the manner in which faith has been kept with Parliament and the much-harassed agricultural interest is painfully evident from the Great Eastern case. The Great Eastern Company, we must remark, has been the pioneer encourager of light railways. It was the first railway company in England to offer the right hand of friendship to these local enterprises. Its policy has been this: that when the local authorities helped themselves by contributing one-half the initial cost, the company would make up the other half, construct the line, and work it in perpetuity. The little line we have referred to had complied with these conditions, but just as the contract was about being signed it transpired that the Board of Trade would insist on almost all the restrictive conditions applying to ordinary railways, such as bridges over roadways, gates and gate-houses at level crossings, and so on. That, of course, upset the basis of calculation on which the enterprise rested, and we are not surprised to learn that the Great Eastern Company has washed its hands clean of the matter. A more monstrous piece of interference it would be difficult to imagine. We went to Belgium, Italy, and France for light railway models when similar lines were first projected in this country. Can Mr. Ritchie point to a single instance on the Continent where restrictions like those now sought to be enforced in the Great Eastern case were adopted? What explanation has he to offer regarding the pledges made in Committee and never meant to be kept by the permanent officials, who are apparently his masters? We attach great importance to this case, because we regard it as the thin end of the wedge. If interference be resorted to in one instance it will be in another. Meddling is one of those things whose appetite grows by what it feeds upon. If promoters have hitherto fought shy of light railways, what will be their future attitude? If railway companies in the past have been circumspect in light railway dealings, is the snub administered to the Great Eastern likely to swell enthusiasm? No; agriculturists sorely in need of these vital links with markets may take it from us that the Board of Trade is strangling the Light Railway Act, as surely and as fast as red tape can do it. The Government gave them the Act, but Whitehall is strangling the gift by the sheer impact of officialism. When Parliament meets we shall see who really presides at the Board of Trade; and further, we can learn whether the Government will uphold the shortsighted restrictive policy adopted in the name at any rate of the nominal ruler at the Board of Trade.

### ANOTHER NORTH-WEST ARGENTINE SHUFFLE.

A good many stockholders of the North-West Argentine Railway Company, Limited, must have felt surprised when they saw in last Saturday's papers the report of a meeting, which had been held on the previous Wednesday, of the holders of the company's first debenture stock. This meeting does not appear to have been previously announced in the advertisement columns of the public journals, nor have we heard of any stockholder who received previous notice of it; but we know of more than one instance in which stockholders did not receive any such notice. That the entire proceeding was of a hole-and-corner character may be gathered from the fact that out of four or five hundred registered stockholders only about twenty-five attended the meeting; and even this limited number included the usual string of busybodies who, for some years, have persisted in having a finger

in the North-West Argentine pie on every possible occasion. The meeting seems to have been got up in the interests of the second debenture stockholders, and it is very significant that most of those who supported the resolution were holders of seconds as well as firsts. The substance of the resolution was that the first debenture stock—which under the terms of issue enjoys cumulative rights of interest up to 6 per cent. per annum—be turned for a time into income stock, and it is rather startling to find such an impudent proposal supported by the board, who would, in the ordinary course, be supposed to have the interests of all classes of stockholders equally at heart. The chairman—who appears, from the published reports of his speech, not to know the difference between debentures and debenture stock, or pre-preference bonds and pre-preference debenture stock—advanced the ludicrous argument that the scheme to issue 4 per cent. prior lien debenture stock might be jeopardised if any portion of the first debenture stock interest fell into arrear, as if such a contingency could in any way affect the position or rights of prior debenture stockholders. The only people who can be affected by the accumulation of interest arrears on the first debenture stock are the holders of securities ranking after that stock, and they alone are benefited by the resolution declared by the chairman to have been carried on Monday last. If this resolution be allowed to stand, the precedent it creates will be a permanent menace to the rights of all investors similarly placed to the first debenture stockholders of the North-West Argentine Railway, who have subscribed for their stock on well-defined terms and conditions. That is the serious aspect of the case. The foolery of the position lies in the fact that only last July, after a couple of years of incubation, the board and a stockholders' committee (or both) brought forth a molehill of a scheme as the result of a mountain of labour—a scheme which the wearied stockholders adopted for the sake of peace and quiet; and now, almost before their wretched scheme is carried into effect, it is proposed to depart from it in one of its most important particulars. There must be some limit to the forbearance even of North-West Argentine first debenture stockholders, and it is fortunate for those responsible for all this meddling and muddling that the voting power lies where it does.

### THE GREAT INDIAN PENINSULA RAILWAY.

For the three half-years to December 31st, 1897, the "G. I. P." sustained successive losses in gross receipts, and the large recovery shown in the first half of 1898 is consequently very welcome. It is true the recovery last half-year was not equal to the loss of gross receipts suffered in the corresponding period, on account of famine and plague. In the June half of 1897 the decline in receipts was 480,158*l.*, last half-year the recovery was 386,872*l.* Failure to regain the traffic previously lost may be fairly attributed to the continuance of the plague in the districts served by the company's lines. This is clearly shown by the fact that passenger receipts actually declined in 1898 by 80,004*l.*, and the number of passengers fell off by over a million. The quarantine regulations and medical examinations imposed by the Government in consequence of the plague epidemic of course act as a deterrent to travellers, apart from the natural desire to avoid entering the infected districts. Though, by reason of the recovery in receipts last half-year, the ratio of expenses was considerably reduced it has not reverted to the 1896 level. For 1898 it was 51·61 per cent. against 57·84 per cent. in 1897, and only 46·15 in 1896. In fact, last half-year there was an actual increase in the cost of working per train mile, which was 3*s.* 8*d.* against 3*s.* 6½*d.* in the corresponding

period. There was an actual increase in expenses of 109,923*l.*, but from the abstracts it would appear that a large part of this merely represents the writing down of materials, for under the head of locomotive expenses, carriage and wagon expenses sums of 21,560*l.* and 30,430*l.* respectively are charged for "loss on exchange." The net outcome of the half-year is a profit which permits of a supplementary dividend of 8*s.* 9*d.* per cent. in addition to the guaranteed rate of 5 per cent. For the first half of 1897 it will be remembered the company was in the unfortunate position of being unable for the first time since 1875 to pay any supplementary dividend; on the contrary some small loss fell on the Government in meeting the guarantee. In the first half of 1896 the company's half share of the surplus profits permitted the payment of a supplementary dividend of 12*s.* 6*d.* per cent., so that the proprietors suffer slightly from the failure to recover the ground lost in 1897.

### PASSING NOTES.

The traffic receipts for the week ending December 4th, on thirty-three of the principal lines of the United Kingdom, amounted to 1,644,923*l.*, which was earned on 19,253½ miles. For the corresponding week in 1897 the receipts of the same lines amounted to 1,555,223*l.*, with 19,034½ miles open. There was thus an increase of 89,700*l.* in the receipts, and an increase of 219 in the mileage. The aggregate receipts for twenty-three weeks to date amounted on the same thirty-three lines to 41,398,439*l.*, in comparison with 40,072,802*l.* for the corresponding period last year; increase, 1,325,637*l.*

The Trade and Navigation Returns for November show exports amounting to 19,820,207*l.*, an increase of 46,613*l.*, or 0·2 per cent., on the corresponding month of 1897, the imports amounting to 42,069,569*l.*, an increase of 903,423*l.*, or 2·1 per cent. The value of the iron and steel exports was 1,854,937*l.*, against 2,179,513*l.*, a decrease of 15·3 per cent.; and of coal and coke exports 1,732,950*l.*, against 1,438,736*l.*, an increase of 20·4 per cent. Imports for eleven months ended November 30th amounted to 425,346,792*l.*, an increase of 15,514,591*l.*, or 3·7 per cent.; exports to 212,412,384*l.*, a decrease of 3,635,438*l.*, or 1·2 per cent., and re-exports to 55,084,817*l.*, an increase of 240,318*l.*, or 0·2 per cent.

Evil associations are notoriously demoralising, and this may account for the directors of the Great Southern of Spain Railway Company, Limited, being afflicted with a prominent trait of the Spanish national character—dilatoriness. We are now almost in the middle of December, 1898, but only on Monday last did the report of the Great Southern Company for the year ending December 31st, 1897, make its appearance. Possibly, though, the delay is owing to the vast magnitude of the company's business—a turnover of 28,321*l.* resulting in a net loss of 4,097*l.*

In our last issue we recorded that Mr. Robert Miller and Mr. Carl Meyer—both intimately associated with Rothschild interests—had joined the board of the Pekin Syndicate, Limited. We now hear that all the other members of the board have cleared out, and at this we are not in the least surprised. The dubious methods of the Pekin Syndicate, to which we have so often referred, were not likely to commend themselves to gentlemen of the standing of Mr. Miller and Mr. Meyer, and it was obvious that the new directors and the old would soon part company.

The Barnoldswick Railway Company, which was incorporated in 1867 with an authorised capital of 53,300*l.*, of which 40,000*l.* in shares has been issued with 27,695*l.* paid up, has been worked in conjunction with the Midland Railway Company, and although the line is only 2 miles in length, dividends of 5 per cent. have been declared. The shareholders have sanctioned the sale of the property, which has now been taken over by the Midland Company, the price paid being 52,000*l.*—a sum sufficient to pay the ordinary shareholders 1*l.* for each 10*l.* held.

The executive committee of the Amalgamated Society of Railway Servants has repudiated the action of the London

council in waiting upon the Liberal and Conservative Whips to ascertain what support Mr. R. Bell, the general secretary of the A.S.R.S., would be likely to receive from the party organisations. The committee condemns the action of the London council as "irresponsible," "unauthorised," and as a violation of the decision arrived at that their representative must hold himself quite independent of both political parties.

The ninth annual dinner of the Great Northern Railway Athletic Association, of which Mr. F. W. Fison, M.P., is president, was held at the Holborn Restaurant on Saturday night, when Sir Henry Oakley (a director of the company) occupied the chair, being supported by Mr. Steel (general manager), Mr. Ross (engineer), Mr. Grinling (assistant-general manager), Mr. Colchester (registrar), and many other officials.

The Great Northern Railway Company have recently obtained a successful result in some artesian boring operations they have had carried out at Werrington, near Peterborough Station. At a depth of 132ft. a splendid overflowing spring has been struck, which rises to the height of 20ft. above the surface. The flow is at the rate of 300,000 gallons per diem, which would suffice to supply a town of over 10,000 inhabitants.

At a meeting of the general committee of the National Cyclists' Union, held at the offices, Lonsdale-chambers, Chancery-lane, Mr. Todd reported that both counsel who had been engaged on behalf of the plaintiff in the railway test case advised the union not to appeal against the decision of Mr. Justice Channell in favour of the Great Northern Railway Company. Acting on this advice, it was decided not to appeal.

The Great Northern Railway Company announce that as from December 1st the minimum weight which formerly applied to the despatch of parcels from and to their stations at "owner's risk" will be abolished, and in future the various traffics will be charged at actual weight.

The Board of Trade has confirmed the St. George and Hanham Light Railway Order, 1898, authorising the construction of a light railway from Summerhill-road, in the city of Bristol, to Hanham, in the parish of Kingswood, in the county of Gloucester.

Mr. M. P. Buckley, of Cork, has issued a pamphlet containing a collection of opinions bearing upon the Forged Transfers Acts, and strongly urging their adoption.

The Swansea and Mumbles Railway Company have offered to lease their undertaking to the British Electrical Traction Company.

## Money and Stock Markets.

*The monthly settlement in Consols takes place on the 5th prox.; the fortnightly settlement in other Securities commences on the 13th inst.*

CITY, FRIDAY EVENING.

Money is in very quiet demand, at about 2 per cent. for day-to-day accommodation, and 2½ to 2½ for short loans. In the discount market brokers found difficulty in getting more than 3 3-16 per cent. for three months' choice paper, although the supply of bills was somewhat larger. The Bank of Bengal has increased its minimum rate of discount from 5 to 6 per cent. The Bank of Norway has raised its rate of discount from 5 to 5½ per cent. The India Council to-day renewed and lent loans to a large amount in the aggregate at 3 per cent. till the 31st inst. Gold is still wanted for Germany in the open market at 78*s.* per ounce. The Bank Return issued yesterday shows that the exports of gold, together with considerable withdrawals of coin into circulation, have reduced the reserve by 949,000*l.* to 20,869,000*l.*, though its proportion to the current liabilities is 1½ higher at 50½ per cent. The market, however, has been reimbursed by Government payments, shown in a decrease of 229,000*l.* in the public

deposits and the return of pawned Consols to the Bank, which caused an increase of 685,000*l.* in the Government securities; so that the private deposits are only 2,668,000*l.* lower, almost the whole of which is accounted for by the repayment of last week's loans, as shown in a decrease of 2,552,000*l.* in the "other securities." Since the Return was made up gold to the amount of 60,000*l.* has left the Bank for abroad.

The Bankers' Clearing-house return for the week ending December 7th, 1898, shows a total of 163,438,000*l.*, as compared with 136,090,000*l.* for the corresponding period last year.

Subjoined is a comparison of the present position of the Bank of England, the Money Market, the prices of Consols, French Rentes, &c., with the position at the corresponding period of last year:—

	At Present.	Same Week last Year.
Coin and Bullion .....	£31,250,743	£32,177,114
Total Reserve .....	£20,869,378	£21,854,419
Proportion of Reserve to Liabilities...	50½ per cent.	50 per cent.
Notes in Circulation .....	£27,181,365	£27,122,695
Bank Rate of Discount .....	4 per cent.	3 per cent.
Open Market ditto .....	3½ per cent.	2½ per cent.
Consols (account) .....	110½d	113½d
French Rentes (account) .....	102 <i>fr.</i> 77 <i>c.</i>	103 <i>fr.</i> 80 <i>c.</i>
Paris Cheque Exchange .....	25 <i>fr.</i> 31½ <i>c.</i>	25 <i>fr.</i> 21½ <i>c.</i>
New York 60 days ditto .....	\$481½	\$482½

Silver bars are now quoted at 27½*d.* per oz., being 1-16*d.* higher on the week. A year ago the price was 27½*d.*

Eastern exchanges are telegraphed as follows:—Bombay, 1*s.* 3 31-32*d.*; Calcutta, 1*s.* 3 31-32*d.*; Hong Kong, 1*s.* 11 5-16*d.*; Shanghai, 2*s.* 8½*d.*; Singapore, 1*s.* 11 13-16*d.*

The premium on gold at Buenos Ayres has risen during the week from 113-00 per cent. to 115-10 per cent., making the paper dollar (nominally worth 4*s.* 2*d.*) now actually worth 1*s.* 10-14*d.* A year ago the premium was 175 per cent., and the value of the paper dollar 1*s.* 5-29*d.*

The Valparaiso 90-day exchange comes over to-day at 12 13-16*d.*, being ½*d.* lower on the week. A year ago it was 17 11-16*d.*

The Rio de Janeiro exchange on London is 7 13-16*d.*, being ¾*d.* lower on the week. A year ago it was 7 7-32*d.*

A holiday feeling is already beginning to pervade the STOCK MARKETS, and the promised "Christmas boom" scarcely looks like coming off. In the absence of business, prices to-day had rather a drooping tendency, though the movements were not sufficiently pronounced to call for particularisation.

The principal movements *on the week*, so far as they relate to securities in which the readers of this journal are likely to be most interested, are set forth in the following table:—

Name of Stock.	Rise.	Fall.	Name of Stock.	Rise.	Fall.
<i>British Funds, &amp;c.</i>			<i>Colonial Railways.</i>		
Consols, 2½ per cent. ....	—	—	Canadian Pacific .....	—	1½

The Stock Exchange Committee has ordered that the under-mentioned securities be quoted in the Official List:—Entre Rios Railways Company, Limited—1,558,505*l.* ordinary stock and 1,648,330*l.* 5 per cent. cumulative preference stock, in lieu of the ordinary shares and 5 per cent. cumulative preference shares now quoted.

For the preparation of interest warrants the transfer books of the Grand Trunk Railway Company of Canada will be closed as follows:—Perpetual 5 per cent. debenture stock (Grand Trunk borrowed capital) and perpetual 4 per cent. consolidated debenture stock from December 19th to January 13th, and the 5 per cent. perpetual debenture stock (Great Western borrowed capital), and 4 per cent. perpetual debenture stock (Northern borrowed capital) from January 17th to 31st.

Mr. William Henry Gramshaw has ceased to be a member of the Stock Exchange.

The London and Tilbury Lighterage Contracting and Dredging Company, Limited, will pay on the 19th inst. an ad interim dividend at the rate of 5 per cent. per annum for the six months ended September 30th last.

#### ARGENTINE RAILWAY ITEMS.

Elsewhere will be found reported a meeting of North West Argentine Railway debenture stockholders, and an article on the subject appears in our leader columns. Under the heading of "New Companies" will be found a notice of the issue of 6 per cent. debenture stock by the Santa Fé and Cordova Southern Extension Railway Company, Limited.

The Western of Santa Fé Railway Company has applied to the Argentine Congress for leave to extend its line from Juarez Celman to Rio IV, joining up with the Villa Maria-Rufino line. The Santa Fé Provincial Government has exempted the Western Railway Company from payment of taxes for a further period of ten years.

The report of the Compagnie de Chemins de fer de la Province de Santa Fé (Argentina) for the year 1897 states that the gross earnings amounted to \$3,333,146, and the working expenses to \$2,867,842, being an increase of receipts of \$104,602 as compared with 1896; but the expenses have increased on those of 1896 by \$261,979. The net receipts for 1897 were therefore \$465,304, as against \$622,681 in 1896. The cause of the increased expenses has been principally the large expenditure in repairs and purchase of rolling stock, and this must be continued during the current year. These outlays should have been undertaken before this, but they were delayed as long as possible in the hope that some settlement would be effected with the Provincial Government. The transport of cereals in 1897 was only 8-80 per cent. of the gross traffic, whilst in 1896 it was 15-80 per cent.; the tonnage was 56,000, as against 110,000 in 1896. That this was an abnormal state of affairs is shown by the fact that in the first four months of 1898, 114,240 tons of cereals have been carried, as against 26,000 in the corresponding period of 1897.

**Preventable Railway Accidents.**—Mr. R. Bell, general secretary of the Amalgamated Society of Railway Servants, has had an interview with Mr. Hopwood, of the Board of Trade, at which the question of the method which might be adopted to prevent railway accidents to men in the course of their employment was fully gone into, especially the accidents so common among shunters and goods guards. Mr. Bell urged the necessity of the adoption of some kind of automatic coupling being affixed to the wagons. He pointed out that brakes ought to be put on both sides of the wagons, which ought also to have labels on both sides. Mr. Hopwood has recently visited America with a view to making inquiry as to the nature of the safety appliances which are in use there, and he stated to Mr. Bell that it was the intention of the Board of Trade to press for a short Act to be passed during the next session of Parliament, dealing with the matter, and which will make the adoption of some form of automatic coupling compulsory. As to the labelling of wagons on both sides there are legal difficulties in the way, but it is hoped that these may soon be removed.

## Directors' Reports.

### PERUVIAN CORPORATION, LIMITED.

#### CAPITAL.

The balance-sheet to June 30th, 1898, shows the issued capital to be as follows:—Ordinary stock, 9,000,000*l.*; cumulative 4 per cent. preference stock, 7,500,000*l.*; debenture bonds, 3,700,000*l.*

#### REVENUE.

The net receipts derived from the railways in the year ending June 30th, 1898, were 103,230*l.* (against 78,017*l.*); from guano sales 35,146*l.* (against 57,196*l.*); from registration fees, &c., 232*l.* (against 199*l.*); making a total revenue of 138,608*l.* (against 135,412*l.*). Expenses of administration absorbed 10,315*l.*; interest on bonds, 111,000*l.*; and interest and commission, 529*l.* (together 121,844*l.*), leaving a surplus on the year's working of 16,764*l.* Adding the balance brought forward from previous year 44,723*l.*, and deducting a special item of 435*l.*, there was 61,052*l.* to be carried forward.

The following table shows in sterling the traffic receipts and expenses of the railways (including the Mole) in which the corporation is interested, and of the navigation of Lake Titicaca and the River Desaguadero, for the financial year ending June 30th, 1898:—

	Gross Receipts.	Working Expenses.	Net Receipts.
Southern Railway .....	£132,680	£83,413	£49,267
Central Railway .....	116,250	83,542	32,708
Trujillo Railway .....	37,777	18,579	19,198
Pacasmayo Railway .....	11,415	8,283	3,133
Payta to Piura Railway .....	16,055	13,781	2,274
Lake Steamers .....	13,025	6,818	6,187
Navigation of River Desaguadero .....	1,768	1,436	332
	£328,970	£215,872	£113,098

Adding rent of the Pisco to Yca line 2,759*l.*, the total net earnings of all the lines were 115,857*l.* In 1896-7 the net earnings were 88,092*l.*, in 1895-6 106,452*l.*, in 1894-5 99,692*l.*, in 1893-4 80,524*l.*, in 1892-3 90,606*l.*, in 1891-2 137,817*l.*, and in 1890-1, 91,772*l.*

The following table shows in Peruvian currency (discarding fractions) the results of the working of the railways and steamers for the years 1890-91 to 1897-98:—

Year.	Gross Receipts.	Working Expenses.	Net Receipts.	Rate of Exchange of Peruvian Sol.	Net Receipts in Sterling at such Rate.
	Peruvian Soles.	Peruvian Soles.	Peruvian Soles.		
1890-91	1,840,008	1,244,733	595,275	37 <i>d.</i>	£91,772
1891-92	2,487,292	1,514,468	972,824	34 <i>d.</i>	137,817
1892-93	2,284,865	1,535,847	749,018	29 <i>d.</i>	90,506
1893-94	2,522,920	1,749,888	773,032	25 <i>d.</i>	80,524
1894-95	2,577,064	1,622,621	954,443	24½ <i>d.</i>	97,433
1895-96	3,027,760	1,992,937	1,034,823	24 <i>d.</i>	103,432
1896-97	3,230,479	2,331,317	899,162	22½ <i>d.</i>	85,233
1897-98	3,324,335	2,181,449	1,142,886	23½ <i>d.</i>	113,098

#### RAILWAYS AND NAVIGATION.

"Payta to Piura Railway.—The net earnings of this railway amounted, in Peruvian currency, to S 22,980, compared with S 1,870 in the preceding year, an increase of S 21,110. The absence of greater improvement in the traffic of the railway is attributed by the management to general depression in trade and to the want of rain, no heavy rainfall having been experienced since 1891. A wet season is expected every seven years, but this year has proved to be an exception. The board regret that the Peruvian Government have not yet assented to the use for public traffic of the Railway Mole, a work constructed in compliance with the demands of the Government, and passed by the Government engineers upwards of three years ago. Pacasmayo and Guadalupe Railway.—The net receipts from this railway amounted to S 31,655, against S 16,086 in the preceding year, an increase of S 15,569. The Pacasmayo Mole is still worked by this company under an arrangement with the lessees from the Peruvian Government, the company paying, as rental, 20 per cent. of the gross receipts. Trujillo Railway.—The net income from this railway during the past year was S 193,997, compared with S 149,773 in the preceding year, an increase of S 44,224. It will be seen that the amount brought into the revenue account of the corporation, in respect of payments made by the Trujillo Railway Company for the past year, is 10,374*l.*, which represents interest during the year under review, and arrears, on the corporation debentures served by the company. In the net revenue account of the railway company, after charging the debenture interest for the year, there remained a credit balance to the amount of 9,738*l.*, but as the capital expenditure by the company during the past and preceding years has had to be met out of net revenue for want of the necessary working capital, the directors of the railway company were unable to recommend the payment of a dividend, which otherwise would have enabled the corporation to bring into their revenue account a considerable additional amount. The capital expenditure above referred to was incurred in respect of extensions undertaken for the purpose of obtaining traffic from several sugar estates in the district served by this railway. The traffic from those estates is considerable and is capable of yielding a good return. The Peruvian Government having accepted the tender of a local syndicate for the reconstruction of the Salaverry Mole, and for the lease of the Mole thereafter, the railway company have agreed to cancel the existing

lease (which would otherwise remain in force until June 10th, 1900), and to give up possession of the Mole, on being paid the amount of expenditure on repairs and compensation for cancellation of the lease. The company are still working the Mole, pending such payment and subject to the arrangements for reconstruction. Central Railway.—The net earnings of this system during the past year amounted to S 330,518, against S 226,086 in the year 1896-7, an increase of S 104,432. The improvement in the net earnings is attributable partly to an increase of S 74,304 in the gross receipts and partly to a saving of S 30,128 in the working expenses. The cost of clearing landslips has been somewhat heavy, but the expenditure for river defences has materially decreased owing to the thorough nature of the works executed for this purpose in the two previous years. It is satisfactory to state that of the increase in the gross receipts about S 40,000 arises from the carriage of ores, there having been a considerable exportation of ores from Cerro de Pasca, which district is stated to be showing signs of renewed activity. Pisco to Yca Railway.—This railway continues to be held by Mr. Schreitmüller, as lessee. The net rent payable to the corporation amounted during the past year to S 27,887, against S 30,628 in the preceding year. Chimbote Railway.—This railway is still held by Messrs. Haines and Co., as lessees, upon terms which have been indicated in previous reports. It is sufficient to state that no income is at present derived by the corporation from this property. Southern Railway.—The net earnings of this system amounted during the past financial year to S 497,861, compared with S 446,354 in the preceding year, an increase of S 51,507. This increase arises wholly from a reduction in the working expenses. Navigation of Lake Titicaca and River Desaguadero.—The net earnings of the lake steamers during the past year were S 62,520, compared with S 49,794 in the previous year, an increase of S 12,726. The river Desaguadero navigation produced a net profit of S 3,354, against S 9,198 in the preceding year, a decrease of S 5,844, arising chiefly from an increase of working expenses, in consequence of the reconstruction of one of the river steamers. It must be remembered that the net profit derived from the lake and river navigation is not the only benefit to be taken into consideration, as the lake and river traffic goes also over the Southern system.

#### GUANO.

"The net income from this source during the past financial year amounted to 35,146*l.*, against 57,196*l.* last year, which amount, however, included the sum of 25,000*l.* paid by the Anglo-Continental Guano Works, under agreement, on the termination of their contract. Having regard to the high rates of freight ruling during the past year, being on an average about 7*s.* 6*d.* per ton in excess of the rates of the previous year, the above result may be considered satisfactory.

#### LAND.

"The position of the colony remains practically the same as at the date of the last report of the directors, and, as indicated in that report, no material progress is possible until the means of communication and transport between the colony and the terminus of the Central Railway at Oroya have been improved. The market price of coffee during the past year has fallen considerably, and this has not tended to lessen the difficulties encountered in the administration of the colony. The efforts of the board have been constantly directed to the diminution of expenditure, which they have endeavoured to keep at the lowest possible point.

#### NEGOTIATIONS WITH THE PERUVIAN GOVERNMENT.

"At the last general meeting of the corporation the chairman communicated to the stockholders the terms of the authority given by the Peruvian Congress to the Government of Peru with a view to an arrangement with the corporation. The authority was, shortly, as follows:—(1) To proceed to a liquidation of accounts and to agree with the corporation as to the form and terms of payment of any balance which might result from the liquidation. (2) Peru to be entirely exempted from the annuity of 80,000*l.* without, however, imposing upon her any further obligations beyond those specified in the contract or making any innovation with regard to the cancellation of the old external debt. (3) The authority to expire on July 27th, 1898. In pursuance of the authority so given the Peruvian Government appointed a Commission 'for the purpose of formulating the basis for a definitive arrangement, and initiating the necessary steps with the corporation.' The Commission in due course had conferences with the representative of the corporation in Lima, and ultimately proposed to the corporation an arrangement upon certain bases fixed by them in conformity with the narrow limits of the authority granted as above by the Legislature. As was anticipated by the representative of the corporation in his interviews with the Commission, the board of directors upon examination of the proposed bases found themselves quite unable to assent to an arrangement upon the terms proposed, which in the view of the board were entirely wanting in that equitable consideration of the rights of the old Peruvian bondholders who had relieved Peru of an enormous debt of upwards of 50,000,000*l.* sterling, principal and interest, in consideration of engagements and obligations on the part of Peru which it was now sought to cancel. The Peruvian Government have not made, and with such a limited authority from Congress it would seem that they were unable to make, any further efforts towards an arrangement with the corporation, but it is reported by cable that they have obtained from Congress a renewed authority, valid until July 27th, 1899, to settle with the corporation 'on the same terms' as those contained in the law passed by the session of 1897, and indicated above. As those terms are quite inadmissible, it would appear to be hopeless to expect that, during the course of the current financial year, any material progress can be made towards the settlement of the long-pending questions between the corporation and the Peruvian Government.

"It may be mentioned that Señor Canavaro, the Peruvian Minister to Great Britain, France, and Italy, in a report to his Government, dated June 20th, 1898, and published in the Lima newspapers of October 22nd last, says:—'The fact of the questions pending between the supreme Government and the Peruvian Corporation remaining unsettled is probably one of the conditions of the present bad state of affairs. It would, therefore, be a desideratum that the honourable Congress should deal in all preference with this question, which I consider to be of vital importance for the country, because an early and satisfactory settlement for both parties would contribute to raise our credit in Europe, and would place the corporation, whose interests are bound up with ours, in a position to meet her obligations.'"

### GREAT INDIAN PENINSULA RAILWAY.

#### CAPITAL.

The capital expenditure during the half-year ending June 30th, 1898, amounted to 21,086*l.*, of which 12,442*l.* was on stations and 4,027*l.* on rolling stock and machinery. The aggregate amount expended to date was 25,284,073*l.*, whilst the receipts had been as follows:—Capital stock, 20,000,000*l.*; loans, 2,970,900*l.*; irredeemable debenture stock (2,701,450*l.* less discount 225,891*l.*), 2,475,559*l.*; capital not bearing interest, 286,056*l.*; total, 25,732,515*l.* Credit balance, 448,442*l.*, of which 381,564*l.* was represented by stores in hand and in transit.

In August last debenture bonds to bearer to a total amount of 250,000*l.*, carrying interest at the rate of 3 per cent. per annum, and repayable on June 30th, 1905, were issued with the sanction of the Secretary of State for India in Council. This additional capital was required to meet expenditure in connection with the branch lines of railway which this company has been authorised to construct, as part and parcel of its system, in the province of Khandesh.

#### REVENUE.

The gross receipts on this account for the half-year ending June 30th were as follows:—

	1897.	1898.
Coaching.....	£370,661 ...	£302,982
Goods.....	1,051,793 ...	1,595,346
Electric telegraph earnings.....	4,136 ...	3,535
Sundries.....	13,134 ...	14,733

Total receipts..... £1,439,724 ... £1,826,596

The expenditure on revenue account during the same period was as follows:—

	1897.	1898.
Maintenance of way, works, and stations.....	£235,332 ...	£179,786
Locomotive expenses.....	307,575 ...	360,788
Carriage and wagon expenses.....	71,302 ...	167,444
Traffic expenses.....	135,169 ...	140,863
General charges.....	61,574 ...	61,518
Special and miscellaneous expenditure.....	21,775 ...	32,251

Total expenditure..... £832,727 ... £942,650

Compared with the corresponding half of 1897, the receipts for the past half-year show an increase of 386,872*l.*, the expenditure an increase of 109,923*l.*, and the net earnings an increase of 266,949*l.*

The net profit, expressed in Indian currency, amounts to Rs.96,43,045, subject to the following deductions, namely:—

Payment to Government in respect of State lines worked by the company.....	Ra.2,63,482
Guaranteed interest for the half-year.....	64,82,315
Contribution to Provident Fund.....	94,174
Estimated additional contribution to Provident Fund under revised rules, from January 1st, 1898.....	78,300

Ra.66,18,271

leaving a surplus of Rs.27,24,744, equally divisible between the Government and the company. Of the company's share, Rs.13,62,387, the portion required for distribution in this country has been remitted from India at the exchange of 1*s.* 4*d.* per rupee, and the directors propose that a dividend of 8*s.* 9*d.* per cent. shall be declared and paid to the proprietors of capital stock, in addition to the guaranteed interest of the half-year.

#### TRAFFIC, &c.

The number of passengers carried during the past half-year was 4,620,187 (against 5,608,133 in the corresponding period); the quantity of goods carried, 1,636,610 tons (against 1,253,800 tons); the train mileage 5,155,564 (against 4,673,304); the receipts per train mile, 7*s.* 14*d.* (against 6*s.* 2*d.*); the expenses per train mile 3*s.* 8*d.* (against 3*s.* 6*d.*); the length of line owned, 1,288 miles (in both half-years); the length of foreign lines worked over, 203½ miles (in both half-years); and the ratio of expenses to receipts, 51.61 per cent. (against 57.84 per cent.). The report states:—

"It will be seen that, compared with the corresponding period of 1897, there was a decrease in the aggregate number of passengers carried of 1,002,277, with a diminution in the receipts of 80,004*l.*, due to the continuance of the plague epidemic and the consequent restrictions on the travelling public imposed by Government, which necessitated the strict medical examination of all third-class passengers.

"The statement comparing the weight of and earnings from staple commodities carried during the half-year with those of the corresponding period in 1897 exhibits satisfactory increases, especially in cotton, wheat, and seeds, due principally to excellent crops and to the large demand for wheat in Europe. There was, however, a decrease under the head of railway plant and rolling stock, the conveyance of material for the Indian Midland Railway extensions, which occurred in 1897, having ceased.

#### PROVIDENT FUND.

"The inadequacy of the company's provident fund as a provision for members of the staff in India on retirement from the service has for some time been under the consideration of the board and of Government, and at length Government have suggested the adoption of the recently revised rules for State railway provident funds, so far as they may be applicable to the conditions of the guaranteed railways. The acceptance of these rules will necessitate a larger contribution both by the company and the staff, and while the general principle has been approved by the board, the precise terms of the new scheme have been referred to the agent in India for report. Pending decision of the question, it has been considered advisable, with the consent of Government, to reserve the sum of Rs.78,300 as the estimated additional contribution by the company for the current half-year in view of the new rules being adopted, and that amount has accordingly been charged against revenue, but is for the present held in suspense. A resolution approving the action of the board will be submitted to the proprietors."

### MADRAS RAILWAY.

#### CAPITAL.

The expenditure on capital account to June 30th, 1898 (including 249,465*l.* for stores), amounted to 11,194,923*l.*, whilst the receipts had been 11,162,888*l.*—viz., shares and stock, 10,257,630*l.*; loans, 898,000*l.*; sundries, 7,253*l.*; debit balance, 32,035*l.* The capital expenditure for the past half-year amounted to 22,051*l.*, of which 14,574*l.* was on lines open for traffic, and 4,107*l.* on working stock.

#### REVENUE.

The gross receipts for the half-year ending June 30th were as follows:—

	1897.	1898.
Coaching traffic.....	£209,889 ...	£205,889
Goods traffic.....	311,275 ...	299,976
Electric telegraph earnings.....	959 ...	780
Sundries.....	8,587 ...	9,872

Total receipts..... £530,710 ... £516,517

The expenditure on revenue account for the same period was as under:—

	1897.	1898.
Maintenance of way, works, and stations.....	£56,843 ...	£49,639
Locomotive expenses.....	95,223 ...	87,748
Carriage and wagon expenses.....	26,532 ...	21,087
Traffic expenses.....	37,096 ...	38,498
General charges.....	26,091 ...	26,261
Special and miscellaneous expenditure.....	5,708 ...	3,903

Total expenditure..... £247,493 ... £227,136

The balance of net earnings applicable towards the half-year's guaranteed interest was thus 289,381*l.*, against 283,217*l.* for the corresponding half of 1897.

Compared with the corresponding half of 1897, the receipts show a decrease of 14,193*l.*, the expenditure a decrease of 20,357*l.*, and the net earnings an increase of 6,164*l.*

The result of the working for the half-year shows that, after providing for the payment of guaranteed interest on capital and debentures, and the contribution to the Provident Institution, there remains a surplus of Rs.2,18,184, the company's share of which is Rs.1,09,092. This amount is subject to certain deductions—viz., Rs.19,637 on account of interest on 100,000*l.* debentures for the Calicut-Cannanore line, and also a further contribution of Rs.37,187 to the Provident Institution under the revised rules which the board, at the instance of the Government, and for the improvement of the fund, have agreed to accept. This reduces the total of net profits to Rs.1,61,360, the company's share of which is Rs.80,680. From this sum the directors propose to pay, in January next, in addition to the guaranteed interest, a dividend of 1*s.* for every 100*l.* stock.

#### TRAFFIC, &c.

The number of passengers carried (exclusive of troops and police) was 4,657,577 (against 5,116,250); the quantity of goods carried, 481,350 tons (against 499,818 tons); the number of train miles run, 1,265,284 (against 1,262,217); the ratio of expenses to receipts, 43.97 per cent. (against 46.63 per cent.); the receipts per train mile, 8*s.* 14*d.* (against 8*s.* 4½*d.*); and the expenses per train mile 3*s.* 7*d.* (against 3*s.* 11*d.*); the average length of line worked, 840 miles in each half-year.

### BAHIA BLANCA AND NORTH WESTERN RAILWAY.

#### CAPITAL.

The expenditure to June 30th, 1898, amounted to 1,697,431*l.*, and the receipts to 1,670,500*l.*—viz., 6 per cent. preferred shares, 100*l.* each, 1,349,500*l.*; 4 per cent. first debenture stock, 300,000*l.*; profit on investments, carried to this account, 21,000*l.*

#### REVENUE.

The gross receipts for the year ending June 30th, 1898, amounted to 39,873*l.* (against 38,518*l.* for the previous year), the working expenses to 35,663*l.* (against 29,676*l.*), and the profit to 4,210*l.* The net revenue account—after adding balance brought forward, 332*l.*; and interest, 15,761*l.*; and deducting debenture stock interest, 11,500*l.*; and sundries, 1,106*l.*—shows an available balance of 7,692*l.* The report states:—"As the reserve fund can properly be drawn upon to equalise dividends, the directors propose to realise sufficient of the Argentine Railway guarantees rescission loan bonds to enable them to distribute a dividend of 1*l.* 10*s.* upon each preferred share, free of income-tax."

#### TRAFFIC.

The number of passengers carried in the year was 20,322 (against 21,428 in the previous year); the quantity of freight carried, 33,638 tonnes (against 40,360 tonnes); the train miles run, 114,583 (against

120,069); the receipts per train mile, 6s. 11½d. (against 6s. 4½d.); expenses per train mile, 6s. 2½d. (against 5s. 0½d.); net profit per train mile, 8½d. (against 1s. 5½d.); the receipts per tonne of goods, 13s. 5½d. (against 14s. 6d.); length of line worked, 234 miles (against 177 miles); ratio of working expenses to receipts, 89·44 per cent. (against 77·04 per cent.). The report states:—

#### GENERAL.

"It will be seen that the district traversed by the line continues to give increased business to the railway, and the decrease in the net result as compared with the previous year is due almost entirely to the reduction in construction traffic on the one hand, and on the other to the cost of maintaining the additional length of line. To these main causes, which do not need further explanation, must be added the low price of wool during 1897-8, and the consequent lack of funds in the district for camp improvements, which weakened the receipts from March to September, 1898. This depression appears to have passed off, and the new wool is now coming forward in larger quantities and selling at better prices than last year. Flocks have suffered to some extent from a dry winter, but rain had fallen in the middle of October and much improved the camps.

"Hitherto our traffic has consisted mainly of cattle and sheep products, and it has been the constant endeavour of the board and management to promote cereal cultivation along the line. With this view, every facility has been given to landowners and colonists for the subdivision and settling of the land. This year colonists, who have suffered from the locusts in the northern provinces, have come to our district where cheap land is to be had in abundance, and where, if locust visitations are experienced, they arrive too late to do extensive damage to wheat. At five points along the line wheat has been sown this season, and, given favourable weather, agricultural produce should show for the first time in our receipts during the current year.

"As the one building erected in 1897 proved insufficient to accommodate all the produce offered, the capacity of the market has been since doubled. Two large warehouses, each 820ft. by 66ft., are now in use, together with accessory buildings, and the continued increase in wool traffic proves the benefit to the railway of establishing this market at Bahia Blanca. Last year better prices were obtainable for Pampa wools there than elsewhere, and the undertaking has now been fairly launched, with every prospect of success."

#### DONNA THEREZA CHRISTINA RAILWAY.

The accounts for the year ending June 30th, 1898, show that the gross receipts amounted to \$126,131 (against \$132,081 in the previous year), and the expenditure to \$405,224 (against \$349,390), leaving a loss of \$279,093, equal, at exchange of 7½d., to 8,867½l., exclusive of London office expenses 2,535½l., income-tax 650½l., and other expenses amounting to 229½l. Government guarantee 44,173½l., balance from previous account 16,406½l., sundry credits 1,300½l. (together 61,779½l.) were sufficient to meet the interest charges, sinking fund, and loss on working, to pay a dividend of 1½ per cent. on the preferred shares, to place 2,000½l. to working capital account, and to leave 15,126½l. to be carried to credit of next account. Length of line opened, 72½ miles. As the preferred shares are entitled to a cumulative dividend of 7 per cent. per annum, there will be a sum due to them of 16,992½l. in respect of the year ended June 30th, 1898, in addition to previous arrears. The report states:—

"On June 16th last Messrs. N. M. Rothschild and Sons notified through the press that the Brazilian Government had decided to pay the railway guarantees in 5 per cent. funding bonds, secured on the Customs, instead of in gold as hitherto, during a term of three years from July 1st, 1898. No previous intimation of this step had been given to the company, and no opportunity was afforded of discussing the intended change, or the consequences thereof, either directly with the Brazilian Government or through Messrs. Rothschild. The directors have sent the general manager to Rio de Janeiro, to place before the authorities the serious loss which the company suffers under the funding scheme. They regret, however, that up to the present time no measure has been adopted, or promised, which would in any way compensate the company for this loss. The guarantee for the second half of the year was therefore received in funding bonds, which have been sold at an average of 79½, realising a net amount of 17,803½l. The amount due from the Government was 22,086½l.

"Ninety-seven debenture bonds have been drawn during the year, and paid off under the terms of the trust-deed—the total amount of debenture capital redeemed to date is 105,500½l.

"In September, 1897, heavy floods, and in October a strike of workmen occurred, causing great loss and interruption of traffic.

"The bridge at Marcella (kil. 105) was partially, and that at Barra (kil. 99) entirely destroyed. The plans for their reconstruction are under the consideration of the Brazilian Government."

#### ASSAM-BENGAL RAILWAY.

##### CAPITAL.

The capital expenditure during the half-year ended June 30th, 1898, amounted to Rs.84,32,997, making a total to date of Rs.6,90,73,309, whilst 1,500,000½l. had been received from the issue of stock, 2,219,898½l. had been advanced by the Secretary of State, and 513,135½l. (including 13,135½l. premiums) had been raised by the issue of 3 per cent. debentures.

Under the contract with the Secretary of State the guaranteed interest as from July 1st, 1898, is at the rate of 3 per cent. per annum, instead of at the rate of 3½ per cent. per annum as heretofore. The board recommend that a dividend for the half-year ending December 31st, 1898, be declared at the rate of 3 per cent. per annum, payable out of the guaranteed interest receivable from the Secretary of State in Council of India.

#### REVENUE, TRAFFIC, &c.

The accounts for the half-year ending June 30th, 1898, show a gross revenue of Rs.6,73,045 (against Rs.5,21,857), an expenditure of Rs.4,48,386 (against Rs.5,03,258), and a profit of Rs.2,24,658 (against Rs.18,599). The number of passengers carried was 681,783 (against 506,356), and the quantity of goods carried 224,975 tons (against 159,600 tons). The ratio of expenses to receipts was 66·62 (against 90·43) per cent. The number of train miles run was 201,710 (against 235,080). The receipts per train mile were equal to Rs.3·25 (against Rs.2·16), and the expenses per train mile Rs.2·13 (against Rs.2·08). The report states:—

"On the Hill section, 117 miles in length, the five tunnels at the southern end of the section, aggregating a length of about 1,700ft., have been practically finished, and the rails have been laid through the first tunnel, the railhead being at the fourteenth mile north of the Barak river, and the Barak bridge is also nearly finished. Rails have also been laid for a short distance of about 8 miles at the northern end of the section. On the central and northern parts of the section earthwork and tunnelling are in progress, but there is a great deal of very heavy work yet to be done on these parts of the section.

"On the third section, about 325 miles in length, the repairs on the length of 75 miles between Gauhati and Jamunamukh, which was opened in 1896, and closed again after the earthquake, have been nearly completed, and the railhead has been carried for a further distance of 26 miles towards Lumding. Platelaying is also in progress in the northern part of the section, rails having been laid for a length of about 47 miles between the Daing river and the Jhanzi river. North of the Jhanzi river earthwork is in progress to the end of the seventeenth division, a further length of about 24 miles, to the neighbourhood of the Dikhu river. North of the Dikhu river the line is still under survey. Very heavy work also remains to be done on the part of the section which lies between the Daing river and Lumding and which includes the Nambor Forest.

"On the first section the principal work has consisted in the completion of the Silchar branch which was opened for goods traffic at the beginning of the present month. On the open line the earthquake repairs have been nearly completed, but the chief expenditure has been under the heads of stations and buildings and ballast, on which a considerable outlay has yet to be incurred. The jetty at Chittagong is in course of erection.

"The mean mileage worked is taken as 284·03 miles for passenger traffic and 286·52 miles for goods traffic, against 327·88 miles for passenger traffic and 340·57 for goods traffic in the corresponding half-year. The reduction is due to the closing of the Gauhati-Jamunamukh section after the earthquake. On the other hand, a short length of 6·27 from Badarpur to Katta Khal on the Silchar branch was opened, for goods traffic only, on June 13th, 1898. With this exception, the line worked on revenue account during the half-year consisted of the main line from Chittagong to Badarpur, together with the branch from Laksam to Chandpur.

"In their last report the board intimated that as it was not possible that the railway should be completed within the time named in the contract, negotiations had been entered into with the Secretary of State with a view to obtaining his assent to such an extension of time as would be necessary. It has now been arranged that the date fixed by the contract for the completion of the line shall be extended so far as relates to the third section to December 31st, 1901, and so far as relates to the second or Hill section to December 31st, 1902."

#### INDIAN MIDLAND RAILWAY.

##### CAPITAL.

The capital expenditure in the half-year ending June 30th, 1898, amounted to 199,929½l., of which 43,766½l. was on lines open for traffic, 153,575½l. on lines in course of construction, and 2,588½l. on working stock. The total expenditure to date amounted to 7,595,983½l., whilst the receipts had been as follows—Shares and stock, 3,000,000½l.; debentures, 2,754,100½l.; ditto Saugor-Katni Extension, 250,000½l.; loan from Secretary of State at 3½ per cent., 1,345,000½l.; ditto at 3½ per cent., 353,173½l.; sundries, 5,675½l.; (discounts, Dr. 12,500½l.) total, 7,695,449½l. Credit balance, 99,465½l.

To repay advances and to meet further requirements an additional amount of capital has since been raised by the issue, under the sanction of the Secretary of State for India in Council, of debentures for 150,000½l., bearing interest at three per cent. per annum for seven years, from July 1st, 1898.

#### REVENUE, TRAFFIC, &c.

The gross receipts for the six months ending June 30th, 1898, amounted to Rs.37,55,776 (against Rs.34,11,990), and the working expenditure to Rs.18,46,196 (against Rs.18,25,924), leaving, as net earnings, a sum of Rs.19,09,580, which has been paid over to the Government for distribution as follows:—On account of Bhopal State Railway, Rs.1,59,326; Bina-Guna Railway, Rs.29,115; Bhopal-Ujjain Railway, Rs.1,11,995; towards the guaranteed interest, Rs.16,09,143.

The number of passengers carried was 933,992 (against 910,955); the quantity of freight carried 386,084 tons (against 329,855 tons), of which 64,221 tons (against 47,621 tons) was revenue stores; the per-centage of working expenses was 49·16 per cent. (against 53·51 per cent.). The mileage worked by the company during the half-year was as follows:—Indian Midland Railway (including 47·83 miles of the Saugor-Katni Extension worked from 26th March), 727·39; Bhopal State Railway, 57·39; Bina-Guna Railway, 71·74; Bhopal-Ujjain Railway, 113·52; total, 970·04; the mean mileage worked was 947·84. In addition to the lines worked by the company, 19·32 miles of foreign lines were worked over for purposes of through communication, making the grand total of mean mileage, worked and worked over, 967·16. The report states:—

"Work on the unopened section of the Saugor-Katni extension—viz., from Damoh to Katni (about 68 miles) was actively carried on during

the half-year under review, and good progress has since been maintained. In their last report the directors anticipated that the line from Saugor to Katni would be opened throughout for traffic before the close of the year, and they have every hope of their anticipation being realised. The connection which this extension will form with the Bengal-Nagpur and East Indian Railway systems will be of great importance to the Indian Midland Railway.

"The line from Guna to Baran (73 miles) to which reference was made in the twenty-fourth report (paragraph 14) is approaching completion, and the directors are glad to inform the proprietors that it is expected that agreements will shortly be concluded with the native States of Gwalior, Tonk, and Kotah for the working by this railway of the lengths of 21, 22, and 30 miles, belonging respectively to those States. The question of extending the line from Baran, westward, is under consideration, the Government of India having undertaken the survey of the country as far as Ajmere or Marwar, with a view to ascertain the best alignment."

### EAST INDIAN RAILWAY.

#### CAPITAL.

The total capital outlay on the East Indian Railway, and on incorporated branches, to June 30th, 1898, was Rs.40,16,57,982, including Rs.2,56,011 in respect of capital not bearing interest; or excluding suspense accounts and steamboats, Rs.39,17,23,726, giving an average cost of Rs.2,29,749 per mile.

The capital expenditure during the half-year was Rs.81,04,862. Of this sum, Rs.42,25,852 has been expended on the new Moghalsrai-Gya line; and Rs.38,78,809 on the main open line: the chief items of the latter are in improvements to way and works, Rs.7,59,156; additional locomotives, Rs.6,93,623; carriage and wagon stock, Rs.15,73,161; stations and buildings, Rs.6,16,732.

The following resolution to authorise the provision of a further sum of 1,500,000/., to be raised by the issue of debenture stock, to meet the capital expenditure of the coming year, will be submitted to the general meeting:—

"That in pursuance of the provisions of the East Indian Railway Company's Act, 1895, the board of directors be and they are hereby authorised from time to time and at any time to raise additional capital for the purposes of the undertaking, by the creation and issue of debentures or debenture stock, upon such terms as may from time to time be agreed upon with the Secretary of State for India in Council. Provided that the aggregate nominal amount so to be raised, in addition to the moneys authorised by the resolution of December 22nd, 1897, to be borrowed and not yet borrowed, shall not exceed 1,500,000/."

The principal objects to which this sum will be applied have been noticed in former reports. The necessity for continued capital outlay on a large scale wholly arises from the continued expansion of the traffic, alike in the direction of passengers and goods, and more especially of coal. This imperatively calls for increased supplies of engines and rolling stock; the enlargement of stations; the adoption of improved methods of signalling and interlocking points; and the construction of additional lines of way to give relief to the traffic on the lower section of the railway. At the same time, the completion of the Moghalsrai-Gya line, now well advanced, and its eventual prolongation to the main line near Barakar, have to be provided for. The branch to the Daltonganj coalfield likewise has to be constructed under an agreement entered into with the Secretary of State; and another branch in the North-Western Provinces between Shikohabad and Ferokehabad has been sanctioned for early prosecution. Satisfactory progress continues to be made in arranging for these developments of the undertaking, which will necessarily occupy several years in their realisation. The transfer of the A and deferred annuities to the classes C and D continues, the numbers and amounts under them being in C 1,099, representing 86,197/., annuity; and under D 2,678, representing 3,752,254/., capital, leaving in the A annuities 138,051/., annuity, and in the deferred annuities 2,797,745/., capital.

#### REVENUE.

The revenue account shows receipts for the half-year ending June 30th to have been as follows:—

	1897.	1898.
Coaching traffic.....	Rs.89,26,668	Rs.98,85,017
Goods traffic.....	2,18,29,626	2,21,26,271
Electric telegraph.....	50,779	62,273
Steamboat traffic.....	69,904	80,347
Sundries.....	375,693	3,72,838

Total earnings.....Rs.3,12,52,670.....Rs.3,25,26,746

The working expenses for the same period were as under:—

	Rs.26,32,540	Rs.18,98,252
Maintenance of way, &c.....	23,43,476	23,35,836
Locomotive expenses.....	9,59,593	10,67,350
Carriage and wagon expenses.....	18,72,721	20,03,462
Traffic expenses.....	9,81,099	9,49,946
General charges.....	80,944	79,146
Steamboat expenses.....	5,42,981	7,73,209
Special and miscellaneous expenditure.....		

Total expenditure.....Rs.94,13,354.....Rs.97,07,201

Net earnings.....Rs.2,18,39,316.....Rs.2,28,19,545

Less—Balance of gross earnings of the Delhi-Umballa-Kalka Railway, payable to the Secretary of State.....3,52,549.....4,77,048

Total net earnings.....Rs.2,14,86,767.....Rs.2,23,42,497

Appropriated as follows:—Interest on debenture stock, Rs.5,58,621; annuity, Rs.97,57,241; interest on capital sum represented by the portion of the annuity deferred, Rs.21,68,276; other interest, Rs.21,72,677; contribution to provident fund, Rs.2,23,425; balance—surplus profits, Rs.76,85,682 (Government share, Rs.61,48,546; company's share, Rs.15,37,136).

After deducting Rs.31,620 for Indian income-tax, the sum payable to the company is Rs.15,05,516. This amount has produced the sum of 100,305/., which, together with the balance brought forward from last half-year, enables the board to recommend the payment of a dividend for the half-year of 1/., 10s. 6d. per cent. on the deferred annuity capital, and the deferred annuity capital class D, in addition to the guaranteed interest of 2/., per cent., leaving a small balance in hand.

The gross earning of the half-year under review are the highest yet recorded in any half-year, and are in excess of those of the corresponding half-year of 1897 by Rs.12,74,076; the expenses were greater by Rs.2,93,846; and the net earnings, which were also the highest yet recorded, are more by Rs.9,80,230 than those of 1897.

#### TRAFFIC, &c.

The number of passengers carried during the half-year ending June 30th was 9,678,317 (against 8,891,527); the average rate per passenger per mile, 2.73 pies (against 2.73 pies); the quantity of goods carried, 4,283,882 tons (against 4,045,517 tons); the average rate per ton per mile, 5.62 pies (against 5.75 pies); the number of train miles run, 7,128,298 (against 6,626,339); the ratio of expenses to receipts, 29.84 per cent. (against 30.12 per cent.); the receipts per train mile, Rs.4 9s. 0p. (against Rs.4 11s. 5p.); the expenses per train mile, Rs.1 5s. 9p. (against Rs.1 6s. 8p.); the length of line owned, 1,705 (against 1,702) miles; lines worked, 184½ miles (against 182½); foreign lines worked over, 35½ miles (against 35½ miles); mean mileage worked, including foreign lines worked over, 1,925 miles (against 1,920½ miles). The report states:—

#### GENERAL.

"The total outturn of coal at the company's collieries during the half-year ended June 30th, 1898, was 229,935 tons (of which 197,840 tons were steam coal), raised at a cost of Rs.1 14s. 5p. per ton at the pit's mouth, against 229,442 tons at a cost of Rs.2 per ton in 1897. The quantity of steam coal consumed by the undertaking was 196,649 tons, at an average cost of Rs.2 0s. 4p. per ton at the collieries, against 185,627 tons, at an average cost of Rs.1 12s. 6p. per ton in the half-year ended June 30th, 1897.

"A design has been prepared for the new joint passenger station at Howrah, for the East Indian and Bengal-Nagpur railways. This has received the approval of the boards of the two companies concerned, and now only awaits the sanction of the Government to admit of the early commencement of work upon it. The removal of the East Indian carriage and wagon shops, which occupy ground required for the new passenger station, has been authorised, and the preliminary steps for beginning the building of the new shops have been taken.

"The South Behar Railway, the construction of which is being carried out by the company's engineers at the cost of the South Behar Railway Company, will probably be opened for traffic early next year, and with the exception of the great bridge over the Sone, the Moghalsrai-Gya line will also be ready for opening at about the same time.

"It is satisfactory to know that the authorities have recently declared Calcutta to be free from plague, and that the precautionary measures for inspection of travellers in Bengal, which necessarily caused some inconvenience, have now been withdrawn."

## Law Intelligence.

### COURT OF APPEAL.

(Before the Master of the Rolls and Lords Justices Chitty and Vaughan Williams.)

GREAT CENTRAL RAILWAY COMPANY v. METROPOLITAN RAILWAY COMPANY.

This was an appeal by the plaintiff company from Mr. Justice Romer's refusal on November 30th to grant an interim injunction restraining the defendants from preventing or hindering their engines, wagons, trucks, officers, and servants from passing and repassing at all reasonable times along and over the defendants' railway between Quanton-road Junction and the junction of the defendants' railway with the undertaking of the Great Western Railway Company at or near Aylesbury. By an agreement made between the two companies in 1890, which was scheduled to the plaintiffs' Act of 1893, it was proposed that when and so soon as the proposed physical connection between the undertakings of the Great Central Company and the Metropolitan Company at Quanton-road, Buckinghamshire, had been effected and authorised to be open for public traffic, the Great Central Company should be entitled, for the consideration mentioned, to run over and use the railway of the Metropolitan Company between Quanton-road Junction and Baker-street. The Quanton-road Junction had been inspected and passed by the Board of Trade as fit for mineral traffic, and the plaintiffs contended that a physical connection having thus been effected they had a right to use the line for the interchange of goods and mineral traffic with the Great Western Railway. They had endeavoured to run a coal train along the defendants' line

as far as Aylesbury Junction, and thence to the Great Western line; but that was objected to by the defendants on the ground that the proposed physical connection was the completion of the line between Annesley and Quainton Junction for passenger traffic, and that until such opening for public passenger traffic there was no obligation upon the defendants to permit mineral traffic to pass over their railway. The MASTER OF THE ROLLS said that he did not think the plaintiffs had made out their case, at any rate, not with sufficient clearness to justify the court in granting an interlocutory injunction. The question turned upon the construction of the agreement of 1890. His lordship would not say anything on the question whether the "physical connection" which had been actually made at Quainton Junction was "the proposed physical connection" within the meaning of the agreement. But what would any ordinary person understand by the expression "authorised to be open for public traffic"? Unquestionably such a person would understand it to mean "open for public traffic generally," and not merely open for mineral traffic. But a good deal of light was thrown upon the meaning by the rest of the clause, and his lordship felt no doubt that the meaning was "open for public traffic generally." It was true that the use of the junction for coal traffic had been authorised by the Board of Trade, and it had been used for public traffic in that sense. The board were not asked to do more than that. In order that the use for passenger traffic should be authorised no further inspection might be required, but other conditions would have to be fulfilled. The learned Judge's order was quite right. Lord Justice CHITTY concurred. In his opinion "public traffic" in this agreement meant "public traffic generally." There was in the agreement no limitation or restriction of the words; that was the natural meaning; and this clause, his lordship thought, contemplated that meaning. He took the language as he found it, and reading it naturally and grammatically, he construed it as he had already stated, and he could find nothing in the rest of the clause to restrict that meaning. On the contrary, that construction was fortified by the rest of the clause. Lord Justice VAUGHAN WILLIAMS also agreed. Reading the clause as a whole, he thought the natural inference was that "public traffic" meant "public traffic generally."

## American & Canadian Railways.

### LATEST EARNINGS.

Fourth week of November.—New York Ontario and Western, \$111,000—*increase*, \$1,000; Chicago Milwaukee and St. Paul, \$994,000—*increase*, \$49,000; Kansas City Pittsburg and Gulf, \$93,000—*decrease*, \$1,000; Baltimore and Ohio South Western, \$165,000—*increase*, \$1,000; Chicago Great Western, \$134,000—*decrease*, \$4,000; Denver and Rio Grande, \$248,000—*decrease*, \$5,000; Louisville and Nashville, \$615,000—*increase*, \$42,000; Mexican Central, \$392,000—*increase*, \$22,000; St. Louis and San Francisco, \$200,000—*increase*, \$8,000; St. Louis South Western, \$181,000—*increase*, \$16,000; Wabash, \$362,000—*increase*, \$51,000; Missouri Kansas and Texas, \$342,000—*decrease*, \$61,000; Chicago Cleveland Cincinnati and St. Louis, \$405,000—*increase*, \$33,000; Chesapeake and Ohio, \$324,000—*increase*, \$40,000; Missouri Pacific, \$826,000—*decrease*, \$28,000; Norfolk and Western, \$219,000—*increase*, \$2,000; Oregon Railroad and Navigation, \$138,000—*increase*, \$2,000; Southern Railway, \$663,000—*increase*, \$66,000; Northern Pacific, \$809,000—*increase*, \$17,000.

Month of November.—Pittsburg and Western, gross, \$278,000—*decrease*, \$5,000; New York Central and Hudson River, gross, \$4,143,000—*increase*, \$223,000.

The gross earnings of eighty-one roads in the third week of November show an *increase* of 4.21 per cent.

Month of October.—Norfolk and Western, gross, \$1,071,000—*increase*, \$115,000; net, \$400,000—*increase*, \$112,000. Pacific Mail Steamships Company, gross, \$357,000—*increase*, \$64,000; net, \$175,000—*increase*, \$129,000. Cleveland Cincinnati Chicago and St. Louis, gross, \$1,325,000—*increase*, \$28,000; net, \$379,000—*increase*, \$104,000. Denver and Rio Grande, gross, \$898,000—*increase*, \$107,000; net, \$386,000—*increase*, \$70,000. Mexican Central, gross, \$1,237,000—*increase*, \$155,000; net, \$449,000—*increase*, \$110,000. Southern Pacific, gross, \$5,557,000—*increase*, \$1,126,000; net, \$2,345,000—*increase*, \$482,000. Oregon Railroad and Navigation, gross, \$816,000—*increase*, \$90,000; net, \$403,000—*decrease*, \$1,000. Chicago Rock Island and Pacific, gross, \$2,162,000—*increase*, \$162,000; net, \$923,000—*increase*, \$83,000. Oregon Short Line, gross, \$805,000—*increase*, \$216,000. Union Pacific Denver and Gulf, gross, \$392,000—*decrease*, \$8,000; net, \$189,000—*increase*, \$1,000. Southern Pacific Company, gross, \$4,940,000—*increase*, \$899,000; net, \$1,972,000—*increase*, \$282,000.

### RAILROAD NOTES.

The Circuit Court has given a decision against the Texas State Railroad Commission prohibiting the use of commissions on rates made since August 10th, 1894. A New York telegram says:—"Railroad officials are gratified at the decision of Judge McCormick in the Circuit Court, defeating the Texas State Railroad Commission and enjoining the Commission and the State authorities from enforcing rates made since 1894. This decision is of the utmost importance to all south-western roads, removing, as it does, one of the worst menaces to railroad interests in that part of the country. It minimises the Commission's power for harm. Railroads now have an opportunity to transact business on a profitable basis."

The New York correspondent of the *Financial Times* says:—"Mr. F. D. Underwood, general manager of the Minneapolis St. Paul and Sault Ste. Marie, will accept the managership of the reorganised Baltimore and Ohio. He is a good man, and has Mr. J. J. Hill's confidence. He has held his present position for more than ten years, and has operated the road with considerable success, in the face of very adverse circumstances. In the North West he is regarded as one of the most advanced and able officials in the railroad service."

The stockholders of the Atchison Topeka and Santa Fé Railroad at their annual meeting on Thursday unanimously confirmed the purchase of the San Joaquin Valley road, and also the consolidation of the several Kansas branch lines. The meeting re-elected the retiring directors, Aldace F. Walker, Ed. P. Ripley, William Rotch, and C. K. Holliday.

The Atchison Topeka and Santa Fé will, on the 15th inst., cease to interchange freight and passenger traffic with the Chicago Great Western, which will also be boycotted by the other Western lines. It is claimed that the latter road has not observed the regulations laid down by the Atchison management.

It is reported that President Hill, of the Great Northern Railway, has purchased the tax certificates of the old Union Pacific Railroad, which is thought to indicate a Hill invasion of the Northern Pacific system's territory. It is alleged that surveys have already been made to Tacoma and Seattle.

The St. Louis and San Francisco has declared the regular half-yearly dividend of 2 per cent. on the first preferred stock, payable January 6th; books to close December 22nd. Action on the dividend for the second preferred stock has been deferred to the meeting to be held in February.

Holders of New York Ontario and Western Railway Company's first mortgage 5 per cent. gold bonds are offered the option of exchanging into an equivalent amount of 4 per cent. refunding mortgage gold bonds due 1992. Holders exchanging are also to receive a cash payment of 3 per cent.

A western despatch says that the St. Louis South Western Railway will apply to the Legislature for a law authorising it to acquire the Tyler South Eastern Railway, of 88½ miles length, and to make a corresponding increase in the St. Louis South Western stock and bond issues.

The Chicago Great Western Railway Company has declared a half-yearly dividend of \$2 on the preferred A 5 per cent. stock, payable January 31st to holders of record December 31st. This is the first dividend so far declared on the A stock.

The directors of the Norfolk and Western will extend the \$100,000 South Side Consolidated third preference mortgage bonds maturing next month, the interest being scaled down from 6 to 4 per cent.

For the quarter ended September 30th the Lehigh Valley shows:—Gross, \$1,628,000—*increase*, \$105,000; net, \$634,000—*increase*, \$86,000; surplus over charges, \$345,000—*increase*, \$67,000.

The managers of the Chicago Milwaukee and St. Paul contemplate improvements next season on an abnormally large scale. All the outlay will be charged to income account.

The Northern Central Railway has declared a half-yearly dividend of 4 per cent. on its stock, payable January 16th, to holders of record December 31st.

The numbers are advertised of \$425,000 Northern Pacific Rail-

road 6 per cent. general first mortgage bonds which have been drawn for repayment at 110.

It is stated that the Missouri Pacific Railroad Company has paid the whole of its floating debt to Mr. Russell Sage, amounting to about \$1,300,000.

Last week's East-bound all-rail tonnage from Chicago amounted to 111,000 tons, against 53,000 in the corresponding week of last year.

Rumours of a deal between the Chesapeake and Ohio and the Cleveland Cincinnati Chicago and St. Louis are again prevalent.

## General News.

### GREAT WESTERN RAILWAY.

The Great Western Railway Company commenced on Wednesday their new Canadian service. A special train left Paddington at 8.50 a.m., and ran without a stop to Newport, Monmouth, a distance of over 143 miles, in 2 hours 41 minutes, being 11 minutes under the computed time, and continued the journey to Old Milford, where the first of the Canadian steamers, the *Gaspesia*, awaited passengers and general cargo for Paspébiac, calling at Charlottetown, the capital of Prince Edward Island.

Arrangements have been made for the Great Western Railway Company to undertake the passenger service upon the Pontypridd Caerphilly and Newport line, upon its discontinuance by the Alexandra (Newport) Docks and Railway Company, who are the owners of that line. It is expected that the service will be much improved, both as to the character of the rolling stock and as to the number of trains. This change is obviously a beneficial one for residents in the valleys, for they will henceforward be able to reach the eastern section of the main line much more conveniently. Passengers per the London trains, for example, will save both time and expense, as well as the awkward transfer across Cardiff that frequently had to be made, the train from Pontypridd running into the same station at Newport as the Great Western.

A large and representative conference of the public bodies of Swansea, convened by the Mayor, was held last week at the Guildhall, Cardiff, for the purpose of further considering the placing of the town on the main line of the Great Western Railway Company. The Mayor presided, and most of the public bodies were represented. The following resolutions were passed:—(1) "That this meeting desires to invite the attention of the Great Western Railway Company to the present delay, inconvenience, and discomfort to traffic and passengers from and to Swansea owing to there being no main line station in the heart of the borough, resulting in serious financial loss to the burgesses, and to respectfully urge upon the directors of the company the consequent necessity for placing Swansea on their main line of railway." (2) "That this meeting is of opinion that the placing of Swansea on the main line could be accomplished in such a manner as to effect a considerable saving to the company on its present working charges." (3) "That it is the opinion of this meeting the corporation will be justified in conveying to the Great Western Railway Company for a nominal consideration any land with rights they may possess which may be necessary for the object in view." It was further resolved that the Mayor ex-Mayor, Sir John Jones Jenkins, Mr. Griffith Thomas, Miss Dillwyn (as representing the Swansea Chamber of Commerce), Mr. Edden (under-manager of Messrs. H. H. Vivian and Co.), Mr. R. D. Burnie, Councillor Morgan Tutton, Mr. Thomas Yorath, and the town clerk (Mr. John Thomas) be appointed a deputation to wait upon the directors of the Great Western Railway Company to submit the foregoing resolutions. During the course of the proceedings Sir JOHN JONES JENKINS, M.P., pointed out that there were no particular engineering difficulties in the way of carrying out a suitable scheme. He was hopeful that something might be done if only the Great Western Railway Company could be induced to see that it would pay them to go to the large expense. As to the access from the east, he said that without pretending to speak on behalf of the Rhondda and Swansea Bay directors he was justified in saying that there would be every disposition on their part to facilitate such a diversion of the Great Western Railway as was now suggested. To the west, perhaps, there would have to be a little shortening of the road near the cricket-ground, but as that was public property that difficulty might be got over quickly. The new line would then go on to Clyne, running parallel with that of the London and North Western Railway. In conclusion, Sir John spoke of the general difficulties connected with the acquisition of land that railway companies in general had to contend with, observing that this was, to his own knowledge, recognised by the Great Western board.

### THE BUENOS AYRES AND PACIFIC WRANGLE.

In continuation of the correspondence already reproduced in these columns, the following further letter has been addressed to the stockholders of the Buenos Ayres and Pacific Railway Company, Limited, by Mr. J. C. F. Lee, one of the directors:—

42, Gloucester-gardens, London, W., 9th December, 1898.

Ladies and Gentlemen—Seriously, is it not absurd of the directors, after this lapse of time, to now repudiate statements of mine made in replying to the criticism of shareholders at the meeting of the 12th November last year? For I prefaced my speech with the following words, which the directors have forgotten to give in their circular to you of the 30th November last:—

"Gentlemen—My chairman and my colleagues have asked me to reply to these questions, and I hope I may be able to do so satisfactorily."

If my colleagues disapproved of the statements and opinions that followed these introductory words, was it not their obvious duty to the shareholders to have at once disavowed them if I was binding them to a policy in which they did not concur, or which prejudiced your interests; but as I was not doing anything of the kind, they did not repudiate my remarks then, nor have they at any time in the past twelve months suggested the bare idea of such a thing until the meeting of October 25th last, and then in my absence.

We were in agreement that certain expenditure should be stopped except for purposes of safety. No one understood my words then to mean, nor can they be distorted now into meaning that nothing more should ever be done to strengthen the permanent way. The recommendation of a committee of the board, of which I was one, and to which I refer below, must have been forgotten by the author of the circular of November 30th last.

The whole point is, What is the expenditure necessary to ensure safety? The general manager seems to have answered that question at the meeting of October 25th last, when he assured the shareholders that an expenditure of 15,000*l.* per annum for ten years would keep the line in fair running order.

You will not fail to see what a descent this is from the recommendations of Mr. Harrison Hodgson and from the general manager's telegraphic demands in March last, involving altogether 88,000*l.* for this year alone.

I did not fully concur in the course taken in the dispute between the general manager and Mr. Woodhouse; I objected, but was overruled by a majority of the board, and I have now reason for regarding his retirement as a grave misfortune for the company, for at a critical time in our existence we have lost all the accumulated value of his twelve years' experience. I am not alone in looking upon Mr. Woodhouse as a most competent and reliable engineer.

The last paragraph of the directors' circular of the 30th ult. has no application to the facts connected with this controversy, so I merely give a bare denial to the insinuation made about neglecting the permanent way and taking every available penny for revenue, so far as the insinuation may have been intended for me.

The weakness of our road does not, in the main, arise from the rails being worn out, but principally from an insufficient number of sleepers, which leaves the rails unsupported for too large a space. This deficiency in sleepers being notorious, the remedy is obvious. It certainly is not to be found in taking up wholesale miles upon miles of sound rails on a sound bed from one part of the main line, to relay them in another part of the main line, as originally proposed but ultimately abandoned.

I have worked to find a solution of the financial problem connected with the necessary expenditure for strengthening the entire permanent way, which, while being effectual, would leave something for dividend for you; that solution, in the main, was found by a committee of the board, consisting of Sir Gabriel Goldney, Mr. Edward Norman, Mr. Gaskell, and myself, who recommended the strengthening of the entire road-bed with additional sleepers. I concurred in this wise recommendation; this cannot be called neglecting the permanent way.

The whole amount involved would have been properly and legitimately a charge upon capital, being a distinct addition to the corpus, and would, I believe, so strengthen the bulk of the track as to render anything very serious in the way of renewals of rails unnecessary for many years to come.—I am, your obedient servant,

J. C. F. LEE.

### ANOTHER NORTH WEST ARGENTINE SHUFFLE.

The following letter from Mr. G. L. Hodgkinson, 46, Wimpole-street, W., appeared in yesterday's *Financial News*:—"The *Financial News* of this date—a copy of which has been sent to me, apparently by the North West Argentine Railway Company, Limited—I see a report of a meeting of first debenture-holders of that company, which was held on the 30th ult. That report is not correct. I was present throughout the meeting. What happened was that the chairman first put the resolution to the meeting and declared it lost on a show of hands, then stated that a poll would have to be taken. Thereupon some of those who had voted against the resolution said that if they might understand that the directors intended to take a certain course they would like to vote for the resolution; and after that the chairman again put the resolution to the meeting, and, upon a second show of hands, declared it carried. I do not express any opinion as to the validity of a resolution carried in that way, and do not myself at present contemplate taking any steps to prevent it from being carried into effect, though I voted against it on both occasions, I think the absent debenture-holders ought to be

enlightened as to how the resolution came to be declared carried, and be enabled to judge for themselves as to whether they will take any steps to test its validity. I think also they should know that what your reporter describes as a 'discussion' was chiefly occupied by some earnest protests against this tampering with what should be a 'security,' and the futility of tinkering with a difficulty, instead of at once grappling with it in such a way as to avoid the chance of its recurring."

#### NITRATE NOTES.

The City Editor of the *Daily Mail* must be leading his followers a pretty dance over nitrate shares. For weeks past he appears not to have known his own mind on the subject, and his habit of blowing hot and cold alternately is fairly bewildering, and baffles all attempts to fathom what he is driving at.

The numbers are published of the 5 per cent. first mortgage debentures of the Lautaro Nitrate Company, Limited, which have been drawn to be paid off at par on January 2nd next at the offices of the company, 13, St. Helen's-place, E.C., and which will thenceforth cease to carry interest.

Alluding to the prospects of the Nitrate Railways Company, *Money* says:—"What appears to be in the air, apart altogether from the better earnings of the company, is a rearrangement of the capital account, by which the accumulated balance would be released, in which case nitrate rails ordinary should receive an extremely good distribution. The accumulated balance at the end of last year was 136,000*l.*, which represents 8 per cent. on the ordinary. As the company is now doing very well, it will probably prove to have earned anything from 5 to 6 per cent. when the accounts come to be made up for the current year."

Messrs. Henry Bath and Son, of Liverpool, in their nitrate market report, issued on Monday last, state that the actual shipments in November for Europe are cabled as about 200,000 tons, and the loadings on December 1st as about 100,000 tons. The arrivals since the 17th ult. amount to about 50,000 tons, of which 42,000 tons passed up for destinations direct. Altogether five cargoes have called for orders, but the only transaction reported in that position is one of refined quality at 7*s.* cost and freight. In floating cargoes a good business is reported, comprising an August sailing at 7*s.* 5*d.* delivered; September, at 6*s.* 10*d.* cost and freight; October-November sailings at from 6*s.* 11*d.* to 6*s.* 11½*d.* cost and freight; and December sailings at from 7*s.* to 6*s.* 9½*d.* cost and freight, less ½*d.* direct port, according to position and size. A considerable business has also taken place in refined and ordinary nitrate for shipment next year at good prices. The dispute in connection with the method of assay has to all intents and purposes been abandoned by the importers for the time being, and no further development is advised regarding the proposed combination. The freight market was firm up to the 1st inst., but the announcement of the November shipments and quantities loading 1st inst. may have an adverse effect.

The annual report of the Lagunas Syndicate, Limited, was issued on Monday last, and receives the following summary treatment at the hands of the *Pall-Mall Gazette*:—"The net profits of the Lagunas Syndicate for the year ending June 30th last amounted to 20,938*l.*, on an output of 1,250,000 quintals of nitrate (against 30,905*l.*, on 875,000 quintals, in 1896-7), and after deducting 15,000*l.* for redemption of bonds, there remains the munificent sum of 5,938*l.* to be spread over a share capital of 1,100,000*l.* Among the assets in the balance-sheet we notice 11,913*l.* for litigation expenses, and 6,255*l.* for preliminary and debenture issue expenses, standing inconveniently in front of future dividends, while loans against nitrate and iodine (the latter product alone was hitherto in pledge), 26,165*l.*, seem rather out of proportion to nitrate and iodine stocks (at cost), 19,956*l.* London charges, 3,958*l.*, are evidently modelled on the capital rather than on the profits. The allowances to be made to the Lagunas Company are an unknown quantity likely to make an ugly hole in the current year's revenue, expanded though it may be by better selling prices and a large output, now at the rate of 1,800,000 quintals per annum. The directors have no doubt had an anxious time, and earned their fees of 1,500*l.*, and the shareholders will share their regret at the expense of the family litigation, the end of which is not yet. The tone of unctuous rectitude adopted in the report is calculated to raise a smile when in such close juxtaposition with nitrate finance."

The Permanent Nitrate Committee has issued the following public statistical circular:—Total exports to Europe, November, 4,411,000 quintals; loading for Europe, December 1st, 2,215,000 quintals; imports, Europe, November, 67,470 tons; deliveries,

Europe, November, 38,490 tons; visible supply, Europe, December 1st, stocks and afloat, 597,380 tons.

The Anglo-Chilian Nitrate and Railway Company's traffic return for November, being only the same as for the corresponding period last year, was a disappointment compared with the last return of the Nitrate Railways Company. Evidently Tarapaca, just now, is putting Antofagasta's nose out of joint.

The annual general meeting of the Lagunas Syndicate, Limited, will be held on Tuesday next, December 13th, and that of the Lagunas Nitrate Company, Limited, on Thursday, December 22nd. Interest will centre principally in the latter, which may not be of a wholly harmonious character, judging from "what they say in the City." The attempt to keep shareholders away by holding the meeting when everybody will have left town for Christmas, is not likely to escape notice, and will scarcely tend to conciliate shareholders, who, as it is, cannot be expected to have any great regard for a board which has landed the company in such a terrible plight all round.

Spasmodic attempts are being made to galvanise the London Nitrate Company's shares through the familiar device of quoting bogus market movements. The insiders are, no doubt, anxious to get outside of their holdings before the final exhaustion of the grounds, now being depleted in order to discount the debentures referred to in a recent issue of this paper. The idea of two successive five-shilling jumps in London ordinaries is too funny for anything. The same brigade, usually sellers of "San Jorge's," have turned off the tap in view of the approaching return of capital, and the consequence is that the jobbers refuse to deal in the shares, being unable to undo their bargains.

The accounts just issued by the Lagunas Nitrate Company for the year ending June 30th, 1898, present a picture doleful enough in all conscience, but even they can only be regarded as the forerunner of something still more gloomy which the miserable shareholders will have to face when the accounts for the current year are presented. It is only then that the results of the policy of masterly inactivity pursued by the board will be fully realised. For the past year the net profit is only 18,162*l.*, and this without charging against revenue a single penny piece of the 35,969*l.* which has been muddled away in fruitless litigation. Since last March the works have been shut down, and the best of the season for making nitrate has now been lost by this company, whilst other concerns are going ahead for all they are worth, and turning out immense quantities of stuff at what, in these times, is a handsome profit. We shall defer detailed criticism of the report and accounts until our next issue, but before dismissing the subject for a week we may be forgiven for asking how the position of the company can have been strengthened by the addition to the directorate of a "bold baron" of French nationality. However, the shareholders are likely to hear more of this and other questions next week, when, we understand, a circular will be sent to them, reviewing the position generally, and asking for proxies for the forthcoming meeting.

#### THE CHINESE RAILWAY QUESTION.

A report just published by the acting British Consul at Ssumao on the trade of Yunnan contains a word of caution as to the practicability and profitable working of railway connections with Burma. Mr. J. W. Jamieson writes:—"To judge by some recent public utterances, and the general tone of articles written on the subject of Yunnan, it would appear that this province is still considered to be a very important factor in the commercial development of China. One hears a great deal about its actual and potential trade, and its vast mineral resources; and innumerable impossible schemes are from time to time propounded for the construction of railways, which shall open up the country, including the large and fertile valley of the Yunnan, on whatever map that river may be laid down, and connect British and French Indo-China with Ssuchuan. It is difficult to understand on what grounds such sanguine hopes of Yunnan's future prosperity are based, when it is seen what little support has been given to such illusory ideas by competent observers, conversant with actual facts. I am quite prepared to admit that the mineral wealth of Yunnan is great, but the difficulties in the way of working the same are so formidable that they are certain to deter all who wish for some return on their outlay from investing capital in mining enterprises, at least in the southern and western sections of the province. Apart from minerals, the province possesses few other resources, and the inhabitants are unenterprising and lazy to a degree. So long as they can grow enough rice to feed themselves, and procure enough cotton wherewith to make the few

articles of clothing necessary in this equable climate, they are content."

An article in *The Engineering Magazine* for the current month states that the first railroad constructed in China was a narrow-gauge line from Shanghai to Woosung, put down in 1876, and intended chiefly as an ocular demonstration to the Chinese. At the end of twelve months it was sold to a Chinese official, who straightway tore up the rails and deported them to Formosa. The single dummy engine of the line now reposes peacefully in the mud of some Formosan harbour, together with the wreck of the junk in which it was transported. During these twelve months of its existence the Shanghai-Woosung railroad, with its single dummy engine and its train of small cars, which, by the way, were of the American pattern, carried 300,000 passengers.

Although the Colonial Committee of the French Chamber of Deputies declined to recommend that the State should guarantee the Indo-China Railway loan of 200,000,000*f.* as far as the line will be constructed on French territory, it has decided in favour of State guarantees being given to the line which is to be constructed from the Chinese frontier to Yunnan Sen. The cost is estimated at 75,000,000*f.*, which sum is not included in the 200,000,000*f.* Tenders will be invited for the construction of the line.

### NEW COMPANIES AND NEW ISSUES.

[Applications for shares in limited liability companies may be withdrawn by letter—or by telegram, if confirmed by letter—provided the notice of withdrawal reaches the secretary before the shares are allotted.]

#### PEKIN SYNDICATE, LIMITED.

Allotment letters in respect of the issue of 10,000 new ordinary shares of the Pekin Syndicate, issued at a premium of 4*l.* per share, have been posted, the whole issue having been taken up by the shareholders.

#### CAMBORNE REDRUTH AND DISTRICT LIGHT RAILWAYS COMPANY, LIMITED.

This is the title of a company which has been registered, with a capital of 1,000*l.* in 1*l.* shares. The objects of the company are sufficiently indicated by its title. The directors are to be elected by the company. Qualification, 50*l.* Remuneration to be fixed by the company in general meeting. Registered by G. H. Hoyle, Parliament-mansions, S.W.

#### SANTA FÉ AND CORDOVA SOUTHERN EXTENSION RAILWAY, LIMITED.

The directors, on behalf of the contractors, invite subscription at par for an issue of 230,000*l.* 6 per cent. debenture stock redeemable at 110 per cent. after 1908. The company has a share capital of 230,000*l.* in 10*l.* shares, and its line is 52 miles long, extending from near the Venado Tuerto station of the Santa Fé and Cordova Great Southern Railway to Rufino, on the Buenos Ayres and Pacific Railway, forming a connection between the great western provinces of the Argentine Republic and the river ports of the Parana and affording to the railways of those provinces a direct route to Villa Constitucion and Rosario. The prospectus states:—

"The Santa Fé and Cordova Great Southern Railway Company has entered into an agreement to furnish engines and other rolling stock and to work and maintain the Extension Company's line in perpetuity, paying to the Extension Company, by way of rent, 50 per cent. of the gross receipts of the Extension Railway.

"The Santa Fé and Cordova Great Southern Railway Company also agrees, if necessary, to allow, as and from the expiration of two years from January 1st, 1899, a rebate on all traffic passing over its system to or from the Extension line, to an amount sufficient to make up the net revenue of the Extension line to 14,800*l.* a year, subject to the proviso that such rebate shall not exceed 50 per cent. of the gross receipts of such traffic. The interest upon the 230,000*l.* debenture stock amounts to 13,800*l.*, and the directors have agreed that their remuneration and the London office charges shall not exceed 1,000*l.* per annum so long as the company's moiety of the gross receipts of the railway does not amount to 14,800*l.* per annum.

"The contractor, upon whose behalf the present issue of stock is made by the company, also undertakes, during the two years which will elapse before the above-mentioned rebate comes into operation, to make up, if necessary, the net earnings of the company to 14,800*l.* per annum, and has deposited with the trustees security for this guarantee."

From the slovenly wording of the prospectus, and particularly of the third paragraph quoted above, it is almost impossible to say precisely what the agreement with the parent company really is, but putting the best construction upon the terms as here given, it may safely be said that the security for this so-called debenture stock [the share capital appears to be merely a paper creation] is not very ample unless the Extension is to be a severe drain on the parent line. The latter earns less than 10*l.* per mile per week, and even on that basis the gross receipts of the bantling would be only about 25,000*l.* per annum. The actual earnings are more likely to be 3*l.* or 4*l.*, than 10*l.*, per mile per week. And again, if the Great Southern Railway, with a gross traffic of 52,000*l.* per annum, cannot work at less than 60 per cent. of its receipts, what prospect is there of working the Extension at 50 per cent. with a gross revenue of only 8,000*l.* or 10,000*l.* a year?

### RAILWAY PROVIDENT FUNDS.

The general secretary of the Amalgamated Society of Railway Servants has issued a statement bearing upon the proposals to be made by the Hull Barnsley and West Riding Junction Railway and Dock Company, the London Brighton and South Coast Railway Company, the North Staffordshire Railway Company, and other companies for legislation in the ensuing session of Parliament in relation to pension, savings-bank, guarantee, and other funds. He says:—"There are several proposals of which notice has been given dealing with pensions and superannuations and the funds accumulated by their arrangements; also dealing with guarantee funds. I do not know yet what effect the guarantee proposals may have upon our members, but it is clear that the pension and accident and friendly schemes may be dangerous. I will not, for reasons I will specify, criticise these proposals, or say to what extent I consider that the railway companies, by contributing to the pension and other funds, desire to reduce the effect of the Workmen's Compensation Act. A great deal has been said as to the evil effect of similar schemes to those of which notice has been given upon our society and friendly societies generally. It has been described by the late Mr. Harford, by myself, and others. My reason for not dealing with the proposals is that we are engaged in preparing evidence to be submitted to the Departmental Committee of the Home-office, consisting of Mr. Jesse Collings, M.P., Mr. Cozens Hardy, M.P., and Mr. E. W. Brabrook (Registrar of Friendly Societies). That committee is sitting to inquire into the practice of establishing compulsory shop clubs in connection with docks, railways, and large manufacturing factories. These pension schemes, we take it, come within the scope of this inquiry, and we shall be prepared to deal with the proposals about to be submitted to Parliament when we come to lay our evidence before the committee. The companies against whose schemes we are already prepared with evidence are the Midland, the London and North Western, the Great Western, the London and Brighton, the Lancashire and Yorkshire, the North Staffordshire, the London Chatham and Dover, the Taff Vale, the Great Eastern, the London and South Western, and the Dublin Wicklow and Wexford. Amongst our principal witnesses will be myself, Mr. W. D. Dacey, Mr. G. J. Wardle, Mr. E. Garrity, and Mr. W. G. Maunders. We shall point out the objections to the principle of allowing our men to be coerced into accepting objectionable conditions of employment. Compulsory membership of these shop clubs and funds interferes with the rights and liberties of the workman. For instance, young men of nineteen earning only 12*s.* a week are compelled to contribute to them, irrespective of whatever private arrangement they may wish to make to provide for the future. And in most cases when a man leaves the service he is bound to leave all his contributions behind him. In only a few cases is he allowed to retain membership when he has left the service, and even then they have to pay a higher contribution and are disfranchised so far as the management of the fund is concerned. The cure for this state of things, we hold, is to render these funds illegal by including them within the scope of the Truck Acts, and we trust that legislation in that direction will result from the inquiry of the Departmental Committee. We do not see why an employer should be allowed to compel his workmen to contribute to a fund which is only useful to them whilst they are in the service of that employer."

### RHYMNEY RAILWAY BOARD.

It is announced that Mr. John Boyle has resigned the chairmanship of the Rhymney Railway Company, and has also retired from the board. Mr. Boyle was elected provisional chairman on December 14th, 1853, and chairman of the board of directors on December 6th, 1854, so that he has been chairman from the inception of the company. Mr. Boyle is succeeded in the chairmanship by Mr. William Austin, who was elected a director on December 19th, 1854, and was elected deputy-chairman on February 3rd, 1880. Mr. Franklen George Evans succeeds Mr. Austin in the deputy-chairmanship. Mr. Evans was elected a director on July 2nd, 1878. The directors have elected Mr. William Vachell, of Severn House, Sneyd-park, near Bristol, to fill the vacancy at the board caused by the retirement of Mr. Boyle. The *South Wales Daily News* says:—"We learn from a trustworthy source that in tendering his resignation to his colleagues on the Rhymney directorate Mr. Boyle assigned no reason for the step he had taken, and merely pressed for its acceptance, so that he might make room for some one else. It is well known, however, that the state of his health, although wonderfully robust for his nearly fourscore years, makes it very desirable that he should seek a less rigorous climate in the winter months, and it is doubtless a determination to make these lengthened sojourns abroad that has led to a decision to relinquish duties which his conscientious nature would not permit him to discharge perfunctorily. Mr. Boyle is succeeded in the

chairmanship of the Rhymney Railway Company by Mr. Austin, who is also a barrister by profession, although he has never practised. He and Mr. Boyle have been associated nearly all their lives, being fellow law students in London; and since the formation of the Rhymney Railway Company he has acted as Mr. Boyle's deputy in the presidency of the board of directors."

#### FOREIGN AND COLONIAL ITEMS.

The Northern Railway Company of France announces an interim dividend of 5 per cent. for 1898, payable January 2nd.

The numbers are published of 6 per cent. first mortgage debentures of the Cucuta Railway Company amounting to 5,100l., which have been drawn for repayment at par on January 2nd.

The death is announced, at the age of seventy-two, of Mr. G. W. Medley, of 21, Park-street, W., and Winsford Tower, Beaworthy, Devon, chairman of the Assam Railways and Trading Company, Limited.

Only 100,000,000f. of the Indo-China Railway loan will be offered to the public for the present. The issue of the remaining 100,000,000f. will be postponed until it is known whether the Governor-General's railway scheme is likely to be a success.

The United States Consul at Bogota has informed Mr. Hay, Secretary of State at Washington, that the Columbian House of Representatives has rejected the petition of the Panama Canal Company to extend for six years the time for completing the canal. The company has still six years to carry on work.

The winding-up of the Dutch-Rhenish Railway Company has now been closed, and the directors who acted as liquidators have been discharged. Notice is given to shareholders who omitted to receive the respective payments on their shares, that the amount due to them is at their disposition at the Associatio-Cassa, Heerengracht, 187, Amsterdam.

The Società Italiana per le Strade Ferrate del Mediterraneo (Italian Company of the Mediterranean Railways) announces that a dividend has been declared payable on and after January 2nd, 1899, against presentation of Coupon No. 26 of Lrs.12.50 per share, being Lrs.5 for balance of dividend for the year 1897-8, and Lrs.7.50 as first interim dividend for the year 1898-9.

The directors of the Assam Railways and Trading Company, Limited, have declared the following dividends:—On the preferred A shares 4 per cent. per annum on account of arrears, payable on 23rd inst.; on the pre-preference shares at 8 per cent. per annum, for the half-year ending December 31st, payable on January 4th next; on the new 6 per cent. shares, at 6 per cent. per annum, for the half-year ending December 31st, payable on January 4th next.

The Buenos Ayres correspondent of the *Financial News*, telegraphing on Thursday, says:—"The German syndicate which was credited with obtaining a concession for constructing a network of light railways in the province of Buenos Ayres has ultimately refused to take up the concession on account of the manner in which it is worded. It is undoubtedly true that the concession, as drafted, gave the Government an altogether excessive control over the tariffs, and did not provide for the expropriation of the necessary lands."

According to mail advices from Brazil the affairs of the Sorocabana-Ituana Railway Company are attracting considerable attention. This company continues to build extensions with the earnings of the lines under traffic, and also finds money to pay interest on its local debentures, which hold only a second lien on

the property, but the first debenture-holders have for some time had to go without payment, no interest having been forthcoming on the Ituana debentures since May, 1896. The matter has been for some time before the courts, but so far no decision has been arrived at.

A conference of officials representing the principal railway companies in Europe has been sitting at Nice for some days. The object is to facilitate working arrangements between various companies, especially in regard to long-distance trains, and thus to obtain more rapid and direct service between the different countries of Europe. There are to be about three hundred delegates, including some twenty British officials, and of the latter there arrived yesterday Captain Churchward (London Chatham and Dover), Mr. Bush (Great Eastern), Mr. Faircloth (London and North Western), and Messrs. Somers and Alfred Johnson (Midland). The conference has arrived at agreements which will result in an improvement of the international train services. The Russian delegate proposed that the next convention should meet at St. Petersburg on June 15th next, and this was also agreed to.

#### METROPOLITAN RAILWAY CARRIAGE AND WAGON COMPANY, Limited.

SALTLEY WORKS, BIRMINGHAM.

Successors to Messrs. Joseph Wright and Sons.

MANUFACTURERS OF RAILWAY CARRIAGES, TRAMWAY CARS, WAGONS, and RAILWAY IRONWORK of every description. Railway Carriages and Wagons built for cash, or upon deferred payments extending over a period of from three to ten years. A large number of Coal, Ironstone, Ballast, and other wagons to be let on hire.

## GREAT EASTERN RAILWAY. — CHRISTMAS HOLIDAYS.

On Decr. 22nd, 23rd, 24th, 25th, and 27th, **RE LIEVING TRAINS** will PRECEDE the PRINCIPAL ORDINARY TRAINS.

In addition to Relieving Trains **SPECIAL TRAINS** will leave LONDON (Liverpool-st.) as under:—

### ON CHRISTMAS EVE, 24TH DECE.

At 8.20 a.m. to Colchester, Ipswich, Woodbridge, Beccles, Lowestoft, Yarmouth, &c.

At 8.45 a.m. to Cambridge, Ely, Brandon, Thetford, Wymondham, Norwich, &c.

At 4.5 p.m. to Wickford, Rochford, and Southend-on-Sea.

At 7.15 p.m. to Mellis, Diss, Tivetshall, Norwich, Woodbridge, Saxmundham, Halesworth, Beccles, Lowestoft, Yarmouth, &c.

At 9.25 p.m. to Southend-on-Sea, Braintree, Maldon, Colchester, Ipswich, &c.

**SPECIAL MIDNIGHT TRAINS** at 12.0 to Norwich, Wells, Lowestoft, and Yarmouth, via Cambridge; at 12.15 to Bury St. Edmunds and Norwich; also at 12.30 to Yarmouth and Lowestoft, via Ipswich, calling at the principal intermediate Stations.

### ON CHRISTMAS DAY, 25TH DECE.

At 5.10 a.m. to Brentwood, Chelmsford, Witham, Colchester, Manningtree, and Ipswich.

At 8.0 a.m. to Bishops Cleeve, Braintree, Saffron Walden, Haverhill, Cambridge, Newmarket, Bury St. Edmunds, Mildenhall, St. Ives, Ramsey, Peterborough, Wisbech, Lynn, Hunstanton, Swaffham, Dereham, Wells, Wymondham, Thetford, Norwich, &c.

At 8.20 a.m. to Ipswich, calling at Chelmsford and all Stations beyond.

At 8.55 a.m. to Colchester, Sudbury, Bury St. Edmunds, Brightlingsea, Ipswich, Ely, Woodbridge, Wickham Market, Framlingham, Saxmundham, Aldeburgh, Halesworth, Beccles, Bungay, Lowestoft, Yarmouth, &c.

At 10.20 a.m. to Southend-on-Sea, calling at intermediate Stations.

For further particulars see bills and special pamphlet.

**WILLIAM BIRT, General Manager.**

London, Dec., 1898.

## GREAT EASTERN RAILWAY COMPANY.

### REDEMPTION OF MORTGAGES (COMMONLY CALLED LAING'S) BY APPLICATION OF SINKING FUND.

NOTICE is hereby given, that, in accordance with the terms of issue of the above-named Mortgages, a MEETING of the HOLDERS thereof will be held at the Offices of the Company, at Liverpool-street Station, on TUESDAY, the 3rd day of January, 1899, at 12.0 Noon precisely, for the purpose of selecting, by means of the drawing provided for in the terms of issue, the Mortgages to be paid off at the rate of 120 per cent. to such an amount as will be equivalent to the amount of the Sinking Fund for that purpose in the hands of the Company.

The Mortgages selected by means of such drawing, at the said Meeting of the Holders thereof, will be paid off on the 1st July, 1899, at a premium of 20 per cent. on being presented, duly receipted, to the Secretary of the Company, and from the said date all interest on such Mortgages will cease.

By order,

**CLAUD J. HAMILTON, Chairman.**

**W. H. PEPPERCORNE, Secretary.**

Liverpool-street Terminus, London,

5th December, 1898.

## GREAT CENTRAL RAILWAY COMPANY.

NOTICE is hereby given, that the REGISTER of DEBENTURE STOCKS in the above Company will be CLOSED, for the purpose of the half-yearly balance, from the 17th to the 31st day of December inst., both days inclusive.

By order,

**OLIVER S. HOLT, Secretary.**

London-road Station, Manchester,

December 5th, 1898.

## BURMA RAILWAYS COMPANY, Limited.

The Board of Directors of the Burma Railways Company, Limited, are prepared to receive TENDERS for:—

- MISCELLANEOUS TOOLS AND STORES.
- PILLAR WATER CRANES.
- STEEL TANKS.
- STEEL TYRES.
- AXLES FOR CARRIAGES AND WAGONS.

Specifications and Forms of Tender can be obtained at the Company's Offices, 78, Gresham House, Old Broad-street, E.C.

For each Specification (a) a fee of 20s. will be charged, for each specification (b), (c), (d), (e) a charge of 10s. will be made, which will not be returned.

Tenders to be delivered not later than Friday, the 30th December, 1898, at Noon.

The Directors do not bind themselves to accept the lowest or any Tender.

By order of the Board,

**A. G. BEGBIE, Managing Director.**

9th December, 1898.

## LONDON and SOUTH WESTERN RAILWAY.

### CHRISTMAS HOLIDAY ARRANGEMENTS.

**CHEAP THIRD-CLASS RETURN TICKETS** will be issued from LONDON to Stations in the WEST of ENGLAND, NORTH and SOUTH DEVON, and NORTH CORNWALL, also to WEYMOUTH, DORCHESTER, POOLE, BOURNEMOUTH, &c., by all trains on 21st, 22nd, 23rd, 24th, and 25th Dec., and to Stations on the SOMERSET and DORSET LINE on 21st, 22nd, 23rd, and 24th Dec., available to return up to and including 30th Dec. (except from Somerset and Dorset Line on Christmas Day).

**GURENSEY and JERSEY** on 23rd and 24th December, at a fare of 25s., Third-class, available to return any day (Sundays excepted) within 14 days of the date of issue.

**ADDITIONAL TRAINS** will leave WATERLOO STATION as follows:—

At 9.45 p.m. for BOURNEMOUTH on 20th, 21st, 22nd, 23rd, and 24th Dec.; and for WEYMOUTH on 23rd, 24th, and 25th December.

On FRIDAY, 23rd, and SATURDAY, 24th DECE.

At 2.5 p.m. EXPRESS TRAIN for BOURNEMOUTH.

At 12.15 MIDNIGHT for EXETER, BARNSTAPLE, ILFRACOMBE, BIDEFORD, OKHAMPTON, LAUNCESTON, RUDE, WADEBRIDGE, BODMIN, DEVONPORT, PLYMOUTH, and other Stations in NORTH and SOUTH DEVON, and NORTH CORNWALL.

On SATURDAY, 24th DECEMBER.

At 3.0 p.m. for CAMELFORD, DELABOLE, WADEBRIDGE, and BODMIN.

At 5.40 p.m. for the SALISBURY, YEovil, EXETER, and WEST of ENGLAND LINES.

At 5.50 p.m. for BARNSTAPLE, ILFRACOMBE, BIDEFORD, and other NORTH DEVON STATIONS, also to Stations on the SIDMOUTH and BUDLEIGH SALTERN BRANCHES.

At 10.35 p.m. for SALISBURY, YEovil, and EXETER, and INTERMEDIATE STATIONS.

On CHRISTMAS DAY ADDITIONAL TRAINS will leave Waterloo as under, calling at principal intermediate Stations:—

At 5.50 a.m. for BASINGSTOKE, SALISBURY, EXETER, TAVISTOCK, PLYMOUTH, BARNSTAPLE, ILFRACOMBE, BIDEFORD, &c.

At 8.5 a.m. for SOUTHAMPTON, PORTSMOUTH HARBOUR (for Ryde), GOSPORT, ROMSEY, SALISBURY, CHRISTCHURCH, BOURNEMOUTH, LYMINGTON, YARMOUTH, &c.

At 9.30 a.m. FAST TRAIN at Cheap Fares for SOUTHAMPTON WEST, NEW FOREST, and BOURNEMOUTH.

At 12.30 p.m. for ILFRACOMBE.

For further particulars of additional trains, facilities to the Isle of Wight, return special late trains from South and North Devon, North Cornwall, Dorchester, &c., see Bills and Programmes, which can be obtained at any of the Company's offices, or from G. T. White, Superintendent of the Line, Waterloo Station, S.E.

**CHAS. J. OWENS, General Manager.**

## THE BURMA RAILWAYS COMPANY, Limited.

NOTICE is hereby given, that the SECOND ORDINARY GENERAL MEETING of the Burma Railways Company, Limited, will be held at Winchester House, Hall No. 23, Old Broad-street, London, E.C., on TUESDAY, the 20th day of December, 1898, at Twelve o'clock, for the purpose of receiving the Directors' Report and Statement of Accounts for the year ended 30th June, 1898, declaring a Dividend, electing a Director and Auditors for the ensuing year in place of those retiring by rotation in pursuance of the Articles of Association, and transacting the ordinary general business of the Company.

The Transfer Books will be closed from Saturday, the 17th, to Saturday, the 31st day of December, both days inclusive, for the preparation of the Half-yearly Warrants.

Transfers will not be received at the Office while the Books remain closed.

The Dividend Warrants will be forwarded to the Proprietors on the 2nd January, 1899.

By order,

**A. G. BEGBIE, Managing Director.**

Company's Offices: 78, Gresham House,

Old Broad-street, E.C.

8th December, 1898.

**WANTED, a CITY MANAGER,** for London. Must be thoroughly experienced in railway duties.

State age and salary required to "Ralls," c.o. Cowie and Co., 17, Gresham-st., London, E.C.

**MASON'S PATENT TOWER BRIDGE.**

**UNWEARABLE, NON-SLIPPING STAIR TREADS.**

Used on the New Non-Slipping Sideway Entrance Covers, Hydrant, Manhole, Inspection, and other Covers, Coal Plates, &c.

Contractors to H.M. War Office and the Admiralty.

**THE SAFETY TREAD SYNDICATE, LTD.,**  
15, Barbican, London, E.C.

## CALEDONIAN RAILWAY COMPANY.

### EDINBURGH STATION HOTEL— CONTRACT FOR JOINER, PLUMBER, PLASTER, SLATER, AND GLAZIER WORKS.

The Directors of the Caledonian Railway Company invite TENDERS for the Joiner, Plumber, Plaster, Slater, and Glazier WORKS of the new Hotel to be erected at Prince's-street Station, Edinburgh.

The Drawings and Conditions of Contract may be seen at the Office of Messrs. Peddie and Washington Brown, Architects, 8, Albany-place, Edinburgh, on and after Wednesday, 30th November.

Copies of the Specifications, Schedules of Quantities, and Forms of Tender may be obtained from the Architects on payment of a deposit of £2 2s. per copy for the Joiner and Plumber Works, and £1 1s. per copy for the Plaster, Slater, and Glazier Works respectively.

Sealed Tenders, addressed to the undersigned, and marked "Tender for Edinburgh Station Hotel," must be lodged with him on or before Saturday, the 17th December, 1898.

The Directors do not bind themselves to accept the lowest or any of the Tenders.

**J. BLACKBURN, Secretary.**

Caledonian Railway Company's Offices, Glasgow,  
29th November, 1898.

## LONDON, TILBURY, and SOUTHEAST RAILWAY.

NOTICE is hereby given, that an EXTRA-ORDINARY GENERAL MEETING of this Company will be held in the Boardroom at Fenchurch-street Terminus, in the City of London, on THURSDAY, the 15th day of December, 1898, at 12 o'clock Noon, for the following purposes, viz.:—

1. To sanction the creation and issue of the Capital authorised by the London, Tilbury, and Southend Railway Act, 1898, the exercise of the Borrowing Powers and the creation and issue of Debenture Stock.

2. To authorise the Company to subscribe towards the Undertaking of the Whitechapel and Bow Railway Company, and to guarantee the payment of Interest upon the Debentures or Debenture Stock of that Company.

3. To sanction and approve an Agreement, dated the 12th day of September, 1898, made between the Whitechapel and Bow Railway Company, the Metropolitan District Railway Company, and the London, Tilbury, and Southend Railway Company, relating to the Capital, Construction, Working, Maintenance, Management, and User of the Whitechapel and Bow Railway, and for the division of receipts from traffic thereon.

**H. DOUGHTY BROWNE, Chairman.**

**H. CECIL NEWTON, Secretary.**

Fenchurch-street Terminus, E.C.,

26th November, 1898.

## BUENOS AYRES GREAT SOUTHERN RAILWAY COMPANY, Limited.

NOTICE is hereby given, that the REGISTER of Debenture Stock of this Company will be CLOSED from Saturday, the 17th, to Saturday, the 31st instant, both days inclusive, for the purpose of preparing the Interest Warrants for the Half-year ending 31st December, 1898.

By order,

**H. C. ALLEN, Secretary.**

Offices of the Company:

6, Finsbury-circus, London, E.C.,

9th December, 1898.

## THE GRAND TRUNK RAILWAY COMPANY OF CANADA.

NOTICE is hereby given, that the TRANSFER BOOKS of the Company, so far as regards the Perpetual Five per Cent. Debenture Stock (Grand Trunk Borrowed Capital) and Perpetual Four per Cent. Consolidated Debenture Stock, will be CLOSED from Monday, 16th December, 1898, to Friday, 13th January, 1899, both days inclusive.

Warrants for the Interest accrued to the 31st December, 1898, will be forwarded on the 13th January, 1899, to all Proprietors of those Stocks registered in the Books of the Company on the 19th December, 1898.

And Notice is also given, that the Transfer Books of the Company, so far as regards the Five per Cent. Perpetual Debenture Stock (Great Western Borrowed Capital) and the Four per Cent. Perpetual Debenture Stock (Northern Borrowed Capital), will be CLOSED from Tuesday, the 17th, to Tuesday, the 31st January, 1899, both days inclusive.

Warrants for the Half-year's Interest to 31st January, 1899, will be forwarded on that date to all Proprietors of those Stocks registered in the Books of the Company on the 17th January, 1899.

By order,

**WALTER LINDLEY, Secretary.**

Dashwood House, 9, New Broad-street, E.C.,

9th December, 1898.

## CAMBRIAN RAILWAY COMPANY.

### APPOINTMENT OF SOLICITOR.

The Directors invite applications for the position of SOLICITOR to the Company at Oswestry. Salary from £300 to £400 per annum, with private practice. Applicants must have had experience in a Railway Solicitor's Office.

Applications to be addressed to the Chairman at Oswestry, not later than 15th December.

**E. BRAYNE, Secretary.**

Oswestry, November 24th, 1898.

## Meetings.

### MADRAS RAILWAY.

The half-yearly general meeting was held on Tuesday, at the offices, 61, New Broad-street, E.C.; Mr. G. N. TAYLOR presiding.

The SECRETARY (Mr. Julian Byrne) read the notice convening the meeting, and the report was taken as read.

The CHAIRMAN, in moving the adoption of the report and accounts (an analysis of which has already appeared in THE RAILWAY TIMES), said—It is gratifying to the board to be able to present to you to-day accounts which show that the results of the working of the half-year ending 30th June last are not only more favourable than we anticipated, but are, in fact, the best on record as regards net earnings. You will observe that the gross earnings amounted to 516,518*l.*, and the expenditure to 227,136*l.*, making the net revenue 289,382*l.*, which is in excess of the guaranteed interest by 22,934*l.* One-half of this surplus (11,467*l.*) is the amount which would ordinarily pass to the credit of the company. But as the Secretary of State has decided that interest on the borrowed capital for the Cannanore extension must be paid from surplus profits, even before the line is open for traffic, the sum of 625*l.* is deducted from the above amount, reducing the moiety of the company to 10,842*l.* Another adjustment has also to be made, amounting to 3,408*l.*, to provide for the larger contributions by the company and by the staff to the Provident Fund which are required by the revised rules, the board have provisionally accepted. This reduces the company's share to 7,434*l.*, which will allow of the modest sum of 1*s.* being added to the guaranteed interest on every 100*l.* of stock. The per-centage of working expenses to gross earnings is 43.97, against 46.63 in the corresponding half of last year, and is, in fact, the lowest per-centage on record. The gross earnings of the half-year were more than a lac and a half below those of the first half of 1897; but the two great spending departments (engineers, locomotive and carriage) worked so economically that they show a saving over the corresponding half of 1897 of more than two lacs of rupees. This proves how economy in working can be made to compensate for reduced traffic earnings without restriction of necessary expenditure, and for this result we have to thank the careful and judicious action of our officers, Mr. West and Mr. Phipps. The loss of revenue in the carriage of goods amounted to 11,247*l.* There was a large falling off in general merchandise, chiefly food grains. You will recollect that we are comparing with the June half of 1897, when grain was pouring into the famine-stricken districts, and forwarded in large quantities to meet the demands of the north of India. This loss was therefore expected. There was a sensible improvement in the following commodities—coal, oil-seeds and provisions, sugar, salt, and piece-goods. During June, the last month of the half-year, the goods traffic reports show a large falling off in most commodities. On the whole, however, we have reason to be satisfied with the half-year's working. The first-class passenger traffic was worse, but the second-class better, than in the June half of 1897, and the number of third-class travellers was 458,000 below that of the preceding year, involving a loss of revenue of nearly 8,000*l.* I am sorry to say that the weekly reports of traffic for the current half-year are decidedly bad. Writing towards the end of September Mr. Moss says:—"The passenger traffic is as bad as it well can be, and the goods traffic is also behind—partly because we are fighting against last year's famine traffic, and partly because native traders are afraid to travel now that they are liable to be captured and sent to plague segregation carriages." In his half-yearly report the agent and manager writes still more strongly. He says:—"The falling off in the third-class passenger traffic is due entirely to plague and plague restrictions, and still later experience has shown that until these restrictions are relaxed the passenger traffic will not recover. The scare amongst native travellers is so great that I am afraid the effect of the restrictions now imposed will be far-reaching and that the passenger traffic will not return to its normal conditions for many half-years." The precautions necessarily taken by the officers of Government are of the most rigid character, and these as you see are affecting the traffic very seriously. It has been well said that "what Eastern people dread is not death, but worry." To them many things are worse than death, and among them may be classed the constant examination, the tedious delays, the process of disinfection, the production of certificates and passports, &c. All are, no doubt, necessary preventives, but they require to be handled with a wise discretion and with peculiar tact. Mr. Moss reports officially that the stringent rules of the Resident of Mysore will practically kill the passenger traffic on the Bangalore branch. Better, however, that this traffic should be lost than that the lives of many hundreds or thousands of natives should be sacrificed to the plague. We regard with some anxiety the gradual enlargement of the area affected by this terrible epidemic. Cases have occurred in four or five districts of the Presidency, but the number is comparatively insignificant, and, happily, I thought a few days ago, it has not yet reached Madras city. I see, however, by the *Madras Mail* there was one imported case in the beginning of November, but the man was at once taken in charge and conveyed to the Egmore Plague Hospital. He had come from Bangalore, where the disease is very prevalent. Inoculation, which is now considered to be one of the best preventive measures against the plague, is, I am glad to hear, willingly resorted to by the natives in a greater degree than was expected. It is said that sixteen Hindu ladies of Madras, many of them Bramins, recently presented themselves for inoculation, and the experiment was most successful. In the course of the half-year under notice there occurred a strike at the Perambore works. The native workmen clamoured, as usual,

for higher pay and shorter hours. Our locomotive officers were firm, and declined to listen to the malcontents. Through the good management of our staff, victory was easily won. Men were out of work for several weeks and many lost their positions. In a very short time, however, they were besieging the gates with applications for admission and clamouring for reinstatement. The strike resulted in a saving of some thousands of rupees in locomotive expenses without any loss to the company. Mr. Phipps, the locomotive superintendent, was absent at the time on furlough, but when the men found, on his return in June, that he thoroughly concurred in the action of the management during his absence, they gave in all along the line. Mr. Pilkington, who was head of the department in the absence of Mr. Phipps, deserves great credit for his action on the occasion, warmly supported as it was by the agent and manager, Mr. Moss. The mention of our agent's name reminds me that it is right I should tell the proprietors that the Government of Madras have placed on record their warm appreciation of the work done by Mr. Moss for the Madras Railway Company during the past eleven years. During this period, which is coincident with the tenure by Mr. Moss of the office—first of traffic manager and afterwards of agent—the steadily improved position of the affairs of the Madras Railway have been most conspicuous. The gross receipts have very largely increased, and the expenditure has fallen from 64 to 47 per cent. The dividend is nearly double what it was eleven years ago. The tonnage of goods handled has very largely increased, and the number of passengers carried has risen by about 3 millions. The difference between the annual net earnings and the Government guarantee has changed in the eleven years from a deficiency of a quarter of a million sterling to a surplus of some 15,000. In expressing his gratification at this proof of the activity and good management displayed by our officers, the Governor in Council concludes by saying, "In serving his company, the agent and his staff have also served the State." I regret that I have no intelligence of a positive character to communicate to you in respect to proposed extensions. I was silent on the subject on the last occasion, because we had just learnt that the Madras Government had proposed a comprehensive scheme of railway extensions on the metre gauge for the western districts, which involved not only the building on that gauge of our sanctioned Cannanore new extension, but also the conversion of a section of our south-west main line from standard to metre. This proposition was, as you may suppose, somewhat startling to us at first, but, when we came to look closely into the matter and consider it in all its bearings, we could not fail to recognise that the less expensive metre gauge is sufficient to serve the western districts, where the traffic is comparatively light. At the same time, it may be stated that no country could be opened up with greater advantage to the State and to the people than the western coast of Madras, and we may look forward to the time, not, I trust, far distant, when metre-gauge communication may be established between Mangalore to the north and Quilon to the south. We have intimated to the Secretary of State that the Madras Railway Company is willing to accept the full metre-gauge scheme proposed by the Madras Government, to be gradually worked up to as occasion arises—provided always that the Government of India considers that the Madras proposals are sound, and that they also have the approval of his lordship the Secretary of State in Council. With the assistance of the map and of Mr. Gray, who will denote the various places through which the lines will pass, I will explain to you in full what these proposals are. The section of our main line which it is proposed to convert to metre gauge is that from Calicut to Podanur, a distance of 112 miles. This is undoubtedly the weakest section of our railway. If this be done there will be uninterrupted communication on the metre gauge from Cannanore to Shoranur. Shoranur is 54 miles from Calicut. You are aware that an extension has been contemplated for many years past from Shoranur to Cochin. His Highness the Rajah of Cochin has undertaken to finance this line on the metre gauge, and it can be extended as time goes on as far as Quilon, where it will join the southern system of the South Indian Railway. The Western Coast metre-gauge railway will then extend from Cannanore, or even further north, to Quilon. Another proposed conversion to metre gauge is that of our standard branch from Podanur to Mettappoliem, about 25 miles. We are in favour of this conversion being made without loss of time, so that communication on the metre gauge may be provided as soon as possible with Sattiamangalam, Erode, and Mysore to the north and Dindigul to the south. These extensions can be made independently of any arrangements provided for the western coast. It will strike you at a glance that it is imperatively necessary that we should have this communication with Mysore, in order to protect our traffic over the Bangalore branch, and to prevent the encroachments and rivalry of other railways. Podanur will thus become an important junction—the nucleus of the metre system—and it will be necessary to construct new workshops there. We regard the districts to be traversed by the new lines I have described, both east and west, as legitimately within the traffic area of the Madras Railway—diplomatically speaking, within the sphere of our influence—and it is on the clear understanding that these extensions will be granted to us to construct and work that our consent is given to the proposed arrangement. Subject to these stipulations we believe that the carrying out of this comprehensive scheme of the Madras Government will result in serving the best interests of the State, as well as those of the people of those districts, and of the Madras Railway. It is important that the cost of each part of the scheme should be carefully estimated, the order in which the various lines are to be undertaken fully considered, and the terms of working fairly arranged. I felt that I could no longer withhold from the proprietors the changes that are in prospect; the scheme still waits the decision of the Government of India, which is not yet communicated to us. The Nilgiri Railway, which we have undertaken to work for that

company, was opened for traffic about a couple of months ago; goods passed up and down for a short time. I grieve to say, however, that owing to the heavy rains of the north-east monsoon in October and November several nasty landslips have occurred, and one very serious disaster: a bridge 32ft. long has been utterly destroyed by the fall of a boulder—weighing I am afraid to say how many hundred tons; I believe the estimate is 350 tons—which came down from the mountains some 1,000ft. above. This, of course, closes the communication, and the line in places is found to be so damaged that it is decided to defer the reopening till March next, when it is hoped that all damage may be restored. These catastrophes are common to every mountain rack railway at first starting, and can only be met by thorough and careful repair and, I may add, patience. The engineer in charge has written a very graphic account of the disaster, but the meeting will perhaps be satisfied with the summary I have given. As regards the working of the East Coast Railway from Vizianagram and Bezwada to Madras, the terms of which have been under discussion with the Government for many months past, we understand that it is decided that the Government of India shall work it for the present and will not make it over to us. We shall, of course, resign to them the isolated section of 8 miles from Madras to Ennur, which we have worked for Government at a loss for the last two or three years. The Arcot-Ranipet branch—a short branch of 4 miles standard gauge—has made very good progress, and it is hoped it will be opened for traffic before the end of the year. The proposed Beach line extension at Rayapuram is not yet beyond the stage of the submission of plans and estimates. This work is only 1 mile long, and it is estimated to cost about Rs.76,000, half of which is to be borne by the South Indian Railway. You will have remarked that Mr. West, our able chief engineer, who has twice acted as agent, has retired, and that his place is filled by Mr. Stoney, who is noted for his ability as an engineer, and for his inventive talent.

Lieut.-General J. MULLINS, R.E., seconded the resolution, which was carried without discussion.

It was next resolved:—

"That, in addition to the guaranteed interest, a dividend of 1s. on every 100l. of the company's capital stock be paid out of the surplus profits of the half-year ending June 30th, 1898, to the stockholders on the register this day."

#### EGYPTIAN DELTA LIGHT RAILWAYS, LIMITED.

The first ordinary general meeting was held on Wednesday, at Winchester-house, E.C.; Sir AUCKLAND COLVIN presiding.

The CHAIRMAN, in moving the adoption of the report and accounts (an analysis of which has already appeared in THE RAILWAY TIMES), said—If you will allow me I will first deal with the ordinary business before us, and when that is disposed of will proceed to the special business indicated in the resolutions which will be placed before you. For the information of the shareholders who may have joined the company since it started, I will briefly point out the somewhat peculiar conditions under which they have to carry on their operations. The original concession was, as you probably are aware, granted to Messrs. John Birch and Co., Limited, for the formation of a local company whose headquarters were to be in Egypt. The English company was formed to raise the capital required, but it has to be supplemented by a local, that is to say by an Egyptian, company, the board of which is composed of five members of the board of the English company and five gentlemen of high position, who must according to the statutes be resident in Egypt. The president of the Egyptian company is his Highness Prince Hussein, uncle of the present Khedive; his Excellency Riaz Pasha, the eminent Egyptian statesman and at various times Prime Minister, has also joined the board. Both of these gentlemen are highly distinguished agriculturists. The other members are Mr. Percy Carver, of the well-known Alexandrian firm of Carver and Co.; Mr. Foster, formerly of the Irrigation Department and now agent of the important Beherah Land Company; and our agent, Captain Kincaid, R.E. The English company advances money to the Egyptian company, who actually carry on the work, and in return for these advances give the English company debentures and shares of the Egyptian company, as each 25 kilometres of the line are completed and passed by Government. Debentures and shares amounting to the capital of the whole line will ultimately, therefore, be made over to the English company in satisfaction of the advances, the English company thus becoming the sole shareholders and proprietors of the Egyptian company. It sounds rather complicated, but in practice it works very well and enables us to co-operate with a highly competent board on the spot who look closely after all our interests, and whose local knowledge and experience are invaluable to us. You will see from the report that we have now 136 kilometres, say 85 miles, open to traffic. This has now been increased to 89 miles. We had hoped to have had more completed by this time, but as is not uncommonly the case, difficulties arose which have delayed us. When our own officers got to work and began to look and gain further knowledge and experience of the country, they found it desirable to defer some of the lines originally laid down in Beherah, and to try and obtain Government sanction to certain other lines not in the concession, which seemed more promising because they connected up the system which, as first proposed, comprised a series of somewhat isolated sections. These would have proved expensive to work and difficult to supervise. There were also delays in getting possession of land required to round off curves where the track of the country roads, which we mostly follow, is too tortuous and for suitable sites for stations. Last cold season again was a record season for rain, and it very much hampered our work for several weeks in the best time of the year for pushing on the work. As regards

Beherah, most of our difficulties have been overcome, thanks to the zeal and energy of our staff, and we have now a fairly well laid out and connected system, which should be completed in a few months. In Gharbieh we have practically only now, in the last few weeks, made a definite start. For this province no system was laid down in the concession, and, indeed, many of the roads on which lines are required were not even made at that time by the Government. There has also been some discussion as to the lines which we can be allowed to undertake. The State Railway Department is apprehensive of some of our projected lines may be found to compete with rather than to feed the State railways. Our wisest policy, we conceive, is therefore to have patience and to prove by experience that the opening up of a rich and thickly populated province like Gharbieh—where, hitherto, camels, donkeys, and imperfect waterways have been the only means of communication—by a considerable internal system of light railways feeding the State railway at many points, will develop the traffic enormously and materially assist it in its competition with Nile-borne traffic which now escapes them. In the meantime we have plenty of line to get on with, and whilst that is being constructed we hope to get more sanctioned, so that our progress may be continuous, though we may not at the present moment have secured all the line we could desire. You will have seen from the report that we have got a fair amount of line actually earning money; in fact, we open for traffic as soon as we can persuade the Government inspector to certify that it is safe for the public. We think the receipts are most promising, the cotton is coming in steadily, the people move about freely and seem thoroughly to appreciate the value of cheap and efficient carriage at their very doors, the only drawback being the short distances we have to carry the people and their produce. His Highness the Khedive made a trip over a portion of our line the other day, and expressed himself much pleased with what he saw. So far then, gentlemen, we think our prospects are favourable, and that in a reasonable time, and with moderate patience and perseverance, you will be the proprietors of a valuable property. That this opinion is strongly held on the spot also may be judged from the fact that nearly half the shares of the company are now held in Egypt by local investors, who continue to buy up shares on this market at a considerable premium. Our relations with the Government authorities continue to be most harmonious, and we are greatly indebted to the inspecting and local irrigation and road officers for the prompt and courteous disposal of the questions with which they have had to deal in connection with our system.

The Hon. Sir C. W. FREMANTLE seconded the resolution, which was carried without discussion.

It was next resolved:—

"That the interim dividends paid December 20th, 1897, and June 20th, 1898, be confirmed, and that a dividend at the rate of 4 per cent. per annum for the half-year ending September 30th, 1898, on the amounts from time to time for the time being paid up on the preference shares of the company, be and hereby is declared to be paid to the holders of preference shares of the company on the register of the company, on December 5th, 1898."

The retiring directors and auditors were then re-elected.

The CHAIRMAN—We will now, gentlemen, proceed to the other business before us. As you will have seen from the report, the board having gone carefully into the subject, and learnt more of the country, and having seen from practical experience what the lines are likely to earn, consider it desirable to obtain from you considerable powers of extension. They desire to make immediately, as soon as the sanction of Government can be obtained, about another 100 miles of line, mainly in Gharbieh, in order to lay out there a well-connected system to serve the many important towns in that very rich province, instead of a series of isolated sections. When this is accomplished they propose to pause till they have got this 350 miles into a good working and paying condition before proceeding further, by which time experience will have shown which are the most likely extensions to prove valuable to the existing system, and what grounds may exist in regard to each and every such extension for the apprehensions of competition entertained at present by the Egyptian Railway Board. The board will then proceed, with Government permission, by degrees to construct such further lines as may be agreed upon. You must remember, gentlemen, that Government can call on the company to make any lines they consider necessary for the districts in which your concession lies, but your board propose, if possible, all conditions being favourable, to rather anticipate Government requirements, and so to earn their goodwill and confidence. We mentioned in our circular last June that we found that although 1,250*l.* per mile, as given in the prospectus, was sufficient to construct a mile of ordinary line, it did not allow sufficient to connect up the various sections, often the most expensive bits—to make close connection with the State railways when we run into them—and to obtain land in or near the centres of the principal marts, always a very expensive proceeding. Nor did it allow sufficient rolling stock for the traffic that experience now shows we may anticipate. We therefore require another 250*l.* a mile on this account, and also a small amount of working capital for coal and other stores, of which a small stock must be kept up. We propose, therefore, with your permission, to raise shortly, as funds are required, say, 250,000*l.* for these purposes, partly in preference stock and partly in debentures, as may be found desirable and according to the state of the market, and any issue of shares so made will naturally be offered in the first instance to existing proprietors on such terms as may be deemed expedient. This will meet our present requirements, but as we foresee further developments later on, we think it is well to place clearly before you what we consider it probable and desirable the system will extend to, and take powers from you to develop it accordingly with all due caution as circumstances may demand. I now move:—

"1. That this meeting approves of the proposal to construct lines,

in addition to those contemplated on the formation of the company, of about 250 miles in length, and hereby authorises the board to do such things and to enter into such contracts for the construction and working of the said lines, or any of them, as the board may deem advisable, and upon such terms and conditions in all respects as the board may determine, and so that the board may determine the order in which any works, including such new works, are to be proceeded with, and may apply the existing funds of the company, or any money raised by the issue of new shares, or otherwise, to construction of works already authorised, or such new lines, without distinction."

"2. That the capital of the company be increased by the issue of 25,000 new preference shares of 10*l.* each, ranking with regard to dividends and repayment of capital and otherwise in all respects *pari passu* with the preference shares of the original capital, upon the terms that the funds of the company available for dividend be applied first in payment of a cumulative preferential dividend at the rate of 5½ per cent. per annum upon the amount for the time being paid on the preference shares, including such new preference shares, and that subject thereto there shall be set aside to a sinking fund 10*s.* 9*d.* per cent. on the amount of the capital of the company (including such new shares) for the repayment of such capital in its due order of priority, and that the balance remaining in any year shall be divided into two equal parts, of which one shall (subject to the power in the articles to increase the sinking fund or create other sinking funds) be paid as dividend on the preference shares in proportion to the amounts paid or credited as paid thereon, and the other shall be paid as dividend on the deferred shares in proportion to the amounts paid or credited as paid thereon."

"3. The powers given to the board by Article 16 of the Articles of Association to raise or borrow money by the issue of debentures or debenture stock shall be extended by an amount not exceeding the amount of the new preference capital of the company for the time being subscribed."

Sir C. W. FREMANTLE seconded the resolutions, which were unanimously agreed to.

A separate meeting of the holders of preference shares was then held, when the above resolutions were submitted and carried unanimously.

### LONDON TILBURY AND SOUTHEM RAILWAY.

An extraordinary general meeting was held on Thursday, at Fenchurch-street Station, E.C.; Mr. H. DOUGHTY BROWNE presiding.

The SECRETARY (Mr. H. Cecil Newton) having read the notice convening the meeting,

The CHAIRMAN said—Gentlemen, the first two resolutions which I have to propose refer to the creation of the capital under our Act of 1898. The share capital is 500,000*l.* and the borrowing powers are the usual proportion—namely, one-third, 166,000*l.* I wish to say that, in asking you to authorise the creation of this capital and of this debenture stock, it is only an authority to the directors to create it. We do not propose to issue it all at present, but the necessity for its creation arises from the fact that we are going to subscribe 330,000*l.* towards the capital of the Whitechapel and Bow Railway. I will deal with the reasons why the directors ask the proprietors to authorise the subscription to the Whitechapel and Bow Railway in the next resolution. I will therefore formally ask you to approve of the two following resolutions, which I now move:—

"That the additional capital of 500,000*l.* authorised by the London Tilbury and Southend Railway Act, 1898, be and the same is hereby created, and that the directors be authorised to raise such capital by the issue, at their option, of new ordinary shares or stock, or new preference shares or stock, or partly by any one or more of those methods respectively, at such times, to such persons, on such terms and conditions, and in such manner as they may determine."

"That the directors be and they are hereby authorised to exercise the borrowing powers conferred upon the company in respect of the additional capital authorised by the London Tilbury and Southend Railway Act, 1898, to the extent of 166,000*l.*, by the creation and issue of debenture stock to the like amount. And that there be attached to such debenture stock, a fixed and perpetual preferential interest, at the rate of 4 per cent. per annum, to commence from the issue thereof, and be payable half-yearly at the same time as the interest on the debenture stock of the company is payable, and that the directors be and they are hereby authorised to issue such stock, at such times, to such persons, on such terms and conditions, and in such manner as they may determine."

Mr. JOHN WARREN seconded the resolutions, which were agreed to without discussion.

The CHAIRMAN—The next resolution I have to propose is:—

"That pursuant to the provisions of the London Tilbury and Southend Railway Act, 1898, the directors be authorised to subscribe on behalf of the company such moneys as they may think fit towards the undertaking of the Whitechapel and Bow Railway Company, not exceeding in the whole one-half the authorised capital of that company, and also to subscribe for or hold any debentures or debenture stock of the Whitechapel and Bow Railway Company, not exceeding in the whole one-half of the authorised debentures or debenture stock of that company, and guarantee the payment of interest not exceeding the rate of 4 per centum per annum, upon the debentures or debenture stock of the Whitechapel and Bow Railway Company, authorised by the Whitechapel and Bow Railway Act, 1897."

In moving the resolution, I would call your attention to the fact that at the last four meetings we have held I have entered at some length into the reasons why we considered it desirable that we should make this contribution towards the undertaking of the Whitechapel and Bow Railway. The proprietors are aware that this Bill was obtained by an independent company, and we felt when they approached us with regard to its construction that it would be so useful to us that it was

worth our while to undertake, with proper partners and under proper conditions, the construction of this railway. Consequently, the result of our negotiations was that the District Company, who also appreciated the advantages of this railway, agreed to join us in its construction, and they are finding the other moiety of the capital. I might just for a moment dwell upon the reasons why we think the construction of this railway will be beneficial to our undertaking. We at present are not physically connected with the Metropolitan system. If anybody wishes to use our line he has either to walk from Mark-lane on the Inner Circle on the one hand, or from Aldgate on the other, whereas our competitors—the Great Eastern—have a communication by a subway between the Bishopsgate-street Station of the Metropolitan Railway and their station at Liverpool-street. There is also the advantage that we shall obtain by practically making the whole of the Metropolitan system a collecting ground for our traffic, and there is yet another reason which has weighed with us very considerably, and that is with reference to the local traffic. We find great difficulty in conducting it with the somewhat limited accommodation we possess at Fenchurch-street, and there is no doubt that this link from our line at Bromley to the Metropolitan and the Metropolitan District railways at Whitechapel, will be a very great advantage, and allow us to accommodate and develop our local traffic on much more favourable conditions than we have done hitherto. I have not concealed from the proprietors on previous occasions that during the construction of this railway, and probably for a year or so after it is opened, the outlay of capital will entail some burden upon our undertaking; but, in spite of that, which, of course, is one of those things one would never do unless great advantages were to be secured, the board unanimously invite you to approve of this resolution, because, ultimately they believe the new line will be of great and permanent advantage to the London Tilbury and Southend Railway. I might also mention incidentally that we are not doing this without some experience in the past of a somewhat similar engagement. We, with the Midland Company, found the capital for making the Tottenham and Forest-gate Railway. That also during construction and for a year or two afterwards involved a certain burden upon the proprietors of our company, but we are able to say at the present time that the very large increases of traffic which we at present enjoy are to a very considerable extent the result of that connection; and further that, though that line has now been opened for nearly five years, the amount of traffic we are receiving makes the line now no burden to the proprietors whatever. We believe that similar results, and perhaps even more beneficial in many ways, will be secured by the construction of this railway, and therefore we, with considerable confidence, advise you to accept the resolution I have read. I now beg to move the resolution.

Mr. JOHN WARREN seconded the resolution, which was carried unanimously.

The CHAIRMAN—The fourth resolution is the one approving the agreement with the Whitechapel and Bow Railway Company, which we have made with that company, and also with the Metropolitan District Company. It is as follows:—

“That the agreement made between the Whitechapel and Bow Railway Company, the Metropolitan District Railway Company, and the London Tilbury and Southend Railway Company, dated September 12th, 1898, relating to the capital, construction, working, maintenance, management, and user of the Whitechapel and Bow Railway and for the division of receipts from traffic thereon, now submitted, be and the same is hereby approved.”

I would only say with regard to this agreement that it has been most carefully gone into—the questions of joint and separate user, the questions of division of the receipts amongst the respective companies, and also the engagements on the part of the Metropolitan District Railway to give us certain accommodation which we think it necessary to get to obtain all the benefits which the connection ought to give us, have been all most carefully considered and gone into. I beg to move the resolution I have read.

Mr. JOHN WARREN seconded the resolution, which was carried unanimously.

The CHAIRMAN—I wish to say, gentlemen, that although they have not been invited in any way, the proxies we have received in favour of this policy represent 500,000*l.* of our stock, which shows that the proprietors generally see the advantages that are likely to accrue to the company.

The proceedings then terminated.

### BENGAL CENTRAL RAILWAY.

The half-yearly meeting was held on Wednesday, at the offices, 199, Gresham-house, E.C.; Lieutenant-General C. H. DICKENS presiding.

According to the accounts rendered, the gross receipts for the half-year ending June 30th, 1898, amounted to Rs.5,28,083 (against Rs.4,54,749 for the corresponding half-year), and the expenses to Rs.3,55,276 (against Rs.2,74,824), leaving a profit of Rs.1,72,807 (against Rs.1,79,925). In terms of the contract with the Secretary of State, one-fourth of these earnings (Rs.43,202) belonged to the company. This amount has been brought home at 1*s.* 4*d.* per rupee, and the total sterling equivalent, including the balance of last account, amounts to 3,317*l.* This is subject to Indian income-tax for the half-year, leaving 3,242*l.* available for dividend. The directors recommend the payment of a dividend of 11*s.* per 100*l.* subject to income-tax, in addition to the guaranteed interest, making the return for the half-year 2*l.* 6*s.* per cent. The length of line operated was 125 miles. The ratio of expenditure to receipts was 67.28 (against 60.43) per cent. The number of passengers carried was 791,982 (against 796,375), the quantity of goods carried 57,433 tons (against

69,912 tons), and the number of train miles run 184,193 (against 183,562). The expenditure on capital account had been 918,639*l.*, and the receipts 1,000,000*l.*—viz., shares, 500,000*l.*; advanced by the Secretary of State, 500,000*l.* Credit balance, 81,361*l.*, of which 16,147*l.* was represented by stores.

The CHAIRMAN, in moving the adoption of the report and accounts, said that when he last addressed them he mentioned that the Government had declined to sanction their extension to Madaripur, but that they had applied for an extension at least of 22 miles to Lonagara, in view to a further extension to some suitable river terminus, to serve the traffic expected to come by the Assam-Bengal line. They learnt now that the Government had declined also the short extension of 22 miles, but they had allowed them to survey a line for an extension to a place called Majigattee on the Pudda, or Lower Ganges. The Government had also signified their willingness to modify the company's contract so as to allow of their running steamboats to take the traffic which might offer by the Assam-Bengal line, if they found that they could not arrange suitable terms with the steamboat companies. They should do what they could to obtain the establishment of a suitable service by the agency of the existing steamboat companies, but until the railway was extended so as to diminish the gap between their line and the Assam-Bengal Railway they did not expect that much advantage could be obtained from steamboat services. On the other hand, they had reason to think that the express steamer service recently established by one of the large steamboat companies running direct to Calcutta had withdrawn traffic from their railway. In regard to the revenue the half-year to June last had been disappointing. They had been anticipating a continuance of the growth of traffic which had taken place since they took the working of the railway into their own hands, but several adverse circumstances had arisen. Most of them were probably temporary, and they might hope, therefore, for a return of successful working with improved conditions. The adverse circumstances had been, first, the outbreak of plague in Calcutta, which turned out to be slight. The Government, however, formally proclaimed the plague in the city in the end of April last, and the consequence was a panic and a hasty exodus of well-to-do natives, who ran away, regardless of business engagements; and then followed strikes of coolies, carters, and boatmen, and a considerable disorganisation of trade. Then there was the competition of the steamboats. Again, there had been the serious accident reported on the last occasion of their meeting, which had led to increased charges against working expenses; and the provision of some small increase of the working staff to meet the expected progressing traffic had led to expenses without the expected advantage. The dividend they had to propose was 11*s.* per 100*l.* in addition to the guaranteed interest, and was fairly satisfactory in the circumstances. For the current half-year they still found adverse circumstances at work. The jute season was late and poor, so that the large traffic which last year they could not cope with for want of rolling stock had, now that they had got the rolling stock, not come forward. They had no reason to fear that the dividend for the current half-year, payable next July, would fall below what they had on the average received during the years preceding the recent improved traffic.

Mr. J. N. BULLEN seconded the motion, which was agreed to.

### BENGAL-NAGPUR RAILWAY.

The half-yearly general meeting was held on Tuesday, at the offices, Gresham House, E.C.; Mr. SAMUEL HOARE, M.P., presiding.

The CHAIRMAN, in moving the adoption of the report and accounts (an analysis of which has already appeared in THE RAILWAY TIMES), said the increase in their receipts which he foreshadowed at their last meeting had taken place, and while there had been larger earnings, they had the gratification of seeing a decided decrease in the working expenses, the ratio of which to receipts had been 41½ per cent. as compared with 46 per cent. in the corresponding period of 1897. The principal increase had been in the goods traffic, notably in the articles of wheat, oil-seeds, stone, and lime. In sugar there had also been a small increase. With reference to coal, while the tonnage carried had been over 19,000 tons less, the receipts had been better. The rice traffic showed a diminution; the expected import of Burma rice into the Central Provinces had not taken place. The result of the coaching traffic had been rather disappointing, for while they had carried more passengers they had received less—a proof that shorter distances had been travelled; but the plague and famine had very much interfered with the movements of people in India. They hoped when these difficulties had disappeared to see a considerable development of the traffic. Alluding to the works in hand, he stated that they were progressing satisfactorily. The negotiations between their company and the East Indian Company for a joint station at Howrah were practically completed. Arrangements had been made for the carriage, after the opening to Kola, of consignments from that place to Calcutta by steamer until such time as the completion of the Roopnarin bridge would give direct access to Calcutta. During the rains of 1899, from June to September, it might be necessary to close a section of about 60 miles in which the heaviest bridging was situated, as the bridges would not then be finally completed; but the through route should be reopened directly the rains ceased. The arrangements in regard to the terminal station at Calcutta were still under consideration.

Lieutenant-General C. H. DICKENS seconded the motion, which was agreed to.

### INDIAN MIDLAND RAILWAY.

The twenty-sixth half-yearly general meeting was held yesterday at Winchester-house, Old Broad-street, E.C.; Sir ANDREW R. SCOBLE, K.C.S.I., M.P., presiding.

The report and accounts (an analysis of which has already appeared in THE RAILWAY TIMES), were taken as read.

The CHAIRMAN then said—Gentlemen, I am very glad to be able to congratulate you, because I think you will consider that it is a very satisfactory report. The gross earnings are higher than in any previous corresponding half-year, and the amount is Rs.3,43,000, or 10 per cent. more than they amounted to in the corresponding period of 1897. The expenditure shows a slight increase of Rs.20,000, but it is only 49·16 per cent. of the earnings, against 53·51 per cent. in 1897, and 56·82 in 1896. I think, therefore, you will be glad to find that, although the earnings of the railway have shown this considerable increase, that increase has not been accompanied by a corresponding increase in expenditure, but that the ratio of expenditure to earnings is considerably less this half-year than in the preceding two half-years to which for the purposes of comparison it is desirable to refer. I may say that I think in all respects, both as regards coaching and goods, the accounts are satisfactory. Perhaps I may read to you what the traffic manager reports as to the earnings of the line generally. He says:—

"The famine was at its height during the first half of 1897, but after the following monsoon season, which gave a good harvest, we had no longer to carry the abnormal traffic in food grain brought into this part of the country. In May and June of 1898 a sudden demand for wheat arose in Italy, France, and Belgium, owing to the Governments of those countries suspending their import duties on wheat, the price of which had risen so high on the Continent as to lead in some instances to serious riot. The result was to give this railway an augmented traffic at the time we had concluded satisfactory arrangements with neighbouring railways for drawing to the Indian Midland Railway route a share of the Punjab export trade, from which we had formerly been excluded, which largely compensated for the diminished receipts in the movement of food stuffs to the late centres of distress."

Now, gentlemen, I read that extract to you for the main reason of pointing out to you how very much the progress of railway communication in India is adding to the usefulness, and thereby to the profits of this line. When the line was first constructed we were practically only in communication with the East Indian Railway on the one side and the Great Indian Peninsula on the other. Now, by the opening of the Bhopal-Ujjain Railway we are put into direct communication with the Baroda railway system, and we shall by the end of this year be placed also in direct communication by the opening of the through line from Saugor to Katni with the Bengal-Nagpur Railway; and the more schemes of through traffic we can present to the consignor, the better of course will be our own traffic, and the better therefore will be the profit we may expect to realise. At the same time, by the judicious management of our representatives in India, we are opening out new through routes and getting a fairer share to our system than we were able previously to obtain, and at the same time we are not neglecting the local traffic on the line. The traffic manager says on that point:—

"In looking back upon the general results of the working of the last half-year we can not only find much of promise in the local traffic returns, but the position we have gained by combinations effected during the period assures to us increased through traffic in future both to and from Bombay and Calcutta."

I think that shows that our agents in India have kept their eyes open, and have not been slow to take advantage of the increased facilities which our junctions with new systems enable us to offer to the commercial public. The extensions of our line to which I referred on previous occasions are mainly in the direction I have already mentioned—namely, that of the Bengal-Nagpur Railway. The line from Saugor to Damoh was opened for traffic on March 26th this year; that is, in the period to which the accounts refer; but the through line from Damoh to Katni is not expected to be opened until January 1st, 1899. We shall then have a through connection from our main line with the main line of the Bengal-Nagpur Railway, and I hope that that will open to us increased sources of traffic. Another important extension is the one in the direction of Rajputana, by carrying on a line from Guna, which is in the territory of his Highness the Maharajah of Sindia, to a point called Baran, which is expected to be open for goods traffic this month and for all traffic next March. That line, when constructed, will carry us a long way to the accomplishment of a pet project of the Indian Midland, which they have had for some years. It will carry us a considerable way to the completion of a through line on the standard or broad gauge, which will eventually connect Karachi with Calcutta. I am glad to have this opportunity of referring to that line, because I hope that those who represent the Public Works Department in India will come to the view that the directors of this railway have always expressed, that it is most desirable for many reasons that that through route should be accomplished without any unnecessary delay. As the matter now stands the total distance from Karachi to Calcutta is 1,620 miles, and with the completion of our connection with the Bengal-Nagpur Railway at Katni, to which I have referred, and the completion of the Bengal-Nagpur Railway into Calcutta, which is expected to be shortly accomplished, there will be from Baran to Calcutta a distance of 958 miles of the broad gauge, already in existence. At the other end—the Karachi end—there is a distance of 170 miles already constructed from Karachi to a place called Shadipalli; and add that 170 miles to 958 miles and you get a total of 1,128 miles of broad-gauge railway out of the 1,620 which the whole distance comprises. That makes seven-tenths, roughly, of the whole journey, which will very shortly be accessible to the travelling public. Now in the remaining part of the line, I am glad to say that, mainly upon our instance, the Government of India have sanctioned a survey of a line westward from Baran to some point of junction with the Rajputana Railway. They have given two objectives—one at Ajmere, and the other at a place called Marwar. Either of those would

suit us fairly well, though we should prefer to have the junction made at Marwar rather than at Ajmere. Then there is a piece of metre-gauge railway in the province of Johdpore. That is a matter of 94 miles, which is already constructed on the metre-gauge system, and the Government has sanctioned a junction between the broad-gauge end of the line at Shadipalli with this metre-gauge line in the Johdpore territory, which is at present proposed to be made on the metre gauge. We hope and we have strongly urged upon the Government that, instead of making that on the metre gauge, it should be made on the broad gauge, so as to connect the two broad-gauge sections already in existence; and that, in order to complete the connection on the broad gauge, the bit of metre gauge which has already been built should be converted to broad gauge. That would be much cheaper than the alternative plan of constructing the one piece on the metre gauge and converting that bit of the broad gauge which it is now suggested should be turned into metre gauge. And I think it must be very clear to anybody that when you have got seven-tenths of the line on the broad gauge and there is to be a connecting link between two of the most important places in India—it must be clear that it is desirable that the whole line should be made upon the one system, and that there should not be the two breaks of gauge which the present scheme of the Government would necessarily involve. We hope, having brought these considerations very forcibly to the attention of the Government of India, that they will be disposed to take our view in this matter, and then we shall find the Indian Midland taking an important part in linking together the great seaport of Scinde, Karachi, with the great capital of India, Calcutta. That is one of our desires, and one which we think our shareholders will heartily endorse. Then you know that on previous occasions I have mentioned to you the desire of the board to have feeder lines constructed to bring our main system into direct communication with important centres of traffic, military stations, or other localities which offer a good prospect of business. I am sorry to say that so far, although the plans and estimates have been submitted to Government for some time, we have received no sanction to begin any one of our works. There is, I believe, some question as to gauge. We suggested a 2ft. 6in. gauge for these feeder lines, but the Maharajah Sindia has lately constructed, or is now constructing, some lines on the 2ft. gauge, and we, although we ourselves would prefer the 2ft. 6in. gauge, are so anxious to have them constructed, that we would accept the 2ft. gauge, or, in fact, any gauge that would be sufficient for the purposes of the traffic. But the Maharajah, I am bound to say, takes great interest in railway feeder extension, and the two feeder lines he is constructing on the 2ft. gauge are both of them very important lines of railway. One goes from Gwalior to Sipri, nearly 73 miles, and that is expected to be open for traffic by March next. The other goes from Gwalior to Bind, a distance of 52 miles, and that is also well advanced; so that we shall with the help of the native chief, through a considerable portion of whose dominions we pass, soon have two important feeders constructed at his expense, and both of which necessarily must bring a considerable amount of traffic to us. I think the example of his Highness the Maharajah might well be imitated by the Government of India, because while they have been considering, he has been acting, and we shall have about 140 miles of railway building by him, before any one of the feeder lines which we have suggested and the Government have approved, has been sanctioned by them for construction. I do not think there is anything else upon the report that I need trouble you with. I may mention as a matter of interest to you, that the Government have proposed to improve the condition of the Provident Fund which has been established for the benefit of your servants in India, by taking increased contributions from them and giving an increased contribution out of revenue. It is not necessary that I should trouble you with any resolution on the subject, because you are the happy recipients of a 4 per cent. guarantee which you have not yet earned, and, therefore, this benefit to your servants will be obtained without any cost to yourselves; and it is not necessary that I should ask you to sanction the board contributing the sum which will be necessary under the new rules. I sincerely hope it will not be long before I have to make that demand upon you, and I am sure you will be so delighted with having earned a good rate of interest to yourselves, that you will gladly contribute out of your surplus earnings to the fund for the benefit of your servants in India. I now beg to move—"That the report of the directors, together with the accounts now submitted, be received and adopted." (Applause.) I shall be happy to answer any question that any shareholder may wish to ask before I put that resolution to the meeting.

Mr. H. WOLLASTON BLAKE—I beg to second that motion.

Mr. J. BENTLEY—With reference to the gauge, have the chiefs of the different states the power of stating that the line should be of a certain gauge, and no other, or does the Government fix the gauge?

The CHAIRMAN—It is a matter of negotiation between the native chiefs and the Government of India.

In reply to a further remark by Mr. BENTLEY, the CHAIRMAN said—I think you are perfectly right. It would be undesirable that these through lines should be on two gauges if it necessitates two different classes of rolling stock, because there would be great inconvenience to traffic by having two transhipments of cargo during the course of the voyage.

The resolution was then put and carried unanimously.

The CHAIRMAN—I now have to move:—"That the best thanks of the meeting are due, and are hereby given, to F. T. Rickards, Esq., the agent of the company in India, to the heads of departments, and to the members of the staff generally for their services during the past half-year." I can assure you we have a most excellent staff in India, who are perfectly alive to every opportunity of increasing the earnings of the line, and who take the very greatest care of it in every way. ("Hear, hear.")

Mr. A. H. CAMPBELL seconded the resolution, which was unanimously agreed to.

On the motion of Mr. QUICK, seconded by Mr. BENTLEY, a hearty vote of thanks was accorded to the chairman and directors for their attention to the interests of the company.

The CHAIRMAN briefly acknowledged the vote, and the proceedings then terminated.

### GREAT INDIAN PENINSULA RAILWAY.

The ninety-eighth half-yearly general meeting was held yesterday, at Winchester-house, Old Broad-street, E.C.; Sir ANDREW R. SCOBLE, K.C.S.I., M.P., presiding.

The SECRETARY (Mr. F. L. Soare) read the notice convening the meeting, and the chairman affixed the seal of the company to the register of shareholders, 15,292 in number. An analysis of the report and accounts has already appeared in these columns.

The CHAIRMAN then said—Gentlemen, on the assumption that you will take the report as read, I shall proceed to address to you a few observations on the salient characteristics of the report. I have to say that when, contrary to my usual practice, I ventured on a prophesy at our last meeting, facts have since occurred which fully justified that prophesy. I told you I expected the accounts of the half-year with which we are dealing now would correspond very much in figures and in results with those of the corresponding period of 1895. We then were able to give you a dividend out of surplus profits of 8s. 4d., and I am glad to say that this half-year we are able to give you, though it is not a very large sum, a little better than that; we can give you a dividend for the half-year of 8s. 9d.—in the language of the Stock Exchange 7-16 per cent. The gross earnings for the half-year that we are now considering show an increase over the corresponding period in 1897 of Rs.42,20,000, and there was an increase of expenditure of Rs.11,99,000, nearly 12 lakhs, so the net earnings are greater by a sum of Rs.30,21,000. The total net earnings at the rate at which we are under our contract entitled to convert rupees into sterling, would give a return of 6l. 16s. per cent. upon the capital of the company. But, gentlemen, that rate of exchange is 1s. 10d., and you know very well that with the current rate of exchange all you can obtain for your rupees is about 1s. 4d. Therefore, the 6l. 16s. was not actually earned, although we have earned something over 5½ per cent. When I say 5½ per cent. I include not only the surplus profits which you share, but the surplus profits which go into the exchequer of the Secretary of State for India, who divides them with us. The rate of 1s. 4d. was satisfactory enough, in this respect—that we get the whole of our surplus profits at that rate of exchange, and it was that, more than anything else, which has enabled us to give you a slightly increased dividend over that declared in 1895. Now, looking at the traffic, you will observe that there was a slight increase in the takings from the first-class passengers of Rs.14,975. To show how curiously the receipts of railways depend upon circumstances which appear entirely outside railway management, I may say that that increase was entirely due to the number of astronomers who went over to India to witness the eclipse of the sun in January last. They went in considerable numbers, with a considerable amount of apparatus for observing this phenomenon, and our agent in India did the utmost he could to facilitate their movements, with the fortunate result, as I have said, of an addition of Rs.14,000 to our takings. On the other hand, I am sorry to say that the plague still continues in India, and although it is perhaps a little less virulent in its action now than it was some time ago, it is still sufficiently so to prevent the number of third-class passengers from keeping anything like so high as we should wish it to be. During the half-year under review, we carried much more than a million fewer third-class passengers than we did in the corresponding period of the previous year, and that led to a decrease in our takings from that class nearly 8½ lakhs of rupees. But, gentlemen, although the plague is still with us, I am glad to say that the figures of the half-year show very satisfactorily and very clearly that the famine is at an end. Not only was there no necessity for importing grain into the parts of the country which we serve, but there was a very considerable export of wheat to Europe during the period that we are now considering. The increase in wheat amounted in money to no less than Rs.14,37,785, and that increase was, I may say, practically due to the rise in the export trade. Unfortunately, the large demand for export was limited to the last two months of the half-year, May and June; but I am glad to say the resources of the railway and the energy of our staff were sufficient to deal with the very great amount of traffic which that demand for export created. In a Bombay newspaper there is a paragraph which, I think, will interest you, and which I will proceed to read. It shows exactly the state of things prevailing at the time of which we are speaking. The newspaper says:—

"Taking the traffic which daily passes through the Great Indian Peninsula Railway terminus at Wari Bunder alone, some idea of the feverish activity which exists at both the railway termini and the docks may be gained when we point out that it requires the daily removal of about 5,000 cartloads to keep the yard reasonably clear for each succeeding day. Of course, a small proportion of this vast quantity is retained in the city for local consumption, but the major portion goes direct to the various Port Trust warehouses, and when these are full, as most of them are just now, on to the quays, and, in fact, almost anywhere where stacking-room can be found. Tier upon tier and long rows of well-filled bags are stacked just outside the docks too, and are taken in as room is afforded and opportunity occurs. Both the Prince's and Victoria Docks are full, there being there to-day thirty-four steamers, nearly every one of which has been working day and night to clear out and make way for other incoming craft. . . . The volume of exports for the first three weeks of the present month

has been unprecedentedly enormous, having reached something close on 100,000 tons. Add to this about 25,000 to 30,000 tons for imports, and some idea may be gained of the strain that has been put upon the railway and Port Trust authorities and their employes during the period under review."

I think this will be regarded as a satisfactory testimony to the excellence of our arrangements and the energy of our staff in dealing with so large and unusual an amount of traffic. ("Hear, hear.") But, gentlemen, wheat was not our only source of income. The cotton crop was good and early, and gave us an increase of Rs.16,42,000; and the crop of seeds, which also form a very large article of export, was also good, and yielded us Rs.12,22,000 more than in the previous period. Therefore you find that the gross earnings increased by the satisfactory figure which I have already pointed out of upwards of 42 lakhs of rupees. Now, on the other side of the account I told you that we expected that the expenditure would be about 52 per cent. of the takings. I am glad to say that that was a very close estimate, because it actually works out to 51 61 per cent, and therefore I think it was not at all a bad shot at a prophecy. ("Hear, hear.") But that expenditure was considerably greater than we hope to have it in normal years, because you will remember that it was my duty to inform you of the very sad and disastrous failure of a large number of axles which we sent out about thirteen years ago, and which have had to be replaced after a service of only about ten years, whereas their life was expected to reach to twenty years, and the expenditure on account of these axles during the half-year in question amounted to very nearly 9 lakhs of rupees—a very large item indeed and one which we may hope will never occur again. The maintenance of the line generally, as you will see by the figures which are given on page 6 of the report, was rather less than in the corresponding half-year, and that is attributable, to some extent, to one of the indirect effects of the famine. The cessation of famine enabled us also to cease paying compensation for the increased price of grain to our staff, and that has come to a very considerable item during the half-year. But there was also an increased credit in engineers' department for old stores, and the improvement in the rate of exchange also helped us a little. I am glad to say that there has been no falling off, and no neglect whatever, of the careful attention which our servants in India always give to maintain the line in thorough working order, and I am glad to be able to read from the report of the Government inspector, who is not our old friend Colonel Selby, but a new man who came to the duty with entirely fresh eyes and an entirely fresh view of things. I am happy to say that the Government Inspector has given one of the best reports which I have ever had the pleasure of receiving from that officer. He says:—

"It is a pleasure to inspect the Great Indian Peninsula Railway, to note the studious attention given to every detail of maintenance, the steady perseverance in preserving the high standard attained, and the frank willingness—the anxiety, indeed—displayed by the chief engineer and his officers to discuss every matter thoroughly with the Government inspector, and to give him the fullest information in their power. These, which are characteristics of the administration in all its branches, have largely contributed towards the existing harmonious relations between the Government officials and the administration which my predecessor has often remarked upon, and the value of which, for the promotion of business and in the interests of Government and the company alike, it would, in my opinion, be difficult to over-estimate."

I think you will see from that, which I consider very high praise indeed—"Hear, hear"—that the character of the line has been maintained, and that our staff have shown themselves, as they have ever done, perfectly ready and perfectly willing not only to do their best, but to accept any suggestions, and to work out any improvements which may be suggested by the Government inspector of the line. In regard to renewals, which is always a somewhat serious item in our accounts, during the half-year 27 miles of steel rails were laid in substitution of the old iron rails, and I am glad to say that 94 per cent. of the main line is now laid with steel rails, and that the remaining 6 per cent. will probably be completed in the course of the present twelve months. We have renewed eight engines as against seven in the corresponding half-year of 1897, and from our point of view (though not perhaps from the point of view of the trade of the country) it is to be regretted that whereas in 1897 each engine cost us Rs.24,386, in the half-year that we are now considering the same class of engines cost us Rs.30,158 each. This is an increase which, while satisfactory no doubt to the manufacturer, is not quite so satisfactory to the railway shareholder. As regards goods vehicles, we replaced 252 against 152 in 1897. I think those are the main features of the account, and the only ones with which I need trouble you. With regard to the traffic, as you know, we now burn very little English coal, and the country coal from the Bengal, or Singareni, or other mines whose coal we use, is now found to be very suitable for our purposes. We buy the product of the country in the country, and I think that must be satisfactory to all of those who look upon Indian railways—as indeed they have been and will be—as amongst the most important factors in developing the industrial improvement of that country. ("Hear, hear.") The extensions of the line which have been mentioned, and which are in the province of Khandesh, consist of two small pieces, one to connect the Tapi Valley with our system at Jalgaon, and the other to bring the town of Dhulia into connection with our main line at Chalisgaon. These are progressing satisfactorily, and there is nothing very particular to report with regard to them. There are only two other matters, I think, which I need mention. In the first place, you will have noticed that in paragraph 6 we refer to the condition of the company's provident fund, and I have to ask you, gentlemen, to concur with us in making an improvement in the position of our staff in regard to that fund. The Government, as

you know, is the largest employer of railway servants in India, and, with a view to encourage thrift, and to provide for those who are incapacitated from service, either by illness, or by old age, or otherwise, some means of subsistence after they leave the service of the company, you know that all the Indian railways, including the Government lines, have provident funds connected with them. Up to this time we have only taken a moderate sum from our employés, and contributed a moderate sum from our surplus profits in aid of their own contributions. The Government has now proposed a somewhat more liberal scale, by which the contributions of the railway servants will be nearly doubled, and, I suppose, there will be almost a corresponding increase in the contributions to be made by the companies; and, gentlemen, I think you will agree with us that, although this is a burden, it is a burden which we ought to bear in the interests of our servants. We could not have our men saying that they were under worse terms than the employés of any other company, or than the men employed on any of the railways owned by the State in India; and, therefore, I shall ask you with confidence to pass the resolution which will presently be submitted to you, to enable us to carry out, by your liberality, the proposals of the Government with regard to the increase in the provident fund of this company. There is only one other matter which I need mention. I regret to say (and you will all, I am sure, who knew him, share in the regret) that one of our auditors, Mr. George Smith, died the other day. Under our constitution it falls upon you, at this the first meeting after his death, to elect his successor. Three gentlemen have offered themselves for the appointment—Mr. W. A. Browne, Mr. Samuel Lovelock, and Mr. Frederick W. Smith. I believe I am right in saying that Mr. Smith has retired from the contest, and I apprehend that your choice will therefore lie between Mr. Browne and Mr. Lovelock. Both of those gentlemen are chartered accountants, and both of them may, therefore, be taken to possess the necessary qualifications. This election, gentlemen, is entirely in your hands; we shall not, on this side of the table, interfere in the slightest degree with your choice; we shall accept whichever of those gentlemen you may select with the greatest readiness and with the greatest confidence that you have given us the best man you can find to fulfil the duty of keeping your accounts. I do not know whether it may be necessary to go to a poll in the matter, but if that is so, the directors will not use the proxies which they hold in order in any way to interfere with your selection. The proxies which will be used will be only those that have been sent in with regard to this particular matter, and we shall not, either directly or indirectly, interfere with your choice. Gentlemen, I beg to move:—"That the report of the directors, together with the accounts now submitted, be received and adopted." And before I put the motion to the meeting I shall be very glad to answer any questions which any shareholder may think fit to ask me.

Mr. H. WOLLASTON BLAKE seconded the motion.

Rev. BENJAMIN WEST asked whether any notice had been received from the Government of India as to their intention of acquiring the company's railway.

The CHAIRMAN said there had been no communication from the Government of India on the subject during the last six months. They had the option of declaring their intention to purchase the line at any time within six months of August 17th, 1899, and he supposed they did not wish to be hurried in the matter. At all events, he (the chairman) had no communication whatever to make to the shareholders on that subject.

The motion was then put to the meeting, and carried unanimously.

The CHAIRMAN then moved, and Mr. ALEXANDER H. CAMPBELL seconded—"That a dividend of 8s. 9d. per cent. upon the capital stock be and is hereby declared out of surplus profit, to be paid to the holders of capital stock now registered in the books of the company, in addition to the guaranteed interest of 2l. 10s. per cent. for the current half-year;" and this resolution also was carried unanimously.

The CHAIRMAN, in moving, "That the directors be and are hereby authorised to adopt, for this company's provident fund, the revised rules and regulations in force on State railways in India, so far as they may be applicable, and, with the consent of Government, to contribute to the fund from the revenue of each half-year, with effect from January 1st, 1898, such amount as may be necessary under the rules for the time being in force," said that the resolution was drawn in that way for two reasons. In the first place, it was not quite certain that some of the older officers of the company would care to make the increased contribution during the last year or two of their service, and they might prefer to remain under the old rules. The younger men, he believed, to a very great extent (although the board had not yet received an absolute reply upon the subject), would probably prefer to make the increased contribution so as to get the increased benefit, and it was for that reason that they asked the shareholders to allow them (the directors) to make such contribution as might be "necessary under the rules for the time being in force." He would point out that in the accounts for this year provision had been made for what the shareholders might be called upon to pay supposing the rules came into effect as from January, 1898, and, in the event of the new rules not being introduced during the current year, the money paid now would be again placed at the shareholders' disposal, and would, he hoped, go to swell their dividend next year.

Mr. LIONEL R. ASHBURNER seconded the resolution, which was put to the meeting and carried unanimously.

The CHAIRMAN having requested the meeting to proceed to the election of an auditor,

Mr. ARBUTHNOT proposed, and Mr. MACLEAY seconded, that Mr. W. A. Browne should be appointed to the vacant office.

Mr. JAMES KERR said he had much pleasure in proposing the appoint-

ment of Mr. Samuel Lovelock, and Mr. ROBERT KERR having seconded the proposition, a show of hands was taken, and the CHAIRMAN announced the result as being 17 in favour of Mr. Browne, and 9 in favour of Mr. Lovelock.

The CHAIRMAN said upon the show of hands Mr. Browne was elected. He did not know whether any of Mr. Lovelock's friends would wish to go to a poll.

Mr. LOVELOCK said that as he had a very strong support he desired to go to a poll, and after some further discussion, it was agreed to take the proxies which had already been lodged as decisive, and

The CHAIRMAN thereupon announced that upon that footing Mr. Samuel Lovelock stood elected.

The CHAIRMAN then moved, and Mr. CHARLES PEILE seconded:—

"That the best thanks of the meeting are due, and are hereby given, to G. A. Barnett, Esq., C.I.E., the agent, and to the heads of departments and members of the staff in India generally, and also to the home staff, for their valuable services during the past half-year," and this also was passed unanimously.

Surgeon-General DE RENZY proposed, and Mr. MARCUS N. ADLER seconded, the usual vote of thanks to the chairman and directors, which was carried unanimously; and, the CHAIRMAN having briefly responded, the proceedings terminated.

### CORDOVA AND NORTH WESTERN RAILWAY.

The annual general meeting was held on Thursday at 13, Austin-friars, E.C.; Colonel P. MOSLEY presiding.

[The company declines to furnish us with a copy of the report and accounts, consequently we are unable to give our usual summary of the same. We take the following report of the proceedings from the *Times* of yesterday.]

The CHAIRMAN, in moving the adoption of the accounts, remarked that the affairs of the company were still in the hands of a receiver and manager on behalf of the debenture-holders. The report of Mr. A. L. Secretan (the receiver and manager) stated that the gross receipts for the six months ended June 30th last, compared with the corresponding period of 1897, showed only a slight increase, while the expenses exhibited a much larger advance, amounting altogether to \$19,130. This growth in expenses was largely due to the repairs and renewals to the permanent way and works, which included the renewal of sleepers. As the result of the half-year's working there was a deficit of \$3,867, whereas in the corresponding six months of 1897 there was a profit of \$11,685. The number of passengers carried remained practically unchanged, but there had been an improvement equal to about 24 per cent. in the goods traffic, especially in building materials and provisions, which indicated a steady increase of population in the district served by the line. The amount owing by the company in the Argentine on June 30th last was \$6,083, and the book value of the stores in hand on working account on the same date was \$55,637. The value of the surplus rolling stock, ground and house property, which was subject to realisation when opportunity offered, now stood at \$78,789. Under the authority granted by the court he had borrowed an additional 5,000*l.* against the security of 6,250*l.* prior lien bonds, thus leaving the balance unissued of 6,250*l.* from the total amount of 25,000*l.* authorised by the court. The cash in hand on June 30th, in Cordova, was \$19,546, equivalent to 1,397*l.*, and a sum of 800*l.* remained in London. The question of the Government guarantee remained in abeyance.

Mr. F. C. NORTON having seconded the motion,

A SHAREHOLDER asked if there were any chance of the Government doing anything for the company, which was at present in a terrible position.

The CHAIRMAN replied that their representatives in Buenos Ayres were doing all that was possible. With the advent to office of the new president it was to be hoped that the prospects of the undertaking would improve.

Mr. C. D. ROSE expressed the fear that the province of Cordova would be one of the last to have its debt settled. So far, only the province of Buenos Ayres had been dealt with.

A SHAREHOLDER inquired if the credit item in the balance-sheet, "Amount due by the province of Cordova for guaranteed interest under contract, 463,910*l.*," was worth anything.

Mr. SECRETAN replied that it was impossible to say.

After further discussion the motion was agreed to.

### GREAT SOUTHERN OF SPAIN RAILWAY.

The annual general meeting was held on Thursday, at Winchester-house, E.C.; Mr. G. P. TORRENS presiding.

The accounts for the year ending December 31st, 1897, showed a gross revenue of 27,050*l.* (against 27,461*l.* for the previous year), an expenditure of 28,321*l.* (against 29,279*l.*), and a loss of 1,270*l.* (against 1,818*l.*). Losses on exchange amounted to 2,765*l.*, and interest, &c., to 61*l.*, making a total loss of 4,096*l.* The length of line open was 168 kilometres in each year; the number of passengers carried, 57,693 (against 55,825); the quantity of goods carried, 81,193,502 kilogrammes (against 75,635,743 kilogrammes); the number of train kilometres, 176,153 (against 177,369). The nominal capital of the company is as follows:—Ordinary 10*l.* shares, 400,000*l.*; preference 10*l.* shares, 250,000*l.* The issued capital is:—Ordinary shares, fully paid, 234,320*l.*; ditto surrendered, fully paid, 99,080*l.*; ditto surrendered, 1*l.* paid, 4,100*l.*; preference shares, fully paid, 250,000*l.*; prior lien bonds, 599,772*l.*; new debentures, 1,002,951*l.*; new debenture interest funding certificates, 72,222*l.* The report stated that the total traffic receipts for the past nine months of 1898 amounted

to pesetas 591,824, against pesetas 496,359 for the corresponding period of 1897.

The report and accounts were adopted.

## BUENOS AYRES AND VALPARAISO TRANSANDINE RAILWAY.

The annual general meeting was held yesterday at the Cannon-street Hotel, E.C., Mr. E. M. UNDERDOWN, Q.C., presiding.

The CHAIRMAN, in moving the adoption of the report and accounts (an analysis of which has already appeared in THE RAILWAY TIMES), stated that the receipts of the line as so far opened to traffic amounted to 11,842*l.*, as against 12,076*l.* in 1897; and the expenses to 25,900*l.*, as against 25,612*l.* in 1897, showing a deficiency for the year ended June 30th of 14,017*l.* There remained to be constructed the gap in the line between the Argentine section on the one side and the Chilean railroads on the other. Although the distance was only 27 kilometres, yet the work of tunnelling the Andes was one of importance, and would occasion expense. In the meantime their line was not carrying through traffic to anything like the extent intended to be done when the line became complete. Under these circumstances it was inevitable that the expenses exceeded the revenue. Negotiations with the Argentine Government as to the sum to be paid under the agreement with the company were proceeding, and the directors were advised that to continue the construction of the railway was impossible till an arrangement was come to.

The report having been duly seconded, was put to the meeting and carried.

## Directors' Reports.

### BURMA RAILWAYS.

#### CAPITAL.

The total capital created is 2,000,000*l.*, of which on June 30th last there had been paid up 1,781,950*l.* in fully paid shares of 10*l.*, now converted into stock, and 54,512*l.* in shares on which 2*l.* 10*s.* per share has been paid, making a total paid-up capital of 1,836,462*l.* The paid-up capital represents at the contract rates of exchange a sum of Rs.3,11,86,152 of which there had been expended up to June 30th a sum of Rs.1,31,76,239 leaving a balance unspent of Rs.1,80,16,011, besides the uncalled capital of 163,537*l.* The capital expended by Government, which in the last accounts presented stood at Rs.7,87,25,525, is now Rs.7,69,17,913, and the total expenditure by Government and the company is Rs.9,00,94,153. The difference in the Government capital is due to the transfer of the stores account from the Government to the company's capital. This transfer, which is in accordance with the contract, has been made in the accounts of the year under review, but with back effect from August 1st, 1896, the date on which the Burma Railways were made over to the company. Including this transfer, the expenditure from the company's capital during the year has amounted to Rs.81,62,386.

#### REVENUE.

The results of the working for the year ending June 30th, 1898, compare with those of the previous year as follows:—

	1896-7.	1897-8.
Coaching earnings .....	Rs.41,83,952	Rs.43,26,872
Goods earnings .....	41,23,076	41,97,428
Other receipts .....	1,50,655	1,34,969
Gross earnings .....	Rs.84,57,683	Rs.86,59,269
Working expenses .....	47,34,008	50,74,923
Net earnings .....	Rs.37,23,675	Rs.35,84,345

After applying the net earnings of the year to the payments to the Secretary of State of the sums due under the contract in respect of interest, both on the Government's and the company's capital, the proportion of the surplus on the year's working payable to the company amounted to Rs.1,32,145 5*s.* 6*d.*, free of Indian income-tax. This sum was raised by a subsequent adjustment in India to Rs.1,39,255. The surplus profits, which were declared in the last annual accounts to be Rs.1,74,551, were subsequently raised by adjustment to Rs.1,76,262; but of this sum only Rs.1,57,000 had been remitted to England for distribution on January 1st last, the balance not having at that date been paid over by Government. Since then Rs.1,39,255 has been received in Burma on account of the surplus profits for the year under review, and remittances up to date have been made amounting in the aggregate to Rs.1,58,104, leaving a cash balance in Burma of Rs.410, inclusive of interest accrued there. The amount in the hands of the company in London amounts at present to 10,797*l.*, from which the directors recommend that, in addition to the 2½ per cent. already distributed a dividend should be paid of 10*s.* per 100*l.* stock or per 10 shares (free of income-tax), leaving a balance to carry forward, after deduction of income-tax, of 488*l.*

The interest charges of the year under review are proportionately higher, as they cover the interest on the whole of the paid-up capital for the complete period, whereas in 1896-7 capital continued to be paid in up to February, 1897.

#### TRAFFIC, &c.

The number of passengers carried during the year was 9,545,130 (against 8,804,744); the quantity of goods carried, 1,104,160 tons (against 1,183,549 tons); the number of train miles run, 2,871,190 (against 2,706,714); the ratio of expenses to receipts, 58·60 per cent. (against 55·98 per cent.). The report states:—

"The increase in coaching occurred entirely in the half-year ending

December, 1897, when the passenger traffic was the heaviest on record. Additional facilities for natives have been given by the introduction of an intermediate class (between second and third class), and an attempt has been made to stimulate long-distance third-class passenger traffic by the lowering of fares for long distances. Sufficient experience has not yet been gained to form any correct conclusion on this subject. The goods earnings show a small but satisfactory increase over last year. The rice crops of the year under review were even better than those of 1896-7. There has also been a marked increase in the receipts from the carriage of European cotton and piece goods, kerosine oil, provisions, sugar, and spices, which has more than compensated for the great reduction in earnings from carriage of railway materials for construction—an item necessarily subject to much variation.

"The working expenses have risen from Rs.47,34,008 to Rs.50,74,923. There is a very large increase of Rs.1,05,215 under the head police (included in general charges). When the railways were worked by the State, the police charges were not shown in the railway accounts, whereas, under the contract, seven-tenths of the cost has now—following the general custom on guaranteed railways—to be borne by the railway. The above figures (Rs.1,05,215) include also the charge on this account for the period September, 1896, to June, 1897, which had not been settled at the time the last annual accounts were made up. Owing to the heavy traffic of the last two years, and the increasing age of the rolling stock, now scarcely sufficient in quantity, the repairs under this head and that of machinery have cost Rs.1,53,468 in excess of the former year, in which the outlay on repairs to carriages and wagons was unusually low. More stock is under supply. The remainder of the increase in working expenses is due to the larger number of stations, and to the increased train mileage consequent on the increased earnings.

#### MILEAGE.

"On June 30th, 1898, the total mileage open for all traffic was 886·5 miles, while 37 miles (the last section of the Mu Valley from Mogoung to Myitkina), as well as the first 13 miles of the Mandalay-Kunlon Railway had been opened for goods traffic only, both on June 1st, 1898. It may be added that the total length on the Mandalay-Kunlon Railway sanctioned for construction is 224 miles, of which 13 are practically completed and 162 in course of construction. The progress of the Mandalay-Kunlon Railway has been fair, and it is hoped that the difficult ghat section leading to the Shan table-land will be finished in time to admit of the opening of the line to the hill station of Maymyo (39 miles) by the end of March next. It was stated in the report for last year that the sanction of the Secretary of State had been asked to the construction of the Meiktila Myingyan (58 miles) and Sagaing-Alon branches (71 miles), at an estimated cost of Rs.32,14,333 and Rs.36,89,992 respectively. Sanction was received in August last, and work was at once commenced.

"The survey for an important line in the Irrawaddy delta from the port of Bassein, northwards to Henzada, about 95 miles, and thence to Thonzo on the Irrawaddy, 25 miles, has been completed and the estimates are in hand and will before long be submitted to Government for sanction. This line is likely to prove very remunerative, and a further survey northwards from Henzada is contemplated. The estimates of the first section (50 miles) of the line through the Shan States, from Thibaw southwards towards Moné, have been received and an estimate has been sanctioned for the prosecution of the survey. The cost of the first section is estimated at Rs.35,61,178. The survey of this line was undertaken by the company at the desire of the Government. A location of the last section of the Mandalay-Kunlon Railway is in hand. An estimate has been sanctioned for the survey of a line from Kinu on the Mu Valley Railway, through the Kabwet coalfields, to Thabekyin on the Irrawaddy, opposite to the road leading to the Ruby mines. The length of this line is about 29 miles. Reconnaissances have been made of the country between Pyinmana on Tounghoo-Mandalay Railway to Magwé on the Irrawaddy; also from Shwegyin on the Rangoon Tounghoo section, south eastwards to Moulmein. A detailed survey of the latter is likely to be sanctioned at an early date.

#### STAFF.

"Mr. Hebbert, a Government officer who held the post of agent to the company in Burma at the time of the submission of the last report, reverted, at his own request, to the Government service in July last, and Mr. A. T. Goodfellow, an officer in Government service of great railway experience, and recently employed on the Bengal-Nagpur Railway, has been appointed to succeed him, on the understanding that he will shortly retire from the Government service. Mr. F. R. Bagley, M.I.C.E., who was the chief engineer of the railway, has also reverted to Government service. Mr. G. Deuchars, a Government officer of considerable experience in the construction of railways, who had served previously on the Burma Railways for several years, has been appointed to succeed him in the charge of the Mandalay-Kunlon Railway, whilst the open line engineering works will be carried on by the open line staff, an arrangement which, it is expected, will prove more economical and at the same time more easily worked."

**EPPS'S COCOA.—GRATEFUL AND COMFORTING.**—"By a thorough knowledge of the natural laws which govern the operations of digestion and nutrition, and by a careful application of the fine properties of well-selected Cocoa, Mr. Epps has provided for our breakfast and supper a delicately flavoured beverage which may save us many heavy doctors' bills. It is by the judicious use of such articles of diet that a constitution may be gradually built up until strong enough to resist every tendency to disease. We may escape many a fatal shaft by keeping ourselves well fortified with pure blood and a properly nourished frame."—*Civil Service Gazette*.—Made simply with boiling water or milk.—Sold only in packets and pound tins, by Grocers, labelled—"JAMES EPPS and Co., Ltd., Homœopathic Chemists, London."

to pesetas 591,824, against pesetas 436,359 for the corresponding period of 1897.

The report and accounts were adopted.

## BUENOS AYRES AND VALPARAISO TRANSANDINE RAILWAY.

The annual general meeting was held yesterday at the Cannon-street Hotel, E.C., Mr. E. M. UNDERDOWN, Q.C., presiding.

The CHAIRMAN, in moving the adoption of the report and accounts (an analysis of which has already appeared in THE RAILWAY TIMES), stated that the receipts of the line as so far opened to traffic amounted to 11,882*l.*, as against 12,076*l.* in 1897; and the expenses to 25,900*l.*, as against 25,612*l.* in 1897, showing a deficiency for the year ended June 30th of 14,017*l.* There remained to be constructed the gap in the line between the Argentine section on the one side and the Chilean railroads on the other. Although the distance was only 27 kilometres, yet the work of tunnelling the Andes was one of importance, and would occasion expense. In the meantime their line was not carrying through traffic to anything like the extent intended to be done when the line became complete. Under these circumstances it was inevitable that the expenses exceeded the revenue. Negotiations with the Argentine Government as to the sum to be paid under the agreement with the company were proceeding, and the directors were advised that to continue the construction of the railway was impossible till an arrangement was come to.

The report having been duly seconded, was put to the meeting and carried.

## Directors' Reports.

### BURMA RAILWAYS.

#### CAPITAL.

The total capital created is 2,000,000*l.*, of which on June 30th last there had been paid up 1,781,950*l.* in fully paid shares of 10*l.*, now converted into stock, and 54,512*l.* in shares on which 2*l.* 10*s.* per share has been paid, making a total paid-up capital of 1,836,462*l.* The paid-up capital represents at the contract rates of exchange a sum of Rs.3,11,86,152 of which there had been expended up to June 30th a sum of Rs.1,31,76,239 leaving a balance unspent of Rs.1,80,16,011, besides the uncalled capital of 163,537*l.* The capital expended by Government, which in the last accounts presented stood at Rs.7,87,25,525, is now Rs.7,69,17,913, and the total expenditure by Government and the company is Rs.9,00,94,153. The difference in the Government capital is due to the transfer of the stores account from the Government to the company's capital. This transfer, which is in accordance with the contract, has been made in the accounts of the year under review, but with back effect from August 1st, 1896, the date on which the Burma Railways were made over to the company. Including this transfer, the expenditure from the company's capital during the year has amounted to Rs.81,62,386.

#### REVENUE.

The results of the working for the year ending June 30th, 1898, compare with those of the previous year as follows:—

	1896-7.	1897-8.
Coaching earnings .....	Rs.41,83,952	Rs.43,26,872
Goods earnings .....	41,23,076	41,97,428
Other receipts .....	1,50,655	1,34,969
Gross earnings .....	Rs.84,57,683	Rs.86,59,269
Working expenses .....	47,34,008	50,74,923
Net earnings .....	Rs.37,23,675	Rs.35,84,345

After applying the net earnings of the year to the payments to the Secretary of State of the sums due under the contract in respect of interest, both on the Government's and the company's capital, the proportion of the surplus on the year's working payable to the company amounted to Rs.1,32,145 5*s.* 6*p.*, free of Indian income-tax. This sum was raised by a subsequent adjustment in India to Rs.1,39,255. The surplus profits, which were declared in the last annual accounts to be Rs.1,74,551, were subsequently raised by adjustment to Rs.1,76,262; but of this sum only Rs.1,57,000 had been remitted to England for distribution on January 1st last, the balance not having at that date been paid over by Government. Since then Rs.1,39,255 has been received in Burma on account of the surplus profits for the year under review, and remittances up to date have been made amounting in the aggregate to Rs.1,58,104, leaving a cash balance in Burma of Rs.440, inclusive of interest accrued there. The amount in the hands of the company in London amounts at present to 10,797*l.*, from which the directors recommend that, in addition to the 2½ per cent. already distributed a dividend should be paid of 10*s.* per 100*l.* stock or per 10 shares (free of income-tax), leaving a balance to carry forward, after deduction of income-tax, of 488*l.*

The interest charges of the year under review are proportionately higher, as they cover the interest on the whole of the paid-up capital for the complete period, whereas in 1896-7 capital continued to be paid in up to February, 1897.

#### TRAFFIC, &c.

The number of passengers carried during the year was 9,545,130 (against 8,804,744); the quantity of goods carried, 1,104,160 tons (against 1,183,540 tons); the number of train miles run, 2,871,190 (against 2,706,714); the ratio of expenses to receipts, 58·60 per cent. (against 55·98 per cent.). The report states:—

"The increase in coaching occurred entirely in the half-year ending

December, 1897, when the passenger traffic was the heaviest on record. Additional facilities for natives have been given by the introduction of an intermediate class (between second and third class), and an attempt has been made to stimulate long-distance third-class passenger traffic by the lowering of fares for long distances. Sufficient experience has not yet been gained to form any correct conclusion on this subject. The goods earnings show a small but satisfactory increase over last year. The rice crops of the year under review were even better than those of 1896-7. There has also been a marked increase in the receipts from the carriage of European cotton and piece goods, kerosine oil, provisions, sugar, and spices, which has more than compensated for the great reduction in earnings from carriage of railway materials for construction—an item necessarily subject to much variation.

"The working expenses have risen from Rs.47,34,008 to Rs.50,74,923. There is a very large increase of Rs.1,05,215 under the head police (included in general charges). When the railways were worked by the State, the police charges were not shown in the railway accounts, whereas, under the contract, seven-tenths of the cost has now—following the general custom on guaranteed railways—to be borne by the railway. The above figures (Rs.1,05,215) include also the charge on this account for the period September, 1896, to June, 1897, which had not been settled at the time the last annual accounts were made up. Owing to the heavy traffic of the last two years, and the increasing age of the rolling stock, now scarcely sufficient in quantity, the repairs under this head and that of machinery have cost Rs.1,53,468 in excess of the former year, in which the outlay on repairs to carriages and wagons was unusually low. More stock is under supply. The remainder of the increase in working expenses is due to the larger number of stations, and to the increased train mileage consequent on the increased earnings.

#### MILEAGE.

"On June 30th, 1898, the total mileage open for all traffic was 886·5 miles, while 37 miles (the last section of the Mu Valley from Mogoung to Myitkina), as well as the first 13 miles of the Mandalay-Kunlon Railway had been opened for goods traffic only, both on June 1st, 1898. It may be added that the total length on the Mandalay-Kunlon Railway sanctioned for construction is 224 miles, of which 13 are practically completed and 162 in course of construction. The progress of the Mandalay-Kunlon Railway has been fair, and it is hoped that the difficult ghat section leading to the Shan table-land will be finished in time to admit of the opening of the line to the hill station of Maymyo (39 miles) by the end of March next. It was stated in the report for last year that the sanction of the Secretary of State had been asked to the construction of the Meiktila Myitkya (58 miles) and Sagaing-Alon branches (71 miles), at an estimated cost of Rs.32,14,333 and Rs.36,89,992 respectively. Sanction was received in August last, and work was at once commenced.

"The survey for an important line in the Irrawaddy delta from the port of Bassein, northwards to Henzada, about 95 miles, and thence to Thonzé on the Irrawaddy, 25 miles, has been completed and the estimates are in hand and will before long be submitted to Government for sanction. This line is likely to prove very remunerative, and a further survey northwards from Henzada is contemplated. The estimates of the first section (50 miles) of the line through the Shan States, from Thibaw southwards towards Moné, have been received and an estimate has been sanctioned for the prosecution of the survey. The cost of the first section is estimated at Rs.35,61,178. The survey of this line was undertaken by the company at the desire of the Government. A location of the last section of the Mandalay-Kunlon Railway is in hand. An estimate has been sanctioned for the survey of a line from Kinu on the Mu Valley Railway, through the Kabwet coalfields, to Thabetkyin on the Irrawaddy, opposite to the road leading to the Ruby mines. The length of this line is about 29 miles. Reconnaissances have been made of the country between Pyinmana on Tounghoo-Mandalay Railway to Magwé on the Irrawaddy; also from Shwegyin on the Rangoon Tounghoo section, south eastwards to Moulmein. A detailed survey of the latter is likely to be sanctioned at an early date.

#### STAFF.

"Mr. Hebbert, a Government officer who held the post of agent to the company in Burma at the time of the submission of the last report, reverted, at his own request, to the Government service in July last, and Mr. A. T. Goodfellow, an officer in Government service of great railway experience, and recently employed on the Bengal-Nagpur Railway, has been appointed to succeed him, on the understanding that he will shortly retire from the Government service. Mr. F. R. Bagley, M.I.C.E., who was the chief engineer of the railway, has also reverted to Government service. Mr. G. Deuchars, a Government officer of considerable experience in the construction of railways, who had served previously on the Burma Railways for several years, has been appointed to succeed him in the charge of the Mandalay-Kunlon Railway, whilst the open line engineering works will be carried on by the open line staff, an arrangement which, it is expected, will prove more economical and at the same time more easily worked."

**EPPE'S COCOA.—GRATEFUL AND COMFORTING.**—"By a thorough knowledge of the natural laws which govern the operations of digestion and nutrition, and by a careful application of the fine properties of well-selected Cocoa, Mr. Eppe has provided for our breakfast and supper a delicately flavoured beverage which may save us many heavy doctors' bills. It is by the judicious use of such articles of diet that a constitution may be gradually built up until strong enough to resist every tendency to disease. We may escape many a fatal shaft by keeping ourselves well fortified with pure blood and a properly nourished frame."—*Civil Service Gazette*.—Made simply with boiling water or milk.—Sold only in packets and pound tins, by Grocers, labelled—"JAMES EPPE and Co., Ltd., Homœopathic Chemists, London."

**The State Railways of Chili.**—A project for a reform of the State railways in Chili is under consideration by the Cabinet. A Valparaiso correspondent writes:—"The resignation of the Minister of Public Works has resulted from his futile efforts to introduce reforms in the administration of the State railways, which are said, with apparent reason, to be a hotbed of jobbery and corruption. Immense relief would be given to the finances of Chili if the State railways were purchased and their management taken over by an English syndicate. But if a so-called patriotic feeling on the part of Chilians prevented this, it might be found possible to arrange to rent and work the lines for a term of years. The expenditure on the railways—about \$13,500,000—usually exceeds the receipts by \$300,000 to \$500,000; but in the hands of an English company the receipts might be increased perhaps 50 per cent., while undoubtedly enormous economies could be introduced in the administration; for at present jobbing is rife, and the employes of the lines, besides being twice as numerous as required, are selected not for their capacity for railway management, but for political reasons."

## The Railway Times.

Established 1837.

DECEMBER 17, 1898.

## INDIAN RAILWAY RESULTS.

A year ago, when reviewing the Indian railway reports for the first half of 1897, we drew attention to the losses suffered by most companies from the combined adversities of famine and plague. In the first half of 1898 the former influence had been removed except so far as it was bound to affect the resources of so poor a country for a time, but the plague has continued to operate against railway prosperity, mainly on account of the restrictions placed upon travellers, and the quarantine regulations rendered necessary to prevent the spread of the epidemic. Latterly these regulations have been relaxed, but in the railway results for the first six months of 1898 their effects are seen in the reduced passenger traffic. The Great Indian Peninsula lost over a million passengers and 80,000*l.* in passenger receipts, and the Bombay Baroda and Central India lost 560,000 passengers and 47,000*l.* in receipts. Both these companies were able last half-year to more than make up these losses by improved goods earnings. Two smaller companies in the South of India, which also suffered from the plague as regards passengers, were not so fortunate in regard to goods receipts. The Southern Mahratta lost 1,220,000 in passengers and Rs.4,49,000 in receipts. Compared with the first half of 1896 this company has lost nearly 2,400,000 passengers and Rs.17,00,000 in revenue therefrom owing to the plague. The South Indian Railway, too, lost 539,000 passengers and Rs.2,66,000 in revenue. Both these companies carry the poorest class of passengers in great numbers, hence the large losses they have sustained. It is an extraordinary fact that the South Indian Railway Company's passenger traffic last half-year was to the extent of 99 per cent. third-class, and the report contains the statement that "The average number of passengers in a train at any one time was 237, of which number 235 travelled third-class." This statement, bearing in mind the large decline in third-class resulting from the plague, reveals the extent to which the passenger accommodation is utilised and the extraordinary preponderance of the inferior class of passengers. It will be remembered that in the first half of 1897 the failure of the crops in India actually accounted for an increase of goods traffic and receipts in special cases, owing to the large imports of rice which had to be made to make up, as far as possible, for the deficiency in native cereal crops. This was the case with the East Indian, which in the first half of 1897 reported a gross increase of 151,000*l.* The return to a more normal state of matters has produced a curious change in the traffic of this company. Compared with the first half of 1897, the East Indian Railway carried last half-year 201,175 fewer tons of rice, but in wheat traffic there was an increase of 191,059 tons. In receipts from rice there was a decrease of Rs.25,37,205, which was partially compensated for by an increase in the revenue derived from the carriage of wheat of Rs.14,57,549. There was a considerable recovery in the passenger revenue of this company, in spite of a plague scare in Calcutta in May and June. This, however, caused a scarcity of labour for unloading wagons and conveyance of coal to the ships, and thus indirectly produced a considerable decline in shipments of coal from Calcutta.

As examples of the low rates charged by the East Indian Company we may quote the average rate per ton per mile for coal last half-year, which was only .270 of a penny, whilst the average rate per passenger per mile was only .206 of a penny. In spite of these abnormally low rates the company's ratio of working expenses to gross receipts was 29.84 per cent., against 30.12 per cent. in 1897. This phenomenally low rate of working expenses is, we believe, the lowest for any important railway in the world, and shows that low rates are frequently compatible with low working charges, though we may incidentally remark that the services rendered to passengers, for example, bear no comparison with that afforded at higher rates by English companies—the Hindoos could not afford to pay for such services, nor does their standard of comfort require them. In order that the results of last half-year may be readily compared, we give below the increases and decreases in gross revenue and the extent of mileage open in the case of the leading companies:—

Company.	Mileage open.	Increase or decrease in gross receipts, half-year to June 30th, 1898.
Bengal and North Western.....	852	+ Rs.2,88,275
Bengal Nagpur .....	879	+ Rs.5,55,167
Bombay Baroda and Central India...	2,586	+ £100,400
East Indian.....	1,889½	+ £76,976
Great Indian Peninsula .....	1,491½	+ £386,872
H.H. the Nizam's .....	354	+ Rs.2,89,809
Indian Midland .....	948	+ Rs.3,43,786
Madras .....	840	- £14,192
Southern Mahratta.....	1,556½	- Rs.8,10,640
South Indian .....	1,112	- Rs.2,75,010

The increase in mileage of the above ten systems compared with 1897 is about 100, and further considerable extensions are being constructed. It is satisfactory to see that only three companies show decreases in gross receipts. In two cases—those of the Southern Mahratta and the South Indian, the explanation has already been given. In the case of the Madras it is due to a decline in passenger traffic combined with a smaller carriage of grain as compared with 1897, when the famine requirements created an abnormal traffic. The mixed gauges among Indian railways is bound to be a source of considerable trouble and expense in the development of its transportation facilities. Evidence of this was afforded last half-year when a proposal was submitted to the Madras Railway by the Government to convert a section of its main line from standard to metre gauge. This proposal the company seems prepared to carry out, it being a public advantage, and one likely to be of benefit to itself as well, as it would provide the connecting link between the South Indian and the Southern Mahratta railways, both of which are of metre gauge (3ft. 3¾in.), whilst the Madras is of standard gauge (5ft. 6in.). The two companies concerned on either side of this connecting link, however, have protested against this intrusion of a third and standard-gauge company “between the two great narrow-gauge systems of Southern India.” In connection with this question of gauge we may mention that the Bombay Baroda and Central India has three actually in operation. Its system of 2,586 miles is made up of 650 miles of standard gauge (5½ft.), 1,838 miles of metre gauge (3ft. 3¾in.), and 98 miles of 2½ft. gauge. Obviously this simultaneous operation of three distinct systems must entail much waste, and it would be a great advantage if some more definite policy were adopted in the future construction programme of the Government. In our next table we show how working expenses and net revenue for last half-year compare with the figures for the first half of 1897:—

Company.	First half, 1898.	
	Inc. or dec. in working expenses.	Inc. or dec. in net revenue.
Bengal and North Western .....	+ Rs.19,157	+ Rs.2,69,118
Bengal Nagpur .....	+ Rs.62,190	+ Rs.4,92,977
Bombay Baroda and Central India..	+ £5,378	+ £95,022
East Indian .....	+ £17,754	+ £59,222
Great Indian Peninsula .....	+ £109,923	+ £276,950
H.H. the Nizam's .....	+ Rs.20,302	+ Rs.2,69,507
Indian Midland .....	+ Rs.20,272	+ Rs.3,23,514
Madras .....	- £20,357	+ £6,165
Southern Mahratta .....	+ Rs.64,611	- Rs.8,75,251
South Indian .....	- Rs.85,802	- Rs.1,99,207

In most instances it will be noticed that the advance in working expenses has been relatively small—in fact, the only notable advance was in that of the Great Indian Peninsula. In several instances there has been a reduction in the ratio of expenses. Last year, when gross earnings fell away, there were no considerable economies possible, and, on the other hand, the increased earnings secured in 1898 have not added materially to outgoings. The Bombay Baroda and Central India reduced its working expenses from 46.98 to 41.39 per cent. of the receipts, H.H. the Nizam's State Railway ratio was reduced from 46.05 to 40.77 per cent., and the Great Indian Peninsula from 57.84 to 51.61 per cent. So far as net receipts are concerned, all the companies show satisfactory results except the last three in our list. The East Indian, as a matter of fact, secured last half-year a record for both gross and net revenue, and, as a result, is able to distribute the supplementary dividend of 1l. 11s. 6d. per cent. (actual) on its deferred annuity capital beyond the guaranteed rate of 4 per cent. per annum. In fact, so exceptionally heavy has the traffic been that the company has been unable for some time to proceed with its usual work of relaying. The negotiations of this company with the Government with regard to the renewal of its contract are still proceeding. The net results generally are fairly satisfactory. The Bengal-Nagpur, though it had incurred a good deal of as yet unproductive capital expenditure, managed to nearly earn the amount of its guarantee. The report says that pending the completion of the Rooparain Bridge, giving direct access to Calcutta, traffic to the latter place is being taken by steamer. During the rains of 1899, from June to September, it is thought that it may be necessary to close about 60 miles in which the heaviest bridging is situated. The Madras Railway pays the same rate as last year on its capital stock—namely, 1s. per cent. in excess of the guaranteed rate. The Bombay Baroda and Central India has nearly recovered the ground lost in 1897, for it pays 4½ per cent. (actual in January, 1899), against 3½ in 1898, and 4¾ in 1897. On the whole, the outcome of the first half of 1898, so far as the principal Indian railways was concerned, was decidedly encouraging. It is true that in some cases the ground lost in 1897 has not been fully recovered, but in others the results shown in 1898 were even better than those of 1896, in spite of conditions not altogether favourable.

### THE ADVANCE IN AMERICANS.

Ever since the elections early in November American railroad issues have been rising almost without a pause. Prior to the announcement of the election results showing Republican victories, business had declined very considerably. The success of the Presidential party was, however, the signal for large buying, which has continued ever since. The turnover of shares in Wall-street has been very large of late, having reached 900,000 shares in one day, whilst in normal times it frequently does not exceed 200,000. In the early stages of this advance, apart from the professional element, British investors seem to have withstood the temptation to purchase indiscriminately. Latterly, we

regret to observe a less satisfactory disposition towards these stocks, and the very fact that they have risen so largely seems to have brought in a considerable amount of buying from this side. Logically, of course, the large further rise in Yankees instead of being an attraction should serve as an objection to further purchases, and we think it desirable to warn our readers of the large advance shown. Nothing would suit New York operators better than to get the British public in at the present level; and whilst we do not think the activity in this market has entirely spent itself, we do think that the majority of stocks offer but scant chances of profit to the British investors. In the subjoined table we compare the recent quotations of principal stocks with those on November 2nd:—

Stock.	Lowest. 1898.	Price Nov. 2.	Price Dec. 14.	Advance in six weeks.
Atchison .....	10½	12½	19½	7
Do. preferred .....	23½	36½	53½	17
Baltimore and Ohio ...	45	45½	63	17½
Central Pacific .....	11	25½	35	9½
Milwaukee .....	85½	112	120½	8½
Denver preferred .....	41½	56½	66½	9½
Louisville .....	45½	57½	66½	9
New York Central .....	108½	117½	123	5½
Ontario .....	13½	14½	18½	3½
Norfolk Common .....	10½	13	16½	3½
Do. preferred .....	42½	50½	61½	11
Reading .....	7½	8½	10	1½
Union Pacific .....	18½	32½	39½	7½
Do. preferred .....	49½	65	73½	8½
Wabash debentures ...	21½	32	36	4

From the lowest prices of 1898 some of the "reorganised" stocks have more than trebled in value, and quite a number have nearly doubled in price. Latterly Atchison issues have been all the rage. The 4 per cent. adjustment bonds, which, little more than a year ago, could be bought at 50, have this week crossed 80; and the preferred, which, even this year, could be bought at 23½, have risen to 53½. A dividend of 1 per cent. on the latter is shortly expected, and the Northern Pacific has actually announced a dividend of 1 per cent. on its common stock, which has been long looked for. Apparently these are the only tangible bull points apart from the fact that "the public are coming in." When the latter event takes place wise men begin to clear out. Traffics lately have by no means been uniformly satisfactory, the latest figures showing an average increase of only 4 per cent. The rate situation, as we have repeatedly shown, is almost hopeless, and will bring with it serious consequences so soon as the quantity of traffic offering begins to decline. Moreover, the dividend-earning capacity of the various lines, even under present favourable conditions, does not warrant present values. A reaction after the sustained rise is to be looked for, and it is ominous that that awful word "blizzard" has already been whispered in Wall-street. No doubt we shall yet see much higher prices for Yankee rails before the next great "foreclosure and reconstruction" period sets in, but for the moment the rise has gone far enough.

### THE PEKIN SYNDICATE BEGINS WORK.

It is somewhat significant that practically the only comment of importance upon the despatch of the Pekin Syndicate survey party to the East has come from Paris. The *Times* correspondent, on December 9th, refers to the agitation caused in that city by the news that the party, or, as he prefers to style it, the "mission," had actually got under weigh. If for "agitation" he had writ "surprise," the expression would have found some echo nearer home. While it was natural to expect that the pleasures of paper manufacture should give congenial occupation to financiers of chartered renown, it was, however, necessary that some day a start should be made to the scene of the Syndicate's

prospective wealth. Whatever be the opinion as to the methods of finance employed by this latest creation of up-to-date enterprise—and our own view is sufficiently well known—there can be no doubt that the chances of failure are enormously decreased by the more than benevolent neutrality of the British Government. The survey party, for whose expenses the 20,000 "Shansi" shares were recently issued at 4 premium, has of course a commercial aim, and is both paid by and subject to the instructions of the directorate. But the loan of British engineer officers to the Syndicate for this purpose signifies at any rate the willingness of the Imperial Government that all the world shall know its determination to support the commercial undertakings for which British subjects have obtained the concession, and in which British capital is embarked. The incident is shown to form part of a policy by the later announcement of the loan of Major Burn-Murdoch, R.E., for similar service in connection with Mr. Pritchard Morgan's concession in the Sze-chuan district. Some query has been raised as to the status of Mr. Glass, who has gone out in charge of the Pekin Syndicate party. We believe it is correct to say that although until recently holding a high position in the Public Works Department of India, where he obtained considerable railway experience, he has now formally resigned his official appointment in order to enter the service of the Syndicate. Considerable doubt also exists as to the programme of the operations. It is certain, however, that the party will proceed up the Yang-tse to a point short of Han-kow, whence it will strike north through the province of Honan towards Ching-ting, the present southerly terminus of the famous Belgian Lu-han concession, which claims the route from Peking to Han-kow. The Syndicate line will thus provide an alternative route to the Yang-tse in British hands, while the German assent to the passage of the line through the western angle of their Shang-tung province may some day lead to a physical connection with the projected German systems. The evidence of goodwill in this matter is of more than local value in determining the policy of Peking. To continue the route it would seem that the lines to be located must also include the branch from Ching-ting to Tai-yuen-fu, the capital of Shan-si, and probable centre of the coal sphere. Accurate information on these points, or even as to the nature of the country to be passed through, is notoriously deficient; and if Mr. Glass's party does no more than supply this want it will have performed valuable service.

### TRADES UNIONS AND THE RAILWAYS.

On Thursday an important deputation waited upon the President of the Board of Trade with regard to the alleged "victimisation" of railway servants and the provision of further workmen's trains. The deputation purported to represent the Trades Union Congress Parliamentary Committee, and came to lay before Mr. Ritchie resolutions passed by that body. The charges of "victimisation" were dealt with by us on the 12th ult., and the trumped-up grievance which this alleged action of the railways is supposed to have given rise to was aired by Mr. W. Hudson and Mr. R. Bell, the chairman and secretary respectively of the A.S.R.S. Mr. Ritchie, of course, promised to make inquiries of the companies, if full details of the complaints and specific cases are submitted—trifles which seem to have been conspicuously lacking in this latest crusade of the Amalgamated Society. The opportunity was taken by the deputation of pointing out that some railway companies did not allow their servants to sit on public bodies—a course obviously necessary in the case of a considerable proportion of their men, whose duties require them to be at liberty at any hour of the day or night.

In reply, Mr. Ritchie fitly pointed out that others beside themselves—Government servants for instance—were debarred from these civil liberties, and “if the men had no time to attend to public duties, it was no hardship to them to say they should not do so.” Incidentally this complaint throws a good deal of light upon the “long hours” about which the Amalgamated Society of Railway Servants has had so much to say. In regard to workmen’s trains, Mr. Ritchie pointed out that an inquiry was now being conducted by the Railway Commissioners, and he was quite willing that the investigations should take place in the evening, to allow of workmen attending personally. At the same time the President defended the Cheap Trains Act of 1883, and pointed out one or two very good reasons why the companies could not be expected to provide an unlimited supply of workmen’s trains. They were the present congestion of traffic at certain hours, with the consequent public danger incurred by running more trains, and, further, the gross abuse of the privileges intended for workmen. In regard to the latter, we notice that the *Daily Chronicle* boldly asserts:—“The cheapest fares are called workmen’s tickets, but there is no reason that we know why they should be confined to workmen.” Just so. What the Legislature intended as an advantage to workmen is being freely misused by other classes of the community. But a moment’s reflection would surely reveal, even to the *Daily Chronicle*, that the present abuse of the workmen’s privileges in this respect accounts largely for the alleged inadequacy of the services, and is the main obstacle in the way of extended facilities at the low fares. Mr. Ritchie, in conclusion, took the opportunity of pointing to the grave damage done to the trade of this country by labour disputes, and it is to be hoped the Trades Union representatives took his words seriously to heart. He pointed out that capitalists had grown timid about embarking on new enterprises, and that consequently, with a growing population, the interests of labour must suffer too. The only gainers from these disputes were our foreign trade rivals, who had been going ahead whilst we had stood still, and had even in some respects fallen behind. The President of the Board of Trade is certainly not behindhand in his sympathy with the just claims of labour, but it is to be hoped his words will carry due weight with the constituted leaders of the workmen.

### PASSING NOTES.

The traffic receipts for the week ending December 11th, on thirty-three of the principal lines of the United Kingdom, amounted to 1,626,545*l.*, which was earned on 19,253½ miles. For the corresponding week in 1897 the receipts of the same lines amounted to 1,548,481*l.*, with 19,034½ miles open. There was thus an increase of 78,064*l.* in the receipts, and an increase of 219 in the mileage. The aggregate receipts for twenty-four weeks to date amounted on the same thirty-three lines to 43,024,984*l.*, in comparison with 41,621,283*l.* for the corresponding period last year; increase, 1,403,701*l.*

The Edmonton District Council, at their meeting on Tuesday, resolved to oppose a Bill to be promoted by the Great Eastern Railway Company in the next Parliamentary session, to secure powers for the improvement of their system in Edmonton and adjoining district, with a view to the insertion of clauses for the extension of workmen’s trains from Enfield to Liverpool-street until 8 a.m., the running of a workmen’s train for the convenience of employes at the Government Small Arms factory at Enfield Lock and other large works near, and a reduction in season-ticket charges. It was stated that the overcrowding in workmen’s trains had become so great that a number of the regular passengers had resolved to travel second-class if all the seats in the third-class compartments were full, rather than have to stand up, as was now the case.

Mr. Burgess, Irish manager for the London and North Western

Railway Company, visited Waterford last week, and had an interview with several prominent citizens and traders regarding his company’s position in the present state of affairs. Mr. Burgess pointed out that the London and North Western Company do not wish to interfere with the arrangements of Irish companies but his company intend to seek Parliamentary powers to run over the Great Western Company’s line between Carmarthen and Fishguard, so that the traders may have advantage of the shortest route to Lancashire, Staffordshire, and other manufacturing centres in the north of England generally, when the Rosslare route is established.

Under the presidency of the Mayor of Swansea the committee having in hand the proposal to ask the Great Western Railway Company to place Swansea on the main line met on Thursday, when a letter was read from Sir John Llewelyn, Bart., M.P., a director of the company, stating that the latter had the matter under their serious consideration, that their engineers were dealing with it, and that he would introduce the proposed deputation when the date was fixed.

On Wednesday there was opened for passenger traffic the North Sunderland Railway—a light railway from the main line of the North Eastern Railway at Chathill to Seahouses, on the Northumbrian coast. The new railway had its first sod cut on May 16th, 1896, and it was opened for goods traffic in August this year. It is a single line of the standard gauge, and is a little over 4 miles in length.

The following paragraph has gone the round of the daily press during the last few days:—“It is stated that the South Eastern Railway Company intend to acquire the undertakings of the Chipstead Valley Railway Company and the Epsom Downs Extension Railway Company.” Inasmuch as all this was officially announced by the South Eastern Company about a month ago, one fails to see the need for the statement at the present moment.

A deputation from the Bangor City Council last week waited upon the chairman of the London and North Western Railway Company to make representations to Lord Stalbridge with reference to the proposed light railway from Felin Hen to Llandinorwic, the suggested railway station at Llangoffo, the railway extension in Anglesey, the Bangor train service, and other matters of local interest.

On Thursday last an important paper on “Railway Traffic Management” was read at the Royal Engineers’ Institute, Chatham, by Lieutenant E. H. M. Leggett, R.E. The large audience included representatives of all regiments in the garrison. The lecture was illustrated by diagrams and models, showing the latest practice of the London and North Western and other railways.

A statue to the late Mr. John Walker, so long the manager of the North British Railway Company, was unveiled in Waverley Station booking-hall, Edinburgh, on Thursday, in the presence of a representative gathering, by the Marchioness of Tweeddale, wife of the chairman of the company.

The accounts of the Lee-on-the-Solent Railway for the half-year ending June 30th, 1898, show a gross revenue of 318*l.*, an expenditure of 1,622*l.*, and a loss of 1,304*l.* The length of line open is 3 miles 9½ chains. The works and rolling stock have cost 26,368*l.*

A smoking concert given by the London Traffic Superintendent’s staff of the London and North Western Railway was held on Saturday at the dining-room of Broad-street Station, under the direction of Mr. R. F. Castleman, who acted as chairman.

A new post—that of “Marine, Docks, and Harbour Superintendent”—has been created by the Great Western Railway Company, and filled by the appointment thereto of Mr. J. Dunster, chief assistant in the general manager’s office at Paddington.

Subject to the approval of the Dundee Town Council, the Works Committee have resolved to refuse the request by the Caledonian Railway Company for a strip of ground at Dundee extended Esplanade for the purpose of doubling the line.

Mr. Alfred Baker, who was on Tuesday conditionally appointed manager of the London County Council Tramways, has been on the staff of the Nottingham Tramways Company for twenty years, and general manager since 1891.

The directors notify that a further call of 2*l.* per share on the ordinary and preferred "partly paid" shares of the Central London Railway Company will be made on the proprietors, payable January 13th.

Mr. Charles Davis, who for many years has held a prominent position in the secretary's office of the South Eastern Railway, has been appointed by the board assistant-secretary to that company.

## Money and Stock Markets.

The monthly settlement in Consols takes place on the 5th prox.; the fortnightly settlement in other Securities commences on the 28th inst.

### CITY, FRIDAY EVENING.

The MONEY MARKET remains fairly steady. Discounts are firm at about 3½ per cent., or 3-16 higher than the rate ruling a week ago. Money is rather more inquired for, and the rate is now about 3½ for both short loans and call money. The India Council to-day was able to secure 3½ per cent. for renewals of loans on a considerable scale till 27th to 31st inst. Gold was in less demand in the open market, and the price for the metal declined to 77*s.* 11½*d.* per ounce. The Bank of Bombay yesterday raised its rate of discount from 4 per cent. to 5 per cent. The Bank of England Return issued yesterday shows no changes of importance in the general position of the establishment. The Bank has gained in cash under the heads of private deposits and of its holding of Government Securities, and has lost under those of Government deposits and advances on "other Securities." In the result the reserve is almost stationary, showing a trifling decrease of 21,024*l.*, while its proportion to the liabilities is about ⅔ per cent. lower than last week, at 50½. There have been no fresh bullion operations since the return was issued.

The Bankers' Clearing-house return for the week ending December 14th, 1898, shows a total of 138,032,000*l.*, as compared with 161,483,000*l.* for the corresponding period last year.

Subjoined is a comparison of the present position of the Bank of England, the Money Market, the prices of Consols, French Rentes, &c., with the position at the corresponding period of last year:—

	At Present.	Same Week last Year.
Coin and Bullion .....	£30,988,879	£31,757,748
Total Reserve .....	£20,848,354	£21,519,713
Proportion of Reserve to Liabilities...	50½ per cent.	45½ per cent.
Notes in Circulation .....	£26,940,525	£27,038,035
Bank Rate of Discount .....	4 per cent.	3 per cent.
Open Market ditto .....	3½ per cent.	2½ per cent.
Consols (account) .....	110½ <i>d.</i>	112½ <i>d.</i>
French Rentes (account) .....	102 <i>l.</i> 9 <i>s.</i>	103 <i>l.</i> 25 <i>s.</i>
Paris Cheque Exchange .....	25 <i>l.</i> 30 <i>s.</i>	25 <i>l.</i> 24 <i>s.</i>
New York 60 days ditto .....	\$481½	\$482½

Silver bars are now quoted at 27 9-16*d.* per oz., being 1-16*d.* higher on the week. A year ago the price was 25 15-16*d.*

Eastern exchanges are telegraphed as follows:—Bombay 1*s.* 4*d.*; Calcutta, 1*s.* 4*d.*; Hong Kong, 1*s.* 11½*d.*; Shanghai, 2*s.* 8½*d.*; Singapore, 2*s.*

The premium on gold at Buenos Ayres has fallen during the week from 115-10 per cent. to 113-30 per cent., making the paper dollar (nominally worth 4*s.* 2*d.*) now actually worth 1*s.* 10-32*d.*. A year ago the premium was 176 per cent., and the value of the paper dollar 1*s.* 5-25*d.*

The Valparaiso 90-day exchange comes over to-day at 12 13-16*d.*, being unaltered on the week. A year ago it was 17 11-16*d.*

The Rio de Janeiro exchange on London is 8*d.*, being 3-16*d.* higher on the week. A year ago it was 7 5-32*d.*

In the STOCK AND SHARE MARKETS this week interest has principally centred in Yankee rails, which are being rigged

in quite the old sweet way, and the public appear at last to be well on the feed. They should now be about ready for a set-back, though prices far higher than those now ruling may be looked for during the next twelve months. In British railway stocks there is very little doing. A little air has been let out of the District bubble, and the stock is down 1 on the week, last night's price of 31½ being about 4½ points below the highest of the month. In the Foreign Railway market attention is being given to Mexican descriptions, and the stocks of all these companies show an upward tendency. Manila debentures, after dropping away from 55 to 44, to-day showed a firmer tone, with dealings fairly active, and it would not be surprising to see a recovery now. Nitrate Rails are very firm; the trouble in this case seems to be to get hold of any of the stock, which is held very tight in small lots. The absence of large holdings in this company is surprising, and is, of course, a good bull point. Central Argentines have been rushed up to 88, a rise of 2½ on the week; whilst Rosario is up 2½, and all other leading Argentines are better. Central Bahia 6 per cent. debenture stock is up 6, Cordoba Central income debenture stock 3½, Uruguay Northern debenture stock 5, Ottoman of Anatolia bonds 4½, several issues of Ottoman Railway debentures 1½ to 2½, United of Havana bonds 2, and Campos and Carangola bonds 2. Arauco bonds at their present figure are safe to buy. Milford Dock debenture stock has reacted 3, but should still be sold if there is any market.

The principal movements on the week, so far as they relate to securities in which the readers of this journal are likely to be most interested, are set forth in the following table:—

Name of Stock.	Rise.	Fall.	Name of Stock.	Rise.	Fall.
<i>British Funds, &amp;c.</i>					
Consols, 2½ per cent. ....	—	—	Denver & Rio Grande Com. 1½	—	—

Applications have been made to the Stock Exchange Committee (1) to appoint a special settling day in and to grant a quotation to:—Great Western Railway, further issue of 2,448,550*l.* consolidated ordinary stock; and (2) to allow the following securities to be quoted in the Official List:—Argentine Republic—Further issue of 31,200*l.* 4 per cent. railway guarantees rescission bonds, Nos. 722 to 731 of 1,000*l.*, 1,001 to 1,015 and 7,431 to 7,450 of 500*l.*, and 9,451 to 9,475 and 15,098 to 15,122 of 100*l.* each. Denver and Rio Grande Railroad Company—

\$4,348,000 first consolidated mortgage  $4\frac{1}{2}$  per cent. gold coupon bonds of 1936, Nos. 34,619 to 38,966 of \$1,000 each; Illinois Car and Equipment Company—60,832 shares of \$25 each, \$1,087,885 first mortgage gold bonds, and 184,100l. Collateral Car Trust 5 per cent. debentures, in lieu of the securities of the United States Car Company now quoted.

The New York Stock Exchange will close on 24th, 26th, and 31st inst. and on 2nd proximo.

Messrs. N. M. Rothschild and Sons announce the numbers of 22,544 3 per cent. obligations of the South Austrian Lombardo and Central Italian Railway Company, which were drawn at Vienna on the 1st inst. to be paid off as follows, viz.:—Series A, C, D, F, H, I, K, M, O, P, S, T, U, V, and Z, at 20l. each, on January 2nd, 1899, and series X on April 1st, 1899; and also of 1,185 shares of the above company, which have been purchased and cancelled.

The register of debenture stock of the Buenos Ayres Great Southern Railway Company, Limited, will be closed from Saturday, the 17th, to Saturday, the 31st instant, both days inclusive, for the purpose of preparing the interest warrants for the half-year ending December 31st.

Messrs. Thackeray and Co., of Cardiff, under date December 15th, report as follows:—Barry Railway undivided, 262½ (unchanged); Barry preferred, 122 (unchanged); Barry deferred, 141 (unchanged); Cardiff preferred, 111½ (unchanged); Port Talbot, 9¾ (a fall of ¼); Rhondda and Swansea Bay, 5 (a fall of ¼); Rhymney undivided, 258½ (a fall of ¼); Rhymney preferred, 119½ (unchanged); Rhymney deferred, 140½ (a fall of 3); Taff Vale, 75½ (a rise of ¼); Vale of Glamorgan, 122½ (a fall of 1½). Business is still of a very restricted character, but quotations remain fairly steady. Taffs have had a further rise. The new issue of Vale of Glamorgan has attracted a good deal of attention; but there is some doubt as to how it ranks with the old stock, which naturally somewhat interferes with business.

#### COMMUNICATION IN TRAINS.

A meeting of the Institution of Electrical Engineers was held on Thursday at the Institution of Civil Engineers, when Mr. W. E. Langdon (vice-president) read a paper on "Electric Intercommunication in Railway Trains." The president (Mr. J. W. Swan, F.R.S.) was in the chair. The lecturer described the various electrical systems of train communication calling for criticism, and expressed his conviction, arrived at after mature consideration, that to combine the electrical with the brake coupling was, on many counts, undesirable. The question was mainly one of responsibility. Would a combination of the two couplings lessen the responsibility which attached to the efficient maintenance of the brake? When a failure arose in a brake coupling or tube, how was it to be dealt with without the presence of the electrical attendant, and *vice versa*? Were these men to hunt in couples, the one tied to the other? Such a combination of the couplings meant the replacement of some 150,000 brake couplings and tubes. The question presented itself as to whether the cost would prove more economical than, or so economical as, if the two were established and maintained independent the one of the other, leaving the two departments freedom of action and individual responsibility. What had now chiefly to be provided for was the protection of the traveller from outrage. He did not believe that this was adequately provided for by the provision of a means of raising an alarm from one position only in each compartment. Owing to his conviction that the only effectual mode of protecting the traveller was the provision of a means of communication in the neighbourhood of each corner of a compartment, he had endeavoured to evolve a method which had been applied to a Midland train. It was desirable that one system, even in matters of detail, should be adopted throughout all railways, but uniformity in three points was essential to an interchange of stock. These points were the electrical system, the form of coupling, and the releasing key.

Mr. M. F. Keogh, the newly appointed secretary of the Dublin Wicklow and Wexford Railway Company, is the son of the company's solicitor, Mr. George Keogh, J.P., Crown Solicitor for county Meath, who was admitted in Easter term, 1855. Mr. M. F. Keogh already has a familiar knowledge of the company's business, owing to his having been engaged in his father's office, and occasionally at Westminster, in looking after the interests of the senior Irish railway company. We are confident the new appointment will please the shareholders, inasmuch as Mr. Keogh is at once gentlemanly to deal with, capable to execute, and evidently brimful of the energy which goes hand in hand with high mental capacity and the physical vigour of early manhood. We are pleased to hear that the new secretary is popular with the railway staff, who do not regard him as an unwelcome intruder.

## Directors' Reports.

### PARAGUAY CENTRAL RAILWAY.

#### CAPITAL.

The capital account shows an expenditure of 1,453,082l., whilst the receipts have been as follows:—Ordinary shares, 272,930l.; 6 per cent. preference shares, issued to Paraguayan Government, 210,000l.; 5 per cent. debenture stock, 974,000l.; loan from bankers (against 40,000l. of unissued debenture stock), 25,606l.

#### REVENUE AND TRAFFIC.

The report for the year ended April 30th, 1898, states that the gross receipts amounted to \$942,743, an increase of \$44,957, as compared with the previous year. The gross receipts are thus apportioned:—First section, from Asuncion to Paraguari, 45 miles, \$639,483 (against \$619,276); second section, from Paraguari to Villa Rica, 48 miles, \$220,986 (against \$199,819); third section, from Villa Rica to Pirapó, 62 miles \$82,274 (against \$78,661); total, 155 miles, \$942,743 (against \$897,755). The gross expenses amounted to \$834,520, a decrease of \$4,158 on the previous year. The net profit was \$108,223 (against \$59,077). The arrears of debenture stock interest now amount to 339,889l. The number of passengers carried was 557,334 (against 494,742); the weight of goods and parcels carried 74,868 tons (against 79,875 tons). The amount due from the Paraguayan Government in respect of guarantee is now 598,432l. The report states:—

#### GENERAL.

"The directors have much pleasure in stating that since the last-mentioned date [April 30th, 1898] the prospects of the line have greatly improved. The approximate gross receipts for the current year, from May 1st to September 30th, amount to \$479,153 and the net to \$137,916, against \$379,386 and \$19,593 for the corresponding period of last year. In response to the often reiterated petition of the company, the Paraguayan Government, by decree dated May 30th, which came into effect on July 12th this year, has allowed the company to raise the tariffs considerably, the maximum authorised increase to take effect within three years from the date of the decree. As the net receipts have been expended to meet the urgent necessities of the line, no funds have come into the hands of the receivers so as to be available for distribution to the debenture stockholders. The directors hope soon to be able to submit to the share and debenture stockholders a scheme by means of which the receivership may be put an end to, and the company reorganised. The sugar factory mentioned in the last annual report has now been completed, and working was commenced on September 26th. At the request of the Paraguayan Government, the financial agent of the Republic in London, Don José Y. Machain, has been elected to a seat on the board in succession to the late Mr. Christopher James, Consul-General. It is hoped that this appointment may contribute to a friendly settlement with the Government. The directors are pleased to express their appreciation of the valuable services rendered by the company's manager in Asuncion, Mr. Cyril Smith."

### GRAND JUNCTION CANAL.

The report of the committee of management for the half-year ended June 30th, 1898, states that the total receipts amounted to 51,615l., an increase in comparison with the sum received in the corresponding period of 1897 of 3,355l. The total expenses were 24,924l., an advance of 5,277l. The works are reported by the engineer to be in fair working order, but the shortness of water in the southern and middle districts and Foxton Summit has caused much inconvenience to the traffic; measures, however, have been taken to meet the difficulty. An agreement has been entered into with the Oxford Canal Company relating to tolls on through traffic over that canal between London and Birmingham. This, together with the arrangements entered into with the Warwick Canal Companies, gives the Grand Junction committee the control of the tolls on this route. With the view to further developing the canal traffic, the committee has purchased additional land at Rickmansworth, Brentford, and Uxbridge, the cost of which has been charged to the reserve account. The committee recommend that power be taken to raise the balance of the money authorised to be raised by the Leicestershire and Northamptonshire Union and Grand Union Canals (Transfer) Act, 1894—viz., 40,000l.—and it is proposed to issue this, together with the 30,000l. previously authorised, as perpetual 4 per cent. debenture stock. The profits for the half-year, after providing the interest on the debenture stock, dividend on preference shares, and expenses of the canal, amounted to 22,427l. This sum, added to the unappropriated balance, makes a total of 35,713l., and the committee recommend the declaration of a dividend of 2l. per share, free of income-tax, leaving a balance of 13,113l. to be carried forward.

### ROLLER-BEARINGS COMPANY.

The report of the directors of the Roller Bearings Company, Limited, for the year to September 30th, 1898, states that during this period much more experience has been gained in the practical application of this company's bearings, and several important improvements have been made, having for their object the greater efficiency of the bearings without adding materially to the cost. There has been a considerable development in the adoption of line shafting and heavy bearings, whilst their introduction for tramway work has increased to an extent which justifies the directors in claiming that they are now in use in most of the principal cities and towns of the United Kingdom. The company's bearings are also in successful operation upon furnace cars, dynamos, broughams, motor cars, heavy ventilating fans for collieries, and a variety of other machines.

The development of the company's business with regard to railways appears to be more gradual than was contemplated; this may be attributed to the excessive caution of English engineers in the adoption of a new mechanism rather than to the want of intrinsic value in the article itself. The number of bearings supplied in the year shows a considerable increase over the same period of last year, with a corresponding increase in the value of the sales effected and the profit earned, the gross value of the trade done showing an increase of over 100 per cent. This encourages the directors in the belief that there is a growing demand for roller bearings, which, properly fostered, will result in an increasing and profitable business to the company. The directors, in fulfilment of the policy foreshadowed in their last report, have made strenuous efforts to bring roller bearings prominently to the front. This has necessitated considerable expenditure of capital, which they believe will be remunerative, and will prove by future results to have been fully justified. Considerable progress has been made in the introduction of the bearings into France and Germany, and in the former country negotiations are still proceeding for the acquisition of the patent rights on remunerative terms to the company. The profit and loss account shows that the gross profit on trading was 1,558*l.* Management expenses, patent fees, &c., amounted to 3,905*l.*, and there is a balance (being net loss) of 2,310*l.*, which is carried to the balance-sheet, making, with the loss brought forward from last account, 1,865*l.*, a total debit balance of 4,175*l.*

## Law Intelligence.

### HOUSE OF LORDS.

(Before the Lord Chancellor and Lords Watson, Shand, and Ludlow.)

LONDON AND NORTH WESTERN AND GREAT WESTERN JOINT RAILWAY COMPANIES v. J. H. BILLINGTON (LIMITED)

This was an appeal, at the instance of the London and North Western Railway Company, from an order of the Court of Appeal—Lords Justices A. L. Smith and Chitty—dated April 25th last, in which the appellants were plaintiffs and the respondents were defendants. The action was brought by the appellants to recover from J. H. Billington, Limited, coal merchants, in Cheshire, 38*l.* 7*s.*, an amount alleged to be due for siding-rent on coal wagons at Chester station between February, 1895, and August, 1897. The respondents pleaded in defence that the county court had no jurisdiction to decide the question, such jurisdiction being ousted by the Railway Rates and Charges Act, section 5, and they paid into court 2*l.* 6*s.* in satisfaction of the appellants' claim so far as related to the account rendered for March and April, 18*95*, but notwithstanding such payment they denied liability. On January 31st, 18*95*, the railway officials sent to each of the coal merchants in the Cheshire district a circular in which notice was given that, as serious delays had taken place in discharging loaded wagons, involving expenses and impeding the working of the lines, advice would be given to each consignee of the arrival of wagons, and after four days, exclusive of the day of arrival, a siding rent of 6*d.* per day would be charged for every wagon not released and remaining on the companies' premises. On February 28th, 1895, the respondents replied:—"We shall do our utmost to comply with your circular respecting releasing all wagons within four days from their arrival, and we trust you will assist us by delivering the wagons promptly and also despatching the empties daily. Unless this is done we cannot comply with your circular, and we must hold your company responsible for the usual demurrage charges on all wagons not delivered as above." Business went on from that time, the respondents' wagons sometimes remaining on the siding for varying periods beyond the four days, the appellants debiting the respondents with the charge of 6*d.* per day for all wagons so remaining, and carrying forward the arrears of the previous months. This was continued until August, 1897, a period of nearly two-and-a-half years, during which the respondents accepted the services of the railway companies in respect of the siding accommodation. The respondents had never paid anything in respect of these siding services. The county court judge held it proved, by oral testimony and the correspondence, that the respondents never challenged the reasonableness of the charge of 6*d.* for the four-day limit for discharging, but they did contend against the right of the appellants to make any charge for siding accommodation. Any question as to the reasonableness of the charge, he also held, was one for determination by an arbitrator appointed by the Board of Trade under section 5 of the London and North Western Railway Rates and Charges Order Confirmation Act, 1891. The appellants said the question was not whether the charge was a reasonable one. There was no obligation on them to provide this accommodation, but they gave notice to the respondents that, upon certain defined terms, they would provide it, and on those terms the appellants said the respondents had accepted the service, and therefore it was not open to them to repudiate the terms on which they were rendered. The respondents, on the other hand, contended that a difference had in fact arisen as to the reasonableness of the charge, that under those circumstances a Board of Trade arbitration was the proper tribunal, and that to give the ordinary courts jurisdiction the appellants must show either an express contract to pay the charge claimed or an implied one by payment for some time, which in this case had not been done. The county court judge adopted the view of the appellants, as he thought it was inequitable that the respondents, knowing the charge to be made, should accept the accommodation and when sued turn round and say the question of the reasonableness of the charge was not admitted and that the decision was for another tribunal. The Queen's Bench Division upheld the decision

of the county court judge, but the Court of Appeal set aside the judgment for the appellants and entered judgment for the respondents, with costs.

Mr. CRIPPS, Q.C., for the appellants, argued that the county court judge had jurisdiction to decide the question at issue, and he stated that if the matter were referred to arbitration it would involve an expenditure of 2,000*l.* The appellants were not bound to provide the accommodation for which they claimed payment, but, having provided it, and the respondents having accepted the accommodation after notice of the terms upon which the appellants would provide it, they became liable to pay, and they could not now raise a question as to the reasonableness of the sum which under the 5th section of the Rates and Charges Order Confirmation Act, 1891, was the only difference referred to arbitration.

Mr. LAWSON WALTON, Q.C., for the respondents, maintained that the effect of section 5 of the order was to require that all differences arising under it should be determined by arbitration, and so to oust the jurisdiction of the county court. But he pointed out that three days before the decision in the present case another county court judge decided a similar question against the London and North Western Railway, and in favour of a trader, on the ground that he had no jurisdiction. That decision was upheld by the Court of Appeal, and as the railway company had not appealed against the finding in the case of Donellan they must be taken to acquiesce in it. As that question was yet to come before the court, and it raised the point in a more definite manner than could be done by the present appeal, he thought this case might be allowed to stand over.

The LORD CHANCELLOR said the case referred to was not yet on the list, and in any case he did not think it was necessary to hold over the present appeal.

After some remarks by Mr. CHITTY, for the respondents, their lordships proceeded to give judgment.

The LORD CHANCELLOR said in this case the finding of fact by the county court judge was, by the express language of the statute which allowed an appeal, conclusive upon any tribunal which had afterwards to deal with the matter. The question argued before the Court of Appeal was one, no doubt, of very great and serious importance to the traders and railway companies of the country as a whole. As far as he was concerned, he proposed to give no opinion upon the true construction of the statute except this, that a condition precedent to the reference of a case to an arbitrator was that the difference between the parties must have arisen before the action was launched. The contention that the parties when sued for the price of a service should then, for the first time, question whether the charges were reasonable seemed to him absolutely untenable. It was entirely contrary to precedent to introduce new differences after the reference to an arbitrator. The differences must be raised precedent to the order for arbitration. As to the other points he would give no opinion which could be binding upon any future case which might arise. The finding of fact by the county court judge being conclusive precluded him from giving any judgment upon the true construction of the section. That matter, therefore, must be reserved for future consideration. The judgment of the Court of Appeal appeared to him erroneous, and ought not to have been delivered. He therefore moved that the appeal be sustained, and that the respondents pay to the appellants the costs of the appeal.

LORD WATSON and Lord SHAND concurred, the latter remarking that the only point on which he had any difficulty was as to the costs. If the larger question had to be decided, he thought it rather hard that the costs should be thrown upon the present respondents, but that view was not entertained by the rest of their lordships.

LORD LUDLOW concurred with the Lord Chancellor as to the findings of the county court judge on questions of fact being final, and it being too late for the respondents, after action was taken, to raise the question as to the reasonableness of the charge made by the railway company.

The appeal was accordingly sustained, with costs.

## American & Canadian Railways.

### CENTRAL PACIFIC.

Subjoined is a summary of the income account of the Central Pacific Railway Company for the year ending June 30th:—

	1896-7.	1897-8.
Passenger earnings .....	\$4,766,837	\$5,482,772
Freight earnings .....	7,422,139	9,743,038
Miscellaneous .....	450,735	540,039
Total earnings .....	\$12,639,711	\$15,766,849
Total expenses .....	7,648,898	9,221,670
Net earnings .....	\$4,990,813	\$6,545,679
Sundry credits .....		49,663
Net income .....		\$6,594,342
Betterments and additions .....		\$162,250
Taxation on railroad property .....		492,747
Rentals, terminal facilities, steamers, and trackage .....		107,976
Interest on funded debt .....		3,149,088
Sinking fund contributions .....		235,000
Amount payable to United States Government under Thurman Act .....		885,817
Total disbursements .....		\$5,032,878

Amount receivable from Southern Pacific Company, in respect of leased properties, being balances of gross earnings of same after deducting expenses, interest, sinking fund contributions, &c., payable by Southern Pacific Company out of said gross earnings under terms of the lease .....	\$1,561,464
Rental from Southern Pacific Company .....	10,000
Amounts charged in above operating expenses now credited this [income] account and carried to the debit of income appropriation account below:—	
Betterments and additions .....	\$162,250
Sinking fund contributions .....	235,000
	<b>\$397,250</b>
Bonus on Express Company's contract .....	32,000
Income from investments .....	27,112
Interest, discount, and exchange .....	30,515
Income from sinking fund investments .....	613,489
Stumpages on non-trust lands .....	16,424
	<b>\$2,688,254</b>
Provision for replacement of rolling stock in addition to amount included under maintenance of equipment, per contra .....	\$183,935
General expenses charged in books of Central Pacific Railroad Company .....	51,151
Proportion of expenses in connection with extension of bonds, chargeable against the year .....	319,654
Balance, being net income carried to appropriation of income account .....	<b>2,133,514</b>
	<b>\$2,688,254</b>
The above balance of income account for the year ending June 30th, 1898, is disposed of as follows:—	
Income from sinking fund investments credited in income account, above, now transferred to sinking fund account .....	\$613,489
Contribution to land grant mortgage sinking fund in excess of net receipts from sales of granted lands .....	154,243
Old accounts charged off .....	44,814
Expenses in connection with extension of bonds .....	\$1,014,929
Less—Amount applicable to the year, charged above .....	319,655
	<b>695,274</b>
Appropriation for company's sinking funds .....	235,000
Betterments and additions charged off .....	162,250
Balance carried to profit and loss account .....	<b>228,443</b>
	<b>\$2,133,514</b>
President J. L. Requa in his report states:—The allotments of the various amounts withheld by the Government on account of transportation services rendered and cash payments made by the company, arising from the issue of bonds in aid of the construction of the railroad, as shown by Government statements to June 30th, 1898, are as follows, attention being called to the fact that the method of stating said account was changed in the month of April, 1898, and credit was allowed this company for "Judgments and allowed claims," amounting to the sum of \$1,162,939. This amount represents judgments obtained against the Government and claims allowed by the accounting officers of the Treasury Department, but for which no appropriation has been made by Congress.	
Bonds issued by the United States:—	
To Central Pacific .....	\$25,885,120
To Western Pacific .....	1,970,560
	<b>\$27,855,680</b>
Interest paid by United States:—	
On Central Pacific bonds .....	\$45,510,464
On Western Pacific bonds .....	3,412,953
	<b>\$48,923,417</b>
Less:—	<b>\$76,779,097</b>
Amounts repaid and withheld by the accounting officers of the United States Treasury, as follows:—	
By transportation services .....	\$8,287,924
By 5 per cent. net earnings .....	658,283
	<b>\$8,946,207</b>
Credit bond and interest account .....	
By transportation services .....	\$5,338,237
By cash payments .....	633,992
By interest and premium on bonds .....	\$3,034,655
Less premium on bonds purchased .....	1,344,234
	<b>1,690,421</b>
Judgments and allowed claims .....	<b>1,162,939</b>
Credit sinking fund account .....	<b>\$8,825,589</b>
Total .....	<b>\$17,771,797</b>
Balance due United States June 30th, 1898 .....	<b>\$59,007,300</b>
In connection with the debt of the company to the United States Government growing out of the issue of bonds advanced in aid of construction of the road, your board reports that action	

thereon was taken by Congress at its last session, and on July 7th, 1898, the following Act was approved by the President of the United States:—

"Settlement with the Central Pacific and Western Pacific Railroads.—That the Secretary of the Treasury, the Secretary of the Interior, and the Attorney-General, and their successors in office, be, and they are hereby, appointed a Commission with full power to settle the indebtedness to the Government growing out of the issue of bonds in aid of the construction of the Central Pacific and Western Pacific bond-aided railroads, upon such terms and in such manner as may be agreed upon by them, or by a majority of them, and the owners of said railroads—provided, that any and all settlements thus made shall be submitted in writing to the President for his approval or disapproval, and unless approved by him shall not be binding.

"That said Commission shall not agree to accept a less sum in settlement of the amount due the United States than the full amount of the principal and interest and all amounts necessary to reimburse the United States for moneys paid for interest or otherwise; and also provided, that said Commission are hereby empowered to grant such time or times of payment by instalment, and at such rates of interest, to be not less than 3 per centum per annum, payable semi-annually, and with such security as to said Commission may seem expedient; provided, however, that in any settlement that may be made the final payment and full discharge of said indebtedness shall not be postponed to exceed ten years and the whole amount, principal and interest, shall be paid in equal semi-annual instalments within the period so limited, and in any settlement made it shall be provided that if default shall be made in any payment of either principal or interest, or any part thereof, then the whole sum and all instalments, principal and interest, shall immediately become due and payable, notwithstanding any other stipulation of said settlement: Provided further, that unless the settlement herein authorised be perfected within one year after the passage of this Act, the President of the United States shall at once proceed to foreclose all liens now held by the United States against said railroad companies and to collect the indebtedness herein sought to be settled, and nothing in this Act contained shall be held to waive or release any right, lien, or cause of action already held by the United States.

"That there is hereby appropriated, out of any money in the Treasury not otherwise appropriated, the sum of \$20,000 to defray the expenses of said commission in making the said settlement."

#### LATEST EARNINGS.

First week of December.—Kansas City Pittsburg and Gulf, \$61,000—increase, \$2,000; New York Ontario and Western, \$83,000—increase, \$2,000; Chicago Milwaukee and St. Paul, \$803,000—increase, \$140,000; Missouri Kansas and Texas, \$297,000—increase, \$21,000; Norfolk and Western, \$261,000—increase, \$9,000; Oregon Railroad and Navigation, \$5,157,000—increase, \$3,000; Southern Railway, \$488,000—increase, \$37,000; Chicago Great Western, \$113,000—increase, \$18,000; Chesapeake and Ohio, \$289,000—decrease, \$33,000; Denver and Rio Grande, \$185,000—increase, \$22,000; Louisville and Nashville, \$456,000—increase, \$19,000; Mexican Central, \$328,000—increase, \$41,000; Missouri Pacific, \$517,000—increase, \$6,000; St. Louis and San Francisco, \$139,000—increase, \$11,000; St. Louis South Western, \$134,000—increase, \$18,000; Wabash, \$269,000—increase, \$32,000.

First week of December.—Baltimore and Ohio South Western, \$124,000—decrease, \$8,000; Cleveland Cincinnati Chicago and St. Louis, \$269,000—decrease, \$25,000.

First week of December.—Northern Pacific \$558,000—increase, \$72,000.

Month of November.—St. Louis South Western, gross, \$629,000—increase, \$70,000; net, \$250,000—increase, \$46,000. Illinois Central, gross, \$2,555,000—decrease, \$9,000. Baltimore and Ohio, gross, \$2,471,000—increase, \$216,000. The gross earnings of 119 roads in the month of November amount to \$49,984,660, an increase of \$2,187,476, or 4.58 per cent.

Month of October.—Illinois Central, gross, \$2,467,000—increase, \$27,000; net, \$770,000—decrease, \$105,000. Calgary and Edmonton, net, \$8,476, compared with \$17,450.

#### RAILROAD NOTES.

According to telegraphic advices from New York, the Texas and Pacific has settled the largest of the suits which have been brought in connection with the loss by fire at New Orleans of \$600,000 worth of cotton. An official of the Texas and Pacific says the suit has been compromised on a basis most satisfactory to the company—equal to a third of the entire amount of the alleged damage. The other suits, numbering about fifty, are for small amounts; some are being dropped, others have been

settled in favour of the company, and in the case of others there will be an appeal to the higher Court. President Gould, in the last annual report of the Texas and Pacific, gave as a reason for not paying interest on the income bond the existence of these litigations, which, if they should be decided against the company, might cripple it.

Referring to the agreement recently arrived at between the Grand Trunk and Canadian Pacific Railway companies, the *Daily News* gives the following schedule of fares showing the difference between the cut rates and restored tariff:—

From Toronto to	Cut rates.	Restored tariff.
Hamilton .....	\$ .50	\$1.20
Niagara Falls, Ontario.....	1.90	2.60
London .....	1.00	3.40
Woodstock .....	1.00	2.60
Ingersoll .....	1.00	2.90
Chatham .....	1.50	5.30
Windsor .....	2.00	6.60
Flora .....	.75	3.65
Fergus .....	.75	3.65
Hespeler .....	.75	1.75
Guelph .....	.50	1.50
Brantford.....	1.25	1.95
Sarnia.....	3.00	5.10
Montreal .....	5.00	10.40
Brockville.....	3.00	6.95
Prescott.....	3.00	7.30
Kingston .....	2.50	5.40

The numbers are announced of bonds of the Wellington Grey and Bruce Railway Company, which have been drawn and will be paid at par at the offices of the Grand Trunk Railway Company in Montreal, or at Dashwood-house, New Broad-street, on and after January 2nd. It is also announced that the estimated earnings of the railway for the half-year ending 31st inst. applicable to meet interest on the company's bonds will admit of the payment of 2l. 4s. 1d. on each 100l. bond, and that this payment will be applied in respect of coupon No. 37, due January 1st, 1889, and will be made on and after January 2nd next at the agency of the company.

The Reading Company has issued a report covering the Philadelphia and Reading Railway and the coal and iron companies for the nineteen months since the receivership has been ended, which shows a surplus, after providing for all expenses, of \$133,000; during the first seven months of the period there was a deficit of \$1,243,000. The year ended June 30th shows gross receipts of \$45,257,000, an increase of \$2,853,000; net receipts of \$10,420,000, an increase of \$1,083,000; and a net surplus of \$1,376,000, against a deficit of \$579,000.

The Chicago and Alton crowd say that the negotiations for the sale of the road to the Vanderbilts or the Kansas City Pittsburg and Gulf have been broken off, and it is now supposed that a deal is on with the Gould companies. Should they not result in anything, it is not improbable that the Union Pacific may try to get possession of the road. The Alton joins the Union system at Kansas City, and would give it direct and independent access to Chicago and St. Louis.

Friction exists between the Grand Trunk Railway and the order of railway telegraphers. Mr. Hays, the general manager, declines to recognise their organisation. Montreal advices say that the operators may strike at the New Year unless their grievances are remedied.

The Board of the Chicago Junction Railways and Union Stock Yards Company has declared a dividend of 1½ per cent. on the preferred and a dividend of 4 per cent. on the common stock, payable in New York on January 3rd next, and in London a few days after.

The Chicago Rock Island and Pacific has declared the regular quarterly dividend of 1½ per cent., payable February 1st. The board of directors has elected the assistant-treasurer, Mr. F. E. Hayne, as treasurer, to succeed the late Mr. J. F. Phillips.

The Chicago and North Western has applied to the New York Stock Exchange to list \$1,133,000 of 3½ per cent. general mortgage gold bonds of 1887. This is part of the \$165,000,000 issue authorised last year.

Out of the net income of the half-year ending 31st inst., the board of the Northern Pacific Railway Company have declared a dividend of 1 per cent. upon the common stock, payable on February 3rd next.

The rate war on grain east-bound from Chicago continues, and probably the lowest figures on record have been reached, some

business having been done at 6c. per bushel, all rail from Chicago to New York.

Mr. J. W. Thomas, jun., has been elected general manager of the Nashville Chattanooga and St. Louis Railway, to succeed his father, who resigned as manager, but remains president of the concern.

It is announced that the Dauphin Railway, now being built near the Saskatchewan River, will be pushed forward to Hudson Bay within four years, thus opening a new short route to Europe.

A Tacoma despatch says that the Northern Pacific has filed plans of eleven branch lines, with a total mileage of 566 miles, to parallel the Oregon Railroad and Navigation Company's lines.

The Wabash Railroad Company will withdraw from the Western Passenger Association on January 15th, the reason given being that the Chicago and Alton Road is not a member.

President Cable, of the Chicago Rock Island and Pacific, positively denies the report that his company is seeking to obtain control of the Colorado Midland.

Mr. Gardner, the chairman of the board of directors of the Chicago Burlington and Quincy Railroad, died on Saturday at Boston of apoplexy.

A report is being circulated that New York Ontario and Western common stock will be divided into two classes.

Last week's East-bound all-rail freight tonnage from Chicago amounted to 113,000 tons, against 65,000 last year.

It is reported that the Atchison Topeka and Santa Fé will abandon several of its Kansas branch lines.

## General News.

### MR. RITCHIE ON THE "GRIEVANCES" OF RAILWAY SERVANTS.

A deputation representing a large number of the principal Trade Unions waited on the President of the Board of Trade on Thursday, to lay before him grievances felt by railway men and others through the action of various railway companies. Mr. Ritchie was accompanied by Sir Courtenay Boyle, Mr. Hopwood, and Mr. G. Roper. The deputation included Mr. J. T. Coates, and Mr. G. Dew (National Cheap Workmen's Train Movement); Mr. W. Hudson, Mr. E. C. Gibbs, and Mr. R. Bell (Amalgamated Society of Railway Servants).

The speakers for the railway service, contended that railway men had suffered through acting on the advice of the Board of Trade, that they were often prevented from acting as members of local authorities, and that great hardship was inflicted on thousands of the working classes because workmen's tickets were not issued up to a later hour in the morning, and because the refusal of several of the companies to grant any but the most limited facilities to workmen caused congestion of population with its consequent evils in many large towns.

Mr. RITCHIE, in reply, said the first point brought to his notice was the dismissal of the delegates because of the action they had taken under the advice given to the railway servants by the Board of Trade. If it were a fact that, because of the adoption of the advice given to the railway servants by his direction, they were removed from their employment, it was a case in which he thought the strongest steps possible for the Board of Trade to take should be taken. Nothing could be more detrimental to the public than if, when steps were taken by a body of individuals, on the advice of a Department, they should be subjected to pains and penalties. The position of things seemed to be that the railway servants had alleged that certain members of their union had been dismissed, not because of faults committed by them in the execution of their duty, but because of their interference under the advice given by himself in connection with the department. Of course, if a man was incapable of carrying out his duty, it was no bar to his dismissal that he was a member of the society, or had acted as delegate. He certainly should regard it as very regrettable on the part of the company if they took advantage of some slight fault on the part of a man to take strong steps with regard to him, because he had at some time or other taken part in negotiations between the servants and the company. As Mr. Bell knew, there had been some correspondence between the Board of Trade and himself with regard to that particular question, and the position the Board of Trade

had taken up in the correspondence was that it was impossible for them to be the judges of whether or not any particular fault committed by a railway servant was or was not sufficient to justify his discharge or reduction. If they attempted to do that they would be practically taking into their hands the management of the great railway systems of this country. It would be an impossible position for them to make themselves responsible, and, in case of accident or calamity, the responsibility would be very grave if it could be shown that the cause, or a portion of the cause, of the calamity was interference between the company's servants and the company by the Board of Trade and its officials. But the Board of Trade had stated by his direction that if they were to get possession of the particulars of these various alleged grievances, it would be their duty to ask from the companies explanations with regard to the action they had taken in respect of the individuals concerned in those particular cases. At first he thought Mr. Bell was rather inclined to ask for a departmental committee, but such a committee was not a weapon with which to deal with a case of this kind, because it would have no power of summoning witnesses at all. If the companies said they were perfectly willing to discuss with the Board of Trade all these allegations, but they were not going to be brought to the bar of a departmental committee, they would have no power of getting any evidence from them. What they proposed to do was, for all purposes of the railway servants, as good as a departmental committee, indeed considerably better. He proposed, assisted by his colleagues, that full investigation should be made into each of the cases by Mr. Bell. He thought he must ask them to wait until that operation had been carried through before he expressed any opinion upon the question of a House of Commons Committee. He did not say it might not be necessary to have a House of Commons committee on this question. The next question, which had been brought before them by Mr. Allerman Dew, was in regard to workmen's trains. There, again, they had been moving in the matter. He did not think it could be said that the Act of 1883 had proved a failure, for under it great facilities had been given to the working classes. If that Act had proved a failure they would have a strong case for its amendment, but so far they did not acknowledge its failure. As Mr. Dew had stated, there were inquiries now pending with regard to cheap trains. Two had been held, and five were pending. In addition to that, nineteen other cases would be shortly before the Railway Commissioners, and until they saw what the result of all those inquiries was, he thought the demand for an alteration of the Act could not be said to be sufficiently strong. The Board of Trade had no objection, and if representations were made to him with regard to the pending inquiries he would make representations to the Railway Commissioners. Something had been said with regard to the fares. Uniform fares, no doubt, would be convenient, but some railways were much more costly than others, and Parliament had always recognised in cases of that kind that there should be some consideration shown with regard to the fares. This, after all, was in the interest of the travelling public, for if those who embarked their money in railway enterprises were restricted, some of the more costly lines would not be made. Anything that would prevent capital getting a proper return was clearly not in the interest of the travelling public; but, of course, at the same time, advantage ought not to be taken of that to unduly press the question of fares. Many of the lines coming into London carried on their traffic under circumstances of extraordinary difficulty, and anything that congested traffic must be a source of danger to the travelling public. There was another class as well as workmen who must be considered in connection with cheap traffic—a large body of people who were not workmen, but whose remuneration was little more than that of the workmen; these must be accommodated. Each class ought to have full and adequate consideration. He next referred to the difficulty of restricting workmen's facilities to the class for which they were intended, and excluding people who belonged to the middle classes. With regard to the civil liberty question, that was a matter which they could hardly interfere with. They all knew the great difficulty of giving time and attention to public matters. The disabilities they complained of were not confined to railway servants. They would pardon him if he took advantage of the presence on that occasion of gentlemen who were prominent in the trade union world, and if he spoke on more general questions than those they had brought before him. The subject was of the most supreme importance to all interested in the prosperity of the country. They were as much interested from their point of view in a prosperous condition of things in the country as any capitalist could possibly be. A great deal had been written of an alarmist character in regard to the exports and imports of this country, and with much that had been said he did not sympathise. He had great faith in the capabilities of his country and countrymen, and he believed that they would be able to meet the competition of their rivals in the future

just as they had done in the past; but, of course, it could not but be a matter of anxiety when they knew that every European country of any importance for the past few years had been increasing their export trade, some of them to a very large extent indeed, while this country had been going back. It was the only country of any importance that showed a decrease in exports. The reason why our rivals had been so successful had in part been owing to the very great adaptability and energy shown by their manufacturers, combined with the great excellence of their technical and general education. But they must not disguise from themselves that there was another reason, and it was on this reason that he wished to say something to the representatives of trades unions, and that was, the unhappy disputes that had occurred from time to time in this country between capital and labour. He hoped he was not going out of his province, as the head of the great trading department of this country and also the head of the department charged with labour, in expressing his anxiety that some way should be found to end, so far as possible, these disastrous wars between capital and labour which had brought so much profit to their competitors, and so much loss to this country. The result had been that large orders had gone out of the country. Our rapidly increasing population demanded increased employment, which could only be provided by the embarkation of capital. Strikes, however, frightened capital. He wished to impress on all concerned the duty of striving to put an end to these unhappy struggles. Supreme efforts were now being made to get international peace, and he hoped they would do their best to bring about a conference in order to achieve industrial peace. The Conciliation Act, however, had been extremely effective in a large number of cases, but it would never be as operative as they could desire it in large disputes unless both parties were agreed to settle matters under it, and there lay the difficulty. It had been said that it ought to be compulsory, but that was impossible.

#### THE GREAT LACUNA COMPANY.

Brought out with a great flourish four-and-a-half years ago as the redeemer of the late John Thomas North's failing prestige, the Lagunas Nitrate Company bids fair to prove the most monumental of the numerous failures foisted on the British public by that financial buccaneer. Incomplete when transferred for the sum of 850,000*l.*, and saddled with contracts so onerous that the originators were ignominiously ejected from the management, the concern has in its short life passed through many vicissitudes, but instead of recovering lost ground it has steadily gone from bad to worse, until at the present time it threatens to die of inanition. The works have been closed for nearly nine months, during which time every oficina in Chili possessed of decent grounds has been hard at work producing nitrate at a profit, and the Lagunas Company has become a laughing stock to the trade and a delusion to the shareholders. We have come across a good many curiosities in the way of nitrate accounts, but certainly none to approach those to be presented at Cannon-street Hotel on Thursday next, and, although loth to take up our space with matter verging on the absurd, we will go through the more striking items of the balance-sheet for the benefit of proprietors necessarily innocent of Tarapacan accountancy. The first entry on the debit side—share capital, 900,000*l.*—is the measure of the Lagunas Company's weakness. Bills payable 48,485*l.*, are a large order, considering that only 14,000 tons of nitrate were made in the three months January to March (none since), at a cost by no possibility exceeding 30*s.* per ton. It therefore looks as if some kite-flying had taken place between Iquique and London, although the negotiation of bills without "documents attached," would, under present circumstances, appear more difficult than convenient. Sundry creditors for 21,828*l.* may be classed among the philanthropists so frequently met with in nitrate circles. Suspense *re* the Lockett claim "as per contra," 16,437*l.*, happens to be contrary to the opposite entry of 14,672*l.*, neither of these fitting in, moreover, with the foot-note to the effect that no reserve is made in the balance-sheet for amounts payable and receivable under the pending lawsuits. We had almost omitted to express our admiration for those shareholders who, in this time of suspense, have left their dividends unclaimed to the amount of 16*l.* 6*s.* 3*d.* Nothing short of a seat on the board or a trip on commission to Tarapaca should reward such self-abnegation. Passing over the cost of works and properties, including, as a matter of course, matters in dispute with the vendors, we come on the asset side to stores and pulperia, 17,375*l.*—an absolutely preposterous sum for an oficina shut down and in charge of a few caretakers. The directors may thank their luck more than their judgment if the contents of the shop do not disappear by the time work is resumed, assuming that contingency to be on the cards. Without by any means recognising the parent

syndicate's balance-sheet as a model of moderation, we may point out that the stores and pulperia figure therein at 19,894*l.* for one large oficina in full work and a second "shut down" like the Company's! "Nitrate bags in transit, 10,252*l.*," most assuredly "take the cake," setting the seal on the directors' prescience. Making no nitrate, with none to sell, with no intention of immediately resuming manufacture, and in a falling jute market, these amiable gentlemen actually invested 10,000*l.* of the company's superabundant capital in a million bags, which, by this time, are probably eating their heads off in Iquiqui like the mules at Lagunas! The cargo may have been sold, but the transaction is utterly indefensible even if a profit has been made. Valuations of nitrate stocks are cattle too kittle to be handled here, but it seems to us that in the case of nitrate sold the actual net value might be given instead of being merely estimated. The existence of sundry debtors for nitrate sold, 33,438*l.*, is another proof of the company's affluence, and presumably the same may be said of "nitrate sold but not delivered," 19,079*l.* Caliche in stock, 11,769*l.*, comes in handy as a window-dressing asset, although it might just as well have been left in the ground, unless work had to be given to postpone a raid on the pulperia. The stock of iodine, estimated at 7,137*l.*, should yield a profit of 10,000*l.*, spread over the next two or three years, and meantime money can be raised on it—for a consideration. It would have been interesting to see the cost of the commission to Chili stated separately instead of lumped in with the legal expenses, 35,969*l.*, and the chairman may perchance be induced to vouchsafe some information at the meeting. The item last mentioned speaks eloquently for itself, and we have no ambition to analyse spilled milk. As low interest means good security, the deposit of 36,000*l.* is evidently in safe keeping; the directors must for nearly a couple of years have kept the money at call in the hourly expectation of paying that prematurely declared 4 per cent. dividend, which will now find its way to Lincoln's-inn instead of into the shareholders' pockets. Cash, 6,875*l.*, is, or rather was, a comforting feature, with nothing coming forward from Chili except bills for acceptance, and the payment of directors' fees should be safe enough in the current year. We will now rapidly glance through the profit and loss account. The sum of 6,133*l.* having been expended at works during stoppage, the paralytic state commencing on April 1st, it would appear that the company is galloping into debt at the rate of 24,000*l.* a year, exclusive of London expenses, the amount of which latter, 3,004*l.*, is likewise in inverse ratio to work done; directorial mental anguish "in suspense." As the "former board" vacated office in 1896, its "consignments" (loss on?) further debited with 3,139*l.*, must have been carried for a considerable period by the present incumbents, with the inevitable results now perceptible to Mr. Robert Harvey's hindsight. A sense of humour is evidently not a part of the stock-in-trade of this brilliant board, else the contribution to the funds of the Nitrate propaganda, 610*l.*, would have been charged to cost of manufacture as by other companies. Commission to "Colonel" North's executors, 992*l.*, is a gem beyond compare in the Lagunas casket. After all, the deceased officer was a farseeing financier, else he would not have dreamed of securing an annuity on his own promotions. When will the distribution of these surprise packets come to an end? Loss on exchange 2,754*l.* is merely another of the incidents seemingly connected with the shrinkage of business. We commend to Mr. Henry Lowe the disquisition on the subject served to the Lagunas Syndicate meeting by his rival, Mr. Robert Harvey. Recuperation being one of the company's few weak points, there is all the more reason for congratulating it on the "recovery on water charged in excess 3,008*l.*" The East London Company's policy must have travelled to the Far West. It might have been supposed that the Lagunas business was black enough without the help of coal, but the profit on coal consignments, 32*l.*, if small, serves to eke out that on the company's legitimate trade (if any). We should not have credited the existence of a number of investors sufficient to account for 81*l.* in transfer fees, were it not that the entry is there to speak for itself. The state of the company's affairs is "as shown by the books of the company," and *vice versa*. The joint certificate of two eminent firms of accountants is there to prove it.

Fortunately for our readers' patience the report of the directors, as distinguished from the accounts, does not require lengthy comment. It is adorned with the names of Mr. Henry W. Lowe, director of fifteen gold mining and finance companies (not including Lagunas); Mr. R. E. Morris, a member of the legal profession, we believe; M. Porlitz, the representative of "those people," as the French shareholders used to be referred to by the "Colonel"; and last, but not least, Le Baron Benoist Méchin, recently pitchforked into a seat as a further sop to the "bearer share" brigade. M. Quatfaslem, vendor of the Lautaro properties, formerly graced the Lagunas board, but somehow his seat "became vacant," as the report pithily puts it, and has been filled with the aristocratic machine-made god. The

gross trading profit, 34,342*l.*, is the only item of the accounts mentioned in the report, for reasons readable by him who runs through it. "Due attention has always been paid to the maintenance of the company's property in an efficient working condition" (*sic*). As a matter of fact it is not and has not for nine months past been in a working condition. There was nothing to prevent the manufacture of 120,000 quintals per month at a profit of sixpence per quintal before the fall in exchange, and fully 7½*d.* since July. By stopping work the company has deliberately thrown away between 30,000*l.* and 40,000*l.* for the mere sake of avoiding a payment of commissions to Messrs. Lockett, which could not by any possibility exceed 2,500*l.* (1 per cent on the million of quintals sold at 4*s.* 9*d.* f.o.b.) Beyond this point fatuity cannot reach, and it is for the shareholders to say whether the directors shall be allowed *carte blanche* in this game of skittles with their money. With the lawsuits still pending we will not deal beyond stating the lamentable fact that the conduct of same has been on a par with that of the general business of the company. Men capable of sounding the praises of a nitrate combination when themselves voluntarily closing down their oficina are not likely to take advice; yet we recommend them to inwardly digest the bogus valour displayed at the Syndicate meeting in respect of the company's appeals.

Nitrate shareholders are proverbially a patient race, and the exchange of mounts is risky when crossing a stream (not to mention a stagnant malodorous lagoon); but the line must be drawn somewhere, and we had hoped to see next Thursday's meeting signifying its disapproval by refusing to pass the accounts and insisting on an investigation into the mismanagement of the Lagunas Company's affairs. Presumably, however, the time is not considered ripe for this just yet, as the circular which we expected to see issued to the shareholders this week has not made its appearance. For months past we have been trying to find excuses for the flabby and vacillating policy of the board, but with such a report before us as that now under review we begin to feel that in changing the administration a couple of years ago the shareholders jumped from the frying-pan to the fire. Yet another change may, therefore, be necessary, and the first step in this direction will be to open the eyes of the Continental shareholders to the way in which they are being bamboozled. When that is done there will be some chance of putting the management on a satisfactory footing.

#### HANWELL AND UXBRIDGE "LIGHT RAILWAY" SCHEME.

At the Board of Trade, on Wednesday, Sir Courtenay Boyle, Permanent Under-Secretary to the Board of Trade, sat, under the Light Railways Act, to hear the application of the London United Tramway Company to the Board of Trade for sanction to their scheme of proposed light railway extension from Hanwell to Uxbridge.

Mr. POPE, Q.C., on behalf of the Great Western Railway Company, submitted that the Board of Trade should not confirm an order which had been made by the Light Railway Commissioners authorising the construction by the promoters of a light railway between Hanwell and Uxbridge. The object of Parliament when passing the Light Railways Act (which gave the Board of Trade power to confirm such an order without the intervention of Parliament) was not that the machinery should be used to enable the Board of Trade to deal with questions which ought to receive the sanction of Parliament. His point was that the effect upon the railway already existing in the district would be of such magnitude that it ought not to be dealt with except by a committee of Parliament, and, further, that it was not a case in which the powers of the Light Railways Act should be invoked at all—that it was, in point of fact, a tramway extension and nothing more, and that it ought not to be permitted that the powers and protection which were given to the various interests under the Tramways Act should be evaded by proceeding under this particular form of legislation, which was not really applicable to the present scheme. The line, as authorised by the Light Railway Commission, was to pass along the main Oxford-road, and had all the characteristics at all events of the ordinary tramway service, and one would have thought that it was one of those very cases in which the protection of the Tramways Acts to frontagers and others interested should be made available for their protection. The whole question was that the Great Western Railway felt that this proposal was of so much moment to their interests, and having regard to the recent adjustment of railways which had been made for the accommodation of the district by Parliament itself, that it was a case which ought to be judged of by Parliament directly and not by the Board of Trade under the Light Railways Act. Mr. Pope proceeded to detail the railway

schemes which had recently been sanctioned by Parliament for the accommodation of the district, explaining that the Great Western access to Uxbridge would therefore be now two-fold—the ordinary line for West Drayton in connection with their main line, and also the Wycombe line. There was, therefore, a circular system of railway from the Mansion House serving the district—a mode which afforded the greatest possible facility for the development of the locality. Uxbridge was also served now by an authorised line in the hands of the District Company. If this matter were before Parliament, he asked, was it likely that a committee would allow the interposition of a direct line of competition both against the District and the Great Western railways before the satisfactory character of the accommodation which had been provided by recent legislation had been or could be tested, seeing that some of it had been so recently sanctioned that it had not been constructed, though it undoubtedly would be? It would be the strongest possible argument to say that the scheme was premature. This was a case of direct railway competition, because it would divert from authorised and existing railways passenger traffic from Uxbridge to other parts of London, which would otherwise pass over the Great Western Company's line. It seemed to him that this was a most ingenious disturbance of the railway settlement of two years ago. The whole question of the connection of Uxbridge with the metropolis was gone into and settled two years ago, and no one could say that the arrangements then made were inadequate, because they had not yet been tried.

Mr. WILKINSON, general manager of the Great Western Railway Company, said if all the line authorised were constructed (including the piece between Uxbridge and Hanwell, sanctioned by the Light Railway Commissioners) he apprehended very serious competition with the Great Western Railway because the line of tramway would be practically parallel to the railway all the way to London. The Uxbridge and Hanwell piece of itself would abstract traffic that the Great Western carried now. The traffic between Uxbridge, Southall, and Hanwell on the Great Western amounted to 50,000 passengers a year. The expenditure of the Great Western to construct the railway to Uxbridge being undertaken at the express wish of the Uxbridge people would afford sufficient accommodation for the reasonable requirements of the locality. He understood the company proposed to carry passengers at something like  $\frac{1}{4}$ d. a mile.

Can similar fares be adopted by you?

No, because we have had to pay for making our railways—and very expensively too. Then we have as ratepayers to pay for keeping up the roads for the tramway, and thus pay for them to compete against ourselves.

Sir COURTENAY BOYLE—Supposing the Acton and Hanwell scheme were dead, and not likely to be resuscitated, would you then oppose this scheme from Uxbridge to Hanwell alone?—I think we should, because, take it whichever way you will, it is the avowed intention to compete with the Great Western.

In further examination, WITNESS said he understood the promoters proposed to issue workmen's tickets at about  $\frac{1}{4}$ d. a mile, the same as the Great Western Company.

Mr. MOON then addressed the court in opposition to the application on behalf of frontagers on the line of the proposed tramway, practically the whole of whom objected to the scheme. He proceeded to argue first that the Light Railways Act did not include such a scheme as this, and then that if the undertaking was such that the procedure under that Act would apply in this particular case there was no public case for allowing the scheme to proceed.

Mr. BALFOUR BROWNE, Q.C., replying (before further evidence was called) on behalf of the promoters, contended that the evidence had absolutely failed to show there was any such competition as would make the undertaking one which should not be dealt with by the Board of Trade, but one which should go to Parliament. The competition was trivial to a degree, and if such competition as arose in this case was to be a bar to a light railway they would put a stop practically to the Light Railways Act. With regard to Mr. Moon's contention that it was not a light railway, but a tramway, he said if that was right the Board of Trade had been wrong in a great number of cases, and had sanctioned tramways under the name of light railways in every respect similar to this.

Mr. CRIPPS, Q.C., also spoke in defence of the scheme.

The decision on the legal points raised was adjourned.

### RAILWAYS IN CHINA.

The Pekin correspondent of the *Times*, writing on October 31st, says:—"The French are keeping very quiet, and there is distinct evidence here of the widening of the rift between France and Russia. Russia has obtained all that she sought for. She is

firmly consolidating her power in Manchuria. Immense activity is being shown in Port Arthur and Ta-lien-wan. Defences are being put in order with feverish haste. All railway work is advancing rapidly, both from Port Arthur and from Niu-chwang. No less than 140,000 Chinese labourers are said to be employed now while the season is open upon the various sections of the Trans-Manchurian Railway. Russia has her sphere clearly defined and recognised by England in the case of the terms of the Niu-chwang Railway concession as far south as the Great Wall. France has nothing—not even in Fu-chau has she yet made a move. The railway from Pak-hoi to Nanning exists on paper only. Even the preliminary survey has not yet been undertaken. One of the French Fathers is in the hands of the Mantzu rebels in Szuchuan, and is experiencing the same treatment at the hands of these aborigines that in years gone by was the fate of the Monseigneur Fénouil. No reparation has yet been demanded; certainly none has been given. The missionary will be liberated on the payment of a ransom; his life is not considered in danger. Particulars of the disturbance in the French concession at Shameen, Canton, have not yet reached us, but there appears to be a case there which can give France another pretext for exacting from China a railway concession that will never be developed. No progress has yet been made in surveying the railway route from Lao-kai on the Red River to Yun-nan city. Germany has made but little movement lately. Kiao-chau appears so far to be a complete failure. The Governor is resigning his post. As a German officer remarked to me, the Imperial Foreign-office expected him to make bricks without straw. No railway construction has yet been attempted in Shan tung province, nor has any commercial house succeeded in establishing itself at Kiao-chau. There is no trade, no activity, and unless totally different methods of administration are introduced by Germany the colony will be a failure. Germans themselves fight shy of it: they find a better scope for their energies in those fields already opened and developed by Englishmen in the treaty ports. There is, however, on foot again a project to obtain an Anglo-German concession to finance and construct the trunk line from Tien-tsin to Ching-kiang—Germany to build the line from Tien-tsin to the southern border of Shan-tung province and England the remaining portion to the Yang-tze river. One portion at least of one of the great branch lines projected to the Yang-tze would thus be secured by England. Both the two others, the more central and important, she has lost. The northern half of the great central trunk line, from Peking to Han-kau, will be built by the Russian-Belgian-French combination; the southern half, from Han-kau to Canton, has been secured by the American Washburn-Carey syndicate on terms more favourable than any yet granted in the case of any other railway contract in China."

The following communication, dated December 8th, has been received at St. Petersburg from Khabarobka:—"It is reported from Niu-chwang that tranquillity prevails there. Large stores of anthracite coal are being transported thither from Kaiping, Japan. The Russian Government has also sent a large quantity of railway sleepers and rails, as well as great stores of wood for building purposes, and materials of all sorts for railway construction. The first locomotives will arrive shortly, and the railway embankment will soon be partially completed as far as Port Arthur. The railway to Shan Haikwan is making progress. The embankments and cuttings at Niu-chwang have already been begun, and they are completed for 50 miles from Shan Haikwan onwards. The rails are now being laid, and a temporary bridge is being erected. The final bridge will consist of thirty spans of 100ft. each. Thus Niu-chwang will soon be connected with Peking by railway. Along this line are coal mines hitherto untouched."

The French Chamber on Thursday had under consideration the loan of 200,000,000f. for the construction of railways in Indo-China guaranteed by the Government of Indo-China. Urgency was demanded and agreed to for the measure. M. PICHON declared that the Right were opposed to the proposal, because France had no interest in undertaking such works. M. de CASSAGNAC, interrupting, said, "Let us keep our money for casting cannon and building ships." M. DOUMER, Governor of Indo-China, observed that Indo-China did not ask France to make any sacrifice. She applied for 200,000,000f. on her own resources. The situation in Indo-China was good, the Budget showed a surplus, and the guarantee of the loan was certain. In conclusion, M. Doumer declared that the railway was an instrument of development and power, and Indo-China would contribute to the wealth and power of France. (Cheers.) Article I., authorising the loan, was adopted. The Chamber then agreed to Article II., providing for the construction of five lines of railway in Indo-China with the sole guarantee of the Government of the colony, and to Article III., providing for the construction of a line from Laoka to Yunnan Sin, with an annual

State guarantee of 3,000,000*l.* M. M. Doumer and Guillaumet dwelt upon the advantages of this line, which would secure for French trade an important outlet in the Chinese province of Yunnan. The Bill, as a whole, was then adopted almost unanimously.

An edict has been issued by the Chinese Government ratifying the concession of coal mines in the vicinity of the projected Shan Hai-kwan Niu-chwang Railway granted to the Hong Kong and Shanghai Bank. This completes the ratification of the bank's contracts in the north of China.

Speaking at Moulmein, Lower Burma, on the 6th inst., the Earl of Elgin, Viceroy of India, said the project of the railway into Siam had not yet taken shape, and must depend largely on circumstances over which the Government of India had no control, and more particularly on the views of the Siamese Government. The proposed railway communication with Rangoon stood in a different position. Its prospects were favourable. He could give no promise, nor speak to the Burma Railway Company, with whom the initiative lay, but he hoped that matter might be seriously considered at no distant date.

### NEW COMPANIES AND NEW ISSUES.

[Applications for shares in limited liability companies may be withdrawn by letter—or by telegram, if confirmed by letter—provided the notice of withdrawal reaches the secretary before the shares are allotted.]

#### SANTA FÉ AND CORDOVA SOUTHERN EXTENSION RAILWAY, LIMITED.

The Railway Times has not been alone in condemning the issue of so-called debenture stock by this company. The *Investors' Review* says:—"We consider it a very poor investment, and, even at 6 per cent. interest, would have none of it." The *Statist* says:—"So short a section of road in Argentina is but slight security, and investors who may be attracted by 6 per cent. must act with full knowledge of the risk they run;" and adds:—"It is difficult to understand why the Great Southern, with its trunk line of 186 miles, did not add the extension to its own system, instead of there being a sub-company with its own members." The explanation is probably to be found in the desire of directors to grab additional fees from the separate company. The tacking on of 52 miles of wild-cat line to the existing company's system would not have afforded the necessary pretext.

#### VALE OF GLAMORGAN RAILWAY COMPANY.

The directors of the Vale of Glamorgan Railway Company have resolved:—(1) That the 45,000*l.* of new ordinary stock created on February 4th, 1898, under the company's Act of 1895, be allotted and offered at the price of 115*l.* for every 100*l.* of the said stock to the proprietors registered as holders of the company's existing ordinary stock on November 25th, 1898, the allotments to be made to such proprietors as near as may be at the rate of 12*l.* 10*s.* in respect of every 100*l.* of the said existing ordinary stock standing registered in their names at that date, and so in like proportion, but that no fraction of 1*l.* of stock be allotted or be transferable. (2) That the par value of the new stock to be allotted and the premium thereon be payable on January 10th, 1899. (3) That any sum in arrear shall be subject to interest at the rate of 5 per cent. per annum from January 10th, 1899, until payment. (4) That the amount paid up in respect of such new stock to be allotted, exclusive of premium, be entitled as from January 1st, 1899, to dividend at the same rate and payable at the same time and for the same periods as the dividends on the existing ordinary stock of the company.

### THE SOUTH EASTERN—CHATHAM WORKING UNION.

It is announced that on and from January 1st next the South Eastern and Chatham and Dover companies have arranged for all tickets, ordinary and season, to be available, without extra charge, by all trains of both companies between all competing points on the two systems, such as Dover, Deal, Ramsgate, Margate, Canterbury, Ashford, Maidstone, Chatham, Gravesend, St. Mary Cray, Orpington, Bickley, Bromley, Beckenham, and the six London termini of the two companies—viz., Charing-cross, Victoria, Cannon-street, Holborn-viaduct, London-bridge, and St. Paul's. The holders of traders' season-tickets on either company's system will also enjoy the privilege of being able to travel between the above points without extra payment. From January 1st and on every day (Sundays included) an express train will leave Victoria (London Chatham and Dover Railway) at 10.30 a.m., running *via* Swanley and Sevenoaks on to the South Eastern system, arriving at Tunbridge Wells at 11.30 a.m., St. Leonards at 12.10 a.m., and Hastings at 12.13 p.m.. There will be a return train by the same route, leaving Hastings at 4.55 p.m., St. Leonards at 4.58 p.m., and Tunbridge Wells at 5.41 p.m., arriving at Victoria at 6.45 p.m. New Brompton, the rising suburb of Chatham, is also to derive benefit from the new arrangement between the companies, as three or four of the more important trains will run from Charing-cross and Cannon-street to New Brompton (London Chatham and Dover station) and *vice versa*. A new service has also been arranged by which

passengers can be booked to the Continent *via* Flushing and Queenborough, leaving Charing-cross at 8.22 p.m., and London-bridge at 8.28 p.m., joining the Chatham and Dover mail train at Chatham. The train service between Maidstone and London will also be greatly improved, and a new loop line will be opened at Otford, near Sevenoaks, thereby accelerating the service between London and Maidstone by the Chatham and Dover system by as much as fifteen minutes in the case of certain trains. These improvements will also apply to all stations below Maidstone, as it has been arranged for the trains of the Chatham and Dover Company to run from Maidstone, *via* Ashford (South Eastern Railway), to Appledore and Hastings. Chatham and Dover trains will no longer terminate at the Bat and Ball Station, Sevenoaks, but will run through to the much more convenient station of Tub's-hill, Sevenoaks. These are some of the alterations which are notified as taking effect from January 1st, and it will thus be seen that the arrangement between the companies for the working of the joint traffic is now taking definite shape, and will certainly be to the advantage of the public using these two railways.

### THE NORTH WESTERN NOT UP TO DATE.

Lieutenant-Colonel G. W. Addison, R.E., has presented to the Board of Trade his report on an accident which occurred on September 13th at the North Junction, Crewe, on the London and North Western Railway. In this case, immediately after the 7.23 p.m. passenger train from Crewe to Liverpool had left the down platform at the former station, the signalman put the starting signal back to danger, and reversed the facing points at the North Junction, over which the train was about to pass; quickly discovering the mistake, one of the men endeavoured to make the proper road again, but in doing so he "split" the train. Only two passengers are reported to have complained of any injuries. Lieutenant-Colonel Addison finds that the responsibility for the mishap must be shared by two signalmen, Farmer and Broome, and he adds:—"The signalling arrangements are not up to date, but this will, I understand, shortly be remedied, a complete rearrangement of the lines, &c., at the north end of Crewe station being now in progress. In the meantime, steps should be taken to see that the signalmen do not, as in this instance, disregard the extra appliances at their disposal for maintaining the locking after a starting signal has been placed at danger in rear of a train. The system which appears to be permitted of light engines following trains out of the station towards the North Junction, without receiving any signal—semaphore, disc, or hand—also seems to me to call for some alteration. I am not surprised to find that several witnesses bear testimony to mistakes having been made under these conditions."

### ARGENTINE RAILWAY ITEMS.

The Argentine National Railway Board having ceased to exist, the railways are now under the jurisdiction of the Minister of Public Works, the section being in charge of Engineer Demetrio Sagastume. Engineer A. Schneidewind remains as Inspector-General of Railways, and Engineer Eduardo Schlatter as chief of the Mechanical and Statistical Department.

Sr. Augusto Brondeur, in representation of a French syndicate, has made a proposal to the Provincial Government of Corrientes for the construction of a network of light railways, 75 centimetre gauge, the lines to be as follows:—(1) Bella Vista to Saladas, Niburucuyá and Cúa Cúa; (2) Goya to Santa Lucía, Nueve de Julio, and Veron de Astrada. All fiscal lands to be given free. Private lands to be expropriated. Exoneration from all taxes. Tariffs to be fixed by the Government when the receipts reach 10 per cent. After ninety years' working, all the lines, rolling stock, &c., to be handed over free of charge to the province.

Concessions for light railways in the province of Buenos Ayres continue to be granted broadcast, the latest recipients being Messrs. Pareja, Millat, and Co., for a line from Mar del Plata to Balcarce. Sr. Juan D. Cilley has also become a concessionaire for the following lines: *Barracas al Sud* to 9 de Julio, passing through Merlo and Chivilcoy; 9 de Julio to Villegas, passing by Trenque-Lauquen; Chivilcoy to Arenales Norte, passing by Chacabuco; 9 de Julio to Adolfo Alsina, passing through Pehuajó and Guaminí. The length of these lines is 950 kilometres.—*River Plate Review*.

### HALIFAX AND THE GREAT NORTHERN RAILWAY.

A deputation from the Halifax Chamber of Commerce last week waited upon the general manager of the Great Northern Railway (Mr. C. Steel) at Leeds. There were also present Mr. Alexander, chief traffic manager, and other officials of the Great Northern Railway Company. Mr. T. SUTCLIFFE (President of the

Chamber) pointed out that great inconvenience was experienced by business people in Halifax by reason of their not being able to get into London before 11.45 a.m.—Mr. CLARK, in supporting this, urged that a train should be run from Halifax due in London not later than 11 a.m., which would give traders an opportunity of transacting their business, and returning the same day. He also urged that a breakfast-car should be attached to this train.—Mr. FIRTH asked that Halifax should be made a centre for this district for the making-up of express trains to London, in order to obviate stopping at all the small stations.—It was also urged that through carriages should be attached to the 12.37 p.m. train from Halifax to London and the 1.30 p.m. from London to Halifax. The deputation asked for a third-class dining-car on the 5.30 p.m. train from London to Halifax, and that the 5.45 p.m. train from London should be run half an-hour later, with a through connection to Halifax. Attention was also called to the through carriages between London and Halifax being used for passengers to intermediate stations.—Mr. BOOTH warmly supported the views of the deputation. Improvements were suggested in the Sunday service. The attention of the general manager was also called to the delays to traffic between Hebden-bridge and Calder Valley stations to London, and it was stated that steps had already been taken which would prevent any complaints in the future. The interview lasted over an hour, and Mr. STEEL stated that one or two of the most important points had already been under the consideration of the directors since the communication was received from the Halifax Chamber, and he would endeavour to meet the wishes of the deputation as far as possible.

### NITRATE NOTES.

As a great deal is just now heard about the question whether the Nitrate Railways Company is going to adjust its capital and revenue accounts, and distribute the large balance of undivided profits carried forward at the end of 1898, it may not be amiss to reproduce the remarks of Mr. Robert Harvey, the chairman, at the general meeting on May 28th last:—"On our last year's balance-sheet we said that the raising of capital in order to cancel the amount paid from revenue for capital account should have the immediate attention of the directors, but in view of the present quotation of our bonds we think it would be impossible at the present time to secure money from the public on a second bond, and we have, therefore, decided to allow matters to remain as they are for the present, and we hope by careful administration of your interests, and by limiting the dividend to a small amount, that the price of our bonds will again rise to par. Should that happen we shall have no difficulty in raising the amount which has been expended out of revenue on capital account." It will be interesting to watch and see whether the shareholders come by their due, or whether we shall once more witness the familiar spectacle of Mr. Harvey swallowing his own words.

It is refreshing to find shareholders in a nitrate company for once in a way displaying a little common sense. Those of the Paccha and Jazpampa Company have wisely refrained from throwing good money after bad, judging from a circular just issued by the liquidator, who states that holders of only 34,000 shares have come into the reconstruction scheme, whilst his "endeavours to dispose of the unapplied-for shares have not met with success."

The following extract from Mr. Harvey's speech at the Lagunas Syndicate meeting on Tuesday should possess some interest for shareholders in the Nitrate Bank (alias the Bank of Tarapaca and London), the assets of which, according to the last balance-sheet, were still valued at 19½d. per dollar, although the current rate of exchange was only 13d.:—"It is the system of the auditors here—they have always insisted upon it; I do not condemn the system at all, and I think it is quite a safe one—to write down the whole of the stocks, as well as the cash, to the figure of the exchange which is ruling at the time the accounts are made up."

### MASHONALAND RAILWAY.

The report of the resident engineer of the Mashonaland Railway Company, showing the progress up to October 24th, states that 132 miles of earthworks are finished; platelaying, 64 miles finished; at the Odsi bridge, three spans of 100ft. are completed, and as regards masonry two girders are in position; the Tsungwesi and Imjasura bridges are each of 100ft. and the masonry is finished and ready for the girders; the Myamapambesi bridge of 100ft., and the Rusapi bridge, three spans of 60ft., are about half finished; the wooden bridges between Umtali and the Rusapi river are in hand. Six engines and sixty trucks are running. The telegraph is being rapidly pushed forward, 28 miles being finished and a further 12 miles are ready for

erection. Three hundred and twenty whites and 4,300 natives are at work on the extension. Workshops and running sheds are nearly completed, machinery being erected. Rusapi Station and telegraph office will be commenced immediately. Siding already in. 15½ miles of rails and 30 miles of sleepers are ready to go forward from Umtali. In contradicting a rumour originated in Salisbury that the Salisbury extension was suspended and would probably stop for a year, Mr. George Pauling, the contractor, writes:—"Every effort is being made to push on the railway work, and so far from stopping we expect to reach Salisbury and convey goods there by the end of March next."

### THE STOCK EXCHANGE SETTLEMENT.

The making-up prices for the principal railway stocks, and the extreme rates of continuation current at the Stock Exchange settlement on Tuesday, are shown hereunder:—

Making-up Price.			Stock.	Continuation rate.

### FOREIGN AND COLONIAL ITEMS.

The Lower House of the Austrian Reichsrath on Wednesday adopted the Local Railways Bill without amendment.

The half-yearly drawing of bonds of the Royal Trans-African Railway will take place at the company's principal office in Oporto, Portugal, on the 21st inst.

The French Government, in deference to the Budget Committee, has waived the proposed French guarantee of any part of the Tongking railway loan of 200,000,000f.

The interest on the 3½ per cent. debentures of the South Western of Venezuela (Barquisimeto) Railway Company, falling due 1st prox., will be paid at the company's offices on that date.

In the Cape House of Assembly on Monday, Sir J. Sivewright gave notice of motion "that this House is of opinion that the material for the railway to Lake Tanganyika should be carried free over the Cape railways."

A Dalziel telegram, dated Perth, Western Australia, December 15th, says:—"Great activity prevails in the timber trade, and ten vessels are now loading with Jarrah. The local timber companies assert they cannot overtake the foreign demands for the wood, and a substantial increase in the price is likely to follow."

A meeting of the holders of debentures of the Puerto Cabello and Valencia Railway Company, Limited, will be held on the 21st inst., for the purpose of receiving and considering a report by the trustees in regard to the position of the company and of considering a proposal to give time for the payment of interest due and to accrue due upon the debentures.

The Leopoldina Railway Company, Limited, have been officially recognised by the Government of the State of Rio de Janeiro as the legal successors of the former company, and obtained permission to build branch lines from Areal to Entre Rios, and from Porto das Caixas to the junction of the Norte and Grao-Pará lines. The Areal line, it is stated, will be completed within eighteen months, and the Porto das Caixas line within thirty-six months.

According to the *Jornal do Brasil*, the raising of the rates of the Central Railway has been attended with most unsatisfactory results, a good deal of traffic having been lost in consequence of this retrograde step. On November 11th the Legislature of the State of Rio de Janeiro resolved to ask for a reduction in the freight rates on coffee on the Central Railway, in view of the present low prices rendering unremunerative the capital invested in coffee plantations.

The La Guaira and Caracas Railway Company, Limited, announces an interim dividend of 5s. per share, being at the rate of 5 per cent. per annum, payable on 21st inst. Holders of share warrants must deposit coupon No. 24 at the company's office three clear days for examination. The coupons on the share warrants to bearer being exhausted after the payment of this dividend, the warrants themselves must be lodged at the company's offices seven clear days for examination and issue of twenty-four new coupons, numbered 25 to 48.

#### RAILWAY PATENTS.

[This list is specially compiled for THE RAILWAY TIMES by Messrs. Rayner and Co., registered patent agents, 37, Chancery-lane, London, W.C., from whom all information relating to patents, designs, trade marks, copyrights, &c., may be obtained.]

24,527. Walter Griffiths—Improvements in railway luggage trollies and the like.

24,700. William Edward Langdon, Electrical Department, Midland Railway, Derby—Intercommunication in railway trains.

24,708. David Smith Burns—A new or improved instrument for interlocking railway points and signal levers with electric block or train signalling switch on double lines of railway.

24,710. Daniel Jones, 6, Finkle-street, Stockton-on-Tees—

Improvements in railway trucks in respect of their loading capacity for certain purposes.

24,721. George Featherstone Shinmin, 26, Ellinborough-place, Maryport, Cumberland—Automatic lock for preventing railway platform bogies and other similar vehicles from moving when left alone.

24,746. Albert Edward Jones and Thomas Henry Cadreman—A new or improved automatic lock for railway carriages and other doors.

24,787. Jaen Beto—An improved detonating signal for use on railways.

#### METROPOLITAN RAILWAY CARRIAGE AND WAGON COMPANY, Limited.

SALTLEY WORKS, BIRMINGHAM.

Successors to Messrs. Joseph Wright and Sons.

MANUFACTURERS of RAILWAY CARRIAGES, TRAMWAY CARS, WAGONS, and RAILWAY IRONWORK of every description. Railway Carriages and Wagons built for cash, or upon deferred payments extending over a period of from three to ten years. A large number of Coal, Ironstone, Ballast, and other wagons to be let on hire.

Manufactory and Chief Offices—Saltley Works, Birmingham.

#### WEST AUSTRALIAN HARDWOODS.

## THE GREAT INDIAN PENINSULA RAILWAY COMPANY.

At the NINETY-EIGHTH HALF-YEARLY GENERAL MEETING of the Proprietors, held at Winchester-house, Old Broad-street, London, E.C., on Friday, the 16th December, 1898,  
 Sir **ANDREW R. SCOBLE, K.C.S.I., M.P.**, Chairman of the Company, in the Chair.

The Advertisement convening the Meeting was read. The Company's Seal was affixed to the Register of Proprietors.

The Directors' Report having been taken as read, It was moved by the Chairman, seconded by H. Wollaston Blake, Esq., and resolved—  
 That the Report of the Directors, together with the accounts now submitted, be received and adopted.

It was moved by the Chairman, seconded by Alexander H. Campbell, Esq., and resolved—  
 That a Dividend of 8s. 9d. per Cent. upon the Capital Stock of the Company be and is hereby declared out of surplus profit, to be paid to the holders of Capital Stock now registered in the books of the Company, in addition to the guaranteed Interest of £2 10s. per Cent. for the current half-year.

It was moved by the Chairman, seconded by Lionel R. Ashburner, Esq., C.S.I., and resolved—  
 That the Directors be, and are hereby, authorised to adopt for this Company's Provident Fund the revised rules and regulations in force on State Railways in India, so far as they may be applicable, and, with the consent of Government, to contribute to the Fund from the revenue of each half-year with effect from 1st January, 1898, such amount as may be necessary under the rules for the time being in force.

It was moved by James Moodie Kerr, Esq., seconded by Robert Charles Kerr, Esq., and resolved—  
 That Samuel Lovelock, Esq., F.C.A., be, and is hereby, elected an Auditor of this Company.

It was moved by the Chairman, seconded by Charles Peile, Esq., and resolved—  
 That the best thanks of the Meeting are due, and are hereby given, to G. A. Barnett, Esq., C.I.E., the Agent, and to the Heads of Departments and Members of the Staff in India generally, and also to the Home Staff for their valuable services during the past Half-year.

**ANDREW R. SCOBLE, Chairman.**  
 It was moved by Surgeon-General A. C. Castriot de Kersy, C.B., seconded by Marcus N. Adler, Esq., and resolved—

That the best thanks of the Meeting are due, and are hereby given, to the Chairman and Directors for their attention to the interests of the Company.

# BLAENAVON COLD BLAST PIG IRON

(MADE WITH THE CELEBRATED BLAENAVON CHARCOAL COAL).

- No. 1 Foundry.**—A Dark, Grey, Soft Iron, used for Castings, where toughness and strength are required, such as Toothed Wheels for Agricultural, Cotton and other Machinery; also by various Governments, for Guns and other superior work.
- No. 2 Foundry.**—A more Open Quality, used for similar purposes, and largely by nail makers.
- No. 3 Foundry.**—An Open Grain, Harder Iron; used for both Foundry and Forge; it has a high transverse strength in Castings, but not so tough as the No. 1 and No. 2; gives a strong fibre in wrought iron.
- No. 4 Grey Forge.**—An Open, Soft Iron; possesses great strength; suitable for toughening and tempering harder qualities; it is a very superior Forge Iron.
- No. 5 Common Forge.**—A Harder, Finer Grain, very Strong Iron; suitable for Heavy Machinery, such as Shafts, Large Wheels, and also for Steam and Blowing Cylinders, Guides, Slides, &c., as well as for Forge purposes in Cable Bolts, Boiler Plate, and B.B. Merchant Bars.
- No. 6 Strong Forge.**—A still harder and Closer quality used for Mill Rolls and for bringing up the strength of weaker Forge Irons.

**MOTTLED.**—Used for Chilled Rolls in tempering; and for other similar purpose

\* These qualities have a high tensile strength in wrought iron, and are used for bringing up weaker iron to stand the Government tests.

Extract from Report made by the Officers of H.M. Government to the Royal Arsenal on the strength of various descriptions of Iron, showing the general average of a number of Specimens prepared and tested from fifty-seven samples and also from five samples of Blaenavon Iron.—Parliamentary Paper No. 4871, Session 1888.

	Specific Gravity.	Tensile Strength.	Transverse Strength.	Crushing.

In all £2,100 Sterling.

Holders of these Bonds will take notice that the  
Interest will cease after 1st January next.

WALTER LINDLEY, Secretary.

London, 12th December, 1898.

## GRAND TRUNK RAILWAY COMPANY OF CANADA.

NOTICE is hereby given, that the estimated earnings  
of the WELLINGTON, GREY, and BRUCE RAIL-  
WAY for the Half-year ending 31st December, 1898,  
applicable to meet interest on the Bonds, will admit  
of the payment of £2 4s. 1d. per £100 Bond, and that  
this payment will be applied in respect of Coupon  
No. 37, due 1st January, 1899, and will be made on  
and after the 1st January next, at the Offices of the  
Grand Trunk Company, 203, Dashwood-house, New  
Broad-street, London, England.

The Coupons must be left three clear days for exami-  
nation.

WALTER LINDLEY, Secretary.

London, 12th December, 1898.

WANTED, a thoroughly qualified  
Civil and Mechanical Engineer, as WORKS  
MANAGER, by Jan. 1, 1899. Gentlemen only pre-  
ferred to apply who are yet, or may have been till  
recently, in active employment, and who may be  
desirous of improving their position, provided they  
have had some years of successful activity in the  
management of a steel, or (if welded or welded)  
steel tube works, in this country, to refer to, and are  
accustomed to handle upwards of 800 men. Very  
liberal terms given to a competent man of this descrip-  
tion.

Address, stating full particulars as to age, whether  
married or not, past or present employment, to A. S. A.  
c/o Messrs. Street and Co., 30, Cornhill, London. (All  
communications will be treated in strictest confidence.)

## TAFE VALE RAILWAY COMPANY.

Return Tickets, valid 14 days, issued by 9.5 p.m. Ser-  
vice from Victoria and Holborn, Dec. 22 to 25 (incl.),  
and 1 and 2 cl. by 9.0 a.m. Service, Dec. 24 only. Return  
Fares, First-cl., 58s. 4d.; Second-cl., 37s. 6d.; Third-cl.,  
30s.

SATURDAY, Dec. 24th, and MONDAY, Dec. 26th.  
—SPECIAL MIDNIGHT TRAIN, 1, 2, 3 cl., from  
HOLBORN and ST. PAUL'S 11.55 p.m., VICTORIA  
12.0 midnight, to MARGATE, RAMSGATE, CANTER-  
BURY, DEAL, DOVER, and principal Main Line Sta-  
tions. Cheap Return Tickets by this Train, and also  
by other Trains during the day, on Saturday, avail-  
able till following Tuesday.

CHRISTMAS DAY.—The 8.30, 9.0, 10.0, and 11.0 a.m.  
and 8.50 and 9.5 p.m. Continental Express Trains, and  
the 10.0 and 11.0 a.m. Express Trains to the Kent Coast  
Branch will run. Special early Train, Ramsgate to  
London, at 3.20 a.m., calling at principal Stations. All  
other Trains as on Sundays.

BOXING DAY.—CRYSTAL PALACE, High Level  
Station. Frequent Special and Ordinary Trains will run  
to and from Holborn, Victoria, Ludgate, St. Paul's, and  
intermediate Stations. Certain Main Line (including  
the Up and Down Granville Express) and Local Trains  
will not run, but all Continental Services as usual.

For full information see Handbills, to be obtained  
at the Company's Stations, or, post-free, from the  
Traffic Manager's Office, Victoria Station, S.W.

### AMERICAN RAILWAY SHARES AND BONDS.

THE ENGLISH ASSOCIATION of  
AMERICAN BOND and SHARE HOLDERS,  
Limited, Register Shares, Collect Dividends, and  
Cash Coupons. Shares may be registered either in  
owners' names or in that of the Association. In the  
former case dividends are collected by Powers of  
Attorney (forms supplied at the office), and on shares  
in Association's name on presentation of the shares  
certificates. The Association also issues its own certi-  
ficates good to bearer or registrable, countersigned by  
the London and Westminster Bank against the deposit  
of the original shares. These certificates save great  
trouble to Executors as they can be distributed, avoid-  
ing the expense of sending the original shares and  
certified copies of Wills to America.

Particulars and Forms may be obtained at the Associa-  
tion's Offices, 51, Great Winchester-street, London, E.C.

## THE INDIAN MIDLAND RAILWAY COMPANY, Limited.

At the TWENTY-SIXTH ORDINARY HALF-  
YEARLY GENERAL MEETING of the Proprietors,  
held at Winchester-house, 50, Old Broad-street, Lon-  
don, on Friday, the 16th December, 1898.

Sir ANDREW R. SCOBLE, K.C.S.I., M.P. (Chairman  
of the Company), in the Chair,

The Advertisement convening the Meeting was read.  
The Directors' Report having been taken as read,

It was moved by the Chairman, seconded by H. W.  
Blake, Esq., and resolved—

That the Report of the Directors, together with  
the Accounts now submitted, be received and  
adopted.

It was moved by the Chairman, seconded by A. H.  
Campbell, Esq., and resolved—

That the best thanks of the Meeting are due  
and are hereby given to F. T. Rickards, Esq.,  
the Agent of the Company in India, to the Heads  
of Departments, and to the Members of the Staff  
generally, for their services during the past Half-  
year.

ANDREW R. SCOBLE, Chairman.

It was moved by J. F. Quick, Esq., seconded by J.  
Bentley, Esq., and resolved—

That the best thanks of the Meeting are due  
and are hereby given to the Chairman and  
Directors for their attention to the interests of  
the Company.

R. A. FAYREER, Secretary.

## PORTUGUESE GOVERNMENT GUARANTEED RAILWAY BONDS. ISSUE BY THE ROYAL TRANS-AFRICAN RAILWAY COMPANY OF £1,500,000 FIVE PER CENT. FIRST MORTGAGE DEBENTURES.

NOTICE is hereby given, that the usual Half-yearly  
DRAWING of BONDS of the Royal Trans-African  
Railway Company, according to the amortization  
table endorsed thereon, will take place at the Com-  
pany's principal Office in Oporto, Portugal, on  
WEDNESDAY, the 21st day of December, at 12  
o'clock Noon, in the presence of Ewá-do Arthur  
Maia Mendes, Notary Public.

By order,

THOMAS CASTELLI, Secretary and Agent  
of the Company in England.

Dated this 14th day of December, 1898.  
5, Throgmorton-avenue, London, E.C.

The annual general meeting was held on Monday, at Winchester-house, Old Broad-street, E.C.; Mr. WALTER J. STRIDE presiding.

The SECRETARY (Mr. F. O. Smithers) read the notice convening the meeting. The report and accounts (an analysis of which has already appeared in THE RAILWAY TIMES) were taken as read.

The CHAIRMAN—Gentlemen, I feel that in presenting the accounts for the year ending June 30th last, some apology is due to the shareholders for the delay which has occurred. The reason of that has been that the health of our worthy manager, Mr. Harding Green, broke down just at a critical time, and he had to return to Europe, and there was a necessary consequent delay. I am glad to say he is now restored, and I hope he will soon be able to go back to Bahia Blanca. I have also to say that, to the regret of the board, our old friend, Sir Gabriel Goldney, has found it necessary to retire from the chairmanship of the company. I am glad to be able to add to that that he has consented to remain on the board, and give us the benefit of his mature judgment. Turning more particularly to the report itself, it is not what we should like to have been in a position to put before you, but it certainly is a record, if you look at it, of improvement, and the real position of the company is better than it appears. Taking first the gross receipts, the figures as they are stated, you will see, show that there were 38,517*l.* earned on 180 miles in the year 1896-7, and 39,873*l.* on 234 miles of line in the year 1897-8. Now, on the face of it, that is not so favourable, but if you look at the note a little lower down, you will see that really the 1896-7 receipts included no less than 8,612*l.* for construction traffic, while those for 1897-8 include only 1,891*l.* from that source. The result therefore is, as you will see on page 3, the real public traffic—the public paying traffic—for 1897-8 is 6,618*l.* better, or 22 per cent. That, I think, is satisfactory so far as it goes, but it does not go so far as we hoped it might go, but still it is a record, and we have had now every year a record of increasing public traffic. The statement which is published, as usual, on page 2, shows you that the increase is pretty well spread over everything. The report of Mr. Harding Green goes very fully into details, and you will see that the result of the building of the produce market has brought a considerable amount of wool over the line, and into Bahia Blanca. That has not been as much as we could have hoped, because there is, of course, competition, and the market in Bahia Blanca was not as well known as the market of Buenos Ayres, but Mr. Harding Green is very certain, and I think he is justified in his opinion, that that will improve as time goes on. Now, with regard to the working expenses, you will see that we have been, from various causes, unable to give you the comparative statements in detail of the working expenses as we have been in the habit of doing. This is mainly on account of the entire alteration of the form in which the accounts are kept, which has been decided for us—and against our will, I may say—by the National Board of Railway Engineers, who have had the control of the companies on the other side in a great measure, and partly from the fact that we, as you know, changed the date of our financial year from December 31st to June 30th, and therefore we have no complete year with which we could compare. That is only as regards details. Comparing the totals of working expenses—35,662*l.* 19*s.* 9*d.* in 1897-8, against 29,676*l.* in 1896-7—you will see that that is really an increase of 12·40 per cent. of the receipts, but that, owing to the increased train miles run—at least, the increased train miles open—the cost per mile has been reduced no less than 15*l.* per mile. That on a new line, which, of course, requires a very considerable amount of expensive maintenance, and until the traffic can be thoroughly developed, can but be a feeder to the old line, I think, reflects very considerable credit on our manager, Mr. Harding Green. ("Hear, hear.") The effect of the produce market is shown mainly on pages 8 and 9 of the report, and if you will return to that you will see that the increase of wool that came down here in 1896-7 was so great that we very soon found that we had to build the other half of the market. We have now, therefore, two large warehouses, 820ft. by 66ft. each, and the statement on page 9 shows that from June 30th, 1891, to June 30th, 1898, the tonnes carried increased from 683 tonnes in 1891 to no less than 6,368 tonnes in 1898, that last producing for the company a revenue of 12,480*l.* of freight. Now, as showing the policy of this produce market, I may say that not only does it enable us to give facilities to attract traffic over our own line, but it also, by the arrangements which were made at the time with the municipality, enabled the municipal offices, also built on the former Plaza de Frutos—as it is called there, which was a very poor place—to be transferred to our market, and it brings into our warehouses, or rather it brought in, the following figures:—In September and October, 1897, when we started, there was brought by carts 1,413 tonnes, by our railway 517 tonnes, by the Southern 294 tonnes, and by the Rio Negro Extension 50 tonnes, making a total of 2,275 tonnes. In 1898 that brought by carts, showing the effect to the railway, was 1,204 tonnes, as against 1,400 tonnes; by our railway 713 tonnes, instead of 517 tonnes; by the Southern 411 tonnes, against 294 tonnes; and by the Rio Negro Extension 253 tonnes, against 50; or a total of 2,581 tonnes, as against 2,275; therefore, you see, besides bringing ourselves good traffic, it is already becoming a paying concern. The freight we get per tonne is just under 2*l.* Now that, I think, brings me to the question of net revenue. The net revenue is 7,691*l.* 16*s.* 4*d.* You will remember that the rescission bonds which were given as compensation for the guarantee which was overdue, were set aside, amongst other purposes, for the purposes of the company and for equalising dividends, and we have thought that we were justified in taking from that fund a certain amount of bonds which would enable us to pay 1*l.* 10*s.* in

cash, free of income-tax, on the preferred shares. Our average hitherto has been about 24s., so that this is a little better. We hope that the receipts in future will show such an increase that this amount may be also increased, but we feel satisfied that it is better for the stock and better for you that a small regular dividend should be worked for rather than that we should pay irregular dividends of a larger amount this year, and then fall short in the following year. A resolution to that effect will be proposed presently. Now, with regard to the accounts, I do not think there is very much that I need say about those—I have dealt already with the traffic account—with the exception of the capital account, and I think that is a point that I ought to, at any rate, remind you of. We have already, if you will look at page 13, several times in past years alluded to the capital account, but shareholders change and probably many others forget. You will see that our 4 per cent. debenture stock is 300,000*l.*, and the preferred shares are 1,350,000*l.* Now, that is only 800*l.* prior charge per kilometre of line—300,000*l.* on 374 kilometres. We have only a first charge of 800*l.* per kilometre and the preferred shares make 610*l.*, and the two together 1,410*l.* per kilometre, or 7,000*l.* per mile. That is, taking the preferred shares at par, the cost of the line as it stands to-day, including the market and ample lands, which are every day becoming more valuable in Bahia Blanca, really only comes out at 7,000*l.* per mile of rail. Now, that compares most favourably with every other line in the Argentine. I believe there is but one line, which has not the prospects which this line has; there is but one line which has a lower cost. In five-and-a-half years the line has been practically doubled in length and the market built for an increase in capital of only 135,000*l.* That has been done, as we have often explained before, by the utilising of the assets which have been taken over by the contractor, and by the favourable arrangements which have been made for the construction of these additional lines. The consequence is, as I say, at the par value of your shares your line only costs you 7,000*l.* a mile—a most favourable position to be in as regards capital value. Of course, if you look at the market price of only 50*l.* it stands at something like 4,000*l.* a mile, so that all we want to make this line an exceedingly valuable one is an increase in traffic, which we see, although slowly, is coming every year. As to the prospects for the future, Mr. Harding Green is the prophet. I cannot prophesy, but you see what he says in his report. He says:—"I have every confidence in the future prospects, as I now see colonisation and ploughing up of lands in the vicinity of our line, and it must be remembered that this means not only grain to carry but a certain increase in the number of passengers and in the tonnage of all general goods." Well, gentlemen, I do not think we have really any reason to despair of the future. Mr. Harding Green in his report makes a very proper and a very right record of the value of the energies of our staff on the other side, which, certainly, I should be delighted to corroborate. Mr. Green himself is here to-day, and will be very pleased to answer any questions or to make any remarks if the proprietors wish him to do so. I will, therefore, now only conclude by moving:—

"That the report of the directors and the statement of accounts presented, be and they are hereby received and adopted."

Mr. ROBERT RYRIE seconded the resolution, which was carried unanimously without discussion.

On the motion of the CHAIRMAN, seconded by Colonel MOSLEY, the retiring directors, Mr. Edward Norman and Mr. Robert Ryrie, were unanimously re-elected.

Mr. LAWTON moved the reappointment of the auditors, Messrs. Turquand, Youngs, and Co., for the current year at a fee of 50 guineas.

Mr. VAN RAALTE seconded the proposition, which was agreed to.

On the motion of Mr. VAN RAALTE, seconded by Mr. LAWTON, a hearty vote of thanks was accorded to the chairman for presiding and to the directors generally for their attention to the business of the company.

The proceedings then terminated.

#### NILGIRI RAILWAY.

The half-yearly general meeting was held on Tuesday at the office, 50, Threadneedle-street, E.C.; Mr. ROBERT MILLER presiding.

The CHAIRMAN, in moving the adoption of the report and accounts, said it had been very disappointing to the directors to be obliged to ask the trustees to call the debenture-stockholders together to obtain the latter's assistance, but they had had no alternative. The railway as originally planned was opened for goods traffic on October 1st, and the directors had been in daily expectation of hearing that it would be opened for passenger traffic, but on the 14th of the same month a landslip occurred which dashed their hopes, and compelled them to ask their debenture-holders to consent to an alteration in the trust-deed under which the board should have power to raise more money to effect the necessary repairs. Their disappointment was all the keener because when they received news of the disaster they also had in their possession a letter from the official engineer who was deputed to take over their railway, and who wrote stating that he had never in all his eighteen years' experience in India and South Africa seen a line in so splendid a condition as theirs was when it was handed over. The duty of the directors had been to ascertain at once whether the debenture-stockholders would permit an alteration in the trust deed to enable more money to be found. A meeting was accordingly held a few days ago, and the debenture-stockholders had agreed to a certain arrangement. When the board found that the original estimates would be exceeded they were obliged to issue the remaining 10,000*l.* of debenture stock, making up the 160,000*l.* they had the power to issue, but this was not enough to meet the extraordinary charges thrown on them by the landslip. In these circumstances it was proposed to the debenture stockholders—and they had agreed to it—to allow the directors to create a prior charge to an amount not exceeding

30,000*l.*, and also to issue 240,000*l.* more of debenture stock, altering the nature of the charge securing the present debenture stock in the following way:—The present debenture stock was secured upon the existing line from Metapolliam to Coonoor and upon the rolling stock connected therewith, but it was expressly provided in the deed that any extension should not be included in the charge, it having been intended originally to issue separate debenture stock charged upon the extension. It was now felt by the board and their financial advisers that it would be much more satisfactory to all concerned if the debenture stock raised for the extension should rank *pari passu* with the present debenture stock and the present debenture stock *pari passu* with that raised for the extension upon the whole line from Metapolliam to Ootacamund. The present debenture stockholders would have the benefit of being part of a large issue, and there was always greater freedom of contract in dealing with large issues than small ones; and the rearrangement of debenture stock would provide for the whole line from Metapolliam to Ootacamund being dealt with as one entity instead of being dealt with as two, as it would have had to be in the case of two separate debenture stocks. It was, therefore, proposed now, with respect to the original line from Metapolliam to Coonoor, to provide for the expenses entailed by the landslip and for contingencies arising in connection therewith, and to have power to issue 60,000*l.*, of which they now proposed to issue 30,000*l.* to cover all the expenses connected with the landslip and certain other charges which had arisen, leaving the balance in reserve. With respect to the 240,000*l.* referred to, this was to provide for the expense of the extension from Coonoor to Ootacamund if and when it were sanctioned by the Government of India. They were in negotiation with the Secretary of State to carry out the extension, which, in the view of all who were competent to form an opinion on the subject, would add greatly to the value of their property from Metapolliam to Coonoor. It would facilitate their negotiations with the Secretary of State if they had the power to raise the capital on certain terms provided the Secretary of State was agreeable to their doing so.

Sir ALEXANDER WILSON seconded the motion, which was adopted.

Resolutions were afterwards passed sanctioning the additional capital mentioned.

#### DONNA THEREZA CHRISTINA RAILWAY.

The annual general meeting was held on the 15th inst., at Winchester-house, E.C.; Mr. G. VON CHAUVIN presiding.

The CHAIRMAN, in moving the adoption of the report and accounts (an analysis of which has already appeared in THE RAILWAY TIMES), said that the accounts for the year ended June 30th last were the most unsatisfactory that had been presented to the shareholders since he had been connected with the company. The gross traffic receipts during the period under review amounted to 126 contos, as compared with 132 contos in 1896-97. Four contos of the latter total were, however, received from the Brazilian Government for some machine tools sold to them by the company, so that the actual traffic receipts for 1896-97 and 1897-98 showed a difference of only two contos. The small decrease was due, first, to a strike of their workmen, which stopped all traffic for some time, and, secondly, to the floods which occurred on their line during September and October of last year. He warned them last year that there were various causes at work which would tend to make their expenses in Brazil larger, and it would be seen that they had risen from 349 contos to 405 contos during the twelve months covered by the accounts. On the other hand, it was satisfactory to find that their receipts were increasing. Referring to the decision of the Brazilian Government to pay the railway guarantees in 5 per cent. funding bonds for three years, instead of in gold, as heretofore, he said that the board had realised the bonds handed over to this company for the first half-year at an average price of 79½ per cent., in addition to which there was a quarter's interest on the bonds, making the total amount received 80½ per cent. That was a very good figure when compared with the price at which the bonds stood in the market. The effect of the funding scheme on this company during the second half of the year was the difference between 22,086*l.*, which the Government owed them in respect of the guarantee, and 17,803*l.*, the amount they obtained for their bonds. A reference to the revenue account would show that the introduction of the funding scheme had cost them more in one half-year than the entire receipts of the company from traffic in Brazil. The board had sent the general manager to Rio de Janeiro to place before the authorities the position in which the company found itself. Of course, they recognised that the new Government could not be expected to deal with the matter immediately, but in the course of time he hoped they would get something which would give the shareholders a little relief. They were in a totally different position from a bondholder, to whom it meant, perhaps, a reduction of only 25 per cent. in his income. The funding scheme would be operative during the whole of their current financial year, and what the loss to the company would be on the sale of bonds during that period it was impossible for him to say. It was certainly not a cheerful thing to look forward to, but it was a fact which he did not feel justified in hiding from them.

Major-General J. P. BEADLE seconded the motion, which was carried.

#### BURMA RAILWAYS.

The half-yearly general meeting was held on Tuesday, at Winchester-house, E.C.; Sir A. COLVIN presiding.

The CHAIRMAN, in moving the adoption of the report and accounts (an analysis of which has already appeared in THE RAILWAY TIMES), said the past year had not been eventful, although it had been one of advance and material prosperity. They had maintained their revenue. The work on two new lines, which were expected to prove

remunerative, was begun last autumn; progress had been made at the difficult portion of the Mandalay-Kunlon Railway; and the survey of the important Bassein-Henzada line had been completed, and would shortly be considered by the board. The period under review had been one of financial difficulty in India, and it was to be expected that the outlay of fresh capital by guaranteed railways would be less vigorously encouraged than would otherwise be the case. With the return, however, of improved prospects for the finances of India, they might hope for a freer hand, and it would not be their fault if the fullest effect was not given during the present and ensuing years to the policy lately advocated by Lord Elgin while on tour in Burma. This set out as the policy to be followed by the State precisely what were the policy and aims of this board. With reference to the work of construction, they might say that the last section of the Mu Valley Railway to Myitkyina was practically completed, and it had been opened for goods traffic since June 1st last, while they expected that it would be open for passenger traffic at the beginning of next month. Beyond Maymyo there was the Gokteik gorge, and much progress had been made towards securing a really satisfactory crossing of that very difficult ravine. More vigorous efforts were being made to develop the coalfields, and if they proved successful a short branch to them would be undertaken. In view of the rise in price of Bengal coal they looked to the development of the coalfields at Kabwet with considerable interest. He then alluded to the formation of the Yunnan Company, which intended to make an extended reconnaissance towards the Yang-tze river, with the object of the future construction of railways in extension of those of this company. The Yunnan Company would receive their cordial co-operation. With reference to revenue, their passenger traffic had been better than ever. It was stated last year that the rice crops of 1897-98 were expected to exceed the records of 1896-97, and this had proved to be the case. They were able to recommend the payment of a surplus profit dividend of 10s. per 100l. stock, or per ten shares, tax-free, in addition to the 2½ per cent. already distributed. This dividend was not wholly due, strictly speaking, to the operations of the year. The Government retained one-tenth of the surplus due to the preceding year pending settlement of certain points connected with the contract. These had been satisfactorily settled, and the balance since paid over went to swell the surplus of the present year. The traffic accounts up to date were in excess of even those of last year, and the reports of the rice crop were most favourable.

Sir CECIL SMITH seconded the motion, which was adopted.

#### SOUTHERN PUNJAB RAILWAY.

The half-yearly general meeting was held on Wednesday, at the Cannon-street Hotel, E.C.; Sir BRADFORD LESLIE presiding.

The accounts for the half-year ending June 30th, 1898, showed a gross revenue of Rs.7,81,540, and an expenditure of Rs.4,06,401. The company's proportion—48 per cent.—of the gross receipts for the half-year, as shown in the accounts rendered by the North Western State Railway, is Rs.3,76,365, of which Rs.471 is on account of rebate, and Rs.9,046 is for adjustments in the accounts to December 31st, 1897. This amount, converted at the average rate of exchange on the transactions of the half-year, would yield 24,551l. After recouping 23,960l. to capital, being the net interest on debenture and capital stock for the half-year, and deducting auditing expenses in India, there remains a surplus of 512l., which is held in suspense pending adjustments in regard to rebate, which, under the contract, can be made only at the end of each calendar year. The number of passengers carried was 422,259, and the quantity of freight carried 122,591 tons. The report stated that the length of the main line now practically completed and opened for traffic is 402 miles, and that of the Kaithal branch, under construction and expected to be completed in January, 1899, is 23 miles, making a total of 425 miles. The authorised capital is 1,500,000l., of which 1,466,000l. has been paid up. It is not anticipated that the remaining 34,000l. will be required at present. The amount expended to June 30th, 1898, was 1,264,141l., leaving a balance in hand of 201,858l.

The CHAIRMAN, in moving the adoption of the report and accounts, said there had been a considerable saving in the interest on debenture and capital stock charged to capital account, not only by interest received on investments, but also owing to the opening of the line for traffic at an earlier date than was originally anticipated. The net earnings for the half-year ended June 30th last were sufficient to fully recoup the six months' interest which had already been paid to the debenture stock and the capital stock holders. The net revenue for the half-year was Rs.3,76,365, including about Rs.9,000 on account of adjustments for the previous half-year. After making all deductions there remained a small balance, which was carried forward. As to the passenger traffic, the third-class passengers constituted 98½ per cent. of the number and 96 per cent. of the receipts of the passenger traffic, while grain and seeds contributed nearly 70 per cent. of the merchandise receipts. Towards the close of the half-year under review, and after the crops had been gathered, a large export traffic in grain and Kurrachee sprang up; but with the commencement of the present half-year exports ceased, and traffic receipts consequently dropped very greatly. That was owing to the collapse of the wheat corner in America. Traffic had consequently been restricted during the current half-year, and rebate might therefore become more important than was anticipated. Continuing, he said that under arrangements with the Government of India the North Western State Railway would take over the maintenance of the line six months after the completion of the ballasting of each section of 30 miles. By a computation that was averaged, and it had now been agreed with the Government of India that the maintenance by the company of the whole of the main line should

cease, and be taken over by the State Railway as from the 31st inst. They would now, therefore, have to retain only sufficient engineering staff in India to complete the Kaithal branch, and to finally make up the capital accounts.

Mr. H. N. GLADSTONE seconded the motion, which was agreed to.

#### GREAT SOUTHERN OF SPAIN RAILWAY.

The annual general meeting was held at Winchester-house, on the 15th inst.; Mr. G. P. TORRENS presiding.

The CHAIRMAN, in moving the adoption of the report and accounts (an analysis of which has already appeared in THE RAILWAY TIMES), said they were holding their meeting for the year 1897, the directors having delayed the gathering in the hope that they would have favourable news to convey to the proprietors, and also to be in a position to give an account of the working for the current year, so far as it had been ascertained. Whilst the results of the operations of the current twelve months, so far as they were known, were satisfactory, he could not describe them as brilliant, but they showed a great improvement on 1897. The operations of the latter year resulted in a total loss of about 4,000l., the actual loss on the working of the line having been 1,270l., the remainder principally representing the loss on exchange. The profits for the first ten months of the current year had amounted to 39,265 pesetas, or about 1,100l. The directors hope that the last two months of this year would show a profit at a larger rate than that of the first ten months, and if everything proceeded satisfactorily he thought the company might realise for the twelve months, after the payment of all expenses, the sum of 2,500l. Therefore he thought he could say that the line was paying its way, and when a railway of this character was enabled to do this there was no need for the shareholders to despair of the future. The fact that the railway was paying its way would enable the company to wait for opportunities of traffic and for the natural development of the district it traversed. It should be remembered that the railway was young. It was constructed to develop the known wealth of a district hitherto unworked, with a large population, and it was to this development, gradual though it had been, that the company owed the more favourable receipts of this year. The increase was not due to any one special class of traffic, but was spread over passengers, goods, and minerals. The increase, as compared with the corresponding ten months of 1897, was about 4,000l. The railway was cheaply worked, and more economically than other railways in Spain of the same character. He had been to Aguilas, and had gone thoroughly into all matters connected with the railway, and he could endorse the certificate of the general manager as to the excellence of the permanent way. He was pleased to tell the proprietors that practically all the legal difficulties in Spain had been settled. The shareholders would remember that the dispute was a very serious one, involving the payment of about 16,000l. The company won. The directors inherited most of the difficulties from the contractors. Having explained the origin of the dispute, the chairman, in conclusion, expressed his belief in the future of the line owing to the development of the great mineral resources of the district traversed by the railway, and stated that the directors were doing all that was possible to secure the traffic which would follow such development.

Mr. F. PRAED seconded the motion, which was agreed to.

#### PARAGUAY CENTRAL RAILWAY.

The annual general meeting was held on Monday, at the offices of the company, 35, New Broad-street, E.C.; Mr. E. M. UNDERDOWN, Q.C., presiding.

The CHAIRMAN, in moving the adoption of the report and accounts (an analysis of which has already appeared in THE RAILWAY TIMES), said—Gentlemen, so far as the traffic is concerned, you will see that there has been an increase in the number of passengers carried from May 1st to April 30th, and although there is a decrease in goods and parcels, the decrease in that respect is really, you may say, a decrease in the carriage of smaller packets or parcels. Now, you will observe, passing from that heading of receipts to the third paragraph of it—you will see there is 5 per cent. from the first-class, 4 per cent. from the second-class, and 91 per cent. from the third-class traffic. We really have not sufficient information before us, but I think it would be probable that when we come to examine into that, that the carrying on of three classes will hardly be necessary. Perhaps the second-class may very well be merged into the first-class. Now, the working expenses show a decrease, and, at the same time, although, as you will see, there is a great deal required to be done to the lines, a certain amount has been done during the time, and we have been able to do what was extremely necessary—namely, to lay down a total number of 22,000 sleepers, and we have sent out some rails; but we shall certainly have to increase the shipment of rails because, as you are all aware, in the first place, a great portion of the old line—the rails over a great portion of the old line—have been there for a very long period, and in the newer portion of the line some of the sleepers will certainly have to be dealt with even if the rails are not. A new locomotive has been purchased, and we are considering a contract for the supply of two others. Now, the statement of receipts and expenditure deals with the working up to April 30th, 1898, and that date is taken because it is the end of the financial year as regards the making up of the accounts with the Government. Since that date—since April—the prospects of the line show an improvement, and that, as you see, arises from the fact that we have been successful in inducing the Government to look into the question of tariffs, and to allow a reasonable amount of increase in those tariffs to be made. We, I think, induced the Government to do that by laying before them a

pretty clear statement of what the traffics were in other countries like Paraguay, and we showed them that the amounts which were then current were absolutely insufficient to cover the working of the line, much less to leave anything for its maintenance and renewal, and still further in the distance anything to compensate the persons who had invested their money in it. That, they saw, by comparison it was impossible to oppose, and consequently we got a reasonable increase in the tariffs, and we shall be able to gradually increase those tariffs up to within three years from this time, or from the date of the decree. And now we get into the more unfavourable portions of the business. The net receipts have been expended upon the maintenance of the line, and Mr. Stride and myself, who are the receivers, have not had anything come to our hands capable of being divided among the debenture-holders. At the same time we have lately had an interest shown in our undertaking on the part of influential persons who are interested in the debenture capital, and that being so we have been in a position to endeavour to formulate some plan which can be laid before the shareholders and debenture-holders, and before the Government of Paraguay, and if this, which, of course, depends as to whether we can come to an arrangement with the Paraguayan Government, if that were done we might put an end to the anomalous position of the company, and endeavour to carry out matters in a more satisfactory way, and one of the results of that would be that we might be able to raise some money for the purpose of putting the line into proper order, to make a short prolongation of the line from where it now stops to the river itself, and it is very much the desire of the Government that we should be able to carry that out. ("Hear, hear.") We do not propose any heroic measures to be taken in the city of Asuncion or its neighbourhood, because we think we had better remain as we are for the moment. The Paraguayan Government has appointed Senor Don Jose Y. Machain, who is the financial representative of the Government in Europe, and who is resident in Paris, to succeed the late Mr. Christopher James, who was Consul-General here, and was a member of our board for many years; and I think it is due to Senor Machain to say that in his recent visit to London he came here and thoroughly went into the business of the company. He seems to be not only a man of business and a man of skill, but to be actuated by the very best and most reasonable feelings with regard to this undertaking. He seemed to be convinced that it was in the interests of the Government to make as satisfactory a settlement as possible with the company, and we therefore have elected him a member of the board, and he consequently is an important member of the company, because he represents in his own name the amount of preference shares which were originally allotted to the Government, as representing a portion of the value of the original line from Asuncion to Villa Rica. Our present representative in Paraguay seems to have acted in a very satisfactory manner, to have shown very considerable judgment in his communications with the inhabitants of Asuncion, and with the Government, and we do not hear anything but favourable accounts on all sides, so far as he is concerned—"Hear, hear"—which, of course, is a very gratifying thing to us. Now, with regard to this scheme. It is impossible for me to go to-day into any particulars of what it would be, but it would be a scheme for the re-formation of the company. Everybody would have to give up something, and there would be the necessity of creating some preferential securities for the purpose of finding the money which is so much wanted in Paraguay in reference to our company. Now, the original scheme you will recollect provided—I mean the original foundation of the company provided for the participation of the Government in the share capital of the company. Now, there is no doubt that the difficulties of this company, to a great extent, arose from the fact that the Government did not—perhaps could not—comply with its original undertaking to pay the guarantee upon the shares. That, of course, has caused us a great deal of trouble, a great deal of loss, and considerable anxiety and unpleasantness. But we must look at the position of things as they are, and the position of the Government as it is, and what is the best course to be taken in our own interests in regard to our communication with the Government. I think that most people admit that the best way is in some way or another to maintain for that Government the participation of the Government in the share capital, however we may arrange it, so that they may have some interest in the ultimate results of the line. That being so, a great many of the difficulties which we have hitherto met with appear to be gradually settling themselves, and we trust we shall retain the services of Mr. Cyril Smith as our manager, and I really do think that if that gentleman could put the line into a good condition to meet the traffic, that there will be a recovery in the affairs of Paraguay. It is true that the new colony of Italians which is landed not far from Asuncion is not upon our line, but at all events it has been landed there, and it appears to be settling under favourable conditions, and perhaps it is a forecast of other colonists who may be likely to establish themselves in that country, of which we all know the capabilities, and, assuming that active people and reasonable people are employed, and assuming that there is a reasonable amount of capital and communication with this country, things ought to improve. I do not know that there are any further remarks I can make; but, if there are any questions to be asked, I shall be very glad to deal with them. It is very often asked that the London expenses should be analysed, and, although it is not exactly on the face of the accounts, I should like to say with regard to London offices expenses the salaries and outgoings are 419*l.* and 205*l.*; but, on the other hand, we let these offices and give the use of the staff to another company, and we get out of that 207*l.*, so that the London expenses are reduced to an extremely small figure. I do not know whether it is necessary to allude to another branch of your expenses in connection with the company, but all I have got to say is that we (the directors) are allowed by the accounts with the

Paraguayan Government the sum of 1,800*l.* a year, but that sum has not reached myself and the others who are now addressing you, but it has been employed chiefly in providing for the formal necessities of the line, and at present we are looking after the interests of the debenture-holders and shareholders, without any very advantageous conditions so far as we are concerned.

Mr. A. E. FRANKLIN seconded the motion.

Mr. GASKELL said he thought they might congratulate themselves upon the altered position of affairs. ("Hear, hear.") He also thought they ought to be extremely grateful to the board for having appointed Mr. Cyril Smith, who, apparently, had done wonderful work in Paraguay. He had shown that there was some hope in the future of this railway, and he (the speaker) was sure they must be all pleased with the present report. So far as he could tell—for there were two months mentioned in the report as to which the general public had not been supplied with the working expenses—it appeared that during those two months the company worked at something like 67 per cent. of its gross receipts. He thought that was most gratifying. In the original prospectus, he believed, it was estimated that the working expenses would be 65 per cent. Well, at that time when the company was formed the Paraguayan dollar was worth 3*s.*, whereas to-day it was worth but 6*d.*; that is to say, it had fallen to one-sixth of its original value. It was most gratifying to know that they had brought down the working expenses so much, and that very nearly the original amount estimated had been arrived at, although the maximum rates which they were now authorised to charge had not yet been put into force. He assumed there was to be a gradual increase in those rates; therefore the whole of the benefit which they were going to derive from those rates they had not yet received. ("Hear, hear.") He was very glad personally to see that the board had in view a scheme of reconstruction. There had been very little interest taken in the Paraguay Central Railway, mainly, he supposed, because there had been no return on the capital. It appeared to him that what the railway wanted, and what Paraguay wanted, was further capital. Almost every country in South America had some one or another to take an interest in it, but apparently there was no one in Europe—there was no one outside Paraguay—who took the slightest interest in that country. If they could only get some strong financial institution who would send capital to Paraguay, it would do many things not only for Paraguay itself, but also for this railway, which was a great institution so far as Paraguay is concerned. Capital embarked in the country would effect a double object. In the first place it would tend to raise the value of the Paraguayan dollar, and consequently increase the export trade, or at any rate increase the trade of the country; and secondly, it would largely increase the traffic of the railway from the fact that new industries would be started along it. He hoped that the meeting would pass a cordial vote of thanks to the staff in London, and to Mr. Cyril Smith, the general manager in Paraguay, and to express the shareholders' gratitude for the altered state of affairs. ("Hear, hear.")

The CHAIRMAN—I am very much obliged to Mr. Gaskell for his very interesting speech, which, I think, shows a very sound appreciation of the situation. Of course, we have been always extremely anxious about this matter. It is a great number of years since my attention was first called to Paraguay, and in those days we had a very high opinion of its capabilities. It is one of those places which in old times showed such very high results, and it is only the introduction of English capital and the approach of railways that will restore that state of things. But we cannot forget the terrific convulsions which have taken place there. Let us hope they are all over, and that we shall have renewed prosperity.

The report and accounts were then adopted, the retiring directors were re-elected, and the auditors were reappointed.

The CHAIRMAN—Gentlemen, if you will allow me, I will propose that a vote of thanks be given to the staff in London, and to our general manager and staff in Paraguay in respect to their valuable services rendered to this company. Perhaps you will be good enough to second that.

Mr. GASKELL—I shall have very great pleasure in seconding that.

Mr. FRANKLIN (a director)—I should like to associate myself also with this vote. I have seen every piece of correspondence which has come from Mr. Cyril Smith—I want especially to refer to him. I may say that I met him before he went out, and I took part in his appointment. Although I knew that he was a bright, capable young man, I had no idea that he was gifted with the tact and energy and common sense which he has since proved himself to possess. He has unheard of difficulties to encounter, but he is surmounting them, and from the information we have, showing what the net earnings are, we can see that with a few years' play before him, and with the assistance he asks for putting the line into order, and doing proper justice to the traffic, we may expect to see some return for the capital we put into this company some years ago.

The CHAIRMAN—I take it that that is carried by acclamation. That concludes the business.

#### ESPIRITO SANTO AND CARAVELLAS RAILWAY.

The second ordinary general meeting was held on Monday at Winchester-house, E.C.; Mr. B. H. C. HARRISON presiding.

The CHAIRMAN, in moving the adoption of the report, stated that since their last meeting they had had the various properties—the railway, the trapiche, and other properties—conveyed to them. The deed was not signed until April 28th last, and, therefore, they had only had actual possession of the properties for six months. The board were unable to give the shareholders a detailed balance-sheet and the exact expenditure under the different heads. The principal expenditure they had been

incurring had been in putting into working order the railway which had been handed over to them. It had been allowed, when in possession of the late company, to get into a very bad state indeed; and the railway stock had also required considerable repair. Mr. E. J. Lynch had been appointed their representative in Brazil, and Dr. M. E. do Prado resident manager of the railway. A regular service of trains was now running, and since coming into possession of the properties, they had been able to make arrangements with a substantial firm to work the barges on the river, which were used to take the grain and coffee that came to the railway from the terminus of the line down the river to the steamers. The directors had raised a certain sum to meet the expenses on the line. They offered for subscription 80,000*l.* in 6 per cent. debenture stock at par, and 7,050*l.* had been taken up, and constituted a first charge on the whole of the company's properties. A further 25 per cent. of the amount which had been taken up had to be paid, but payment had been deferred, because the board did not want to have more money than they could use, especially as 6 per cent. interest had to be paid on it. In consequence of certain informalities, the company's legal representatives in Brazil had not yet obtained from the Government the necessary licence to work the trapiche reis in Rio Janeiro, but it was hoped that the licence would be granted shortly, and the directors anticipated a substantial return from this property. Their accounts would, in future, be made up annually to April 30th, and their meetings would be held as soon as possible afterwards. An official quotation on the Stock Exchange had been obtained for their shares.

Mr. EDWARD HERDMAN seconded the motion, which was carried.

A special resolution was afterwards passed altering clause 87 of the articles of association to meet the requirements of the Stock Exchange Committee.

#### LAGUNAS NITRATE COMPANY, LIMITED.

The fourth annual general meeting was held on Thursday at Cannon-street Hotel; Mr. HENRY W. LOWE presiding.

The CHAIRMAN, in commenting on the balance-sheet, said that their stores and pulperia, on the credit side, had been written down to 17,375*l.*, against 26,864*l.* in the last accounts, and the capital stocks from 16,010*l.* to 15,075*l.* They had cash amounting to 6,000*l.*, against the small sum of 1,343*l.* last year, so that in this and other items the position of the company was considerably more favourable than it was a year ago. On the debit side they had sundry creditors in London, 11,238*l.*, as compared with 69,000*l.* on June 30th, 1897. That difference was a very large one, but included in the latter sum the new board found on taking office that there was a loan owing to the bankers of 30,000*l.* That loan was made at a time coincident with the declaration of a dividend, and he must leave them to draw their own inference from that fact. In Chile their creditors last year were 20,290*l.*, and in the present accounts 10,588*l.* It would be seen that all round they had reduced their liabilities and increased their assets. They had made a profit on trading for the period under review of 34,342*l.* That was on an outturn of 850,000 quintals, giving a profit of 9*d.* per quintal. Against the 34,342*l.* they had written off the expenses incurred by the stoppage of their works and also 3,139*l.* for the loss on the consignments made by the former board, and he was glad to say that this item was now finally closed. The loss on exchange for the year amounted to 2,753*l.* With regard to the legal expenses standing in the balance-sheet at 35,969*l.*, he said that they had entered the item as an asset because they expected to recover that, and more, from the Lagunas Syndicate. The greater part of these expenses represented the cost of sending the commission to Chile in relation to the suits. That expenditure was forced on them by the action of the syndicate in refusing to admit as evidence the letters and telegrams that the board had from their own employés in Chile. As to the closing down of the oficina, he said that nothing was more objectionable to the directors than having to stop work, but in February last they foresaw, in view of the state of the market, that there was little likelihood of their making a profit if they continued operations. They, therefore, thought it better to cease working and preserve their grounds than to go on producing nitrate for the whole year and sell it at a figure which would only cover expenses. The result of the Lockett action so far had been a source of considerable disappointment to the board. It was, he might state, impossible to get sufficient shareholders together to pass the necessary resolutions for cancelling the agreement. With regard to the litigation on the main issue, the matter was still *sub judice*, and therefore he could not enter into particulars so fully as he could wish. They regarded their case as very clear, and were resolved, if necessary, to go to the highest court in the realm. The whole of the expenses, under the most adverse circumstances, would not exceed a sum equivalent to 1*s.* per 5*l.* share, or 9,000*l.* He concluded by moving the adoption of the report.

Mr. A. PORLITZ seconded the motion.

In answer to a shareholder, the CHAIRMAN stated that it was expected that their appeal would be heard in January or February.

Mr. ALLEN criticised the accounts, and complained of the way in which the company's case had been conducted in court. He thought that an effort should have been made to get together, personally or by proxy, the necessary voting strength for cancelling the Lockett contract. In his opinion a little diplomacy on the part of the directors might have ended the fight, as he did not suppose Mr. Lockett and the others were altogether unreasonable.

After further discussion the CHAIRMAN, in reply, said that to a very large extent the shares were share warrants to bearer, and the directors did not know the names and addresses of the holders of them. Offers of a totally inadequate character had been made to them by the Lagunas

Syndicate with a view to stopping the litigation. He might say that if any offer were made to them by the syndicate which would justify the board in recommending its acceptance to the shareholders they would consider it.

The report was adopted.

[The above summary of the proceedings at Thursday's meeting is taken from the *Times* of yesterday. A more extensive but very misleading and garbled report (paid for by the company) appears in the *Financial News*, and presumably this is the one which will be sent out to the shareholders.]

## American & Canadian Railways.

### READING COMPANY.

The Reading Company has issued, for the information of its stockholders, a report, not only on its own affairs, but also on those of the Philadelphia and Reading Railway Company and the Philadelphia and Reading Coal and Iron Company, of which corporations substantially all the stock is owned by the Reading Company. This report includes the operations of the said two companies from November 30th, 1896 (the date on which the property now operated by them respectively passed to them), to June 30th, 1898, a period of nineteen months. The fiscal year of the Reading Company, as well of the Railway Company and of the Coal and Iron Company, ends on June 30th. "In this report," the president says, "the business of the three companies will be discussed without constant reference to the fact that each of the three companies above named is entirely distinct from the other, has a distinct organisation, and is engaged in a distinct occupation. This course is especially necessary in comparing the revenues of the last year with those of former years, as the properties formerly held by the Railroad Company and by the Coal and Iron Company have now been distributed between the three Reading companies, so that only by comparing the revenues and expenditures of the three companies for the period under consideration with those of the two companies which formerly held the same properties can we arrive at an intelligent comparison of the results under the present ownership with those attained under the former ownership."

The balance-sheet of the Reading Company, June 30th, 1898, shows a bonded debt of \$63,249,500, and a share capital of \$140,000,000 as follows:—General mortgage loan, 1897-1997, \$60,886,000; bonds and mortgages on real estate, \$1,054,500; Delaware River terminal bonds, \$500,000; Delaware River terminal extension bonds, \$809,000; first preferred stock, \$28,000,000; second preferred stock, \$42,000,000; common stock, \$70,000,000. The principal assets of the Reading Company are:—Locomotive engines and cars, \$16,950,000; colliers, barges, &c., \$1,450,000; real estate, \$16,315,575; Philadelphia and Reading Railway Company's bonds, \$20,000,000; bonds of sundry companies, \$15,646,874; Philadelphia and Reading Railway Company's stock, \$20,000,000; Philadelphia and Reading Coal and Iron Company's stock, \$8,000,000; stocks of sundry companies, \$26,731,565. Philadelphia and Reading Coal and Iron Company, for advances on account of cost of property and for retiring divisional coal land mortgage bonds, \$77,108,652.

The balance-sheet of the Philadelphia and Reading Railway Company, June 30th, 1898, shows a share capital of \$20,000,000, and a bonded debt of \$71,027,857, as follows:—Prior mortgage loans, \$5,241,700; consolidated mortgage loan, \$18,811,000; improvement mortgage loan, \$9,364,000; consolidated mortgage loan, 1882-1922, first series, \$5,766,717; consolidated mortgage loan, 1883-1933, second series, \$1,535; debenture loan, 1891-1941, \$8,500,000; purchase money mortgage, \$20,000,000; Philadelphia-subway loan, \$2,700,000; bonds and mortgages on real estate, \$642,905. The principal assets are:—Railroad, \$79,851,857; Philadelphia - terminal, \$8,500,000; Philadelphia - subway, \$2,700,000.

The current business assets and liabilities of the Reading Companies on June 30th, 1898, were as stated in the following summary:—

	Current business assets.	Current business liabilities.
Reading Company .....	\$2,864,330	\$2,092,911
Philadelphia and Reading Railway Co. ....	5,685,490	5,604,267
Philadelphia and Reading Coal and Iron Co. ....	3,062,300	1,492,197
Philadelphia and Reading Coal and Iron Company, coal loan, due 1904 .....		3,600,000
	\$13,612,120	\$12,789,375

The subjoined table in the first two lines summarises the mileage at June 30th, 1898, of the roads operated by the Philadelphia and Reading Railway Company, and in the third line the mileage of the roads in which the Reading Company holds a controlling interest:—

	Length of Road.	Second Track.	Third and other Tracks.	Sidings and Laterals.	Total miles of Track
Miles owned .....	365.23	172.57	1.46	424.52	963.78
Miles leased .....	548.48	213.12	1.27	387.03	1,149.90
Miles controlled .....	452.79	56.78	—	114.27	623.84
<b>Total .....</b>	<b>1,366.50</b>	<b>442.47</b>	<b>2.73</b>	<b>925.82</b>	<b>2,737.52</b>

The operations of the consolidated undertakings for seven months ending June 30th, 1897, resulted in a deficit of \$1,243,127, after charging the accounts for that period with a proportion of the fixed charges. For the year ending June 30th, 1898, the result was as shown below:—

<b>Income from Phil. and Read. Railway Company—</b>	
Interest on purchase money mortgage .....	\$1,200,000
Interest, &c., leased lines .....	444,346
Rent of Delaware river wharves ..	50,000
Rent of equipment .....	1,472,000
<b>Other income—</b>	
Real estate rented .....	105,605
Interest and dividend receipts .....	246,950
Schuylkill Canal .....	7,682
	<b>360,237</b>
	<b>\$3,166,346</b>

<b>Receipts of Phil. and Read. Railway Company—</b>	
From railway traffic .....	21,475,242
From other sources, net .....	511,592
	<b>21,986,834</b>

<b>Receipts of Phil. and Read. Coal and Iron Company .....</b>	<b>22,909,553</b>
<b>Total receipts .....</b>	<b>\$48,422,970</b>

<b>Expenses—</b>	
<b>Reading Company—</b>	
Contingent expenses .....	\$16,916
<b>Railway Company—</b>	
Insurance .....	\$41,863
Operating expenses .....	11,142,161
Equipment renewed .....	841,782
Improvements .....	360,222
	<b>12,386,028</b>

<b>Phil. and Read. Coal and Iron Co.—</b>	
Operating expenses .....	21,802,691
New work at collieries .....	630,624
	<b>22,433,315</b>
	<b>34,836,259</b>

<b>Net receipts .....</b>	<b>\$13,586,711</b>
---------------------------	---------------------

<b>Fixed charges and taxes—</b>	
<b>Reading Company .....</b>	<b>\$2,672,408</b>
<b>Phil. and Read. Railway Co.—</b>	
On securities, &c, payable to the public .....	\$5,804,673
Discount on bonds .....	37,100
On securities owned by Read. Co. ..	3,166,347
	<b>9,008,120</b>
<b>Phil. and Read. Coal and Iron Co. ..</b>	<b>529,763</b>
	<b>12,210,291</b>

<b>Surplus .....</b>	<b>\$1,376,420</b>
<b>Deficit, seven months .....</b>	<b>1,243,127</b>

<b>Surplus, nineteen months .....</b>	<b>\$133,293</b>
<b>Fixed charges and taxes as above .....</b>	<b>\$12,210,290</b>
<b>Less income of Reading Company included in fixed charges of railway company as above .....</b>	<b>3,166,346</b>

<b>Net fixed charges and taxes .....</b>	<b>\$9,043,944</b>
--	--------------------

President J. S. Harris, in his report, states:—"The joint operations of the three companies for the nineteen months since November 30th, 1896, resulted in net earnings which were sufficient to meet all interest and other charges, all expenditures for betterments and improvements of every kind, and left a surplus of \$133,293. Stated in detail, the seven months to June 30th, 1897, show a deficit of \$1,243,127, and the twelve months to June 30th, 1898, a surplus of \$1,376,420, the different character of the results for the two periods being mainly due to the fact that the seven months from December to June mark the regular annual period of dulness in the coal trade, and always show much smaller net earnings than the five months from July to November. If we apply to the deficit for the seven months from December, 1896, to June, 1897, the surplus under the receivership for the five months July, 1896, to November, 1896, which was \$663,992, we have as the result for the year from July 1st, 1896, to June 30th, 1897, a deficit of \$579,134, as against a surplus (as already stated) of \$1,376,420 for the fiscal year just closed, so that the result of the two years' business would have been a surplus of \$797,285. Eliminating all duplication of accounts between the three companies, the results for the past two years, including the year 1896-7 as above stated, five months under the receivership, may be stated in their simplest form as follows:—

Year ending June 30th.		1897-98.	1896-97.
<b>Receipts—</b>			
Reading Company .....	\$360,237	\$360,237	\$360,237
Phil. and Reading Ry. Co. ....	21,986,834	20,616,234	20,616,234
Phil. and Reading Coal and Iron Co. ..	22,909,553	21,427,080	21,427,080
	<b>\$45,256,624</b>	<b>\$42,403,551</b>	<b>\$42,403,551</b>
<b>Expenses—</b>

Phil. and Reading Ry. Co. ....	5,841,773	6,554,216	6,554,216
Phil. and Reading Coal and Iron Co. ..	529,763	909,381	909,381
	<b>\$9,043,944</b>	<b>\$9,916,625</b>	<b>\$9,916,625</b>
<b>Balance .....</b>	<b>Sur. \$1,376,420</b>	<b>Def. \$579,134</b>	

"The receipts of the railway company arising from the several classes of business compare as follows for the last three years, the period in each case being the twelve months ending June 30th:—

Years ending June 30th.	1897-8.	1896-7.	1895-6.
Coal traffic .....	\$9,931,896	\$9,535,676	\$9,706,230
Merchandise .....	7,163,170	6,455,031	7,141,240
Passenger .....	3,877,546	3,763,890	3,904,329
Miscellaneous .....	389,951	377,539	382,182
Mail .....	112,678	103,157	100,790
<b>Total .....</b>	<b>\$21,475,241</b>	<b>\$20,235,294</b>	<b>\$21,324,761</b>

"The tonnage of anthracite carried increased from 9,240,238 tons in 1896-97 to 9,464,598 tons in 1897-8, a gain of 224,360 tons, or 2.54 per cent.; and the tonnage of bituminous coal increased in the same year from 2,432,938 tons to 3,517,069 tons, an increase of 1,084,131 tons, or 44.56 per cent. The revenue from coal traffic increased from \$9,535,676 to \$9,931,895, an increase of \$396,219, or 4.15 per cent. Merchandise increased from 8,324,062 tons to 9,362,641 tons, a gain of 1,538,579 tons, or 18.48 per cent., and the earnings therefrom increased from \$6,455,031 to \$7,163,169, a gain of \$708,139, or 10.97 per cent. The number of passengers carried increased from 17,991,326 to 18,671,433, a gain of 680,107, or 3.78 per cent., and passenger revenue increased from \$3,763,890 to \$3,877,546, a gain of \$113,656, or 3.02 per cent. Comparing these earnings with those of the four previous years, the total is the largest for five years. Coal earnings were exceeded only in 1893-4, 1894-5, and 1895-6.

"In order to arrive at a correct understanding of the business affairs of the several companies, it will be desirable to outline, in a general way, their organisation and scope:—In the report of the receivers of the Philadelphia and Reading Railroad Company and the Philadelphia and Reading Coal and Iron Company for the year ending November 30th, 1896, it is stated that the general mortgage of the Philadelphia and Reading Railroad Company and the Philadelphia and Reading Coal and Iron Company had been foreclosed, and that under the direction of the Circuit Court of the United States all the properties and estates of these companies had been sold by the trustee of the general mortgage and by the receivers, and that the purchasers of the properties at that sale had organised a new company, Philadelphia and Reading Railway Company, to which, and to the Reading Company and the Philadelphia and Reading Coal and Iron Company, possession was transferred at midnight on November 30th, 1896.

"The Reading Company owns practically the whole capital stock of the Philadelphia and Reading Railway Company and of the Philadelphia and Reading Coal and Iron Company, and all of the other stocks and securities which were acquired by the purchasers under the sale made by the trustee and the receivers. It also owns the \$20,000,000 purchase money mortgage bonds issued by the Philadelphia and Reading Railway Company, the locomotives, cars, steam-colliers, tugs and barges constituting the railway and marine equipment, and all the real estate of the old Philadelphia and Reading Railroad Company, which was not appurtenant to the railroad itself. This, of course, does not include depots, rights of way, &c., which belong to the railway company.

"The Philadelphia and Reading Railway Company, which was organised under the Act of the Legislature of Pennsylvania, of May 31st, 1887, owns all the railroads formerly belonging to the Philadelphia and Reading Railroad Company; and it controls the roads heretofore leased to that company, either by transfer of the old leases or by new leases made since November 30th, 1896. It leases from the Reading Company the railway and marine equipment which it uses in the conduct of its business and a number of wharves and warehouses on the Delaware River between South-street and Queen-street, Philadelphia.

"Under the foreclosure sale the charter of the Philadelphia and Reading Coal and Iron Company was preserved, and it was purchased at the sale. The purchasers, after the acquisition of the charter and franchises, conveyed all of the coal lands and collieries which they had acquired at the sale to the Philadelphia and Reading Coal and Iron Company. Its business consists exclusively of the mining and sale of coal."

#### WEST VIRGINIA AND PITTSBURGH.

Messrs. Brown, Shipley, and Co. notify the holders of their certificates of deposit for the 5 per cent. first mortgage gold bonds of the West Virginia and Pittsburgh Railroad Company that, by way of supplement to the plan of agreement for the reorganisation of the Baltimore and Ohio, a proposition has been made which they have carefully considered, and recommend a prompt acceptance of. The proposition provides that the property of the West Virginia and Pittsburgh is to be leased to the Baltimore and Ohio, the rental to be sufficient to ensure payment of 4 per cent. per annum from the date of settlement—say, not later than April 1st next—and interest is to be paid upon the present bonds at the rate of 5 per cent., with interest upon overdue coupons up to the day of settlement. In consideration of this agreement holders are to agree that the Baltimore and Ohio shall have the option for five years from April 1st to purchase the bonds at par and accrued interest upon sixty days' notice of intention to do so. In order to make the arrangement effective all the owners of the West Virginia and Pittsburgh bonds who now hold Messrs. Brown's certificates of deposit, or such lesser amount as the reorganisation managers of the Baltimore and Ohio shall accept, must sign and return to them on or before January 7th the written acceptance of the proposed arrangement.

#### BALTIMORE AND OHIO SOUTH WESTERN.

The full text of the reorganisation plan of the Baltimore and Ohio South Western Railroad Company was issued on Saturday last. The following is the official summary of the scheme submitted by the board and Messrs. Speyer Brothers, 7, Lothbury, E.C., Speyer and Co., New York, Kuhn Loeb and Co., New York, reorganisation managers:—"The Baltimore and Ohio Railroad Company, the guarantor of a large amount of the securities of the Baltimore and Ohio South Western Railway Company, having become insolvent, and its property placed in the hands of receivers, it became imperative for the Baltimore and Ohio South Western interests, in order to properly protect their securities, to enter into negotiations with the reorganisation managers of the Baltimore and Ohio Railroad Company as soon as they had declared the Baltimore and Ohio reorganisation plan operative. The Baltimore and Ohio South Western Railway Company was confronted with grave difficulties. Since the last reorganisation of this company, vigorous competition has sprung up in the territory it occupies, greatly reducing the rates. The effect of this reduction in rates has been most serious and points to the pressing need of a readjustment of the company's securities and fixed charges and the securing of additional capital to make much-needed improvements upon the property. After most careful study of the whole situation by the reorganisation managers, it was found that not less than \$9,500,000 fresh money would have to be raised to provide the necessary capital for the company's needs, of which \$5,500,000 would have to be expended upon the property to reduce its grades, secure heavier motive power and increase the equipment, the balance being required to pay off Car Trust obligations, floating debt, and to provide for the expenses of the reorganisation. The relations between the two above-named companies in the past have not, in the opinion of the reorganisation managers, been entirely satisfactory. The Baltimore and Ohio Railroad Company, by the ownership of the Baltimore and Ohio South Western Railway Company's common stock, controlled the latter, and was thereby arbiter of the situation without having to pay any fixed rental. It has therefore been the chief aim of the reorganisation managers to put an end to such a situation, and it is certainly a matter for congratulation that they have succeeded in formulating a plan for consolidating the interests of the two companies by issuing the direct obligations of the Baltimore and Ohio Railroad Company in exchange for the securities of the Baltimore and Ohio South Western Railway Company. The plan provides for an issue of \$40,000,000 Baltimore and Ohio Railroad Company (as reorganised) South Western Division first mortgage 3½ per cent. gold bonds secured by a mortgage on the present Baltimore and Ohio South Western system, \$12,500,000 preferred stock and \$10,000,000 common stock of the Baltimore and Ohio Railroad Company (as reorganised). The reorganisation managers of the Baltimore and Ohio Railroad Company have agreed to undertake the consummation of the plan, and to recommend the Baltimore and Ohio Railroad (as reorganised) to issue its securities in exchange for those of the Baltimore and

Ohio South Western Railway Company on a just and equitable basis, thus placing the holders of Baltimore and Ohio South Western Railway securities in a position to receive their proportionate share in the successful operations of the entire Baltimore and Ohio system. A careful examination of the terms offered to the various security-holders will show that the plan has been drawn with the greatest care and appears fair to all interests. Messrs. Speyer Brothers and their associate managers have formed a syndicate to raise the necessary money, including the purchase, at their face value, of coupons due on January 1st next, which will not be paid by the company, amongst which are those of the 4½ per cent. Baltimore and Ohio South Western first mortgage bonds and 4½ per cent. Baltimore and Ohio South Western consolidated mortgage bonds. The syndicate, which has been formed to-day, is for \$25,000,000, and has been largely over-subscribed." The terms on which the new securities will be exchanged for the existing securities are shown below:—

Existing bonds and stock to be deposited.	Each \$1,000 receives			
	Cash.	New S. Western Division 3½ p.c. gold bonds.	New Preferred stock trust certificates.	New common stock trust certificates.
Ohio and Mississippi Railway first consolidated mortgage bonds extended 4 per cent. ....	\$20'00	\$1,070	\$100	
Ohio and Mississippi Railway first consolidated mortgage sterling bonds, extended 4 per cent. ....	20'00	1,040	100	
Ohio and Mississippi Railway second consolidated mortgage 7 per cent. bonds (currency) ....	17'50	1,240	125	
Ohio and Mississippi Railway first mortgage Springfield Division 7 per cent. bonds (currency) ....	11'67	1,000	125	
Ohio and Mississippi Railway general mortgage 5 per cent. bonds (currency) ....	4'17	900	100	
B. and O. South Western Railroad first mortgage 4½ per cent. bonds ...	22'50	1,060	100	
B. and O. South Western Railway first consolidated mortgage 4½ per cent. gold bonds ...	22'50	900	100	
B. and O. South Western Railway first income mortgage 5 per cent. bonds, Series A. ....	—	—	300	\$200
B. and O. South Western Railway first income mortgage 5 per cent. bonds, Series B. ....	—	—	—	225
B. and O. South Western Railway preferred stock. ....	—	—	—	175
B. and O. South Western Terminal Company 5 per cent. gold bonds. ....	8'33	1,030	125	
Cincinnati and Baltimore Railroad first mortgage 7 per cent. bonds. ....	35'00	1,000	125	
Marietta Railway first mortgage 4 per cent. bonds. ....	6'67	1,000	—	

\* Interest at the rate provided in the old bonds from the date of the last matured coupon next preceding January 1st, 1899, up to the date when the new bonds begin to bear interest—namely, January 1st, 1899, excepting in respect of bonds represented by certificates of deposit stamped "Ex interest due January 1st, 1899," as stated below.

The reorganisation managers of the Baltimore and Ohio South Western Railway Company inform holders of securities affected by the plan of reorganisation that, from holders who deposit their bonds under the plan, a syndicate will purchase for cash at their face value coupons and claims for interest on registered bonds maturing January 1st next. Participation under the plan of reorganisation in any respect whatsoever is dependent upon the deposit of securities on or before January 20th, 1899.

#### RAILROAD NOTES.

Passenger rates east of Chicago are utterly demoralised; rates are being cut and commissions paid regardless of agreements. The Pennsylvania gives notice of a cut of \$4 from Chicago to New York in the passenger rate *via* Washington. This indicates that the strong lines are lowering passenger fares to the weak line basis. A meeting of the representatives of the Baltimore and Ohio, the Reading, and the Pennsylvania has been held at Philadelphia, with a view to bring about a restoration of the freight rates on west-bound traffic. Nothing definite was accomplished. A special meeting of the Western Passenger Association will be held on January 10th to consider the draft of a new association agreement which has been prepared by a special committee of the traffic managers of the Atchison, the St. Paul, and the Rock Island.

Mr. Reid, the Newfoundland railway contractor, has issued a public notice that lands along the railway will be granted free to

settlers. Formerly, when these lands belonged to the Government, 30 cents. per acre were charged; now a settler can have 160 acres for nothing, and earn the Government bonus of \$60 for clearing the first three acres. Mr. Reid has also contracted with the Newfoundland Government to build and run seven steamers, which will ply between all the fishing villages along the coast, as well as between the island and Labrador. A cable dispatch from St. John's, dated December 20th, says:—"Mr. Chamberlain in a dispatch to-day declines to disallow the Reid railway contract as requested by colonial petitions."

A strike of the telegraph operators of the Grand Trunk Railway has not yet been averted. Mr. Hays, the general manager, has recognised the men's union, and consented to allow a conference between the union and the company for the discussion of grievances. The men demand shorter hours and more pay. They were informed by the company on Wednesday that the earnings of the past six months did not warrant a general increase of salaries, but the company was prepared to consider individual cases. On Thursday the conference was resumed, but in the afternoon all negotiations were broken off.

President Stillwell, of the Kansas City, Pittsburg, and Gulf Railroad, is arranging for the consolidation of three northern branch lines—viz., the Kansas City and Northern Connecting Railroad, the Omaha Kansas City and Eastern Railroad, and the Omaha and St. Louis, into one company, which will probably be known as the Chicago Kansas City and Gulf Railroad. The arrangements of the company for entrance into Chicago have been completed. The line will connect at Peoria with the Big Four and the Vandalia systems, to which end about 15 miles of new track will be necessary.

A New York correspondent telegraphs:—"Governor Leedy, of the Kansas State, has issued a call for a special session of the Legislature to commence on December 21st to regulate railroad charges. It seems to be the policy of the outgoing Populists to attack all classes of corporations, particularly railroads and insurance companies." The *Times* correspondent says:—"Any anti-railway laws the Kansas State Legislature may pass at its extra session next week will stand for at least two years, as the Kansas Senate holds over, and is controlled by the Populists."

The Chicago Great Western Railway says that it will withdraw its independent freight tariff on January 1st and will become a party to the joint Western tariff and a member of the Western Freight Association. In consequence of this the Atchison has cancelled its order suspending traffic relations with the Chicago Great Western. President Stickney says that the boycotts against the road have not done it any harm. The company has under consideration an extension of the road to Omaha.

The Denver and Rio Grande Railroad Company has declared a half-yearly dividend of 2 per cent. on its preferred stock, payable January 16th. Chairman Coppel says that the company is now on a 4 per cent basis. Its actual net surplus for the four months ended October amounts to \$524,000, that of November and December is estimated at \$252,000, making for the six months \$776,000, which, after deducting \$105,000 for locomotives and \$473,000 for the dividend, leaves a balance to carry forward of \$198,000.

The directors of the New York Central and Hudson River have declared the usual quarterly dividend of 1 per cent. The statement for the quarter ending December 31st (December partly estimated) shows gross earnings, \$12,150,000—increase, \$416,000; net, \$4,452,000—increase, \$178,000; surplus after charges, \$1,560,000—increase, \$325,000; surplus after the dividend, \$560,000—increase, \$325,000.

The Canadian Government subsidy for the six months ending the 31st inst., together with the net earnings of the company to October 31st last, will permit of a distribution of 2½ per cent. in respect of the interest due on January 1st on the first mortgage sterling bonds of the Calgary and Edmonton Railway Company, and payment of such interest will be made on and after that date.

It is semi-officially announced that the Vanderbilts have secured control of the Delaware Lackawanna and Western. President Sloane will retire at the annual meeting in February, and will be succeeded by a Vanderbilt man, who will operate the line in harmony with the Delaware and Hudson and other coal carriers. President Sloane declines to make any statement as to his retirement.

The directors of the Atchison Topeka and Santa Fé have

declared a dividend of 1 per cent. on the preferred stock. At the annual meeting on Wednesday the old general officers and executive committee were re-elected. The meeting decided not to say anything about future dividends.

Attorney-General Griggs, after the adjournment of the President's Cabinet on Wednesday, denied that any agreement had been reached between the Government and the Central Pacific. He stated that no proposition had been submitted to the Government for consideration.

A pooling Bill, endorsed by the National Board of Trade, representing trade organisations throughout the country, will be introduced into both Houses of Congress next week. A committee has drafted the Bill in conjunction with the Interstate Commerce Commission.

The latest purchasers which rumour has found for the Chicago and Alton undertaking are the Union Pacific and the Standard Oil Company. If the latter report were true the line would be worked in connection with the Missouri Kansas and Texas.

The Southern Railway Company has declared a dividend on the preferred stock of 1 per cent., payable January 20th. This dividend is understood to be the first of what will be, it is hoped, semi-annual distributions.

It is reported that the Pacific Coast Steamship Company, with all its accessories, has been purchased by the Great Northern. This will make the Great Northern a strong competitor for Californian business.

There are indications (says a New York correspondent) that the pool in Louisville and Nashville has commenced to realise in anticipation of a distribution of 1½ per cent. on the stock in January.

The Atchison Topeka and Santa Fé has established a monthly steamship line to the Orient, via Honolulu and Yokohama, from San Diego. The first steamer leaves Yokohama on January 3rd.

The Louisville and Nashville Railroad Company announces that the remaining 5 per cent. of the cut in the wages of its employés, made in 1893, will be restored in January.

The death of Mr. Calvin S. Brice is regarded as strengthening the position of the Trunk lines, and means at least the abandonment of one contemplated new main road.

Rumours are prevalent of a deal between the Illinois Central and the Minneapolis and St. Louis, with the object of establishing a close traffic connection.

The reorganisation plan of the Central Pacific Railroad Company, which will probably be issued early in January, will provide for an assessment on the stock.

Last week's East-bound all-rail freight tonnage from Chicago amounted to 104,000 tons, against 83,000 in the corresponding period last year.

It is reported that a readjustment will be made of Texas and Pacific seconds, under which they will be turned into a fixed charge.

#### LATEST EARNINGS.

Second week of December.—Baltimore and Ohio South Western, \$133,000—increase, \$3,000; Chesapeake and Ohio, \$244,000—decrease, \$18,000; Chicago Great Western, \$106,000—increase, \$8,000; Denver and Rio Grande, \$174,000—increase, \$11,000; Louisville and Nashville, \$441,000—decrease, \$20,000; Mexican Central, \$306,000—increase, \$28,000; Missouri Pacific, \$490,000—increase, \$3,000; St. Louis and San Francisco, \$139,000—increase, \$8,000; St. Louis South Western, \$123,000—decrease, \$4,000; Wabash, \$265,000—increase, \$15,000; New York Ontario and Western, \$73,000, same as last year; Chicago Milwaukee and St. Paul, \$785,000—increase, \$119,000; Kansas City Pittsburg and Gulf, \$66,000—increase, \$6,000; Missouri Kansas and Texas, \$238,000—decrease, \$47,000; Oregon Railroad and Navigation, \$108,000—decrease \$16,000; Pittsburg and Western, \$49,000—decrease, \$3,000; Southern Railway, \$522,000—increase, \$37,000; Norfolk and Western, \$258,000—increase, \$2,000. The decreased earnings of the South-western lines are explained by the exceptionally cold weather interfering with the movement of cotton.

Month of November.—Southern Railway, gross, \$2,262,000—increase, \$242,000; net, \$821,000—increase, \$99,000. Nashville

Chattanooga and St. Louis, gross, \$504,000—increase, \$36,000; net, \$163,000—increase, \$8,000. Chicago and North Western, gross, \$3,375,000—increase, \$170,000.

On 119 lines reporting earnings for the month of November the total receipts were \$49,984,000 (on 93,620 miles), whilst for the same month in 1897 the receipts were \$47,797,000 (on 92,490 miles). Increase in receipts, \$2,187,000; increase in mileage, 1,130. On 119 lines reporting earnings from January 1st to November 30th, 1898, the aggregate receipts were \$486,820,000, as compared with \$447,356,000 for the corresponding period in 1897—increase, \$39,464,000.

Month of October—Missouri Kansas and Texas, gross, \$1,539,000—increase, \$135,000; net, \$750,000—increase, \$90,000. Pittsburgh and Western, gross, \$294,000—decrease, \$3,000; net, \$100,000—increase, \$3,000. Qu'Appelle Long Lake and Saskatchewan, gross, \$7,454, against \$7,120; net loss, \$1,976, against profit, \$1,709. Calgary and Edmonton, gross, \$20,783, against \$33,052; net, \$8,476, against \$17,459. During the month of October 127 roads made gross earnings of \$85,905,816, an increase of \$4,142,674, or 5.07 per cent.; and net earnings of \$33,163,472, an increase of \$2,280,143, or 7.38 per cent.

## General News.

### SIR G. E. PAGET AND THE HOOLEY PROMOTIONS.

The *Rialto*, in its issue of Saturday last, says:—"There is a report current, evidently spread by Mr. Hooley, that Sir George E. Paget, the chairman of the Midland Railway Company, purchased 25,000 shares in Simpson's Lever Chain Company, and 25,000 in Simpson's Lever (Foreign) Company at 5s. each, on condition that Mr. Hooley was to buy them back again at 10s., thus affording Sir George a certain profit of 12,500*l*. This transaction, it is suggested, was carried through in connection with the acceptance by Sir George of a seat upon the Simpson's Lever board. Now, considering the responsible position of Sir George Paget in regard to the Midland Railway and other important undertakings, it becomes imperative that such reports as this should not be allowed to gain too much currency, and we hope that he will lose no time in contradicting a rumour which is calculated to so seriously prejudice his position."

Needless to say, we quite share the views just expressed by our contemporary. At the London Bankruptcy Court last week Mr. Registrar Hood opened the public inquiry into the promotion and conduct of the affairs of Simpson's Lever Chain and Cycle Company, of which Mr. E. T. Hooley was the vendor and promoter. Amongst the witnesses called was—

Mr. E. M. MUNDY, one of the original directors of the company, who said that the question of obtaining suitable directors for the company was discussed at the first board meeting, and some one suggested Sir G. E. Paget, the chairman of the Midland Railway Company. Witness said he would be satisfied if that gentleman joined the board, which he subsequently did. Three other gentlemen were also elected on October 18th, 1895. Sir G. E. Paget retired in August, 1896, and witness followed his example in the following June. He could not remember any discussion at a board meeting with reference to the sale of shares on the market. He was aware that a sudden increase occurred in the number of transfers, but this was caused through trial races which were held and published in the cycling papers, and every one made for the shares. He remembered an article which appeared in the *Financial News* of May 16th, 1896, being discussed at a board meeting; but he could not remember what decision was arrived at.

The SENIOR OFFICIAL RECEIVER read the article, which ran as follows:—"The company has not been long in existence, but is making remarkable headway. The demand for its specialities is rapidly increasing, and we are informed that it has already earned enough profit to pay a dividend of 10 per cent. on its subscribed capital—a very praiseworthy achievement for a company which is only a few months old."

Witness said that the information was not given by any member of the board.

The article is quite untrue, is it not?—Yes.

It also states that a machine fitted with one of the Simpson lever chains has been driven along a level road for 11 miles in a quarter of an hour?

Witness said that was also untrue. The board did not take any action with regard to the article, and they decided to let it severely alone. Although the increase in the number of transfers was contemporaneous with the article, he believed the transfers increased simply because of the results attained at trial cycle meetings.

The next witness called was Mr. E. T. Hooley, and it is only fair to state that, according to this witness, Sir G. E. Paget received but 7,000 shares, for which he paid 3,250*l*. This would be in the English company, and the transactions in the shares of the Foreign and Colonial Company would still remain to be explained. Surely Sir George Paget will see the necessity of giving some of these statements an unqualified denial without further delay, his name having been bandied about in connection with these Hooley promotions in a manner by no means pleasing

to those concerned for the reputation of the great English railway corporation over which he presides.

### RAILWAYS IN CHINA.

The Paris correspondent of the *Morning Post* is authorised to state that any action by France in the Yang-tse Valley will in no way be taken with views to extension.

Lieutenant E. Barnardiston, R.E., will sail for Shanghai per R.M.S. *Britannia* on Wednesday, January 11th. It is understood that his services have been lent to the Pekin Syndicate, and that he will join the party which has already left for the East under Mr. Glass.

It is officially announced that the British and Chinese Corporation, Limited, has secured, through the Hong Kong and Shanghai Banking Corporation, a concession for working the extensive coalfield at Nanpiao on the line of railway from Shanghai to Newchwang. The corporation is sending out an engineer to report upon the concession, and he will have the assistance of the engineer-in-chief of the Imperial railways of North China, and the benefit of the great experience he has gained as the engineer who developed so successfully the Kaiping coal mines.

M. de Lanessan, writing in the Paris *Rappel*, says:—"One of the motives which decided the Chamber to vote the sums demanded for the Indo-China Railway was the desire to make French influence penetrate into Yunnan before Great Britain has established herself in that province. This competition is so loyal and so practical that our neighbours cannot complain of it. The gigantic scheme of the British to unite the Indies with the capital of Yunnan, a scheme which their tenacity will probably bring to a successful issue, will hurt our interests considerably if we do not take measures to extend our influence to the whole of that province. No one can dream of making Yunnan valuable until a railway connects the province with the Delta of Tongking and the China Sea. The Chamber and the Government are undertaking a fine piece of work in Yunnan. The country will reap material and moral advantages therefrom such as to compensate it for the mortifications which the barren and clumsy policy followed in the valley of the Upper Nile and elsewhere has made it undergo, and our rivals in colonisation will themselves be more disposed to extend us their consideration and friendship when they see us doing a sound and useful work."

### THE SOUTH EASTERN-CHATHAM WORKING UNION.

One result of the South Eastern and Chatham and Dover working arrangement which comes into force on January 1st next is that more liberal treatment has been accorded to season-ticket holders on both lines. The revised regulations applicable to "seasons" on the South Eastern and Chatham are now identical. The equal quarterly instalment system in payment for tickets has been adopted in the case of present holders, but new ticket-holders will be unable to avail themselves of this privilege until after the expiration of twelve months. They, however, will pay for their seasons by four instalments instead of three as heretofore. Another concession is the reduction in the deposit from 10s. to 5s., while annual tickets paid for in one amount may be deposited for not less than one and not more than two months, and a corresponding extension of the ticket granted.

The *South Eastern Gazette* says it has now been definitely arranged, under the South Eastern and London Chatham and Dover joint working scheme, that Mr. Gratwick shall act in the capacity of stationmaster, and that Mr. J. Roberts shall have sole charge of the goods traffic, at the Maidstone stations of the two companies. Mr. Gratwick has been stationmaster at the London Chatham and Dover station for a good many years past, and has gained the esteem of the travelling public as a very efficient and exceedingly courteous officer. Mr. Roberts, who is also to have control of the goods department of the Tovel station, has been goods manager for the South Eastern Company at Maidstone for a long period, and his sterling qualities are as highly appreciated by his employers as by the traders of the town. The inhabitants of Maidstone will cordially wish both gentlemen success in the discharge of their increased responsibilities, which they will take up on January 1st.

**EPPS'S COCOA.**—GRATEFUL AND COMFORTING.—"By a thorough knowledge of the natural laws which govern the operations of digestion and nutrition, and by a careful application of the fine properties of well-selected Cocoa, Mr. Epps has provided for our breakfast and supper a delicately flavoured beverage which may save us many heavy doctors' bills. It is by the judicious use of such articles of diet that a constitution may be gradually built up until strong enough to resist every tendency to disease. We may escape many a fatal shaft by keeping ourselves well fortified with pure blood and a properly nourished frame."—*Civil Service Gazette*.—Made simply with boiling water or milk.—Sold only in packets and pound tins, by Grocers, labelled—"JAMES EPPS and Co., Ltd., Homoeopathic Chemists, London."

## Notices to Readers.

The Offices of THE RAILWAY TIMES are at 2, Exeter-street, Strand, W.C.

Telegraphic Address:—RAILWAY TIMES, LONDON. Telephone No.:—1967 GERRARD.

All communications bearing upon literary matters should be addressed to the Editor.

Letters relating to Subscriptions, Advertisements, and other business matters should be addressed to the Publisher.

## TERMS OF SUBSCRIPTION.

Post-free to any address in the United Kingdom.

Three Months .....	£0 7 0
Six Months.....	0 13 0
Twelve Months.....	1 5 0

A special discount of 6d. on quarterly, 1s. on half-yearly, and 2s. on annual subscriptions will be allowed for payment in advance.

THE RAILWAY TIMES may be had at all bookstalls, and of any newsagent throughout the kingdom, at 6d. per copy.

Back numbers will be charged for as follows:—If dating back more than a year, 1s. per copy; if more than two years 2s. per copy.

## REMITTANCES.

Money Orders, Cheques, &c., should be drawn in favour of Lionel Bridgland, and should invariably be crossed "London and County Bank." Stamps will be taken in payment of small sums, say under 10s.

## EDITORIAL.

All communications must be authenticated with the name and address of the writer, which will be received in strict confidence.

## Forthcoming Meetings.

Dec. 30—Bansi Light Railway (Half-yearly), Winchester-house, at 12.

Jan. 3—Great Eastern Railway (Holders of Laing's Mortgages), Liverpool-street Station, at 12.

Jan. 11—Chicago Great Western Railway (Annual), City Terminus Hotel, at 2.

Feb. 6—Zafra and Huelva Railway (Special), Madrid.

**The Level Crossing at Atherstone.**—The successful action by the Warwickshire County Council to restrain the London and North Western Railway Company from running trains over the level crossing at Atherstone at a greater speed than 4 miles an hour has resulted in the determination of the company to give Atherstone the cold shoulder, so far as fast traffic is concerned, and to make an entirely new line direct from Nuneaton to Tamworth. It was found, when the action was tried, that while a large number of expresses were being run at a high speed over the level crossing at Atherstone, which is on the high road from London, the company had really no power to exceed 4 miles an hour. The new route from Nuneaton to Tamworth will be called the "fast line," and will be shorter and have better gradients than the existing railway. The present line through Atherstone will afterwards be known as the "slow line," on which the rate of speed at the level crossing will be in accordance with the county authorities' requirements, and there will be no necessity for an over bridge. The new railway will pass some distance from Atherstone.

## MORE LIGHT WANTED.

The season of English railway reports is drawing near, to be followed in due course, and certainly with no undue haste, by the general returns of the Board of Trade and the final report by the same authority on the year's railway working. Inasmuch as the official compilations do not give much more information than can be gained from an intelligent scrutiny of the companies' reports, taken collectively, it is primarily to the initiative of the companies that those interested in the railway progress of the country must look for the information upon which to base their forecasts for the future and their reviews of the past. The meagre nature of the information contained in the Board of Trade publications, to say nothing of the "find out for yourselves" description of the general returns, has often been pointed out in these columns. It is not too much to say that British railway statistics are as backward as the industry whose progress they profess to chronicle is healthy and up to date. The tendency of goods rates to rise or fall, the average haul of goods and length of passenger journeys, the average fare per mile paid by passengers of each class—these are matters which if set out in tabular form can and do afford in other countries the bases of far-reaching railway policy with untold effect upon the welfare of the railways and the country. Why our Board of Trade and our railway managers will not adopt the ton-mile and the passenger-mile system of statistics is beyond our power to explain. Such matters as we have mentioned, and many others, of technical importance if not of so general public interest, depend entirely upon this basis of comparison of results. That an expressed desire to elicit the information on the part of the Board of Trade would settle the matter we have no doubt. The question of expense is hardly deterrent, for we have good reason to believe that more than one great company already keeps such detailed record for its own information. Then there arises only the possible objection that trade secrets might in this way become divulged by the ingenuity of the professional critic to the advantage of actual or potential competitors. We are bound to say that such disadvantage, even supposing it exists, would be more than outweighed by the graphic way in which the companies, as a whole, would become enabled to dispose of the wholesale accusations of high rates and uneconomical management made against them by not irresponsible parties. Had it been within the power of the companies to point to an average mileage rate, steadily declining under normal conditions of competition and technical progress, a powerful weapon, and one easily understood, would have been placed in the hands of those who reasonably opposed legislative interference between 1888 and 1892. Similarly, the great increase in passenger train mileage and in passengers carried, compared with the receipts from this class of business, would probably show, by the giving of actual passenger mileage, that fares have suffered an all-round reduction, which in itself is a complete answer to any charge of indifference to the public demand for cheaper transportation. Here are the figures from the general returns relating to England and Wales, in which, it need hardly be said, the table is not given at all, but from the crude particulars in which the following has been calculated:—

Year.	Average receipts per				
	Passenger.*	Ton.			
	First Class.	Second Class.	Third Class.	Minerals.	General goods.
	d.	d.	d.	d.	d.
1888.....	24.6	9.7	6.7	19.4	66.9
1889.....	26.0	9.9	6.8	19.6	66.6
1890.....	25.7	9.3	6.8	19.8	66.5
1891.....	25.2	8.9	6.8	20.0	67.1
1892.....	24.8	8.7	6.7	20.0	66.8
1893.....	24.7	7.8	6.7	19.3	67.2
1894.....	23.9	7.3	6.6	18.6	65.3
1895.....	24.9	7.3	6.6	18.4	63.3
1896.....	24.8	7.6	6.5	18.7	62.5
1897.....	24.5	8.4	6.4	18.0	61.1

These figures are intentionally taken only to the first place of decimals, since it is desired merely to illustrate the tendency. Now without mileage information it is obvious that the almost uniform decrease in the receipts per passenger and per ton might be due to a lesser length of journey in each case, combined with an actually higher rate or fare. From other indications—not of course to be found in this or, indeed, in any table—there are good grounds for believing the exact opposite to be the case, and the reduction to be due to a lowered scale of remuneration with perhaps even an increased haul in each case. This is an important point to ascertain, and it is one upon which the immediate prosperity of all concerned depends. Yet the Board of Trade gives no assistance. The general report for 1897 even goes so far as to say that “the inference would seem to be that the railway companies were doing the same amount of work in 1897 as in 1896 for a lesser monetary return. The figures, however, cannot be considered as conclusive in the absence of returns of the actual ton-mileage (and passenger-mileage).” Why should we be content with inference, when facts can be ascertained? Take again the question of train loads, by strict attention to which the American railways have, as we pointed out some time back, been able in part to compensate for lower rates by the greater weight hauled per train. For every goods train-mile run in 1897 there were carried on our English railways 2.28 tons of goods and minerals, as against 2.05 tons in 1893, and 2.12 tons in 1888. The figure in fact was actually decreasing up till the middle year of the decennial period, since when it has steadily increased. But not knowing how far the goods were carried, who can say if the actual train mileage has increased or decreased in proportion to the real amount of transportation work performed? Yet this also is of the first importance, as affecting the economical use of locomotives, rolling stock, and line accommodation, the latter becoming a more pressing question year by year as traffic becomes more crowded. To what extent also can mileage be reduced in proportion to the output of great industries during times of strike? The system for which we plead can answer this. Here and now it can only be said that in the disastrous coal strike year of 1893 the average receipt per ton of goods was actually higher than before, signifying in all probability the longer haul necessary, while the ratio of total tons carried to total miles run by goods and mineral trains was the lowest on record, due presumably to the reduction in the number of fully loaded trains of coal and to the higher proportion of the whole shown by general merchandise traffic which is not too easy to work in full train loads, or, indeed, in fully loaded trucks. These are a few only of the questions which every great railway nation except ourselves has found it necessary to ask and to answer. If the Railway Companies' Association, through the Clearing-house, wishes to do something to advance the interests of the great bodies it represents, we cordially recommend this reform to its notice.

\* Excluding season-tickets.

## THE CHINESE AMERICAN RAILWAY.

The concessionary kaleidoscope in which the embryo railway system of China is revolving has brought up this week the most interesting production which has as yet emanated from that interesting country. The Chinese American railway will not only be one of the most important trunk lines passing through one of the richest portions of the empire, but the terms on which it is to be built and worked may, no doubt, serve as a model for the many railways which have been talked of but which have not yet emerged from the talking stage. Readers of THE RAILWAY TIMES are habitually kept well posted up in the many and oftentimes perplexing developments of the situation, and in furtherance of our policy we now call attention to the salient conditions under which this Americo-Chinese project is to assume definite shape. To commence with, the nationality of the promoters is in itself a guarantee against territorial designs, and of preferential or exclusive treatment in the subsequent working. Traversing, as this railway will, the district in which the great trade focussing upon Shanghai and Canton has its sources, it must be a matter of profound satisfaction to Englishmen to feel an assurance on this head. The financial control of the railway will practically find its headquarters in Washington, as will be understood from a consideration of the manner in which the capital is to be raised. The promoters and real owners of the railway are the American-China Development Company, a corporation whose agents have at one time or another examined most of the projects now in the hands of other concessionaries. We need only instance the Shansi railways, now to be built by the Peking Syndicate, which lines were reported upon by the American engineers as exceedingly difficult and costly of construction owing to the nature of the country to be traversed—that of the dreaded loess formation. The Peking Hankow project—now ostensibly in Belgian hands, though practically Russian, was another line angled for by the Americans some time back, and, with others, was not improbably lost or designedly passed by in face of the onerous conditions sought to be imposed for political reasons. The Canton Han-Kow Railway will, however, lack the difficulties (political, financial, or technical) which beset other railway schemes in China. To “save face” the concession appears to be nominally granted to the Taotai Shêng, whose name is familiar in connection with railway development, or the lack of it. Under Shêng, as director-general, the “China Railway Company” is formed to build and work the lines. This company will be financed to the extent of 4 millions sterling by the American company already mentioned, which will receive mortgage bonds to that amount, issued at 90, and bearing 5 per cent. interest. The bonds will be fully secured on the railway and its equipment, and will be countersigned by the Chinese Minister in Washington. Thus the American company is placed as to the China Railway Company in a position analogous to that assumed by the Russo-Chinese Bank to the so-called Eastern Chinese and other Russian lines in the north, with the exception that whereas the bank is a political institution actually drawing its supplies from the Russian and French treasuries, the money found by the American company will doubtless be offered for subscription to the public. The provision that the officials of the railway shall be appointed by the American company or by a department to be formed “similar to that of the Chinese Customs,” is further evidence of the freedom from native control and corruption, since the imitation of the Customs' administration presupposes the appointment of an American or European supervisor working on the lines of Sir Robert Hart. The actual work of construction is shown to be practically unfettered in specifically leaving the

purchase of materials to be made in the cheapest open market; and in this respect the conditions compare satisfactorily with those obtaining on the Russian lines in the north. As regards return on capital over and above the 5 per cent. carried by the bonds an unusual and, we think, beneficial provision is included. This in effect gives a bonus to the finance company of one-fifth of the net profits after the railway company has paid the working expenses and fixed charges. The remarkable feature is, however, the payment of this bonus in debenture scrip of the railway which can be issued up to one-fifth of the cost of the line, which we take to be one-fifth of the 4 million capital already referred to. The railway company has the right of redemption of these debentures at par at any time, and any not so redeemed will be automatically extinguished at the end of forty-three years. This matter is not very clearly expressed in the telegraphic summary, and we take it to mean that the railway company must annually apply one-fifth of its net profits to the redemption, and that it is calculated that in the period mentioned these payments will extinguish the 800,000*l.* debentures. If this be correct, the net profits would appear to be estimated at an average of exactly 100,000*l.* per annum, of which 20,000*l.* will go to the finance company for the debenture charge, while 80,000*l.* will remain available for the railway company after paying its 5 per cent. mortgage in these on the 4 millions. The period of forty-three years includes the three years within which the railway is to be completed, and in which, of course, no debenture redemption would be necessary. We have only to add that the railway company is to establish technical schools for the education of the Chinese as railwaymen to show that the framers of the conditions have evidently overcome many of the native scruples and objections to the ways of the "foreign devil." Clauses prohibiting native interference with survey and working parties are of a value proportionate to the influence of the company with the local mandarins. We look in vain for any reference to the method to be adopted for the compulsory acquisition of land. On this point three-quarters of the local trouble in railway construction is to be expected, and it is unfortunate that no definite indication is given. With this exception the scheme must be said to serve well as an example to follow.

### THE HOME RAILWAY POSITION.

Just a year ago, in an article entitled "Will Railway Dividends show further increase?" we stated the reasons for anticipating a change in the direction of railway profits. We showed that for the four half-years then preceding there had been a general increase in railway dividends, but pointed out that in spite of further increase in gross receipts net profits were not likely to improve. We said:—"It is desirable to bear in mind that the proportion of additional net profit secured by the railways from the growing traffic has been a declining one throughout the past four half-years, and so small was the margin of extra profit last half-year as to point to the probability of this half-year's extra revenue being altogether wiped out by the extra expenditure. We fear that will be the case, and that the best that can be looked for is a maintenance of the dividends for the current period. . . . Indications are that the turning point in railway dividends is approaching." Our forecast has been exactly borne out by actual results for the past two half-years. For the second half of 1897 the twelve leading companies showed a gross increase of 1,253,000*l.*, but in working expenses there was a still larger increase of 1,304,000*l.*, so that, apart from the growth in capital charges, there was a decline in the profit available for the

ordinary shareholders. In the first half of 1898 the same features were observable, though in a more marked degree. The gross increase of the twelve leading companies then amounted to 914,000*l.*, but the increase in expenses was 1,198,000*l.* In the first half of 1898, moreover, there was a larger increase in capital charges than had been witnessed in any half-year since 1894, thus aggravating the adverse influence upon ordinary dividends of the decline in net profits. To show the distinct change that has come over railway profits during the past twelve months, we tabulate below the increases and decreases in the ordinary dividends paid by the fourteen principal lines for the second half of 1897 and the first half of 1898:—

Company.	Changes in rate of ordinary dividends.	
	2nd half of 1897.	1st half of 1898.
Caledonian.....	No change.....	— $\frac{1}{4}$
Great Central .....	— $\frac{1}{4}$ .....	No change.
Great Eastern .....	+ $\frac{1}{4}$ .....	No change.
Great Northern .....	— $\frac{1}{4}$ .....	* — $\frac{1}{4}$
Great Western .....	No change.....	— 2 $\frac{1}{2}$
Lancashire and Yorkshire .....	— $\frac{1}{4}$ .....	No change.
London and North Western .....	— $\frac{1}{4}$ .....	— $\frac{1}{4}$
London and South Western .....	+ $\frac{1}{4}$ .....	— $\frac{1}{4}$
London Brighton and South Coast... ..	+ $\frac{1}{4}$ .....	— $\frac{1}{4}$
London Chatham and Dover .....	No change.....	† + 1 $\frac{1}{2}$
Midland .....	— $\frac{1}{4}$ .....	No change.
North British .....	No change.....	— $\frac{1}{4}$
North Eastern .....	— $\frac{1}{4}$ .....	No change.
South Eastern .....	+ $\frac{1}{4}$ .....	— $\frac{1}{4}$

It will be observed that for the second half of 1897 there were six declines, three of which were of  $\frac{1}{4}$  per cent.; but there were only four increases in dividend, all of  $\frac{1}{4}$  per cent. For the first half of 1898, the result was still more clearly indicative of retrogression, for eight companies showed declines and only one any increase. The latter was an increase of 1 $\frac{1}{2}$  per cent. in the dividend on the Chatham second preference stock and represented only 13,000*l.* in all, most of this sum having been derived from the extra balance carried forward at the end of 1897. Of course, the Welsh coal strike in the first half of this year adversely affected several companies, including the Great Western, whose dividend had in consequence to be reduced by 2 $\frac{1}{2}$  per cent. The three principal local railways—the Barry, Rhymney, and Taff Vale—from the same cause had to pass their ordinary dividends altogether last half-year, and again this half-year they will all suffer with the Great Western from further losses in gross receipts prior to the settlement of the dispute in September last. But it must not be overlooked, in making any general survey, that some other companies were specially benefited by this abnormal state of affairs. Among these were the North Eastern, Midland, and North Western, which had increases in mineral traffic partly attributable to the stoppage of South Wales supplies. The half-year now drawing to its close has been marked by exceptionally good gross traffics. Our weekly summary of traffic publications shows an even larger aggregate increase this year than for the corresponding period to date. It amounts in fact to nearly 3 $\frac{1}{2}$  per cent. on the average, in spite of the losses sustained by various companies in July and August, owing to the continuance of the South Wales dispute. Bearing in mind that for the second half-years of 1895 and 1896, as well as 1897, our railways showed general expansion in gross revenue, this further marked increase in 1898 is very encouraging. When we turn to the dividend prospects, however, it must be admitted that the outlook is not at all promising. It is practically certain that the rate of working expenses will take another step forward. The larger growth in expenses than in gross receipts witnessed in the last two half-years is likely to be again in evidence, and

\* Increased balance carried forward, including  $\frac{1}{4}$  per cent. reserved for deferred stock.

† On second preference, for year to June 30th, 1898.

in a more pronounced form, so that only companies with very large additions to gross receipts can expect to increase or even maintain their dividends. In addition to growing wages, and higher charges for rates and taxes, the rise in the price of materials is becoming an important factor, and we need hardly remind our readers of the growth in capital charges which was so prominent last half-year, and is likely to be repeated for the period now drawing to a close. We have no hesitation in saying, therefore, that there will be a decided further decline in home railway dividends on the average for this half-year, and that increases are only to be looked for in a very few favoured cases.

### GREAT NORTHERN DEFERRED.

The relatively low price of Great Northern deferred ordinary stock has lately attracted attention, and the price recently advanced to  $61\frac{1}{2}$  compared with 55 not long ago. For years this stock has declined seriously in market value from a number of adverse influences. First of all the dread of the loss of traffic it may suffer when the Great Central line to London is open has been a depressing influence ever since that line was sanctioned in 1893. Then the Great Northern has been rather free for a long time with its capital outlays. These, moreover, have been mainly on widenings and extensions, which are not of a very reproductive character, and during the last few years have been augmented by the defensive outlay necessarily incurred by the company in view of the approaching competition of its erstwhile partner. The ordinary stocks, in their existing form of preferred and deferred, further suffered from the fact that most of this capital was raised by the issue of that class of capital. On July 30th last we pointed out some very good reasons for supposing that the Great Northern would not suffer so much by the opening of the Great Central as had been anticipated in some quarters, and this view is apparently gaining some support, for when we wrote the price was  $55\frac{1}{2}$ . The Great Northern has provided itself with extensive terminal accommodation at the main centres of traffic where it has hitherto been partly dependent upon the co-operation of the Great Central. By its running powers over the Great Central system obtained as the price of withholding its opposition to the new London line in 1892, and also by its one-third interest in the Cheshire Lines Committee's system, the Great Northern obtained and maintains a considerable hold on all the existing routes of traffic. Besides, where competition for traffic is concerned, possession is nine-tenths of the law unless indeed there were any obvious advantages to be gained by using the new route—which there certainly do not appear to be in this instance. The Great Central has been opened some months for coal traffic, but there is certainly no indication in Great Northern receipts for the current period that any damage has been suffered by it. On the contrary, the gross results established by this company have been exceptionally satisfactory; for twenty-five weeks to date the gross increase published is 101,286*l.*, or nearly 4 per cent.—certainly above the average rate of improvement for the current half-year. But for the necessity it will be under of providing against any unfortunate loss which it may possibly encounter next year, the company would probably be in a position to pay a higher dividend for the current year than for 1897. For the first half of 1898, it will be remembered, the Great Northern did very well indeed. It could easily have paid the same dividend as for the first half of 1897 and had something to spare. Instead of paying everything away, however, it set aside the  $\frac{1}{4}$  per cent. due to the deferred—the same as in 1897—and only paid the preferred ordinary dividend. After doing this, it was left with a balance to carry forward of

16,113*l.*, against only 4,596*l.* in 1897. With the excellent gross results alluded to above, there can be no question about the ability of the company to pay the same dividend for this year as it paid for 1897, that is  $2\frac{1}{4}$  per cent. But for the special circumstances arising from Great Central competition it would certainly be in a position to do better than this. Under the circumstances, however, the board may very likely consider it their duty to conserve the resources of the company until the effects of complete competition are gauged by actual experience. In some respects it is even possible that this competition will make the management of the Great Northern more enterprising; indeed, we hear of evidence that this is the case. There is, further, some hope that force of circumstances may bring about some economies in the working expenditure of this company. At present, and indeed for many years past, its ratio of expenses to gross receipts has been higher than that of any leading company. For the past two half-years the ratio has been 60·77 and 62·76 per cent. respectively, or about 6 per cent. above the average rate of the railways as a whole. Early in the week the report that the company's Bill for the forthcoming session will contain powers for a further  $1\frac{1}{2}$  millions of share capital caused some decline in the market value of the deferred stock. On Tuesday this stock fell to  $59\frac{1}{2}$  after having been  $61\frac{1}{2}$  only two days previously. Most of the new capital will apparently be required for projected widenings of the existing line. It is to be noted that power will be sought to make the issue either in the form of ordinary or preference. For the last three years the company has issued its new share capital in the form of 3 per cent. preference stock, and this has to some extent relieved the ordinary shareholders. Whether this course will continue to be adopted must depend largely upon the effects of the approaching competition on its rate of ordinary dividend, though obviously the cheaper method of raising further capital would be by the issue of preference stock. A suggestive comparison can be drawn between Great Central preferred ordinary quoted at 65 and Great Northern deferred at only  $59\frac{1}{2}$ . The former now receives a dividend of  $1\frac{1}{2}$  per cent., and next year may be confidently expected to get nothing; whilst Great Northern deferred now gets  $2\frac{1}{4}$  per cent., and may fairly be expected to get a moderate dividend next year. An exchange from the Great Central to the Great Northern stock would seem to be a sound operation.

### THE NORTH WESTERN IN IRELAND.

We have dealt from time to time with the important developments in the South of Ireland and in South Wales, arising out of the joint schemes of the Great Western, and the Great Southern and Western railway companies. These schemes occupied a prominent place in the railway legislation of last session, and will again claim a large share of attention in the forthcoming session. These matters all turn upon the important project for the new steamboat service between Fishguard and Rosslare, Parliamentary powers for which were obtained this year. Both the Great Western and Great Southern and Western companies have agreed to subscribe large sums to carry out this enterprise, and in the coming session powers will be asked by the Rosslare Company to permit those two companies to guarantee its capital. A further important development in the same connection is the agreement arrived at between the Great Southern and Western on the one hand, and the Waterford and Limerick and Waterford and Central Ireland on the other, for absorption by the first-named company. Though the shareholders are agreed on the terms, Parliamentary sanction has to be obtained; and as we have pointed out on more than one occasion, bitter public opposition is threatened. On Monday last a long

discussion adverse to the scheme took place at the meeting of the Limerick Harbour Commissioners. Mr. A. W. Shaw, who is, or was until not very long ago, a director of the Waterford and Limerick Railway, attended this meeting, and gave a statement in reference to the "railway question." Mr. Shaw has taken up a curious attitude all through this business, having been one of the directors who opposed the transfer to the Great Southern and Western under circumstances fully recounted by us on July 23rd last. He still apparently entertains the delusion that the Waterford and Limerick shareholders could get better returns by remaining as they are than by accepting the handsome offer of the Great Southern Company—terms which by the way the shareholders have accepted, in spite of Mr. Shaw's advice. Of course this procedure of the Great Southern Company has the active support of the Great Western. Apparently the North Western are getting alarmed by the comprehensive character of these bold schemes, and are beginning to wonder where they come in. Obviously, the Great Western hopes by this new route to secure a share of traffic to the South and West of Ireland which at present goes *via* Dublin and Kingstown. The Great Southern and Western has hitherto been the principal partner of the North Western in the development of this traffic and in the through service provided for the American mails *via* Queens-town. In coquetting with the Great Western the Great Southern has estranged the North Western, which, moreover, holds 124,000*l.* of Great Southern stock, and opposition is threatened from that quarter. We reported last week that Mr. Burgess, the North Western Company's manager in Ireland, had been interviewing interested parties in Waterford, and that he announced the intention of his company to apply for running powers over the Great Western from Carmarthen to Fishguard, thus giving the North Western connection, *via* its Central Wales lines, with the new steam-boat route. One advantage of all this business is that the North Western has done a good deal to improve its Irish services, and it certainly cannot afford to be merely an uninterested spectator of these important movements. We note that the company's representative in Ireland is a candidate for election upon the Dublin Port and Docks Board. In his address Mr. Burgess points out that the North Western are "the heaviest payers of dues to the Port of Dublin" and that they have spent, and will further spend, large sums at North Wall. Clearly the company, with such important interests at stake, is entitled to direct representation, and we note that the *Irish Times* supports the claims of Mr. Burgess. One of the gravest injustices which railways suffer is the lack of control over public authorities to which they are frequently the largest contributors, and this is a commendable attempt to overcome the difficulty.

### PASSING NOTES.

The traffic receipts for the week ending December 18th, on thirty-three of the principal lines of the United Kingdom, amounted to 1,666,686*l.*, which was earned on 19,253½ miles. For the corresponding week in 1897 the receipts of the same lines amounted to 1,587,026*l.*, with 19,034½ miles open. There was thus an increase of 79,660*l.* in the receipts, and an increase of 219 in the mileage. The aggregate receipts for twenty-five weeks to date amounted on the same thirty-three lines to 44,691,670*l.*, in comparison with 43,208,309*l.* for the corresponding period last year; increase, 1,483,361*l.*

A special general meeting of the London Brighton and South Coast Railway Company will be held on January 25th for the purpose of considering, and, if thought fit, approving and passing resolutions which will then be submitted (a) authorising the company under the powers of the Newhaven and Seaford

Sea Defences Act, 1898, to guarantee the payment of a dividend of 4 per cent. per annum upon the sum of 25,000*l.*, part of the additional capital of the Newhaven Harbour Company by that Act authorised to be raised, and (b) approving an agreement between the company and the South Eastern Railway Company continuing certain agreements now existing between the two companies for a further term.

In consequence of the great pressure of work in all the locomotive engineers' shops throughout this country (owing to the arrears left by the engineers' strike), and the utter impossibility of obtaining deliveries within a reasonable period, the Midland Railway Company have been compelled to place an order for twenty goods engines and tenders, which are urgently needed, in the United States. Ten of these engines are to be supplied by the Schenectady Locomotive Works Company and the remaining ten by the Baldwin Locomotive Works, Philadelphia. At the present time the Midland have 200 engines on order with English firms.

At a meeting of the Hull Chamber of Commerce on Monday a letter was read from Mr. R. Bower, who wrote asking that a resolution should be submitted by the Chamber for the consideration of the Associated Chambers, urging the Government to initiate legislation to facilitate the adjustment of complaints in regard to railway charges and for granting effective control over railways generally. On the suggestion of Sir James Woodhouse, M.P., it was decided to write Mr. Bower intimating that the council was in sympathy with the object he had in view, and would consider whether something could be done in the direction indicated.

Commencing January 1st, the North-Eastern Railway Company will deliver parcels within one mile of the undermentioned stations in the neighbourhood of Leeds:—Crossgates, Garforth, Scholes, Thorner and Scarcroft, Bardsey, and Collingham-bridge. The charge will be 2d. for a parcel not exceeding 14lb. Parcels addressed to places beyond one mile and parcels exceeding 14lb. will be dealt with as at present, the addressee, on receipt of an advice-note from the station-master, making his own arrangements for obtaining the parcel from the station. This is an experimental arrangement.

The North Eastern Railway Company announce that from January 1st a reduced scale for first-class contract tickets will come into force on the company's system. In some cases the reduction is considerable. For example, the present rate of 8*l.* 10s. for 5 miles will be reduced to 6*l.* 11s. 6d.; for 8 miles, 8*l.* 8s. will be charged instead of 11*l.* 10s.; and for 10 miles, 10*l.* 10s. instead of 13*l.* 5s. The new scale will not apply to those branches on which second-class carriages are run until after March 31st next, when it is intended to abolish second-class bookings.

A representative of the *Financial News*, "in order to get at the truth," on Thursday called at the offices of the Buenos Ayres Great Southern Railway Company, and discovered that "the real facts are that Mr. Barrow has definitely given up his position as manager, and will assume a similar position on the Leopoldina railway." The *Financial News* made the same discovery about three weeks ago, and a month before that the "real facts" were announced in the columns of THE RAILWAY TIMES.

Information was received on Tuesday by Colonel Pryce-Jones, M.P., that the Treasury have agreed to make a free advance of 7,000*l.* towards the Welshpool-Llanfair Light Railway. The news was received with much satisfaction in Welshpool, as a free grant assures the construction of the line, which affects an immense district. Pending the Treasury decision the directors have completed the preliminaries, and an early start will be made.

At the Dublin City Sessions, on Monday, the Recorder, in awarding damages to a lady for a bag lost in transit from Dublin to London by the London and North Western Railway Company's service, said that there was a set of wholesale thieves in the company's employment at the North Wall. This was the fifth or sixth case of the kind, and there was no doubt that the company's servants had stolen the goods.

Before Mr. Justice Kekewich, on Saturday, the action of "Mason v. the British Railway Carriage Metal Fittings Company, Limited," came up on motion for judgment. It was a debenture-holders' action, and the Master in Chambers directed that there should be no pleadings. The defendant company admitted that the plaintiff held mortgage and debentures, and his lordship made the usual order.

The Blackburn Corporation, which recently acquired the tramway system of the borough for 77,000*l.*, and substituted electric traction, on Monday agreed to join the Darwen Corporation in buying the steam tramways connecting the two towns, and owned by the Blackburn and Over Darwen Tramways Company. The purchase-money is 48,500*l.*, Blackburn's contribution being 23,000*l.*

The Irish Tourist Association is actively engaged upon the arrangements for the proposed visit to Ireland during the next Whitsuntide recess of members from both Houses of Parliament. Several of the Irish railway managers have been interviewed on the subject, and a draft has been prepared of the itinerary for an eight or ten days' tour throughout the country.

Mr. Pegg, joint traffic inspector on the Rhymney and Great Western Railways at the Merthyr Dowlais and Llancaiach branches, was found dead in bed at his residence, Fair View, Merthyr, on the 16th inst. The deceased gentleman, who was well known locally, had suffered from pleurisy some months, but had apparently recovered.

The Highways Committee of the London County Council have provisionally settled the terms of the agreement with the London Tramways Company for the purchase of the company's under taking for 850,000*l.* The Parliamentary Committee proposes to seek power to enable the council to use electrical traction on its tramways.

By an oversight, which we greatly regret, we omitted to acknowledge our indebtedness to our Dublin contemporary *L. S. D.* for the paragraph on p. 793 of our last issue respecting Mr. M. F. Keogh's appointment to the secretaryship of the Dublin Wicklow and Wexford Railway Company.

Mr. Henry G. Burgess, the Irish traffic manager of the London and North Western Railway Company, has issued an address to the electors of the Dublin Port and Docks Board, purposing to become a candidate at the poll to be taken on January 10th.

Mr. Cumberland Lowndes, from the staff of the superintendent of the line at headquarters, has been appointed assistant-superintendent of the northern division of the London and North Western Railway at Liverpool.

Mr. George Henry Turner, general manager of the Midland Railway Company, has been elected chairman of the board of management of the Railway Benevolent Institution, in succession to Sir Henry Oakley.

The directors of the Midland Railway Company have just appointed Mr. Alfred Derry, chief clerk of the stores department at Derby, to the position of stores superintendent's assistant.

By the death of Baron Ferdinand de Rothschild, which took place on Saturday last, a vacancy occurs on the board of the London Brighton and South Coast Railway Company.

## Money and Stock Markets.

*The monthly settlement in Consols takes place on the 5th prox.; the fortnightly settlement in other Securities commences on the 28th inst.*

CITY, FRIDAY EVENING.

The MONEY MARKET has hardened somewhat during the past week, owing, in a measure, to the customary demand at this season for cash for holiday purposes. Call money is quoted  $3\frac{1}{4}$  to  $3\frac{1}{2}$  per cent., and short loans  $3\frac{1}{2}$  to  $3\frac{3}{4}$  per cent. Discount rates show a slight advance on last week's rate at 3-7-16 per cent. The Bank is doing a considerable business

in loans at 4 per cent. The Bank Return issued yesterday shows that the movement of coin and notes into circulation, usual at this time of year, has reduced the reserve by 878,000*l.*, making its amount 19,970,000*l.*; its proportion to the current liabilities is  $2\frac{1}{2}$  lower at 48 per cent. The market's resources have been further diminished by heavy revenue payments—usual at this season—which have added 1,301,000*l.* to the public deposits. On the other hand, there is an aggregate increase of 1,128,000*l.* in the Government and other securities, partly due to market borrowings, so that the private deposits show a decrease of rather over a million on balance. Since the Return was made up 220,000*l.* in sovereigns has been withdrawn for South America.

The Bankers' Clearing-house return for the week ending December 21st, 1898, shows a total of 198,014,000*l.*, as compared with 155,425,000*l.* for the corresponding period last year.

Subjoined is a comparison of the present position of the Bank of England, the Money Market, the prices of Consols, French Rentes, &c., with the position at the corresponding period of last year:—

	At Present.	Same Week last Year.
Coin and Bullion .....	£30,590,507	£30,783,393
Total Reserve .....	£19,970,417	£20,036,163
Proportion of Reserve to Liabilities...	48 per cent.	43 per cent.
Notes in Circulation .....	£27,420,090	£27,547,220
Bank Rate of Discount .....	4 per cent.	3 per cent.
Open Market ditto .....	$3\frac{1}{2}$ per cent.	3 per cent.
Consols (account) .....	110½d	112
French Rentes (account) .....	101 <i>l.</i> 77 <i>c.</i>	103 <i>l.</i> 15 <i>c.</i>
Paris Cheque Exchange .....	25 <i>l.</i> 26 <i>c.</i>	25 <i>l.</i> 24 <i>c.</i>
New York 60 days ditto .....	\$4 81½	\$4 81½

Silver bars are now quoted at 27½*d.* per oz., being 3-16*d.* lower on the week. A year ago the price was 26*d.*

Eastern exchanges are telegraphed as follows:—Bombay, 1*s.* 4*d.*; Calcutta, 1*s.* 4*d.*; Hong Kong, 1*s.* 11 11-16*d.*; Shanghai, 1*s.* 8½*d.*; Singapore, 1*s.* 11½*d.*

The premium on gold at Buenos Ayres has fallen during the week from 113'30 per cent. to 113'00 per cent., making the paper dollar (nominally worth 4*s.* 2*d.*) now actually worth 1*s.* 10'45*d.* A year ago the premium was 177 per cent., and the value of the paper dollar 1*s.* 5'18*d.*

The Valparaiso 90-day exchange comes over to-day at 12 11-16*d.*, being ½*d.* lower on the week. A year ago it was 17 15-16*d.*

The Rio de Janeiro exchange on London is 7½*d.*, being ½*d.* lower on the week. A year ago it was 7½*d.*

In the STOCK and SHARE MARKETS, Yankee rails have again been the centre of attraction this week, and contrary to the expectation of many there has been no set-back; prices, on the contrary, having in many instances been screwed above last week's level. The game was kept going merrily right up to the close to-day (Friday). Canadians, however, continue to move in the opposite direction, bad traffics, less hopeful dividend prospects, and a threatened strike of telegraph operators being the influences at work in this department. British railway stocks attract next to no attention just now, though an attempt has been made to galvanise a little life into Great North of Scotland deferred, which is nominally—only nominally— $3\frac{1}{2}$  higher on the week. The District bubble is again undergoing the process of inflation, and 40, 50, and even 60 is freely talked of as the figure to which the stock may be foisted. The bull card is amalgamation with the Metropolitan, which we are asked to believe will result in a saving of expenses to the tune of 50,000*l.* per annum! We used to be told that Chatham and South Eastern fusion would result in economies of 200,000*l.* a year. Where are those thousands now? In the Foreign Railway market the feature has again been the strength and activity of Nitrate shares, which are referred to at length in another column. On the week the ordinary are up  $\frac{3}{4}$  and the preferred  $\frac{5}{8}$ . Manila debentures have justified our remarks of last week by rising 3 points, but they have lost their activity, and now look like remaining neglected for some time. Brazilian shares and debentures

are generally better, and the same may be said of the majority of Argentines. Interoceanic of Mexico A and B debenture stocks are up 4 and 3 points respectively, Uruguay Northern debenture stock has risen 3, and United of Havana debenture stock  $3\frac{1}{2}$ , whilst Ottoman debentures are mostly a point or two lower.

The principal movements on the week, so far as they relate to securities in which the readers of this journal are likely to be most interested, are set forth in the following table:—

Name of Stock.	Rise.	Fall.	Name of Stock.	Rise.	Fall.

The Stock Exchange Committee has ordered the undermentioned securities to be quoted in the Official List:—Argentine Republic—Further issue of 31,200l. 4 per cent. railway guarantees rescission bonds, Nos. 722 to 731 of 1,000l.; 1,001 to 1,015 and 7,431 to 7,450 of 500l.; and 9,451 to 9,475 and 15,098 to 15,109 of 100l. each. Great Northern and City Railway Company—78,000 4 per cent. preferred ordinary or class A shares of 10l. each 2l. paid, Nos. 1 to 78,000l. Great Western Railway—Further issue of 1,799,150l. consolidated ordinary stock 75 per cent. paid, and 649,400l. consolidated ordinary stock fully paid.

Applications have been made to the Stock Exchange Committee (1) to appoint a special settling day in, and to grant a quotation to:—Costa Rica Electric Light and Traction Company (Limited), 130,000l. 5 per cent. debentures; Pekin Syndicate (Limited)—further issue of 10,000 ordinary shares of 1l. each; (2) to allow the following securities to be quoted in the Official List:—Argentine Republic—further issue of 95,000l. 4 per cent. railway guarantees rescission bonds, Nos. 1 to 10, 389 to 398, and 732 to 736 of 1,000l., 1,016 to 1,055 4,952 to 4,967, and 7,451 to 7,470 of 500l., 9,476 to 9,675, 23,462 to 23,481, and 38,573 to 38,672 of 100l. each. Northern Pacific Railway Company—\$1,797,000 additional prior lien railway and land grant 4 per cent. gold coupon bonds, Nos. M76,080 to M77,851 of \$1,000, and D20,051 to D20,100 of \$500 each.

A receiving order has been made in the London Bankruptcy Court against George Alfred Raikes, lately carrying on business as a stockbroker at 4, Copthall-chambers, City, and residing at Carlton-road, Ealing. The liabilities are believed to be considerable.

The Stock Exchange will be closed to-day (Saturday) and again on Monday next (Boxing Day).

The Puerto Cabello and Valencia Railway Company, Limited, notifies that Messrs. Glyn, Mills, Currie, and Co. will pay on January 2nd the balance of 1l. 5s. of coupon No. 22, due July 1st, 1898, of the first mortgage debentures of the company, less income-tax.

## Parliamentary Intelligence.

### RAILWAY BILLS FOR NEXT SESSION.

Saturday night was the latest time for depositing in the office of the Clerk of the Parliaments copies of private or local Bills which it is proposed to introduce when the two Houses assemble in February. Plans in connection with those Bills requiring them were, it will be remembered, deposited at the Private Bill-office at the end of last month, and it was the measures themselves, some of which do not require plans, and were therefore not included in the former list, that were handed in on Saturday. The Bills of interest to London include the Harrow and Uxbridge Railway, London Brighton and South Coast Railway (Pensions), South Eastern and London Chatham and Dover railway companies, West Metropolitan Railway, Great Northern and Strand Railway. The total number of Bills handed in was 267, as compared with 249 last year.

#### SOUTH EASTERN AND LONDON CHATHAM AND DOVER RAILWAY COMPANIES BILL.

The preamble of this Bill cites the statutes that have hitherto governed the relations of the two undertakings and the nature of those relations, and adds that, with a view to avoiding undue competition, and unnecessary expense and delays, and other inconveniences arising from diversity of interests, and to turning to the best account the respective powers and resources of the two companies, and, as regards the traffic dealt with by the Continental agreement, with a view also to the improvement and extension of the service between England and the Continent, it is expedient, and will be for the public advantage, that, subject to the provisions and enactments to be laid down, the undertakings should be used, worked, managed, maintained, and improved, from and after the passing of this measure as one concern, in manner and upon terms to be duly expressed. It is also stated to be expedient that the boards of the two companies should be incorporated and enabled to act conjointly as one board for the purposes to be mentioned, and that such powers as are to be conferred and prescribed should be exercised by a managing committee. As, however, these objects cannot be attained without legislative authority, Parliament is asked to enact the Bill now deposited. The measure provides that from and after its enactment the undertakings of the two companies shall be used, worked, managed, maintained, and improved as if the said undertakings were one undertaking and the two companies were one company. The directors of the two companies who hold office at the passing of the Act, except James Staats Forbes (who is hereinafter appointed general adviser of the joint board and the managing committee), and their successors as directors of the two companies respectively, for the time being, are to be incorporated as a joint board by the name of the South Eastern and Chatham Railway Companies Joint Board, and by that name shall be one body corporate, with perpetual succession and a common seal, and shall be deemed to be a railway company within the meaning of the Railways Clauses Consolidation Act, 1845, the Railways Clauses Act, 1863, and of any other enactment passed or to be passed affecting railway companies, or incorporated with any Act relating to either of the two companies. The chairman of the South Eastern for the time being shall be the chairman of the joint board, and a director of the Chatham, to be nominated by the board of that company, shall be deputy-chairman. Any actions, suits, indictments, and proceedings, which, if a company instead of the joint board, had been by this Act authorised to work, manage, maintain, and use the undertakings might have been brought or prosecuted by or against such company, may be brought or prosecuted by or against the joint board, or against the company against which the same might have been brought if the Act had not been passed; but the prosecution or defence of any such actions, suits, indictments, or proceedings shall be conducted by the managing committee, and the managing committee shall indemnify the respective companies in respect of all such actions, suits, indictments, and proceedings; but nothing in the Act shall make the joint board liable for any act done or default committed by either of the two companies before the passing of the Act, or in respect of any matter not placed by the Act under their control or the control of the managing committee. All the powers and authorities, duties, and obligations vested in or attaching to the two companies, or either of them, or their respective directors or any committee of them, in relation to the following matters shall be transferred to and vested in or imposed on the joint board, to be exercised and carried into effect as provided by the managing committee:—(1) The working, management, and maintenance of the undertaking, and the use of the same for every kind of traffic; (2) the carrying on, management, and development of the traffic of the undertaking; (3) the renewal, alteration, enlargement, or improvement of stations, offices, factories, buildings, and other works, conveniences, appliances, and things belonging to the undertaking, and the construction or provision of additional stations, offices, factories, buildings, conveniences, appliances, and other things for the purpose of the same; (4) the use for the purposes of the said traffic and other purposes aforesaid of the rolling stock, steamboats, machinery, plant, equipments, appliances, stores, materials, and other effects vested in them as hereinafter provided, and the maintenance and renewal of the same, and the making of any improvements, additions, or alterations therein or thereto, or other dispositions with respect to the same; (5) the fixing, collecting, receiving, and enforcing payment of rates, tolls, fares, and charges; (6) the appointment and removal of officers, servants, agents, and workmen necessary for carrying out the purposes aforesaid; (7) the making and carrying into effect,

rescinding or varying of traffic and working agreements and arrangements with other companies and persons, and the running or working over or using or jointly managing of railways or portions of railways, stations, and works of or partly belonging to other companies, and the carrying of traffic thereon, and the requiring and using of facilities for traffic. As soon as practicable, and within one month after the passing of the Act, the joint board shall nominate and appoint an equal number of the directors of the two companies to form the managing committee, and such managing committee shall hold office for three years. At the expiration of every such period the joint board shall in like manner appoint a fresh managing committee to hold office for a like period, the previous members being eligible for re-election. Any member of the committee shall vacate his office if he cease to be a director of the company of which he was a director at the time of his appointment. Four members of the committee shall be a quorum, provided there be present at least one director of each company. Meetings shall be held at intervals of not more than a month, and in default any two members may at any time convene a meeting by not less than six days' notice delivered or sent to each member at his usual place of business or abode, or at the office of the secretary of the company of which he is a director. Mr. James Staats Forbes, chairman of the Chatham, is to be appointed general adviser of the joint board and managing committee, with power to attend and advise at all meetings of such board and committee, but without the power of voting for or against any resolution. The remuneration of the members of the committee shall be such sum not exceeding £. per annum as shall from time to time be fixed by the joint board, and shall be divided between such members in such manner as they may determine, and such remuneration shall be part of the expenses of the committee under the Act. The committee shall receive all moneys to be received in respect of traffic, and after payment or allowance thereout of any terminals or mileage or other proportion payable to other companies for through traffic and other proper deductions, and after payment of all outgoings and expenses chargeable to revenue, the net balance (to be called the net receipts) shall be divisible between the two companies in the proportions agreed or to be agreed on between them. Where under any existing or future arrangement of either company with any third company the receipts from traffic on or over any part of the undertaking or from any steamboat traffic are pooled or divided with such third company the amount to be brought into account under the Act shall be the amount received or retained in respect of such traffic in settlement with such third company. The amount received by the South Eastern under an agreement with the London Brighton and South Coast Railway Company, and now entered on its half-yearly revenue accounts as "proportion of Eastbourne traffic," shall not be included or brought into account, nor shall the receipts of the South Eastern included in the items entered in such accounts as "rent and hotel accounts, &c.," "transfer fees," and "London Brighton and South Coast Railway Company—use of lines between London and Redhill," nor the receipts of the Chatham included in the items entered in its half-yearly revenue accounts as "transfer fees" and "rent of property, &c., net," be so included or brought into account. The net receipts shall be divided between the two companies from time to time, as the managing committee may determine, and the respective proportions of the two companies shall be appropriated and distributed by their respective boards in the same manner as the net receipts accruing in respect of the undertakings of those companies respectively would have been applied if the Act had not been passed. Where any capital expenditure is necessary for any of the purposes of the Act, or of any other Act affecting the undertaking passed in this or any future session, then and in every such case the requisite capital shall be contributed by the two companies in proportion to their shares in the net receipts of the undertaking, and each company shall, on the requisition of the managing committee, pay as and when the committee shall prescribe the amount of such company's contribution. Each company shall be entitled to receive out of the gross receipts of the managing committee before any division of profits, interest at the rate of 3 per cent. per annum on the amount of the capital sums so contributed by such company, or which may be voluntarily contributed or advanced by it in place of the other company in case of its default; and each company shall also be entitled to receive interest at the like rate on the amount of its capital expenditure in respect of any new lines or works already commenced, but brought into use after 31st inst., or which may hereafter be constructed with the approval of the managing committee. If any question shall at any time arise in the joint board or the managing committee on which the directors or the only director of one company present differ from the directors or the only director of the other company present, the matter in difference shall, on the demand of any member present, be thereupon referred to the chairman of the two companies, whose decision, if they agree, shall be binding, and have the same effect as a decision of the joint board or managing committee, as the case may be. In case the question is so referred and the chairmen fail to agree, the question shall, on the statement in writing of either chairman to that effect, be referred to Lord Balfour of Burleigh as standing arbitrator, or to some person to be appointed as special arbitrator by him, or in some other manner. The Continental agreement shall be varied, modified, and enlarged, so as to give effect to the following provisions:—The managing committee shall be the joint committee for the purposes of the agreement, and shall have the management and control of the Continental and local traffic, the subject of such agreement and all expenditure in respect of the same shall be part of the expenses of the managing committee under the Act, and in lieu of the provisions contained in the agreement, for the division of the receipts from Continental and local traffic, such receipts shall be brought into account as receipts from traffic under the Act, without any deduction

or allowance for working expenses, which shall be defrayed by the managing committee, in accordance with the provisions of this Act. The two companies, or either of them, or the joint board or the managing committee shall not, out of any money by any act relating to the two companies respectively authorised to be raised, pay or deposit any sum which, by any Standing Order of either House of Parliament now or hereafter in force, may be required to be deposited in respect of any application to Parliament for an Act authorising them or either of them to construct any other railway or to execute any other work or undertaking. Nothing in the Act shall exempt the two companies, or either of them, or the joint board or the managing committee, or the railways of either of the two companies, from the provisions of any general Act relating to railways, or the better and more impartial audit of the accounts of railway companies now in force, or which may be passed before or after the commencement of this Act, or from any future revision or alteration under the authority of Parliament, of the maximum rates of fares and charges, or of the rates for small parcels, authorised by this Act to be fixed by the joint board. All costs, charges and expenses of and incident to the preparing for, obtaining and passing of the Act, or otherwise in relation thereto, shall be paid by the two companies in proportion to their respective interests in the net receipts.

## Law Intelligence.

### THE RAILWAY AND CANAL COMMISSION.

(Before Mr. Justice Wright (president), Sir F. Peel, and Viscount Cobham.)

LONDON TILBURY AND SOUTHEAST RAILWAY COMPANY v. GREAT EASTERN RAILWAY COMPANY.

Judgment was given on Wednesday in this case, which was an application by the London Tilbury and Southend Railway Company against the Great Eastern Railway Company, in respect of a charge of £14,000l. a year on the cost of widening the Blackwall line, said by respondents to be for the accommodation of the Tilbury Company's traffic to their docks.

Sir F. PEEL, in the course of his judgment, said the court had already given a decision between the parties, and in their judgment on the previous occasion they dealt with the liability of the Tilbury Company, under the Blackwall Railway Act, 1885, in respect of the widening of the Blackwall line from Stepney Junction to Fenchurch-street. The court had held that the Tilbury Company were primarily responsible for an annual rent on the entire cost, subject to any set-off in the form of any benefit which the Great Eastern Company might derive from increase of their traffic consequent upon the widening of the Blackwall line. It had not been possible, when judgment was given, to state what was the cost of the works which had been executed. That matter was referred to the arbitration of Sir Benjamin Baker, who found that the amount expended was £402,000l. After Sir Benjamin's report was made the Tilbury Company went to Parliament and obtained the London Tilbury and Southend Railway Act of 1898, which affected some of the grounds on which the court's judgment had been given, and rendered a re-hearing necessary. They had now to consider how far the judgment was modified by section 38 of the Act of 1898, which provided that payments by the Tilbury Company, additional to the annual rent which they paid for the widening of the line, should be calculated as from 1890, or such earlier year as, having regard to the circumstances, might be determined. The year 1890 was the last of the term given by the Blackwall Act of 1885 within which to effect the widening of the Blackwall line. The Act of 1898 provided that the benefit derived by the Tilbury from the widening was to be taken from some year not later than 1890, and he thought that was the year which should be taken, because five years was not an unreasonable time to allow for the execution of the works, notwithstanding that Sir Benjamin Baker had found that they might have been completed earlier. In ascertaining the amount claimed by the Tilbury Company against the claim of the Great Eastern Company they must have regard to the extent to which the Tilbury and Great Eastern companies respectively had derived benefit from widening the line and from additional accommodation. Since 1890 the traffic of the Blackwall Railway had increased, and the increase had been owing partly to the running of additional trains, and it seemed agreed that these new trains should be the real measure of benefit. It was contended by the Great Eastern Company that the trains between 9 p.m. and 7 a.m. should not be included, on the ground that the accommodation as it existed before the widening of the line was still sufficient for that traffic. The Great Eastern Company further contended that as only 1 mile 51 chains out of the 2 miles 56 chains of lines made had been used by the Tilbury Company, the corresponding part only of the Great Eastern trains running should be used as a set-off. The first claim seemed to him reasonable, but as to the second it seemed to assume that the Tilbury Company would not have put on any additional trains but for the additional accommodation, and that

their earnings on any part of the distance were due to that additional accommodation. The benefit which the Great Eastern Company derived from the widening consisted of the profit from their own or other companies' new trains, as well as new trains run by the Tilbury Company, and the widening had benefited the Great Eastern Company in the working of their traffic generally. Before the widening there were three lines, two up and one down, and the single down line had to be used in common by all the companies running trains on this railway. By the widening the number of lines was increased to four, now divided into the northern and southern line, each with one up and one down line. The northern lines were used by all the companies alike, the Great Eastern included; but the southern, as to passenger traffic, were used by Great Eastern trains only. In respect of this use of the southern lines, free from other companies, he had come to the conclusion that the Great Eastern Company ought to pay 500*l.* a year.

Viscount COBHAM said he was of opinion that, apart from the question of date raised by the section of the Act of 1898, the previous judgment of the court was substantially unaffected. Sir Benjamin Baker had ascertained that the cost of making the line was 402,000*l.*, and on that the annual charge was 14,500*l.* This had to be apportioned between the two companies. The Tilbury Company claimed that the benefit derived by the Great Eastern Company from increased traffic due to the widening should be set off against the sum they had to pay; that the additional trains should be restricted to the hours between 7 a.m. and 9 p.m.; and that for the purpose of calculating the benefit the year 1890 should be taken. Parliament, in the Tilbury Company's Act of 1898, had inserted a provision that any additional payments by the Tilbury Company should be for such years not later than 1890 as the arbitrator might determine. The Great Eastern Company had not completed the works before 1890, and by fixing 1890 they were only carrying out the provisions agreed upon between the parties, and were not giving countenance to an intelligible theory of anticipatory profits. The effect of the works executed had been, so to speak, to widen the neck of the bottle, and it could not be doubted, indeed, it was admitted, that it had facilitated the working of the line at least on the section of the line immediately adjoining. He was of opinion, therefore, that the table put in by the Great Eastern Company should be amended so as to include the traffic between Gas Factory Junction and Stepney Junction. He agreed with Sir F. Peel's conclusion as to the benefit which the Great Eastern derived from the widening in the way of facilitating their traffic. He was glad he was not called upon to interpret the obscure language of section 38 of the Act of 1898, but he could only suppose that had Parliament intended to legislate in favour of one of the parties it would have done so in clear and unmistakable terms.

The PRESIDENT said, with regard to the conjectural figure of 500*l.* a year for the Great Eastern fourth line, if either company desired to have that matter further considered, the court would give them a day early next sittings. As to section 38 of the Act of 1898, it was so inefficiently drafted that it was hardly possible to ascertain its meaning; in fact, he thought it was impossible. But when the history of the case and the former judgment were considered, the intention of those who passed the clause could be inferred with reasonable certainty, and he thought they were at liberty to construe it in the way they did. The new line was not opened until 1896, and the object of the new clause was to compel deductions to be made for any increase of traffic from 1890, the last year of the agreement between the companies, or such earlier year as might be fixed.

In reply to Mr. RUSSELL, the President intimated that an order carrying out the judgment of the court would be drafted by the registrar, and communicated to the parties.

#### CHANCERY DIVISION.

(Before Mr. Justice Romer.)

IN RE WREXHAM MOLD AND CONNAH'S QUAY RAILWAY COMPANY.

In the Chancery Division on the 16th inst., Mr. Justice Romer gave judgment in an adjourned summons in this case. The matter was before his lordship on a previous occasion, when his lordship delivered judgment which dealt with the case so far as one aspect was concerned. A subsidiary point which now came before the court was this:—The Wrexham and Mold Railway Company had a certain power of borrowing money on the debentures, and there were 175,000 A, 175,000 B, and 14,000 C debentures. The company banked with the North and South Wales Bank, and having exhausted their borrowing powers, they wrote to the bank and asked for an advance of between 9,000*l.* and 10,000*l.* for the purpose of paying interest that had fallen due on the debentures. The bank advanced the money asked for, and that money was applied in payment of the interest on the debentures. The bank had filed an affidavit, in which they swore that a sum of between 3,000*l.* and 4,000*l.* had been paid to the holders

of the A debentures and a similar sum to the holders of the B debentures, and they submitted that to that extent they ought to stand in the shoes of the A debenture-holders as against the B debenture-holders. That was to say, that when money was received by the receiver applicable for the payment of dividends as soon as all claims on the A debentures were satisfied the surplus should not be applied to paying interest on the B debentures, but should be applied to the payment of the bank claim. In giving judgment Mr. Justice ROMER said he would again point out the bank advanced its money under no contract purporting to give it security for the money, and that the B stockholders knew nothing of the source from which the money came which paid the former interest, and were not bound to inquire. He could not see any sufficient reason why the B stockholders should now find themselves placed in the position of having a charge second not only to that of the A stock, but to that of the bank. It was said they were not injured, because if the bank money had not been applied in payment of the A debenture interest it would still rank for payment. But suppose the case had been that the railway company had, at the time when the bank lent its money, other assets, which could and should have been applied in paying off the A interest, and that the railway company's insolvency had arisen from a subsequent and unexpected loss, were the B stockholders to be now affected because, instead of applying those other assets at the time in paying the A interest, the railway company chose to pay it out of the money borrowed from the bank; and if not, had the court to embark on an investigation as to what the exact pecuniary position of the company was at the time of the borrowing? He thought not. He could not accede to the application; it appeared to him to be wrong in principle, and supported by no authority. He thought the application failed, and the applicant must pay the costs incurred subsequent to his last order.

#### QUEEN'S BENCH DIVISION.

(Before Mr. Justice Day and a Special Jury.)

GILLETT v. THE METROPOLITAN RAILWAY COMPANY.

This was an action to recover damages for personal injuries sustained owing to the alleged negligence on the part of the defendants in leaving a staircase leading down to the platform of Farringdon-street station in a dangerous state and out of repair. The plaintiff is a builder about seventy years of age, and weighs about 16st. On January 1st, 1898, he was going down the staircase in question, when he fell and sustained the injuries complained of, owing, as he alleged, to the treads being worn and giving way under his weight. The defendants admitted that their general stations inspector on December 7th, 1897, ordered the treads to be repaired and that the repairs had not been done at the time of the accident. For the defence, witnesses who did the repairs on January 4th, 1898, were called, and stated that the treads were made of pitch pine, were sound, and could not split; that the nosings of the treads were worn off at the edges, and new nosings had to be put to the treads; and that the staircase was properly lighted.

Mr. Justice DAY, in summing up to the jury, said it would be clear negligence in the defendants if the plaintiff fell by reason of the nosing wearing away. The railway company were only liable to give reasonable safety, and were not obliged to give new legs for a person to walk on. If the plaintiff faltered and fell, then the defendants would not be liable. They must be satisfied that the railway company were guilty of negligence.

The jury returned a verdict for the defendants.

## General News.

#### NITRATE RAILWAY PROSPECTS.

A further rise has taken place during the past week in the price of Nitrate Railway shares, and, judging from what one hears in the market, they are likely to touch a much higher level yet. A good deal of the support comes from Paris, where, of course, the dealings are confined to the ordinary shares, though the improvement in these is reflected on the preferred and deferred. It seems to be generally agreed that the present year's profits will leave about 12s. dividend for the ordinary shares, and with the balance brought forward from last year a total of about 30s. per share might be paid. As to the expediency or otherwise of distributing the accumulated profits, we wish to point out that we do not express any views, one way or the other. What we have repeatedly done is to call attention to the promises held out by the board that these balances would be divided as soon as the capital and revenue account, could be adjusted, the chairman's last utterances on the subject being at the annual meeting in May last, when he said:—"On our last year's balance-sheet we said that the raising of capital in order to cancel the amount paid from revenue for capital account

should have the immediate attention of the directors, but in view of the present quotation of our bonds we think it would be impossible at the present time to secure money from the public on a second bond, and we have, therefore, decided to allow matters to remain as they are for the present, and we hope by careful administration of your interests, and by limiting the dividend to a small amount, that the price of our bonds will again rise to par. Should that happen we shall have no difficulty in raising the amount which has been expended out of revenue on capital account." As we said in our last issue, it will be interesting to watch and see whether the shareholders get their promised dividend, or whether we shall once more witness the familiar spectacle of Mr. Harvey swallowing his own words. And there, for the moment, we can leave the question.

(From "The Financial Times.")

After a long period of inactivity and low prices Nitrate Rails have recently received some attention, and on some buying on a market bare of stock have risen considerably. French and Belgian holders who went into these shares at high prices in the more palmy days when Colonel North was at the head of affairs seem to have taken the opportunity of averaging, and this has assisted the advance. On the 30th ult., when the ordinary shares stood at only 6, we drew attention to their favourable prospects, and the correctness of our views has very soon been confirmed, for they have since reached 7½, and now stand at 6½. To show how great the depreciation has been in former years, we give below a comparison of the highest and lowest prices of the ordinary shares in each year since 1889:—

Year.	Highest.	Lowest.
1889 .....	28½ .....	20½ .....
1890 .....	21½ .....	12½ .....
1891 .....	19½ .....	11½ .....
1892 .....	19½ .....	12½ .....
1893 .....	17 .....	11½ .....
1894 .....	19½ .....	13½ .....
1895 .....	20½ .....	11½ .....
1896 .....	12½ .....	4½ .....
1897 .....	6½ .....	4½ .....
1898 .....	7½ .....	4½ .....

It will be observed that last year the price fell to about one-seventh of that which existed in 1890, and in the preferred and deferred the fall was equally severe. The unpleasant disclosures which followed the investigation into the company's affairs last year, combined with the fall in traffics, due to the demoralisation of the nitrate industry, were sufficient to account for this depreciation. In 1889 the dividend paid was 25 per cent., and down to 1893 20 per cent. was paid; but for 1896 nothing was forthcoming, and in 1897 only 3 per cent. was distributed. Of course, our readers are well aware that we have not been backward in exposing the evils connected with the nitrate industry in the past, but we are quite prepared to acknowledge that there is the possibility of a recovery in the various interests dependent thereon. In fact the exposure of the old methods of administration in the case of the Nitrate Railways must have a beneficial effect on the future of this company. One mistake the old management made was paying away practically every available penny in the good years experienced down to 1893. It is true that a paltry reserve fund of 40,000*l.* has been set up, but it is a reserve in name only, and the last accounts showed that it had, together with other funds which ought to have been kept in liquid form, been utilised for capital purposes, and thus locked up in the business. This is a fair specimen of the financial methods which have helped to aggravate the effects of the recent reverses which the company has suffered. To the same causes must be attributed the fact that in 1897, though 4 per cent. was earned, only 3 per cent. was paid. In the year 1896 the position was still worse, for 7 per cent. was earned and nothing at all paid. The explanation of the failure to pay any dividend was given in the report for the year 1896 as follows:—"The position of the company in this respect is entirely attributable to the large amount of revenue which in successive years has been expended upon capital account, amounting to nearly 200,000*l.* The directors think it inopportune to bring forward at the present time any proposal for providing further capital; but this is, nevertheless, a question which will have to be dealt with before long, owing to the difficulty of carrying on the working of a railway in an efficient and satisfactory manner with a closed capital account." The question is, When will the board consider the time opportune for putting the capital account on a proper footing? If we mistake not, that time is rapidly approaching, and it is probable that advantage will be taken shortly of the improvement in the position of the company to raise the needed additional capital. As the company now stands, we believe it could very easily place an issue of, say, a quarter of a million 7 per cent. preference stock at round about par. Such an issue would require only 17,500*l.* for its service, and the proceeds would enable the company to put the net revenue account

upon a proper footing, and also provide for further possible capital requirements for some time to come. In regard to the accumulated surplus from former years the position is as follows:—

Surplus in 1895 .....	£13,192
" 1896 .....	106,568
" 1897 .....	16,364
<b>Total .....</b>	<b>£136,124</b>

This, as we pointed out before, is equal to 8 per cent. on the ordinary capital, or 16*s.* per share, apart from the profits for 1898. Last year the profits earned available for the ordinary shares were 64,385*l.*, equal to nearly 4 per cent. This year, however, the company will not have to bear the heavy outlay of 5,000*l.* for expenses of the Investigation Committee incurred in 1897, whilst debenture interest, owing to the operation of the sinking fund, will be lower, though the sinking fund charge itself is correspondingly increased. In order to earn 5 per cent. on the share capital it is really only a matter of 10,000*l.* more than was earned in 1897. Recent fortnightly traffics have been excellent, and they are expected to be good for the remainder of 1898. The following shows the results for the last four fortnights published:—

Date.	1898.	1897.
To October 16th .....	£29,646	£21,510
October 31st .....	22,533	19,505
November 15th .....	33,204	18,411
November 30th .....	32,060	20,125
<b>Total two months .....</b>	<b>£117,443</b>	<b>£79,551</b>

In only two months the increase has been nearly 38,000*l.*, and what was formerly a considerable decrease in the aggregate traffic for 1898 has been converted into an increase at the end of November of nearly 15,000*l.* This sum alone, apart from further expected increases, should enable the company to show fully 5 per cent. of net profit available for its ordinary shares, apart from the accumulated surplus. Assuming that only 5 per cent., or 10*s.* per share, were distributed, that would be equal to the liberal return of 8 per cent. on the ordinary shares at their existing quotation, allowing for accrued dividend, quite apart from the fact that there is also available a surplus of 16*s.* per share from former years. If 5 per cent. were paid on the ordinary, the preferred would, of course, get the same rate—that is, 10*s.* a share—for until the rate exceeds 7 per cent., or 14*s.* a share, the deferred ordinary does not come in. On these shares at their existing quotation the yield, allowing for accrued dividend, would be over 10 per cent., and as they have the reversion to a further 2 per cent., they still look relatively the cheapest of the three issues. The deferred, of course, is at present entirely dependent upon prospects, but once the gap between it and a dividend were bridged it would quickly respond to such a change in its conditions, and offers the prospects of the largest relative improvement to the speculatively inclined. We have had occasion more than once to draw attention to the difference between the combined values of the preferred and deferred on one hand, and the quotation for the ordinary on the other; but this has now disappeared. On the whole, we think the immediate prospects of any of the three ordinary issues are good enough to make them promising purchases at existing low prices. The fact that over 25 per cent. of the company's obligations have been actually redeemed, and that the redemption is proceeding at a gathering pace, should also not be overlooked in considering the position of these shares.

(From "The Railway Journal.")

The shares of the Nitrate Railways Company are at last beginning to attract the attention of that section of the public which is generally to be found on the look-out for "neglected investments," offering a good return in the shape of interest, with the prospect of a substantial rise in market value. Until quite recently, the earnings of the line had been languishing, but, in the last month or so, things have taken a decided turn for the better, and the year looks like closing with a gross increase of 40,000*l.* to 50,000*l.* It is known to those behind the scenes that many economies in working have been effected during the past year, besides which expenses have been further affected by the low rate of exchange, the company's freights being based on the fixed value of 26*d.* per dollar, whilst the employees are paid in the currency dollar, worth at the present time 12½*d.* Estimating the gross receipts at 480,000*l.*, and the expenses at 47½ per cent., there would be a net revenue of 251,000*l.*, and after allowing for debenture redemption, interest, and other charges, there should remain available for dividend about 110,000*l.*, which would be equal to 6½ per cent. on the ordinary capital of 1,656,000*l.*, or 13*s.* per share, with 2,000*l.* to 3,000*l.* to spare. This should be quite good enough to give the shares a speculative value of about 10*l.*, quite apart from any scheme for distributing the 136,000*l.* balance brought forward from last year, which would be equal to an additional 8 per cent., or 16*s.* per share. It may be, of course, having regard to the

dubious methods under which the present board jumped into office, that the company is not yet in sufficiently good odour to successfully adjust its finances. On the other hand, the new board may be trusted to do its best, after the unpleasant revelations of last year, to ingratiate itself with the shareholders, and there are less likely things than that a dividend of 25s. to 30s. per share will be paid. But, as we have already hinted, 12s. to 15s. per share, as a minimum, is a "moral certainty," and that alone would put the shares to a much higher figure than that now ruling. As the memories of investors are proverbially short, we may remind them that in 1896, for which year the company paid no dividend whatever, the price of the shares ranged from 6*l.* to 13*l.* At the present moment they stand at 7½*l.*, and if they should be taken in hand by "the shop" that price might very conceivably be doubled.

#### NITRATE NOTES.

The traffic return issued on Saturday by the Nitrate Railways Company shows an increase for the first fortnight of December of 8,524*l.*, making the aggregate increase to December 16th 23,137*l.* The return was generally voted good, but we shall not be surprised if the last fortnight of the year results in a gain of 15,000*l.* or more. With miscellaneous "sweepings" the gross increase for the year will probably be over 40,000*l.*

As the chairman of the Great Boulder Proprietary Gold Mines, Limited (Mr. A. R. Robertson) was one of the directors of the Nitrate Railways Company who received their *congé* a year or so ago, and two other directors of the Great Boulder (Messrs. Gamble North and George M. Inglis) were formerly shining lights in the nitrate firmament, many readers of this column will be interested in the following paragraph which appeared in the *Times* and all the other leading daily papers on Monday last:—

The hon. secretary of the Great Boulder Shareholders' Committee announces that the scrutineers nominated on behalf of the Shareholders' Committee at the special meeting on December 12th and accepted by the chairman on behalf of the board, have now issued their report upon the poll. From this it appears that 718 shareholders supported the six resolutions with 92,911 votes, whilst 556 shareholders opposed the resolution with 83,865 votes—the majority in favour of the committee's resolutions being thus 9,046 votes. The net result of these figures is that the first resolution, the vote of censure, which only required to be passed by a bare majority, is carried by 9,046 votes. The remaining resolutions having for their object the amendment of the articles of association and the substitution of new directors for five members of the present board, were special resolutions, and, as such, required a three-quarters majority. The majorities actually polled in favour of these resolutions, though substantial, fall short of the necessary proportion.

These nitrate people are, however, notoriously thick-skinned and tenacious, and we fancy it will want a good deal more than a vote of censure to get them out of the Great Boulder Company, from which the directors draw 4,500*l.* a year in fees alone.

The annual meeting of the Lagunas Nitrate Company, Limited, held on Thursday, was a funeral function. At the table were the directors and half a-dozen reporters, and in the room were a score or so of shareholders and others—mostly others, judging from their appearance. The chairman's speech was received in dead silence, and from first to last not a vestige of animation was shown in the proceedings. Mr. HERBERT ALLEN criticised the report and accounts, and the CHAIRMAN said it afforded him little satisfaction to reply to a critic who showed such lamentable ignorance of the subject under discussion—or words to that effect. And so Mr. Allen's criticisms and questions remained unanswered. The chairman's excuse for not attempting to cancel the Lockett contract was the difficulty of getting the support of "bearer" shareholders, whose addresses were unknown to the board; but at a later stage of the proceedings the meeting was told that the bold bad baron who has just been stuck on the board represented the bearer brigade. We shall leave Mr. Lowe to explain on some future occasion how he ascertained from a body of shareholders whose whereabouts are unknown that they desired to be represented by this Baron Mechin—who, of course, must bring a lot of "expert" nitrate knowledge to the assistance of the board. Before dismissing this subject we must caution the shareholders against being misled by the garbled report of Thursday's proceedings which appeared in the *Financial News* yesterday, and we must protest against the expenditure of the company's funds upon its dissemination.

At the Paccha and Jazpampa meeting, on Thursday, it transpired that only 34,000 shares had been applied for out of the 72,000 required to carry the reconstruction scheme through. The "financial position was deplorable," the liquidator said, and the secretary admitted that the shares applied for would produce only 10,200*l.*, whilst the liabilities were 8,000*l.* Mr. T. Aikman said it would be suicidal madness to go to allotment on such a

subscription, but Mr. G. A. Lockett—for obvious reasons—thought otherwise. In the end a resolution authorising the liquidator to proceed to allotment was supposed to be carried, but only a handful of shareholders were present in the room.

The following is from the *Westminster Gazette* of yesterday:—"It is interesting to set side by side the respective statements of the chairmen of the Lagunas Syndicate and the Lagunas Company as to the disastrous litigation between them. Here they are, the Syndicate statement being on the left:—

You will observe that in the balance-sheet there is a figure representing 12,000*l.* as litigation expenses, and it figures as an asset; there it will be obliged to remain until the litigation is finally concluded, and we hope and believe that it is to a certain extent an asset, as by the judgment given, if it is not reversed, we shall be entitled to receive a considerable part of this amount in our costs when the litigation is terminated. It is an item over which we have little or no control, as the expenses of the plaintiffs were very heavy, and we had to defend ourselves.

The next item that I would refer to is that of the legal expenses, which are charged at 36,000*l.* That item we have entered as an asset, because we expect in any event to recover this, and more besides, from the syndicate. These expenses are undoubtedly heavy; but I may point out that the greater part of them went in the cost of the commission to Chili. That unnecessary expenditure was forced upon us by the action of the syndicate in refusing to admit as evidence the letters and cablegrams we had from employés of the company—their own employés in Chili.

It will be observed that both companies regard the legal expenses as an asset, and each blames the other for the expense. The heavy sums will scarcely appear as assets in the next balance-sheets of both concerns."

Good wine needs no bush, but bad nitrate companies do, judging from the "front page" of the *New Tamarugal* and *Santa Elena* reports. The former concern, in the year ending June 30th, made 820,000 quintals of nitrate and a loss of 10*l.* 4s. 8d., which imposing result is not to be wondered at considering 570,000 quintals were shipped at the worst time of the year. There may, however, be a method in this madness not altogether unconnected with the *esprit de corps* which prompted the guarantee of debenture interest up to August 1st next by two of the directors—one Mr. Inglis, the vendor (by proxy for Messrs. Antony Gibbs and Sons) to the company, the other Mr. Schintz, the well-known nitrate dealer. We might point out the unparalleled circumstance that the stocks of nitrate (220,000 quintals) and iodine are for reasons not far to seek extremely moderately valued at 27,814*l.*, and the directorial services the reverse at 1,533*l.* 6s. 8d., but we must be excused from reviewing the accounts, which do not concern the shareholders at all, and the debenture-holders in only a minor and temporary degree. Sir Francis Evans, K.C.M.G., M.P., shows his usual discretion in confining his labours to the joint trusteeship (at a remuneration of 100*l.* per annum) for the latter unfortunate body, and probably does not share the regret of his late colleagues expressed in the report. The conjunction of *Bankers' Investment Trust* and *Tamarugal Nitrate* is too killing for words! The "Santa Elena" Company made no nitrate (for the third year in succession), and is living on iodine, a somewhat astringent diet. The directors (including Messrs. Inglis and Robertson, of the Great Boulder Mine) give their services gratuitously to the patient.

According to the *South American Journal*, Mr. E. Lembcke, a gentleman of great influence and great experience, is likely to be appointed Peruvian Chargé d'Affaires in London. Readers of THE RAILWAY TIMES will remember the mysterious Mr. L., of the Nitrate Railways Investigation, and agree with our contemporary's estimate of his qualifications.

Nitrate producers will welcome the fall in freights from 31s. 3d. to 28s. 9d. per ton, with the certainty of a further decline.

#### CEYLON NORTHERN RAILWAY.

At the London Chamber of Commerce on Monday, Lord Stanmore presided at a meeting of the Ceylon Association, held to protest against the proposed expenditure on the Ceylon Northern Railway. Mr. E. H. Skrine moved a resolution strongly disapproving of the proposed expenditure on the Ceylon Northern Railway as being opposed to the true interests of the colony. He condemned Sir West Ridgway's scheme for the new railway. At such a time as this the duty of the Government was to husband the resources and develop the island's industries, certainly not to launch into an unnecessary expenditure, which, at the best, would be unproductive, and at the worst might be little short of ruinous. He contended that the proposed line would not pay. What was wanted was cheap rice, a cheap passage for coolies, the volume of traffic quadrupled, and a half-penny taken off the cost of production of tea. The last named,

although very small, might be the dividing line between cultivation and abandonment. Mr. Rutherford, in seconding the motion, asserted that the proposed railway did not fulfil any of the conditions which would warrant its construction. If the railway was to be built there should be a population and traffic which should enable the line to pay its working expenses; it should be shown that the country through which the railway was to pass required the line in order to develop its resources, and it should also be shown that it was desirable for Imperial and strategic purposes. After some discussion the motion was agreed to, and it was further decided to appoint a deputation to wait upon Mr. Chamberlain with the view of urging on the Government a reconsideration of the Ceylon Northern Railway scheme.

### NEW COMPANIES AND NEW ISSUES.

[Applications for shares in limited liability companies may be withdrawn by letter—or by telegram, if confirmed by letter—provided the notice of withdrawal reaches the secretary before the shares are allotted.]

#### NORTH-WEST ARGENTINE RAILWAY COMPANY, LIMITED.

The directors invite subscriptions at par for an issue of 125,000*l.* 4 per cent. prior lien debenture stock, being part of an authorised issue of 200,000*l.* The total creation is 250,000*l.*, but the balance cannot be issued without the consent of further meetings of the first and second debenture stockholders and the shareholders of the company. The stock is secured by deed of trust, and is a first and paramount charge on the whole undertaking, the capital ranking after it being as follows:—350,000*l.* 6 per cent. perpetual first debenture stock; 150,000*l.* 6 per cent. perpetual second debenture stock; 350,000*l.* 7 per cent. cumulative preferred shares; 200,000*l.* deferred shares. Interest will be paid half-yearly, on January 1st and July 1st, and will accrue from January 1st, 1899. The stock will be transferable in amounts of 1*l.*, or any multiple thereof. The trust-deed provides that the stock is redeemable at the option of the company at six months' notice, at 105*l.* for every 100*l.* The average net earnings of the company for the past seven years is 26,781*l.*, including the estimated earnings for 1898. The proceeds of the present issue will be used in redeeming the whole of the existing 100,000*l.* 6 per cent. pre-preference debenture stock at par and in providing funds for carrying out certain urgent works chargeable to the capital account of the company.

Thanks to the deplorable muddle which has been made of this company's affairs during the last few years there is every possibility of the present issue resulting in a miserable fiasco—unless the stock has been underwritten, as to which we have no information.

#### PARLA KIMEDI AND GANJANI DISTRICT LIGHT RAILWAYS SYNDICATE, LIMITED.

This company was registered December 16th, with a capital of 1,000*l.* in 10*l.* shares. Its object is primarily to acquire certain statistical information, to determine the towns and districts which offer the greatest advantages for being profitably developed by the projected railways, and to deal with the same as the company shall deem expedient. Registered (without articles of association) by R. Bloxem, 31, King William-street, E.C.

### LIGHT RAILWAY PROJECTS.

The Board of Trade have recently confirmed the Middleton Light Railways Order, 1898, authorising the construction of light railways in the boroughs of Oldham and Middleton and the urban districts of Castleton and Chadderton, in the county of Lancaster.

At a meeting of Arbroath District Committee of Forfarshire County Council, held on Saturday, there was read a letter from the managers of the Dundee and Arbroath Joint Railway, in reply to a question which had been put by the committee as to what the joint line directors were doing in converting the Carmyle Branch Railway into a light railway as sanctioned upwards of a year ago by the Light Railway Commissioners. The reply was to the effect that a good many things had to be arranged before the work was proceeded with, but that it was engaging the attention of the directors, and would be gone on with as soon as possible.

Mr. F. J. S. Hopwood, assistant-secretary to the Railway Department, Board of Trade, sat on Monday for the purpose of hearing objections and amendments to the order applied for by the promoters of the Grimsby and Saltfleetby Light Railway under the Light Railways Act, 1896. Power is sought under the order to construct a light railway, in all about 20 miles in length, from Grimsby to Saltfleetby, with a branch to Cleethorpes. At the outset, Mr. Hopwood announced that almost all the objections had been withdrawn, including that of Lord Scarbrough. He, however, understood that Lord Carrington had an objection, but that it arose only on the preamble. As it was essential that the assent of Lord Carrington to sell the land necessary for a proposed deviation of the line should be obtained,

Mr. Hopwood suggested that a letter should be obtained satisfying the Board of Trade on this point. His lordship's representatives undertook that this should be done. Dealing with clauses, Mr. Hopwood, on behalf of the Board of Trade, imposed upon the promoters the obligation of having continuous brakes on these cars, this being a usual condition in granting such orders. The Board of Trade also called attention to a dangerous curve shown on the plans about 12 miles from the commencement of the proposed line, and required an alteration in clause 10 so that this might be obviated in the course of the construction of the line. Clause 12 would also have to be modified, to satisfy the Board of Trade that Lord Carrington's land would not be taken by compulsion. Modifications in the sense suggested were agreed to on behalf of the promoters. Mr. E. T. SMITH, for the promoters, said that in consequence of the requirements of the Board of Trade and the other amendments of the order on behalf of the Great Northern Railway, the promoters would have to increase their capital by 20,000*l.* or 21,000*l.* They could, of course, apply for another order, but that would cost over 200*l.* The Great Northern Railway Company also contemplated entering into a working agreement with the promoters, which would necessitate additional expenditure on stations. Mr. Hopwood said the Board of Trade would be very loth to alter figures, which had been carefully considered by the Light Railway Commissioners. He would, however, in view of Mr. Smith's remarks, be prepared to consider a specific application in writing, but would not promise that it would be favourably considered. Mr. Smith undertook to make a formal application for an increase of capital. The proceedings then ended.

The consideration of objections to the proposed Portsdown and Horndean Light Railway came before Sir Courtenay Boyle, permanent secretary of the Board of Trade, on Monday. Powers are sought under the order asked for to construct a light railway from Cosham in connection with the Portsmouth tramways, running for six miles north to Horndean, on the Portsdown-hill. On behalf of the London and South Western Railway, Mr. BALFOUR BROWNE said he did not propose to object to the scheme, as he very well might have done on the ground of its competition with the goods and passenger traffic of the South Western between Horndean and Portsmouth. The proposed line, however, would have a level crossing, authorised in 1845, over the South Western between Fareham and Portsmouth, on the public road. There were some sixty trains a day running over the level crossing, and in busy times as many as thirty-two additional excursion trains, and he contended that the carrying of the light railway across the lines of the South Western Railway would be a serious interference with that company, and would involve great public danger. The line from Fareham to Portsmouth was an increasingly valuable one, and when the Lean Valley line was constructed it would become the main line from Aldershot to Portsmouth. It was the line by which the Queen went to Netley the other day. It was proposed to work the new line by electricity, and this would add to the difficulties and dangers already existing at the level crossing. All the electric signals of the railway at the present time were worked on what was popularly known as the earth return system, but, as a matter of fact, the electric current returned along the rails. Mr. Preece had, on the South London Electric Tramways, traced the influence of stray currents for a very great distance. Counsel contended that a stray 10-volt current of the light railway might alter the signals at the level crossing worked by a 2-volt current and cause a serious accident. He suggested that the proposers should be required to construct a bridge over the South Western for the purposes of the light railway. Mr. CHARLES J. OWEN, general manager of the London and South Western Railway Company, gave evidence in support of the opening statement of counsel, and said the cost of the suggested bridge would be between 3,000*l.* and 4,000*l.* Seeing that the railway company might reasonably have objected to the scheme on the ground of competition, there was no hardship in asking the promoters to construct a bridge over the line. Sir COURTENAY BOYLE, having heard the arguments for the promoters, said he could not at once say what he should recommend to the Board of Trade on the point raised. He, however, suggested that all the parties—the road authorities, the promoters, and the South Western Railway Company—should consider the point, with the view of seeing whether, with mutual co-operation the proposed line could not be carried over the existing railway line.

### MR. RITCHIE AND THE RAILWAY MEN.

The secretary of the Amalgamated Society of Railway Servants, in reply to the declaration made by the President of the Board of Trade last week on the alleged victimising of railway servants, has issued a statement in which he says:—“We regard Mr. Ritchie's reply to this deputation as highly satisfactory—as, indeed, the most encouraging Ministerial reply

the railwaymen have ever received, such statements hitherto having been characterised either by evasiveness or want of sympathy. Neither of these qualities is observable in Mr. Ritchie's speech. . . . It is not the desire of our society to protect a man who neglects his duty and against whom a reasonable cause for dismissal can be found by the company. . . . The total amount paid to each individual victimised is 60*l*. I need not emphasise the fact that our society is not likely to fine itself to that extent in a large number of instances for a purely imaginary grievance. Each of these cases is separately investigated by an officer of the society before an allowance is granted. Of course, we have no machinery by means of which we can ascertain whether or not a man has been guilty of misconduct save our local branch officials and other workmen who happen to know something of the individual affected. . . . I will go so far as to say that we shall be perfectly satisfied if Mr. Ritchie can elicit from the companies the full reasons why these men were discharged. Unless these are given, I am determined to press forward our case, and I believe that Mr. Ritchie, according to his pronouncement yesterday, will be willing to ask the House of Commons for a committee of inquiry. As I have said, Mr. Ritchie's attitude is highly satisfactory to me, as I am sure it will be to those I represent."

### WORKMEN'S COMPENSATION.

Sir Ernest Paget, chairman of the Midland Railway, announced on the 16th inst. an important extension of the Workmen's Compensation Act to Yorkshire and Leicestershire to a deputation from the Midland Railway Friendly Society. A recent decision had shown that draymen on duty are excluded from benefit under the Act, but the directors had decided to extend its provisions to all accidents to draymen and parcel-van men, while on duty, except where injuries proved fatal, and in these cases their widows and children would benefit under the relief of the society. The deputation strongly urged that the concession should be extended to all railway men on duty, now excluded from the Act, but the chairman was unable to go further.

At a largely attended and representative meeting of Cheshire members of the Great Central Railway Mutual Provident Society and Accident Fund, held at Northwich on Sunday, practically the whole of the resolutions proposed by the joint committee of directors of the Great Central and Joint Railways and the society, in view of the alterations made by the Workmen's Compensation Act, were emphatically rejected. The directors of the Great Central, Sheffield, Midland, Cheshire lines, and allied systems have ceased their contributions of 66*½* *l*. per annum towards the accident fund, but offered, in lieu of their general contribution of 1,300*l*. yearly, to pay 7*½* per cent. on members' contributions provided that their suggestions were accepted. The meeting yesterday unanimously refused to accept a reduction of 2*s*. weekly in sick allowance or to agree to a proposal reducing accident allowance, so as to provide that no member shall receive more than his wages from the society and the Workmen's Compensation Act combined. It was further resolved by an overwhelming majority to decline the suggested graduated contributions on the Midland basis, and the only proposal accepted, which, however, was rendered of no effect by the rejection of the other resolutions, was the substitution of a contribution by the allied railway companies of 7*½* per cent. instead of 1,300*l*. annually.

### ARGENTINE ITEMS.

The branch line of the Buenos Ayres Great Southern Railway from 25 de Mayo to Sarmiento will probably be completed by March of next year.

Surveys will shortly be made by the Entre Rios Railways Company for a branch line from Solá, near Rosario Tala, to San José de Feliciano, passing through the rich district of Montiel.

Mr. Jason Rigby, general manager of the Buenos Ayres and Rosario Railway, and Mr. Isaac Cook, accountant of the Buenos Ayres Great Southern Railway, have just arrived in England.

The Argentine Minister of Public Works has decreed that in future all applications for concessions for public works must be accompanied with a very heavy guarantee. Several concessions have recently been annulled.

In 1897 the Argentine Government had to pay the railway companies the sum of \$1,014,000 for passes, this sum including the cost of mobilising the National Guard. The bill for single passes amounted to over \$200,000.

Mr. John V. Cilley has been appointed general manager and engineer of the Dean Funes to Rioja and Chilecito (Government)

Railway. Mr. Cilley has long been employed as chief construction engineer on the extensions of the Buenos Ayres Western Railway.

The Buenos Ayres and Pacific Railway Company, Limited, have deposited a Bill in Parliament to enable them to rearrange their capital and to deal with the accumulated arrears of interest by the issue of stock. This is simply the usual "enabling Bill," and no scheme has yet been formulated.

The Argentine Government has refused to grant any further extension of time to Messrs. Cesar Della Beffa and Co., for commencing the line from Paraná to Monte Caseros and La Paz, and to Sr. F. Baldassare, for a line from Chivilcoy to Rivas. The first line was to have been 1,435 metre gauge, with a length of 380 kilometres, costing \$14,000 gold per kilometre, or a total cost of \$5,320,000.

In all probability the Central Argentine Railway shareholders will shortly be asked to give their consent to the construction of a line from Cordoba, across the Province of San Luis to the Province of Mendoza, where it would branch off one line to the city of Mendoza and the other to San Juan. This line, if built, will prove a serious competitor to the Argentine Great Western and Buenos Ayres and Pacific railways.

Amongst the new works to be carried out by the Buenos Ayres Great Southern Railway Company, which were the object of Mr. Barrow's late visit to England, are the following:—Enlarging of Constitution Station; high level to the Riachuelo; removal of workshops from Sola to Banfield; stone ballasting from Temperley to Cañuelas, then to Las Flores and Azul, Dolores to Mar del Plata, and Maipú to Ayacucho; a large dock on the south side of the Riachuelo.

The La Plata Government has granted some more concessions for light railways. One is from Magdalena to Barracas al Sud, and the other from La Plata to Campana. In connection with these light railways we are pleased to see that the Legislature has asked for full particulars concerning the concessions that have been already granted. We very much doubt if any of the lines for which concessions have been granted will ever be built.—*Review of the River Plate.*

The Buenos Ayres correspondent of the *Financial News*, telegraphing on December 20th, says:—"Congress will probably throw out the *ad referendum* contract between the Argentine Government and the Transandine Railway for the rescission of the guarantee. Congress wants the company to reduce the sum arranged for cancelment, and this the company refuses to do. The outlook is very unsatisfactory also for the Cordoba Central contract, which is not yet sanctioned by Congress."

At the end of 1897 the length of the railways in Argentina was 16,728 kilometres, the capital employed being \$523,549,915 gold—an average of \$35,377 per kilometre. The average interest earned by the different lines from 1890 to 1897 has been as follows:—National lines, 0.04 per cent.; guaranteed lines, 0.56 per cent.; unguaranteed lines, 3.76 per cent.; provincial lines, 1.05 per cent.—general average, 2.30 per cent. The Argentine North Eastern, the Transandine, and the Villa Maria and Rufino railways have always been worked at a loss.

### IMPROVEMENT OF MARGATE STATION.

Mr. W. H. Elwell sat as umpire on Monday at the Surveyors' Institute, to hear the claim of Captain Hatfield against the London Chatham and Dover Railway Company for land, forming part of the Hartsdown estate, proposed to be acquired by the company for the purpose of forming an approach road to their up platform at Margate.—Mr. J. Green was arbitrator for the claimant; and Mr. Robert Vigers for the company; Mr. E. Boyle, Q.C., and Mr. Ryde were counsel for Captain Hatfield; and Mr. Freeman, Q.C., and Mr. Hornell represented the company.—It appears that the claimant owns an estate of between 500 and 600 acres, the road to which is only 24ft. 9in. wide. The South Eastern Railway own the land on the east side and the London Chatham and Dover Railway now proposed to acquire the land on the west, rendering it impossible for the road to be widened. A portion of the land taken abuts on Marine-terrace; but a considerable portion of the claim was for the consequential damage to the estate. Mr. Charles W. Willoughby, a partner of the firm of Weatherall and Green, estimated the two areas of land required at 10.94*½* *l*., and the general depreciation at 3,750*l*., a total of 14,694*½* *l*. This valuation was supported by Mr. Humphreys Davis, surveyor, of London; and Mr. Albert Latham, the town surveyor of Margate. Mr. John Reeve, auctioneer and estate agent, of Margate, valued the

land at 10,585*l.*, and the depreciation he estimated at 3,750*l.*, a total of 14,335*l.* The proceedings were adjourned till January 25th.

### PERSIAN GULF RAILWAY SCHEME.

The Vienna correspondent of the *Times*, writing on December 14th, says:—"The scheme for uniting the Mediterranean with the Persian Gulf by a railway from Tripoli to Koweyt has been for some time under the consideration of the Sultan and the Sublime Porte. It is now stated that it meets with favour in both instances as an efficacious means of opening up one of the richest and most fertile portions of the Sultan's dominions. The application for the concession has been made by Count Vladimir Kapnist, cousin of the Russian Ambassador in Vienna, in the name of a syndicate including English, French, Russian, and Belgian elements. The chief engineer's report recalls the fact that the scheme of establishing railway communication between Europe and the East has been discussed from time to time for the last seventy years. Neither the successful exploitation of the Suez Canal nor the important political changes which have lately taken place have affected the want of rapid transit between the East and West, which is felt now more than ever. It dwells upon the immense gain to the world of opening up and restoring to its ancient fertility and prosperity the marvellously rich country traversed by the Euphrates and Tigris, the cultivation of which would be of incalculable value as a food-producing district both to India and to Western Europe. This independently of the enormous addition to the wealth of the world that would result from the placing under the immediate influence of civilisation that part of the Turkish Empire, and thus bringing Persian products within easy reach of the great trading centres. The advantages that would accrue to Turkey are too self-evident to require emphasising. It is proposed to build a main trunk line from Tripoli, on the Mediterranean, to Koweyt, on the Persian Gulf, and to establish ports and harbours at each terminus; as also a branch line from Khanikin, on the Persian frontier, to Kerbela and to Nedjef (*via* Baghdad and Musseyib, on the Euphrates). Preferential rights for the construction and exploitation of a series of branch railways are included in the project, as also the exclusive right to establish landing-stages and wharves on the rivers and bonded warehouses and goods depôts in the stations and towns traversed by the railway. Other rights are included in the concession, such as those of draining and irrigating large extents of territory, and of working all mines, petroleum wells, bitumen and salt deposits not yet conceded, within 50 kilometres on each side of the line. The report estimates that without diminishing to any great extent the receipts of the Suez Canal, the shortening of the journey between Europe and the East would create and develop a through traffic for passengers and mails and for lighter and more valuable articles of merchandise. In the opinion of the chief engineer the two terminus ports—namely, Tripoli and Koweyt—could easily be made safe and commodious for almost any number of vessels of the largest tonnage; and the sea journey to the East by this route would thereby be rendered the shortest possible, and would be free from the many dangers and inconveniences which are encountered in the present transit through the Red Sea and the Arabian Gulf. The report goes on to say that from Tripoli the line would follow the sea coast as far as the Nahr-el-Kebir, and then up the course of that river over the lowest and easiest pass which could be found through the chain of mountains running parallel to the Syrian coast. The line would reach a summit level of about 2,000ft. above the sea between Tripoli and Homs, on a plateau of hard black basalt. Thence it would proceed to Homs, which is about 1,500ft. above the sea, and on through Palmyra, past numerous villages to Rahaba, on the Euphrates, following, in the main, the present caravan route. The railway would go down the valley of the Euphrates as far as El Kaim, then over the plains to Hit, where it would cross the river and proceed to Iskanderieh, the junction for Baghdad and for Khanikin (on the Persian frontier), and to Kerbela and Nedjef, the famous shrines and burial-places of the Persian Mohamedans, on the south; thence, in as nearly a straight line as possible, across the great alluvial plain between the two rivers to Kurna, where it would again cross the Euphrates and be continued to Basra, and thence across country to Koweyt, on the Persian Gulf. The engineer affirms that there are no special difficulties on any part of the route, whilst the greater portion of it is through an easy country. The railway is to be of the standard gauge, and constructed so that a mean speed of 40 miles per hour may be maintained throughout. The journey from sea to sea would take less than twenty-four hours, including stoppages. The voyage from Koweyt to Bombay would be rather shorter than between Aden and Bombay, and as the port of Tripoli in the Mediterranean would be nearer to Brindisi, Trieste, Constantinople, and other points

of departure of the different mail routes than is Port Said, the time saved would be that which is now taken up by the transit of the Red Sea. It is, therefore, reckoned that, instead of thirteen days from Brindisi to Bombay, the time occupied by the journey would not exceed eight days.

### FOREIGN AND COLONIAL ITEMS.

The position of the principal Spanish railway companies is improving in consequence of considerable increases in their revenue, and a reduction in the agio on gold.

The Steel Company of Pennsylvania have completed a contract for the delivery of 80,000 tons of steel rails for the Trans-Siberian Railway. The rails will be shipped at an early date, and delivered at Vladivostock.

The Turkish Government has authorised the original concessionaires of the Haifa-Damascus Railway to resume the works which were suspended in 1894 owing to the financial difficulties which overtook the English company.

The directors of the Conde d'Eu Railway Company have decided to recommend the declaration of a final dividend of 6*s.* a share, less income-tax, making, with the interim dividend paid in August last, 3 per cent. for the year ended June 30th last.

Coupon No. 24 due January 1st next on the bonds of the Nicaraguan Railways 6 per cent. loan of 1886 will be paid, on and after January 2nd, at the reduced rate of 4 per cent. per annum, according to the arrangement of September 12th, 1895.

M. Berton, a Socialist member of the French Chamber of Deputies, has proposed a law whereby persons desirous "of taking part in the elections and of manifesting their will" shall be conveyed free of charge to the constituency in which they are electors. It is said that the proposal concerns, at a moderate estimate, about 350,000 men.

Mr. Frank Hudson, who has been for many years locomotive superintendent of the Central Uruguay Railway, has been appointed acting general manager, *vice* Mr. F. Henderson, who, as already announced, goes to Buenos Ayres as general manager of the Great Southern Railway. Mr. Percy Sedgfield, Mr. Hudson's assistant, takes his place as locomotive superintendent.

Indignation meetings are being held throughout Bulgaria to protest against the arrangement made by the Government to acquire the lease of the lines of the Oriental Railway which runs through Bulgaria. Public opinion is much excited over the question, and the Philippopolis papers strongly criticise the arrangement. The Sobranje on Wednesday adopted the convention, whereupon the members of the Opposition withdrew from the Chamber, after violently protesting against the Government proposals.

Messrs. Baring Brothers and Co., Limited, notify to holders of Western of Santa Fé Railway consolidated scrip that a distribution at the rate of 3 per cent. per annum will be made on January 2nd next. They at the same time opportunely remind holders of the consolidated scrip who wish to take "advantage" of the scheme for the formation of an English company to deposit their scrip without delay. Nearly three-quarters of the scrip has already been deposited. The "advantages" here referred to have been dealt with in the leader columns of THE RAILWAY TIMES.

A Rome correspondent states that the Italian Ministry for Public Works has decided upon the construction of a number of secondary railway lines, measuring a total length of 600 kilometres, amongst which will be the first normal gauge electric line in Italy, from Milan to Lecco. The concession for this enterprise had been granted to the Italian Electrical Trust, which includes the Hungarian Credit Bank, Messrs. Ganz and Co., the Berlin Union Electricity Company, and the Banca Commerciale. Great natural difficulties being encountered by the contractors, the Government offers them some important subventions.

In the Cape Legislative Assembly on the 15th inst., Sir James Sivewright moved that the Cape should carry the materials for the Tanganyika Railway over the colonial railways free of cost. Sir James, who estimated the charge at 52,000*l.*, said that he brought the proposal forward against Mr. Rhodes's wishes, in order to simply afford the Premier a chance of showing the sincerity of his recent professions of goodwill towards Rhodesia. Messrs. Sauer and Merriman opposed the proposal, the former

contending that the conveyance of the material would cost from 500,000l. to 600,000l. Mr. Schreiner said the Ministry sympathised with the objects of the motion, and would carry the material at actual cost price. Sir J. Sivewright thereupon withdrew his motion.

#### RAILWAY PATENTS.

24,834. Samuel Bandel—Improvements in side couplings for railway carriages.

24,893. David John Morgan, 12, Windsor-road, Barry, Glamorgan—Improvements in guide bars for railway carriage and wagon axle-boxes.

24,959. Thomas Henry Mitchell and Ernest Mitchell—An automatic brake for railway platform and luggage trucks generally.

16,716. The British Thompson-Houston Company, Limited (Rice)—Systems of control for electrically propelled trains. 1898.

21,275. Friedrichs—Pocket railway guides, note-books, business and other books. 1898.

22,082. The British Thompson-Houston Company, Limited (Geassenhoener)—Trolley cars for electric railways. 1898.

22,357. Strauss and Rosten—Railway switch. 1898.

**Leopoldina Railway.**—Messrs. Louis Cohen and Sons announce that they have been in negotiation since June last with the Leopoldina Railway Company, Limited, in reference to the future service of the debentures. In consequence of difficulties in Rio they are not in a position to make any definite statement on the subject, but they hope to be in a position to shortly announce that an arrangement has been made, due notification of which will be given as soon as possible by public advertisement. Messrs. Louis Cohen and Son announce that they will pay the half-yearly interest, due January 1st, 1899, on the 5½ per cent. debentures of 1881 of the Campos and Carangola Railway on and after January 2nd. The funds for the redemption of the debentures drawn in April, 1898, not having been received, the dividend on them, due January 1st, 1899, will be paid as if they had not been drawn.

**Scarborough and Whitby Railway.**—In the Chancery Division on Saturday, before Mr. Justice Kekewich, a petition in the matter of the Scarborough and Whitby Railway Company came up, which represented the last step in an amalgamation between the Scarborough Railway Company and the North Eastern Railway Company. The court was asked to sanction the payment out of court of the funds remaining in the receivership proceedings of the Scarborough and Whitby Railway Company. The whole of the ordinary debts of the Scarborough Company had been paid, and a substantial balance remained to be distributed amongst the debenture stock-holders in respect of their shares and interest, and those stockholders had had allotted to them a corresponding amount of debenture stock in the North Eastern Railway Company to that which they held in the other company. Mr. Justice Kekewich directed the payment out of court of the fund in question.

**South and West Clare Railways.**—A Kilrush correspondent, writing on Wednesday, says:—"Owing to the difficulties that have arisen between the Board of Trade and the board of the West Clare Railway in connection with the agreement for the working by the latter body of the South Clare system, a serious crisis is imminent. It is reported that on and after Saturday next the West Clare Company will cease to work the Southern system, and as the directorate of the South Clare line, owing to lack of full equipment, are unable to carry out the passenger and goods traffic, it is believed the trains will cease running. This will lead to a public calamity, the consequences of which are causing great anxiety and uneasiness here. What lends confirmation to the rumour is that the local post-office authorities are

making active preparations for the despatch of the outward morning mails by car which hitherto were conveyed by rail. The people of Kilrush and the other important towns served by the South Clare Railway are deeply concerned regarding the present state of affairs, and await developments with the keenest interest.

**Sale of the Waterford and Limerick.**—Mr. Colhoun, traffic manager of the Great Southern and Western Railway Company, attended on Tuesday a conference at the Limerick Chamber of Commerce, and discussed, with a committee representing the different local bodies and traders, the sale of the Waterford system to his principals, who, with the Great Western Company, are preparing to establish an alternative route to England from Ireland *via* Rosslare and Fishguard. After hearing Mr. Colhoun, the conference unanimously decided that the guarantees and safeguards offered for the trade of Limerick under the proposed amalgamation were inadequate and unsatisfactory. An official report has been issued of the guarantees which the Great Southern and Western Railway Company would be prepared to give to Limerick merchants and traders in connection with the pending purchase by that company of the Waterford Limerick and Western Railway system, to acquire which a Bill is to be promoted in the next session of Parliament. With regard to the question of rates, in addition to the existing facilities for adjusting, power would be given by the Bill, if any dispute arose, to the county court Judge to hear and determine any such complaint, or such power could be given to an arbitrator appointed by the Board of Trade.

#### METROPOLITAN RAILWAY CARRIAGE AND WAGON COMPANY, Limited.

SALTLEY WORKS, BIRMINGHAM.

Successors to Messrs. Joseph Wright and Sons.

MANUFACTURERS OF RAILWAY CARRIAGES, TRAMWAY CARS, WAGONS, and RAILWAY IRONWORK of every description. ## LONDON, BRIGHTON, and SOUTH COAST RAILWAY COMPANY.

NOTICE is hereby given, that the next HALF-YEARLY ORDINARY MEETING of Proprietors of the London, Brighton, and South Coast Railway will be held in the General Meeting-room, at the Offices of the Company, situate at the London-bridge Terminus, Southwark, in the County of London, on WEDNESDAY, the 25th day of January, 1899, at One o'clock p.m. precisely, to receive a Report of the Directors, to declare a Dividend, to elect Directors in the places of Charles Colin Macrae, Esq., and the Lord Henry Nevill, who will respectively go out of office by rotation, but who, being duly qualified, offer themselves for re-election, to elect an Auditor in the place of William Cash, Esq., who will go out of office by rotation, but who offers himself for re-election, and for all other purposes of an Ordinary Meeting.

And Notice is also hereby given, that, on the conclusion of the ordinary business, the Meeting will be made a SPECIAL or EXTRAORDINARY GENERAL MEETING for the purpose of considering and, if thought fit, approving and passing resolutions which will then be submitted (a) authorising the Company under the powers of the Newhaven and Seaford Sea Defences Act, 1898, to guarantee the payment of a Dividend of 4 per Cent. per annum upon the sum of £25,000, part of the additional Capital of the Newhaven Harbour Company by that Act authorised to be raised; and (b) approving an Agreement between the Company and the South Eastern Railway Company continuing certain Agreements now existing between the two Companies for a further term.

And Notice is also hereby given, that, in accordance with the Standing Orders of Parliament, an EXTRAORDINARY or SPECIAL GENERAL MEETING of the Proprietors will be held on the same day, and at the same place immediately on the conclusion of the Ordinary and Extraordinary Meetings above convened, for the purpose of considering and, if thought fit, approving the provisions of Bills to be submitted to Parliament, intitled:—

(1) "A Bill to empower the London, Brighton, and South Coast Railway Company to construct new Railways to widen their existing Railways and for other purposes."

(2) "A Bill to provide for the establishment and regulation of a Pension Fund for Officers and Servants of the London, Brighton, and South Coast Railway Company."

At such Meeting the said Bills will be submitted for the consideration and approval of the Proprietors then present in person or by proxy.

The Transfer Books of the Company will be closed at Four o'clock p.m., on Wednesday, the 4th proximo, and will remain closed until after the conclusion of the above-mentioned Meetings.

COTTESLOE, Chairman.  
J. J. BREWER, Secretary.

London-bridge Terminus, S.E.,  
21st December, 1898.

## NORTH EASTERN RAILWAY.

NOTICE is hereby given, that the BOOKS for the Registration of Transfers of Stocks and Shares will be CLOSED from the 14th January to the 10th February next, both days inclusive, preparatory to the next Half-yearly Meeting.

By order of the Directors.

C. N. WILKINSON, Secretary.

Railway-office, York, 23rd December, 1898.

## DENVER and RIO GRANDE RAILROAD COMPANY.

The Board of Directors has this day declared a SEMI-ANNUAL DIVIDEND OF TWO PER CENT. on the Preferred Capital Stock of the Company out of the Net Earnings, payable January 16th proximo.

The Transfer Books of the Preferred Stock will close at Noon, January 16th, 1899, and reopen on the morning of January 18th.

GEORGE COPPELL, Chairman of the Board.  
New York, 22nd December, 1898.

## REORGANIZATION of the BALTIMORE and OHIO SOUTH WESTERN RAILWAY COMPANY.

To the Holders of Securities of the  
Ohio and Mississippi Railway Company,  
Baltimore and Ohio South Western Railroad Company,  
Baltimore and Ohio South Western Railway Company,  
Baltimore and Ohio South Western Terminal Company,  
Cincinnati and Baltimore Railroad Company and  
Marietta Railway Company;

As already announced, the undersigned have undertaken to act as Managers to carry out a PLAN for the REORGANIZATION of the Baltimore and Ohio South Western Railway Company, which affects the above-named securities. A Syndicate will purchase for cash at their face value such coupons and claims for interest on registered Bonds maturing January 1, 1899, from holders who deposit their Bonds under the Plan. Participation under the Plan of Reorganization in any respect whatsoever is dependent upon the deposit of securities with the depositary on or before the twentieth day of January, 1899.

The Mercantile Trust Company as depositary under the Plan is now prepared to receive deposits of securities either at its Office, No. 120, Broadway, in the City of New York, or at its Agency, the London and Westminster Bank, Limited, 41, Lothbury, London, England. Copies of the Plan and Agreement of the Reorganization and any further information desired may be obtained at the Offices of the undersigned, or at the Office of the Mercantile Trust Company, or its London Agency above stated.

SPEYER BROTHERS,  
7, Lothbury, London.  
SPEYER and CO.,  
30, Broad-street, New York.  
KUHN LOEB and CO.,  
27, Pine-street, New York.

Reorganization  
Managers.

### PATENT PERFECT RESTARTING INJECTOR,

Admirably adapted for Locomotives, &c.

# BLAENAVON COLD BLAST PIG IRON

(MADE WITH THE CELEBRATED BLAENAVON CHARCOAL COAL).

No. 1 Foundry.—A Dark, Grey, Soft Iron, used for Castings, where toughness and strength are required, such as Toothed Wheels for Agricultural, Cotton and other Machinery; also by various Governments, for Guns and other superior work.

No. 2 Foundry.—A more Open Quality, used for similar purposes, and largely by nail makers.

No. 3 Foundry.—An Open Grain, Harder Iron; used for both Foundry and Forge; it has a high transverse strength in Castings, but not so tough as the No. 1 and No. 2; gives a strong fibre in wrought iron.

No. 4 Grey Forge.—An Open, Soft Iron; possesses great strength; suitable for toughening and tempering harder qualities; it is a very superior Forge Iron.

No. 5 Common Forge.—A Harder, Finer Grain, very Strong Iron; suitable for Heavy Machinery, such as Shafts, Large Wheels, and also for Steam and Blowing Cylinders, Guides, Slides, &c., as well as for Forge purposes in Cable Bolts, Boiler Plate, and BB. Merchant Bars.

No. 6 Strong Forge.—A still harder and Closer quality used for Mill Rolls and for bringing up the strength of weaker Forge Irons.

MOTTLED.—Used for Chilled Rolls in tempering; and for other similar purposes.

\* These qualities have a high tensile strength in wrought iron, and are used for bringing up weaker iron to stand the Government tests.

Extract from Report made by the Officers of H.M. Government to the Royal Arsenal on the strength of various descriptions of Iron, showing the general average of a number of Specimens prepared and tested from fifty-seven samples and also from five samples of Blaenavon Iron.—Parliamentary Paper No. 4971, Session 1888.

	Specific Gravity.	Tensile Strength.	Transverse Strength.	Crushing.
Average of 57 samples including Blaenavon	850 Specimens 7.140	850 Specimens 23,257	546 Specimens 7,102	273 Specimens 91,061
Average of 5 samples of Blaenavon only	63 Specimens 7.175	63 Specimens 25,588	46 Specimens 7,488	21 Specimens 108,281

Prices and any further information as to quality suitable for special purposes may be obtained from

The half-yearly general meeting was held on the 21st inst., at the Cannon-street Hotel, E.C.; Lieut.-General Sir RICHARD STRACHEY presiding.

The report and accounts (an analysis of which has already appeared in THE RAILWAY TIMES) were taken as read.

The CHAIRMAN, in moving the adoption of the report and accounts, said—There has been the usual close conformity between the results of the working during the half-year ending on June 30th last and the estimates given at the last half-yearly meeting, those estimates being in reality to so great an extent based on actual ascertained receipts and expenditure that they can hardly be called estimates with propriety. The differences between the figures presented in the report which is in your hands, and those given by Mr. Colvin in June last, are so small that I need not weary you by indicating them. The company's share of the surplus, Rs.15,37,136 for the half-year, is the largest ever received in any half-year, with the exception of 1891, and to this the remarks just made also apply. The board have been able to bring over the company's share of the surplus at the exchange of 1s. 4d. per rupee, which has admitted of their proposing a dividend of 11. 10s. 6d. per cent. for the half-year in addition to the guaranteed 21. per cent. ("Hear, hear.") This too, with the exception of the first half of 1891, is the largest dividend obtained during the last fourteen or fifteen years. ("Hear, hear.") It is right to add that these favourable results for the first half of 1898 are to a considerable extent due to the smaller expenditure on renewals of permanent way and substitution of a heavier 85lb. steel rail for the 75lb. rail than had been at first contemplated. This work it has been found difficult to carry out to the extent that had been usual in former years on account of the heavy traffic. These remarks also apply to the results of the last half of 1897. Under other heads of working expenses there is nothing to call for special remark, the increased train mileage, about 500,000 miles, necessarily involving additional outlay in almost all the departments. The improvement in the coaching traffic, which is almost up to the best standard yet attained, is to some extent apparent only, the comparison being made with a half-year in which receipts fell off consequent on the pressure of famine, which was severely felt over most parts of the country. The fact, however, that the recovery has been so rapid and considerable is a satisfactory indication of the people having already, to a great extent, got over the worst effects of the famine. The maintenance of the goods receipts at a higher level than in any former half-year is, no doubt, mainly due to the coal traffic, but there has also been a satisfactory return to the normal condition of the trade in wheat and oil-seeds, which has gone far to counteract the very great falling off in the rice traffic. This has shrunk by more than 25 lakhs of rupees on the cessation of the extraordinary demand created by the famine, which had raised the receipts under this head in the corresponding half of 1897 to the large amount of 33½ lakhs of rupees. The quantity of coal dealt with in the first half of 1898 was 10 per cent. more than that of 1897, and the upward traffic, which had fallen off during the famine, has again shown a satisfactory increase. The coal export trade, though somewhat below that of 1897, still comes very nearly up to 500,000 tons in the half-year, and shows every indication of further healthy increase. The area served by these exports now extends from Aden to Singapore, and the requirements of the steam vessels that pass between Europe and Eastern Asia would appear to offer scope for a large expansion of this trade. It is, however, becoming evident that additional facilities for the shipment of the coal will be required to admit of such a development of the export trade as the almost unlimited available supply places within reach of the coalowners of Bengal. The board most fully appreciate the vast importance of this, and nothing will be wanting on their part to facilitate the expansion of this trade which has already begun to take very large dimensions. I may here remark that the quantity of coal sent from the two branches Jherriah and Toposi, opened since 1894, now amounts to close upon 700,000 tons in the half-year, showing in an unmistakable manner the profitable character of the investment made for their construction, and the rapidity in which the trade has taken advantage of the means of transport thus opened to it. The estimated gross receipts of the half-year ending on the 31st of the present month, as reported to the board by telegraph, amount to Rs.2,89,17,000, showing a falling off of Rs.5,44,000, compared to the corresponding half of last year which was exceptionally favourable. The increase over the second half of 1896 is nearly Rs.18,00,000, and shows that the normal growth is fairly maintained. The working expenses for this half-year are stated at Rs.98,02,000, which exceeds the corresponding amount for 1897 by no less than Rs.14,37,800. This result follows, no doubt, on the exceptionally small expenditure in 1897, both on maintenance of permanent way and locomotive engines, which has probably had to be made good by additional outlay in the present year. I say "probably" because we have no explanation given to us—we merely have the figures. Reference to this has already been made, in explanation of the specially favourable results of the first half of the present year. The net receipts are reckoned at Rs.1,91,15,000, which compare with Rs.2,10,98,000 for 1897. The difference, Rs.19,82,000, is made up by the falling off in the receipts amounting to about Rs.5,50,000, and the increase of expenditure of Rs.14,25,000. The charges on account of the annuities, interest, and the provident institution, come to Rs.1,40,63,000, compared with Rs.1,45,47,000 in 1897, an improvement of Rs.4,84,000, arising from the better exchange, 1s. 3½d., against 1s. 2½d. The final result is that the company's share of the surplus, after deducting Indian income-tax, stands at Rs.9,06,000, compared to Rs.11,85,000 last year,

and with exchange at its present rate, 1s. 4d., this may be expected to give a dividend of 18s. 6d. for the half-year, in addition to the guaranteed 2 per cent. This, together with the dividend for the first half of the year, now about to be paid, of 3l. 10s. 6d., will make a probable return for the whole year of 6l. 9s. 0d. I may here draw attention to the circumstance that the yearly gross receipts of the undertaking have now risen above 600 lakhs for two consecutive years, and would not appear to be likely again to fall below that amount. In like manner we may regard the net receipts as now firmly established at a sum over 400 lakhs. These figures may be compared with the gross receipts in 1880, which were 429 lakhs, and the net receipts 287 lakhs. In the same interval the passenger and goods traffic may be regarded as having been doubled, with an increase of working expenses of not more than 25 per cent. For some years past the progress of the undertaking has chiefly been noteworthy from the steady and economical development of the traffic. I apprehend that in the immediate future you will find that interest will rather be directed to the expansion of the works and equipment of the railway, which has become necessary to meet the greatly increased traffic. During the past year the insufficiency of the existing supply of rolling stock, both passenger and goods vehicles, and locomotives, has been rendered so manifest that the hesitation before, as to the expediency of incurring a heavy capital outlay in this direction has been finally overcome, and large orders are now in course of execution which, it is hoped, will soon remove the complaints that have arisen owing to deficiencies in this most essential element of the equipment. The board have met with no small difficulty in obtaining from the manufacturers in this country the supplies required, within the time that can be granted, without deferring in a very inconvenient way the removal of the evils attending on the want of a proper supply of rolling stock. This has to some extent already, and may probably in the future, compel recourse to foreign makers. The orders for engines and wagons now outstanding, which extend over the whole of next year, amount to a sum of more than 750,000l. Since the commencement of 1897 we have ordered more than 2,000 wagons, which are partly delivered and partly in process of manufacture, and about 180 engines. That will show you the extent of the requirements to meet the increased traffic. Concurrently with this, the pressure of the traffic has brought into prominence the urgent necessity for providing the means of expediting the passage of trains, especially over the lower section of the railway leading to the Howrah terminus. To meet this, improved methods of signalling, such as are in universal use in this country, but which have hitherto not been much adopted in India owing to the relatively small traffic, will have to be introduced, and additional sidings will have to be constructed at many of the stations to provide the means for the faster traffic passing the slower without interruption. The principal stations themselves also are in many cases found to be inadequate for the requirements of the present traffic, and considerable outlay will be called for in carrying out their improvement. Among these stations the most important is the terminus at Howrah, the necessity for the enlargement of which has long been foreseen, and can no longer be postponed. It will be so carried out as to provide a passenger terminus for the Bengal-Nagpur Railway also. The new approach to Calcutta for this line, *via* Midnapur, is already in an advanced state of progress. The reconstruction of the Howrah station has involved the removal of the former stores depot and carriage and wagon shops of the East Indian Railway, in order to obtain the requisite space. The removal of the stores depot has nearly been completed, and the erection of the new carriage and wagon shops is in progress. The cost of the new Howrah passenger station will be hardly less than 40 lakhs of rupees, but it will be partly paid for by the Bengal-Nagpur Railway, in proportion to the share of the accommodation that will be assigned to it. Further, to relieve the pressure on the present line leading to Howrah, it is contemplated to carry out a new and more direct approach, leaving the old line at the Burdwan station. The survey of this line has been authorised and is now in progress. The approximate cost of this work is estimated at 49 lakhs for a single line of way, or 77½ lakhs for a double line; as to which shall be preferred for present construction no decision has been come to. Probably we shall be satisfied with a single line to begin with. The constant increase of the volume of the traffic that leaves the main line at Hooghly and there passes over the Jubilee-bridge, and seeks the docks and the neighbouring export wharves, gives good reason for the conclusion that the arrangements I have just described will for a long time to come secure all the relief that will be needed for the traffic directed to the Howrah terminus. The coal traffic that seeks Howrah will be almost exclusively that required for bunkers, to meet the consumption of steamers, the export traffic being sent across the Hooghly-bridge for despatch from the docks or its vicinity. I may add, however, that I cannot believe that the Kidderpore docks will be found suitable for such an extension of the Bengal coal export trade as may reasonably be regarded as probable in an early future, and it is hardly open to doubt that some other opening will be found for the establishment of an export coal terminus in the neighbourhood of Diamond Harbour, or possibly at Port Canning on the Mutlah. In any case it is virtually certain that the coal export traffic will not be carried on at Howrah on a large scale, and therefore additional means of carrying coal to that station do not appear to be called for. Here I may be allowed to remark that I cannot think that the schemes for a central passenger station in Calcutta, with a railway communication between the East Indian Railway at Howrah and the Eastern Bengal Railway at Sealdah, or the Port Commissioners' line, call for serious consideration at the present time, or can be regarded as having any practical bearing on the arrangements now being made for the Howrah terminus, which have been recently agreed to by the Bengal-Nagpur and East Indian com-

panies, and it is believed will be accepted by the Government of India. While the works to which I have referred are in contemplation on the lower part of the railway, the new line from Moghul-Serai to Gya is in active progress, as also the line from Gya to Lakhi-Serai, which is being carried out by this company at the cost of the South Behar Railway Company. We may hear at any moment of the opening of the latter line, with the exception of the bridge over the Phalgu River, which leads into Gya, at which some delay has been caused by engineering difficulties. The bridge over the Sone at Dehri on the former line will, it is expected, be completed either just before the next rainy season or soon afterwards, and both the lines, it may confidently be believed, will be opened and give through communication between Moghul-Serai and Lakhi-Serai before the end of 1899. The size of the great bridge over the Sone will be better appreciated by saying that it would reach from the Cannon-street station to Waterloo-place, or from the Marble-arch to Lincoln's-inn. The survey and estimate for the projected line from Barun, close to the Sone bridge on the Moghul-Serai-Gya line, to the coalfield at Daltongunj—or Palamow as it is sometimes spoken of—are completed, and work can be begun upon it as soon as the necessary funds can be conveniently spared. It is, however, not unlikely that in view of the greater urgency of the works on the lower part of the line, the commencement of this branch may be postponed for some little time. It is understood to have been arranged that when the engineers employed on the South Behar Railway are set at liberty by the completion of the works, they will be transferred to take up the survey of the line that will connect Gya with the Jheriah branch, and complete the Grand Chord. The country to be traversed is hilly and difficult, and it is thought that its examination may occupy two seasons. By the time the surveys and designs are finished, it may be hoped that other more pressing works may be so far advanced as to admit of funds being available for completing this very necessary, but long deferred, communication. It will shorten the distance between Calcutta and the North-Western Provinces by nearly 70 miles, a reduction that must be of the greatest value to the export trade. In order that the interests of the districts in the North-Western Provinces through which the East Indian Railway passes should be duly considered in dealing with proposals for extensions, a project has been prepared and sanctioned by the Secretary of State for a branch line from Shikhoabad, a station on the East Indian Railway about 35 miles south-east of Agra, to Manipuri and the city of Farokhabad on the Ganges, on the opposite side of the Doab. It is about 60 miles in length. This will supply a valuable line of cross-communication, the absence of such cross-lines being an obvious defect in the existing system of railways in those provinces. The estimated cost will be about 30 or 40 lakhs. A short but useful branch, about 4 miles in length, has been opened during the last half-year, leading from the main line of the East Indian Railway to the town of Hathras, about 30 miles north of Agra. This place is one of the great grain markets of the North-Western Provinces, and had previously been directly reached only by the metre-gauge line established many years ago between Cawnpore and Mutra. This line, originally constructed as a feeder to the East Indian Railway, has now by its extension and junction with the Rajputana railway become an active competitor, and thus largely serves to divert towards Bombay traffic that otherwise might have gone to Calcutta over the East Indian line. It is a remarkable fact that the system of Government railway control should have enabled the influence of Bombay to resist for many years the construction by the East Indian Railway of this short branch to a mart in the North-Western Provinces, in opposition to the representations of the Government of those provinces, and the obvious and declared interests of the merchants of the place itself.

Mr. B. W. COLVIN (deputy-chairman) seconded the motion.

Mr. J. L. FLEWER thought the shareholders would but ill show their appreciation of what had been done for them during the past half-year by the directors if they did not make some remarks. He believed that, with the exception of one half-year, the board had earned more for the shareholders than in any preceding half-year within his recollection, and that went back to the first meeting. With regard to the issue of fresh capital he thought the taking up of this must be left to the luxuries of the rich. Offering 2½ per cent. debentures was like offering caviare to the multitude when they would much rather prefer roast beef. He hoped that by means of the money borrowed at 2½ per cent. the board would do something towards increasing the one-fifth which the shareholders received with a great deal of thankfulness. He did not know whether a suggestion which he made at a former meeting would bear repeating, but it was this, that the directors, whose hands were naturally tied by the Secretary of State with regard to the issue of capital, might improve the original line as well as bring some return for the subscription of the shareholders to the original line by inducing the formation of feeders. Many of the stations were some distance from the sources of produce, and therefore feeders in the shape of light railways, or in such other form as might be best suited to the company, would be a source of profit to the ordinary shareholders. He thought if the board would throw their mantle over the promoters of such a railway that the line would be successful. This was not a novelty, as it had been done in the case of the South Behar Railway. If the directors could see their way to assisting companies desirous of making feeder lines he thought they would eventually find it a source of revenue to the company.

The CHAIRMAN—With regard to the debentures, I may say that the board, with the assent of the Secretary of State, have decided to make a fresh departure with respect to raising further capital. It is seen that it would be inconvenient to go on raising such a large amount of capital as will probably be necessary for the expansion of the railway for some years to come in the form of short-term debentures. It has therefore been settled, with the approval of the Secretary of State, that we

should issue, instead of the short-debentures, debenture stock, and this stock will be put upon the market, we hope, early next year. Of course, as to the precise terms on which it can be raised, nothing can be said at present; we must wait and see how the money market goes. That is the present intention. We shall have long-term debentures, and they will become a useful security in the market, and from time to time we shall be able to add to that debenture stock in the same sort of way as English railways do, instead of trusting, as we have hitherto done, either to money given by the Secretary of State or to the short-term debentures. I must again remind you that you are not shareholders of the company. The Secretary of State owns the railway; he is the owner; there is no such thing as a shareholder in this room. We, under a peculiar arrangement, I admit, are lessees of the line from the Secretary of State. You must remember that. You have nothing to do with the railway as owners; we are only lessees of the line, and the Secretary of State, under the contract which is now in force, has agreed to give the company for working the line a certain share of the profits after discharging the liabilities which are fairly put upon the revenue of the railway. You must not suppose that you have any claim such as the owners of a line have; you must get rid of that idea altogether. As regards feeders, I think it is not improbable that feeder lines may be useful and would add to the value of the main line: but there is a limit to everything. You cannot do everything at once. At present the growth of the traffic on the main line has been leading to the necessity for such a large expenditure on it, and to meet the requirements of the traffic as it now exists, that I do not think there is any present prospect of being able to do much more in the way of additional branches as feeder lines. The traffic that has been created on the railway has a first claim upon the company and upon the Government. We having assisted in the development, for instance, of the coal trade, the first thing we are bound to do is to see that the growing wants of that trade are fully met and the same will apply to all branches of trade centred in Calcutta. They have a perfect right to complain if they do not get the means of bringing their goods to Calcutta, and it is our business first of all to attend to that growing traffic. It is all very well desiring to increase our traffic, but you must first of all be fair to the people who give you your existing traffic. As regards the South Behar line, which is being carried on by a separate company, the conditions under which that was taken up were somewhat peculiar, and I may say that those conditions rather belong to the past and are not likely to be repeated in the future.

Mr. J. L. FREWER said they cared not whether it was as "lessees" or "shareholders" they received an additional amount. If he understood rightly, the line was blocked, not from accumulating traffic, but that it carried as much as it possibly could. The larger part of the line was a single line, but as the embankments and bridges were constructed for a double line there would not be much difficulty in doubling it if money could be borrowed at 2½ per cent. If this were done, the traffic could be increased.

The CHAIRMAN—The line is double as far as Moghal Serai, and it is on this part of the line where the difficulty arises. You are quite right in saying there is nothing in the nature of the line or in the nature of the traffic to prevent it all being carried satisfactorily, but you must have proper appliances. The mixture of the slow and the fast traffic makes it extremely difficult to get the trains through in a reasonable time. What must be done is to divide off the line (as is done on English railways) into short distances, which by a system of signalling are kept clear for the trains, as they follow one another, to pass in safety. That is what we are now setting to work to do, to provide a system of block signalling. It is also necessary to provide sidings into which the slow trains shall be put while the fast trains pass. We are doing that as fast as we can; but it all costs money.

Mr. HOGARTH said that to those who, like himself, had only recently joined the company, it was somewhat alarming to learn they were only lessees. The first thing which suggested itself to his mind was what was the length of the lease, and what was going to be done with them. He should be glad if the chairman would throw a little more sidelight upon the matter.

The CHAIRMAN—I am afraid that to you and to a great many other people an old proverb applies—*caveat emptor*. Before you put your money into the East Indian deferred annuities you ought to have ascertained what was the nature of your holding, what were your prospects, and so forth. As regards the future, you are probably aware that the board and the Secretary of State are now in communication regarding the renewal of the contract. The existing contract expires at the end of next year, and from the commencement of 1900 we shall start on a fresh basis. I am not in a position at present to say anything more than that.

The resolution for the adoption of the report was then put and carried unanimously.

It was further resolved:—

"That a dividend at the rate of 1½. 10s. 6d. per cent., less income-tax, be paid to the deferred annuity-holders, and the deferred annuity-holders, class D, registered in the books of the company on December 1st, 1898, out of the surplus profits for the half-year ending June 30th, 1898."

"That in pursuance of the provisions of the East Indian Railway Company's Act, 1895, the board of directors be and they are hereby authorised from time to time and at any time to raise additional capital for the purposes of the undertaking, by the creation and issue of debentures or debenture stock, upon such terms as may from time to time be agreed upon with the Secretary of State for India in Council. Provided that the aggregate nominal amount so to be raised, in addition to the moneys authorised by the resolution of December 22nd, 1897, to be borrowed and not yet borrowed shall not exceed 1,500,000."

## EAST AND WEST YORKSHIRE RAILWAYS.

A special general meeting was held at Leeds on Thursday, when an application by the company to the Board of Trade for a certificate to raise additional capital was submitted for formal approval. Mr. J. W. H. WHITE, one of the directors, presided, in the absence of Mr. Joseph Charlesworth.

The CHAIRMAN explained that the object of the application was to raise additional capital in order to further equip the line, and to provide rolling stock, signals, and sidings. The earnings of the company were considerably larger than was the case this time last year, and in order to deal with the traffic, which they believed would still further increase, the company found it necessary to spend additional money so that the line could be worked quickly and safely, and also with a view to giving passenger service for the district. The company had been pressed for a long time to afford this accommodation. The directors believed that the capital so raised would assist the earning powers of the company to an extent greater than the burden imposed by the issue of the extra amount of stock. The amount of the capital proposed to be raised under the order was 36,000*l.* of stock and 12,000*l.* for borrowing powers, and he moved that the terms of the order be approved.

Mr. ARTHUR DUFTON seconded the motion, which was carried.

## Directors' Reports.

### BARSI LIGHT RAILWAY.

The accounts for the year ending June 30th, 1898, show a gross revenue of Rs.1,40,188, an expenditure of Rs.1,11,995, and a profit of Rs.2,81,93, less Indian income-tax of Rs.637. The balance of Rs.2,75,56, at an exchange of 1s. 3 11-16d. per rupee, was equal to 1,801*l.*, and adding adjustments of previous half-year 60*l.*, the total net revenue was 1,861*l.* Interest on loans absorbed 242*l.*; interim dividend at rate of 1 per cent. per annum paid July 13th, 1898, 750*l.*; final dividend at the same rate now proposed, 750*l.*; balance to next account, 119*l.* The number of passengers carried was 60,580; the weight of goods carried, 47,335 tons; the train mileage, 106,357; the ratio of expenses to receipts, 79.88 per cent.; the length of line open, 21½ miles, exclusive of 3 miles of sidings. On capital account the expenditure had been 83,452*l.*, and the receipts 79,287*l.*, of which 75,000*l.* was derived from the issue of shares, 3,258*l.* from premiums, interest, &c., and 1,029*l.* was the balance of net revenue for the period up to June 30th, 1897. The report states:—

The total expenditure on construction up to June 30th, 1898, was 79,165*l.* As reported last year, the excess expenditure has been met by a temporary loan, which still remains to be adjusted by the issue of further capital. The net revenue account shows a balance of 1,619*l.*, available after payment of Indian income-tax and interest on loan. An interim dividend of 1*l.* per cent. was paid on July 12th last, and the directors now recommend that a final dividend of 1*l.* per cent. be paid, making 2*l.* per cent. for the year. The traffic receipts for the year have been, as explained in the directors' interim report, dated July 12th last, most seriously affected by the drought, an unprecedented frost, and a recrudescence of the plague; a return of normal conditions will undoubtedly show a large increase in traffic and yield a satisfactory return on the capital. The negotiations for the concession to construct and work the extension to Pandharpur have been completed, and the contract with the secretary for India has been drawn, and only awaits final approval. Mr. E. R. Calthrop was chosen by the directors to fill up the vacancy caused by the retirement of Mr. G. H. Hopkinson.

## American & Canadian Railways.

### BALTIMORE AND OHIO SOUTH WESTERN.

From the accounts of this company for the year ending June 30th we take the following:—

	1898-7.	1897-8.
Gross earnings.....	\$6,140,000	\$6,904,317
Total expenses.....	4,257,304	4,916,806
Net earnings.....	\$1,882,696	\$1,987,511
Other income .....	2,250	2,250
Total net income .....	\$1,884,946	\$1,989,761
Deduct interest on bonded debt .....	\$1,791,937	\$1,691,112
Rental Baltimore and Ohio South Western Terminal Company .....	60,000	60,000
Taxes and assessments.....	294,259	293,998
Interest balance .....	8,096	44,225
Total deductions.....	\$2,154,292	\$2,089,335
Balance—deficit .....	269,346	99,574

The balance-sheet June 30th, 1898, shows capital stock (common), \$10,000,000; ditto (preferred), \$20,000,000; funded debt, \$51,844,690.

The length of line operated was 922 miles (against 922 miles); the number of passengers carried, 2,139,467 (against 2,164,004); the average rate per passenger per mile 1.78 (against 1.88 cent); the freight carried was 4,254,123 tons (against 3,575,360 tons); the average rate per ton per mile 0.55 (against 0.63 cent); the ratio of expenses to receipts 71.21 per cent. (against 69.34 per cent.). Vice-President W. W. Peabody in his report states:—

"At the close of the fiscal year the amount of unfunded debt was \$1,389,704, a net increase over last year of \$370,202, which arises chiefly from the amount charged to betterment account, discount and expenses on the extension of the Ohio and Mississippi first mortgage bonds, deficit in earnings for this year and equipment trust certificates retired and extended. The bonds in the treasury of the company, if sold at the prices now prevailing, would realise a sum in excess of such total indebtedness. Owing to the unsatisfactory price at which such securities have ranged during the year, it has been considered undesirable to sell the same and liquidate such indebtedness.

"Particular attention is called to the effect upon the company's affairs and net results of operation by reason of the extraordinary decline in rates. At the time of the organisation of the company—namely, November 1st, 1893—the rate received for freight traffic per ton mile was 8.5 mills; this year only 5.5 mills, being a decrease of 3 mills. This year's business was the first normal year of commercial affairs since the company was organised, as up to that time the unusual financial and commercial depression existed throughout the country, seriously affecting your business; had it received the same rate on the tonnage moved last year as was received at the time of its organisation, it would have realised net earnings over its present fixed charges and taxes of \$2,403,200.

"At the time of such organisation ample provision was made for means to make improvements in the property, so that it could be brought to the highest efficiency, and thus better able to meet declining rates if such should prevail. Such improvements were entered upon as soon as the company commenced operations. One of the most important improvements to be made was large additions to the equipment of the company and the reduction of its grades, and to overcome the grades that could not be reduced by the use of heavier motive power. From the fund thus provided it was also arranged to replace the old rail by heavier rail; certain bridges by heavier structures, and to ballast with stone or gravel that portion of the line which had not heretofore been ballasted. These funds were to be provided by the issue, from time to time, of the company's first consolidated mortgage bonds, guaranteed by the Baltimore and Ohio Railroad Company.

"While the company was engaged in carrying on some of these improvements, the Baltimore and Ohio Railroad Company became insolvent, and the securities thus provided could not be sold at prices which would have justified the management in continuing the improvements and completing the work originally contemplated. The result has been that the company's condition would not permit it to meet the unprecedented decline in rates and carry on, as it had hoped, an advantageous and successful operation of its property. The progress of the reorganisation of the Baltimore and Ohio Railroad Company presents an opportunity for this company to determine its future relations with that reorganised company, and to procure, through the guaranty of its securities on some just and equitable basis, ample capital to complete these improvements and place the property in a position where it can be successfully operated. Negotiations for such relationship are being conducted by the president and the board of directors with the reorganisation managers of the Baltimore and Ohio Railroad Company, and when they are concluded a plan for readjusting the affairs of the company and of such proposed arrangements will be presented to the respective security holders."

#### ATLANTIC AND DANVILLE.

The report of the directors of the Atlantic and Danville Railway Company for the year ended June 30th last states that the total earnings for the year amounted to \$564,751, as against \$543,770, and of the year to June, 1897, a net increase of \$20,981, and the total expenses to \$405,398, as against \$404,857, a net increase of \$541. The net earnings from operation are, therefore, \$159,352, as against \$138,912, an increase of \$20,440, and the ratio of expenses 71.78 per cent., against 74.45 per cent., a decrease of 2.67 per cent. To the improved organisation gradually introduced in the various departments of the road during the last few years is due the satisfactory increase in the net revenue. In the important item of coal alone there is a reduction this year of \$5,447 and of \$12,345, as compared with two years ago. The investments in real estate show an increase of \$12,936. With slight exceptions, this amount, as well as that already charged to real estate account, is producing a satisfactory revenue, and at the same time contributing other decided advantages to the company. The reserve balances, with the monthly additions accruing under the headings of maintenance of way and maintenance of equipment, are sufficient to provide against all contingencies for which these funds were created. The income account shows by earnings from operation \$561,489, by earnings from special rail and other accounts \$3,262—\$564,751; to

operating expenses \$405,398, to fixed charges (interest on bonds) \$61,900, to surplus 97,453—\$564,751. The surplus is transferred to the credit of improvement account, the balance at credit of which on June 30th, 1897, stood at \$229,661, less 1 per cent. dividend on preferred stock, \$3,099,200, paid September, 1897, \$30,992, leaving \$198,669, and adding sundry credits there is at credit \$297,130. The capital stock remains the same amount as last year, and no occasion has arisen to draw into requisition any portion of the \$262,000 first mortgage bonds deposited with the Mercantile Trust Company, New York. The company has continued to conduct its business on a strictly cash basis, and has incurred no obligations of either car trusts or other character. The increased earnings of last year and the financial condition of the company would have justified the payment at a higher rate than a dividend of 1 per cent. on the preferred stock, but regard to the future interests of the road has dictated to the directors the policy of further strengthening the cash reserves, with the view, when opportunities present themselves, for the building of branches, extensions, &c., or for co-operating with others in doing so, to be provided with the necessary preliminary funds for carrying into effect the main purposes for which the road was built. Taking the narrow gauge portion of the road as one-half of the standard gauge, the cost of the latter, including terminals, equipment, &c., would represent per mile less than \$5,000 funded debt, \$12,500 preference stock, and \$8,700 ordinary stock. These last two securities, given in exchange for, and practically representing the old mortgage bonds, can only attain their intrinsic merit by pursuing the policy outlined above. The general manager reports that the roadway, bridges and other structures are in thoroughly good condition, and the state of the equipment and all other property is equally satisfactory. A standard gauge branch of 5 miles is now under construction by the company into a promising copper mining district of North Carolina, which, when completed, will ensure, with some other industries now starting on the line, an increased traffic. All the lines running into Norfolk and Portsmouth have jointly constructed a belt line, in which this company has taken its proportionate interest of \$6,200.

#### HUDSON BAY ROUTE TO MANITOBA.

Mr. Josiah Harris, President of the Chartered Hudson Bay and Pacific Railway, writing to the *Financial Times* of Thursday from 8, Union-court, Old Broad-street, E.C., says:—"In your impression of 20th instant appeared a cablegram from Montreal stating that a Mr. Fisher had reported that the Hudson Bay route to Manitoba was absolutely worthless for purposes of commerce. As such a statement is likely to prejudice an undertaking of commercial and Imperial importance—namely, the Chartered Hudson Bay and Pacific Railway—I trust, with your usual fairness, that you will insert this denial. Without troubling you with full details of papers read before the Royal Geographical Society, clearly showing that the Hudson Bay and Straits are open for navigation for about six months in the year, and also of the report of the Select Committee of the Dominion House of Commons in 1884, I will give you a brief extract from the latter report, as follows:—"To sum up, Hudson Bay appears to be destined to perform the same service for the vast territories of the North-West which the Gulf of St. Lawrence does for the vast fertile valley bearing the same name." I also append an extract from the report from the Legislature of Manitoba in 1884:—"No evidence has been given that goes to prove that Hudson's Strait and Bay proper ever freeze over, or that the ice met with in those waters is sufficient to prevent navigation at any time of the year." In 1884, 1885, and 1886 there were three expeditions sent out, commanded by Lieutenant Gordon, R.N., under the auspices of the Canadian Government, and his report was that the Hudson Strait is open for navigation for four months in the year. In an expedition in 1897 Commander Wakeham, appointed by the Dominion Government, reported:—"I absolutely agree with Lieutenant Gordon in fixing the date for the opening of navigation in Hudson Strait for commercial purposes from July 1st until October 20th." Admiral A. H. Markham, who was in the *Alert* expedition, has recently declared his opinion that the Hudson Strait is navigable for six months in the year. I submit, Sir, the above evidence alone proves that the statement by Mr. Fisher, who is a Winnipeg solicitor, is not to be relied upon. The importance to the empire of opening up the vast North-West Territory of Canada as a wheat-producing country for England, and of shortening the route to the Australian colonies by three days, is my excuse for rectifying a statement which, unless contradicted, would have a serious influence in retarding the progress of Canada."

#### LATEST EARNINGS.

Third week of December.—Oregon Railroad and Navigation, \$135,000—decrease, \$7,000; Pittsburg and Western, \$51,000—

decrease, \$1,000; Baltimore and Ohio South Western, \$126,000—decrease, \$7,000; Chesapeake and Ohio, \$235,000—decrease, \$27,000; Chicago Great Western, \$107,000—increase, \$13,000; Denver and Rio Grande, \$187,000—increase, \$20,000; Louisville and Nashville, \$453,000—increase, \$7,000; Mexican Central, \$315,000—increase, \$57,000; Missouri Kansas and Texas, \$270,000—increase, \$32,000; Missouri Pacific, \$508,000—increase, \$47,000; St. Louis and San Francisco, \$158,000—increase, \$38,000; St. Louis South Western, \$153,000—increase, \$50,000; Southern Railway, \$495,000—increase, \$10,000; Wabash, \$271,000—increase, \$40,000; New York Ontario and Western, \$69,000—increase, \$4,000; Kansas City Pittsburg and Gulf, \$72,000—increase, \$10,000; Chicago Milwaukee and St. Paul, \$781,000—increase, \$176,000; Cleveland Cincinnati Chicago and St. Louis, \$270,000—decrease, \$24,000; Norfolk and Western, \$280,000—decrease, \$2,000.

Second week of December.—Cleveland Cincinnati Chicago and St. Louis, \$266,000—decrease, \$29,000; Northern Pacific, \$474,000—increase, \$73,000. The gross earnings of seventy-two roads in the second week of December show an increase of 1.58 per cent.

Month of November.—Central of New Jersey, gross, \$1,222,000—increase, \$67,000; net, \$558,000—increase, \$62,000. Chicago Burlington and Quincy, gross, \$3,980,000—increase, \$177,000; net, \$1,708,000—increase, \$237,000. Northern Pacific, gross, \$2,826,000—increase, \$186,000; net, \$1,754,000—increase, \$131,000; net operating income, \$1,531,000—decrease, \$49,000. Atchison Topeka and Santa Fé, gross, \$4,009,000—increase, \$120,000; net, \$1,434,000—increase, \$60,000. Chicago Milwaukee and St. Paul, gross, \$3,500,000—increase, \$172,000; net, \$1,595,000—increase, \$125,000. Northern Central, gross, \$644,000—increase, \$28,000; net \$212,000—increase, \$9,000. St. Louis and San Francisco, gross, \$661,000—increase, \$48,000; net, \$284,000—increase, \$14,000. Wabash, gross, \$1,212,000—increase, \$151,000; net, \$298,000—increase, \$30,000.

Month of October—Baltimore and Ohio, gross, \$2,460,000—increase, \$76,000; net, \$641,000—decrease, \$49,000.

#### RAILROAD NOTES.

There are indications that the Chicago Burlington and Quincy and the Chicago Rock Island and Pacific are bent on extending their lines to the Pacific Coast, as a set-off to the Atchison Company's entry into San Francisco in the spring. An officer of a large western line said the other day that he would not be surprised to wake up some morning and find the transcontinental situation further complicated by the announcement that the Burlington and Quincy will be extended to the Pacific. He said the Burlington and Quincy is much nearer the coast than most people imagine, and has recently been surveying through the State of Idaho. Two or three lines are now being built in western Idaho and north-eastern Oregon, which are intended eventually to form part of the Burlington and Quincy's western extension.

The Committee of the Kansas State Legislature charged with the framing of a railroad regulating Bill has completed seven sections. It proposes to create a court, subordinate only to the Supreme Court, with power to pass judgment upon rates, and, having determined whether rates are reasonable, to enforce its decisions by the processes usually followed by the courts. The Bill will not contain any maximum freight-rate schedule. The first election of judges is to be at the regular State election in 1900. An attorney is also to be elected, to inquire into all complaints of overcharges, and to bring proceedings before the court to adjust the rates.

The New York correspondent of the *Financial Times* telegraphs:—"It is understood that the dispute between the Northern Pacific and the Oregon Railroad and Navigation will be settled by the former conceding the main demands of the latter. There is an almost universal consensus of opinion that President Charles Mellen's company is in the wrong, and that it is only following the right and sensible course in giving way."

The directors of the Pennsylvania Railroad Company have issued a notice to the stockholders asking that the managers of the trust of 1878 should be empowered to invest its funds in securities of, or guaranteed by, the Pennsylvania Company. This is reported to mean that the Pennsylvania Company is wishing to obtain control of the minority holdings of Pittsburg Cincinnati Chicago and St. Louis securities.

The Atchison Topeka and Santa Fé has purchased water-front property at San Francisco for a freight terminal, paying \$388,000 for the same. The improvements will be commenced at once. Chairman Walker says that the company's trackage agreement

with the Southern Pacific Company, between Mojave and Bakersfield, has been made for a long term of years and will prove beneficial to both lines.

The Southern Pacific Company will, on and after January 3rd next, against presentation of outstanding certificates of stock of the Central Pacific Railroad Company for stamping statement of such payment, pay to persons presenting same at the Southern Pacific Company's New York office one-half of 1 per cent. of par value of stock represented by such certificates respectively.

The Vanderbilt railroads have declared their usual semi-annual dividends as follows:—Lake Shore  $3\frac{1}{2}$  per cent., Michigan Central 2 per cent., and Canada Southern 1 per cent. For the year ending December 31st the Lake Shore shows:—Gross, \$20,738,000—increase, \$441,000; net, \$6,813,000—increase, \$57,000; net surplus after all charges, \$530,000—decrease, \$247,000.

In order to avert a strike on the Grand Trunk Railway, which would paralyse Canadian trade, Mr. Hays, the general manager, has offered to submit the question in dispute between the company and its telegraphists to arbitration. This proposal the telegraphists have accepted in principle.

Last week's eastbound all-rail freight tonnage from Chicago amounted to 91,000 tons, against 76,000 tons in the same week last year. The total volume of eastbound shipments from Chicago during 1898 will be found to break all records.

The directors of the Wabash Railway Company have decided to again pass the interest on the \$3,500,000 "A" 6 per cent. debenture bonds. The last distribution was in July, 1896, when 1 per cent. was paid.

The United States Treasury has issued a call for the remaining \$8,000,000 of the Union Pacific purchase-money to be paid in weekly instalments of 10 per cent.

The New York Stock Exchange has listed \$813,000 of new Southern Pacific 5 per cent. bonds and \$25,000,000 additional Great Northern preferred stock.

## General News.

### GREAT NORTHERN DEFERRED STOCK.

A correspondent writes:—"One or two of your contemporaries have lately drawn attention to this stock as unduly neglected; others, adopting what I understand is the Stock Exchange view, have recommended that it should continue to be neglected, until it is seen what will be the effect of the Great Central competition. As the opening of that line will very shortly be an accomplished fact, when we shall be enlightened as to what the effect will really be, for the consideration of those who in the meantime might be induced to part with their stock, I should like, with your permission, to bring before them a few facts which may not only prevent them from doing so, but may possibly induce some to increase their holding while they have the opportunity, at so low a price. In estimating the value of any stock the two main points to be considered are, what is the present dividend and what is it likely to be in the future? and in making this calculation for the present half-year on Great Northern deferred we must bear in mind a  $\frac{1}{4}$  per cent. dividend was earned and set aside on June 30th last, besides which 16,113*l.* was carried forward, as against 4,595*l.* in the corresponding half-year. According to the published statements there is an increase in the traffic of 111,000*l.* for the twenty-six weeks, and to this may be added another 25,000*l.* for the usual "underestimated" traffic. Add to this total increase of 136,000*l.* the sum of 16,113*l.* brought forward as before mentioned, and we have the large total of 152,000*l.* to deal with. I have no wish to be over sanguine in my forecast; for I do not forget that this company has more frequently of late been disappointing in its dividend than any other railway in which I am a shareholder; nor would I overlook the fact that there will be 15,000*l.* to 20,000*l.* to find for interest on additional capital, besides which, with all this increased traffic, there must be additional train mileage, which means additional cost; but in estimating this we may bear in mind that the chairman stated this time a year ago there was an increase in wages for the half-year of no less a sum than 70,000*l.*, from which I assume we had then almost realised the full effect of shorter hours and higher wages, and, if space permitted, I might also quote his speech last February, in which he said they had sanctioned somewhat over a normal expenditure in order to put the road, the engines, and rolling stock in a condition "better than good." Carefully considering

all these facts and figures, which I have endeavoured to state accurately, I can come to no other conclusion than that this company must have earned  $5\frac{1}{2}$  per cent. on ordinary stock, as against 5 per cent. last year, which, with the  $\frac{1}{2}$  per cent. in hand from last half-year, will make 2l. 15s. to be paid to the deferred shareholder; and, if earned, nothing less will satisfy us. I must add a very few words as to the probable effect of the opening of the Great Central to London. That line has been open most of the present half-year for minerals, with the result that the Great Northern has taken an increase in these alone of 15,000l.; so we now know the worst of our loss in minerals. The passenger traffic from London to Lancashire, I am sorry to say, has never been a large item of traffic to this company; and, with regard to merchandise, the improved facilities and arrangements that have been made in Manchester and Sheffield for the carriage of goods have already led to a large increase in this branch of traffic, and I believe I am right in saying those best able to judge do not fear any material loss of this traffic."

### PANAMA CANAL.

The annual meeting of the New Panama Canal Company was held in Paris on Wednesday, M. Bonnardel presiding. A long report was read, the interest of which centred in the references to the completion of the canal and to the rival Nicaragua scheme, but on neither point could anything definite be stated. As to the completion of the canal, the Technical Committee have studied three plans. In the first there are five locks on each side, with a fall of 9 metres, in the second four on each side, with a like fall, and in the third two locks on the Atlantic and three on the Pacific side, one of the latter acting only when the sea is above the average level. In all three schemes the freshets of the Chagres and the supply of water to the canal are arranged by a dam in the upper valley of the Chagres at Alhajuela. The choice depended on the time required for the excavation, and the committee have given the preference to the second plan. The board of directors, adopting this conclusion, have referred the report to the statutory commission, presided over by M. Etienne, who with two of his colleagues visited the canal last March. The directors hope in a few months to convene a special meeting of the shareholders to consider the opinion of that Commission. The renewal of the concession for six years will, it is believed, be granted by the Colombian Government, and 3,400 navvies are at work on the canal. These were found on the isthmus, so that it was not necessary to send to Jamaica for navvies to take the place of those sent back to Sierra Leone. The technical committee, it should be mentioned, includes General Abbot, of the United States Engineer Corps, and Mr. Hunter, engineer of the Manchester Ship Canal. As to the Nicaragua scheme, the report speaks of the visit to the Panama works of Admiral Walker and the other members of the United States Survey Commission, but their conclusions are not yet known. "At the beginning of this year," the report adds, "the Spanish-American war broke out, and that event has naturally drawn attention with fresh intensity to the necessity of a communication between the Atlantic and Pacific Oceans. American public opinion has warmly taken up this question, the prompt solution of which it desires; but a tendency is plainly manifested to identify the great national interests of the United States with the special question of the Nicaragua route. This is explained by the fact that, according to the testimony of American personages worthy of all confidence, our enterprise was not well known in the United States. The great majority even of enlightened men, remaining under the impression of the disaster of the old company, believed that the Panama route was no longer to be taken into account. In these circumstances we have striven by all the means in our power to make the true situation of our undertaking known to the American people. As soon as we were in possession of the Technical Committee's report in support of the scheme of execution of the canal, we frankly approached the American Government itself, and handed it an official copy of the report. We have informed that Government of the present situation of our plant, of the importance of the works already executed, and of the constitution of our company, a purely commercial and private company independent of any Government, governed exclusively by its statutes and concessions. We have, moreover, intimated to the American Government that if it expresses such a desire we will place at its disposal every facility for examining our works and plans, which none of the commissions instituted by it hitherto has been empowered to do. The Government and people of the United States will easily convince themselves of the superiority presented from all standpoints by the Panama route. They will find, as well in the treaties existing between them and Colombia as in the facilities allowed by our statutes and freedom of action, all the guarantees and advantages which their national interests

can reasonably require. . . . It is the maritime highway best responding to all necessities. It is indisputably that which can be opened to navigation in the shortest time and with the least expense." The report was adopted, and the three outgoing directors were re-elected.

### CEYLON NORTHERN RAILWAY.

Mr. L. B. Clarence, Coaxden, Axminster (formerly a judge of the Ceylon Supreme Court) writes:—"In a recent issue you reported, under this heading, the proceedings at a meeting of the 'Ceylon Association in London' (a body representing the Ceylon planting interest), at which meeting was recorded an emphatic disapproval of the projected Ceylon Northern Railway. That project embraces, in effect, two separate schemes—viz., a northward railway branching from the existing line which connects Colombo with Kandy, and running upward through the north central country to the Jaffna Peninsula in the extreme north, and a branch deviating westward from that northward line, and connecting Ceylon, by way of Manar and 'Adam's Bridge,' with the Indian mainland at the Pamban Channel. Touching this second scheme I do not now express an opinion. I will not now discuss the advantages which might be expected to follow the connecting of Ceylon with India by an unbroken line of railway, or the probably serious cost of constructing a railway over the long line of rocks, shallows, reefs, and sandbanks known as 'Adam's Bridge.' But with regard to the other, the line designed to run northward through the middle of the island, those who now pointedly seek to discourage the proposal underrate the value of the contemplated extension, and are hardly fair to the native community. Such a line would traverse and tap large tracts of waste and now neglected country which many centuries ago, in the palmy days of the Sinhalese people, supported a teeming population and were the scene of a wide and industrious cultivation. Long stretches of land which now hold scarcely sixteen souls to the square mile were once densely inhabited. What has been might be again. It cannot be said that the country has no potentialities. But the planters, we are told, object to the Ceylon Government expending capital on such a scheme. I have a high esteem and liking for the Ceylon planters. I have valued friends among them, and during twenty years spent in the island I came to know them well. Few achievements have been more marvellous or more deserving than their building up the present successful tea enterprise after coffee had gone under—a success won by dogged, unfailing industry united to alert and intelligent enterprise. But we all have our weak points, and the Ceylon planter is a trifle prone to hold that his wish or convenience should be decisive in questions of the policy of the Government. The three million or so of native inhabitants in Ceylon outnumber the Europeans, planters included, in the ratio of about 500 to 1. The native interests have to be considered. The planters' interest is not inevitably that of the sons of the soil. When I first knew Ceylon the planters were agitating strongly for a railway into the planting districts in the hills. They gained their point. The route was an expensive one—some experts thought needlessly so—crossing the very roof of the island; distinctly a railway undertaken in the interest of the planters. Now that the Government of the island is minded to make another railway through a level and easy country, a line which may benefit native inhabitants, surely it is hardly worthy of the planters to clamour in opposition."

**Accidents to Platelayers.**—A statement issued from the central office of the Amalgamated Society of Railway Servants on Thursday says:—"Further correspondence has reached Mr. John Burns, M.P., from the Board of Trade relative to accidents to platelayers. The assurance which the London Brighton and South Coast Railway Company gives is highly satisfactory to us. They say that in future an adequate staff of look-out men shall be provided whenever gangs are engaged upon repairing and other dangerous duties. We have for a long time been endeavouring to move the Board of Trade in the matter, and have more than once interviewed the heads of the Department with a view to bringing about a much-needed reform. The initiative taken by Mr. Burns has now made the way clear for the general adoption throughout the country of an adequate system of look-out men wherever it is required."

**EPPS'S COCOA.**—GRATEFUL AND COMFORTING.—"By a thorough knowledge of the natural laws which govern the operations of digestion and nutrition, and by a careful application of the fine properties of well-selected Cocoa, Mr. Epps has provided for our breakfast and supper a delicately flavoured beverage which may save us many heavy doctors' bills. It is by the judicious use of such articles of diet that a constitution may be gradually built up until strong enough to resist every tendency to disease. We may escape many a fatal shaft by keeping ourselves well fortified with pure blood and a properly nourished frame."—*Civil Service Gazette*.—Made simply with boiling water or milk.—Sold only in packets and pound tins, by Grocers, labelled—"JAMES EPPS and Co. Ltd. Homoeopathic Chemists, London."

## Notices to Readers.

The Offices of THE RAILWAY TIMES are at 2, Exeter-street, Strand, W.C.

Telegraphic Address:—RAILWAY TIMES, LONDON. Telephone No.:—1967 GERRARD.

All communications bearing upon literary matters should be addressed to the Editor.

Letters relating to Subscriptions, Advertisements, and other business matters should be addressed to the Publisher.

## TERMS OF SUBSCRIPTION.

Post-free to any address in the United Kingdom.

Three Months .....	20 7 0
Six Months.....	0 13 0
Twelve Months.....	1 5 0

A special discount of 6d. on quarterly, 1s. on half-yearly, and 2s. on annual subscriptions will be allowed for payment in advance.

THE RAILWAY TIMES may be had at all bookstalls, and of any newsagent throughout the kingdom, at 6d. per copy.

Back numbers will be charged for as follows:—If dating back more than a year, 1s. per copy; if more than two years 2s. per copy.

## REMITTANCES.

Money Orders, Cheques, &c., should be drawn in favour of Lionel Bridgland, and should invariably be crossed "London and County Bank." Stamps will be taken in payment of small sums, say under 10s.

## EDITORIAL.

All communications must be authenticated with the name and address of the writer, which will be received in strict confidence.

## Forthcoming Meetings.

- Jan. 3—Great Eastern Railway (Holders of Laing's Mortgages), Liverpool-street Station, at 12.  
 Jan. 11—Chicago Great Western Railway (Annual), City Terminus Hotel, at 2.  
 Jan. 25—London Brighton and South Coast Railway (Half-yearly and Special), London-bridge Terminus, at 12.  
 Feb. 6—Zafra and Huelva Railway (Special), Madrid.

**Transvaal Finances.**—According to the Johannesburg Standard, the South African Republic, so far as its finances are concerned, occupies a splendid position, and a glance at the following financial statement will show that for solvency this State is in the front rank. In the first place, it should be noted that it holds in cash and negotiable securities nearly 7,000,000*l.* sterling, made up as follows:—Cash in Treasury, 562,426*l.*; deposited with bankers in Europe, 520,000*l.*; negotiable securities, being 454 debentures and obligations of the Barberton line, 45,854*l.*; 5,480 Netherlands Railway debentures, 550,740*l.*; 3,000 Pietersburg line debentures, 255,000*l.*; 3,000 Netherlands Railway shares, 300,000*l.*, realisable at Bourse rates; 5,713 Netherlands Railway shares, 1,485,380*l.*; 10,000 National Bank of the South African Republic shares, 135,000*l.*; Amortisation Fund mortgage bonds, 100,000*l.*; loan to the Netherlands Railway Company paid out of the Rothschild loan, 2,000,000*l.*; profits due from the Netherlands Railway Company for 1898, 700,000*l.*, making a total of 6,654,399*l.* This does not touch the capitalised value of the Netherlands Railway Company's profit or the general assets of the State, but is an absolute surplus in hand and unpledged.

## The Railway Times.

Established 1857.

DECEMBER 31, 1898.

## EXIT 1898.

From the point of view of financial interests the year 1898 has not shown so favourable a record as 1897, and certainly railway business, though it has attained record proportions, has not been so profitable in the year now concluded as in the year preceding it. Monetary conditions have not been so favourable, political scares have been frequent and protracted, whilst a great shock to financial enterprise has been administered by the Hooley and other disclosures relating to joint-stock companies. In the years preceding 1898 the investing public, heedless of the lessons of the past, swallowed mining, cycle, and miscellaneous investments with an appetite truly amazing, and in spite of the continued accumulation of wealth by the community as a whole, a not inconsiderable number of investors are suffering from these follies of recent years, and legitimate and promising enterprises are also in some degree prejudiced in consequence. Nevertheless, the general prosperity of the country has continued in evidence, and is in no direction better illustrated than in the further traffic increases secured by our railways—another new record in the amount of gross receipts being shown in 1898. As we had occasion to point out last week, the outcome, from the dividend standpoint, has been by no means so gratifying; in fact the change in the direction of railway profits which we foreshadowed a year ago has been but too strongly reflected in the last two series of dividend announcements. In prices there has also been a downward tendency—thus affording a natural reflex to the decline in net profits already shown in recent half-years and likely to be still more prominent in the future. During 1897 the rises in active home railway ordinary stocks ranged from 2 to 22½ points, and the declines in quotations were decidedly in the minority. Comparing present quotations with those existing at the end of 1897, however, the reverse to this is shown, the advances in prices being extremely few and far between, whilst falls ranging up to 12 in Great Western ordinary and 10 in the case of South Eastern deferred are predominant. Even the "gilt-edged" railway stocks have suffered, issues like London and North Western 3 per cent. debenture stock being down 8 or more points on the year. This is, of course, mainly due to the more stringent monetary conditions now prevailing. Besides advancing receipts, still more rapidly growing expenses, and the natural outcome of declining dividends, 1898 has been characterised by a distinct increase in capital outlays, indirectly due no doubt to the continuous growth of revenue since 1895. Large issues of capital have, therefore, been to the fore, among which we may mention an issue of 2½ millions of ordinary stock by the Great Western in June, and 1½ millions by the Caledonian in July, both of which caused sharp declines in the market value of the existing issues. Though no very comprehensive new schemes are being introduced either by existing or new companies, the Bills to be brought before Parliament in the coming session are marked by the large amounts of new capital sought to be raised, and the immediate future promises large additions to capital charges. In regard to capital we may recall the fact that the Chatham financial arrangements have taken up a considerable share of attention, recently, and of the fate of the Bill introduced by the company to rid itself of awkward obligations placed upon it in the past will be watched with great interest. Labour troubles, so prominent in 1897, have not, during the past year,

directly troubled the railways to any extent, though the South Wales coal strike from April to September caused a great loss of revenue to the Great Western and the various local lines. The professional agitator never gained much of a following amongst the general body of railway employés, and the sudden accession to the membership of the Amalgamated Society of Railway Servants in 1897 has since been largely lost—a result which no friend of railway servants will regret, or be in the least surprised at. Wages bills continue to expand, and in 1898 will again be the most conspicuous feature of the growing expenses. A most important development in 1898 has been the rapprochement of the Chatham and South Eastern companies which will come into operation with the New Year, and will represent a working union between these erstwhile rivals of a very close character. The North Eastern and Hull and Barnsley have also agreed to bury the hatchet, and are now making arrangements to set about the construction of a joint dock at Hull. Turning to entirely new schemes and enterprises, we may refer to the opening of the Great Central new line for coal traffic on July 25th and the running of the first passenger train through to London in November. In August the payment of interest out of capital ceased, owing to the exhaustion of the fund for that purpose. The opening of the Waterloo and City Railway for public traffic in August marks another stage in electric railway development in the metropolis. Two other similar schemes—the Great Northern and City and the Brompton and Piccadilly-circus—came before the public for capital in 1898, without gaining much response, though in the former case arrangements have been made for the construction to be proceeded with. Among other new lines opened in 1898 was the Aviemore direct line of the Highland system and the Holsworthy and Bude branch of the South Western. In recent railway legislation the most noteworthy feature has been the scheme for a new route to Ireland via Fishguard and Rosslare, which has the joint support of the Great Western and Great Southern and Western companies. A large increase in the November applications for light railways shows that the privileges of the Light Railways Act are being appreciated. No less than fifty-four schemes were given notice of in November—the largest number since the Light Railway Commission was constituted. Among personal matters we may refer to the lamented death of Sir George Russell, the South Eastern chairman; also of Mr. Oscar Stephen, a director of the North Western and former chairman of the North London; of Mr. Arthur Guest, a director of the South Western and Taff Vale companies; and of Mr. W. G. Skipworth, the Irish traffic manager of the North Western. Mr. Macaulay, the former secretary for eighteen years of the South Western, has been elected to a seat on the board; whilst Sir Charles Scotter, Sir Allen Sarle, and Sir Henry Oakley, the former managers of the South Western, Brighton, and Great Northern companies respectively, were also offered directorships of the companies with which they have been so long and honourably connected—a course likely to be of great advantage to the shareholders of all three railways. A new code of by-laws framed by a sub-committee of the Clearing-house was this year submitted by the North Eastern to the Board of Trade, and is intended as a type of by-laws for other railways. The Workmen's Compensation Act came into operation on July 1st, and represents another addition to the burden of the railways. The most conspicuous speculative interest has recently developed in American rails. These were depressed in the middle of the year by the war with Spain, and continued comparatively low until November. Then the success of the Republicans at the elections caused a large demand and

a steady rise in prices, which has now reached enormous proportions. In foreign rails most Argentine stocks have advanced on better traffics. Costa Rica rails received a maiden dividend of 2 per cent. in May, and nitrate rails have begun to show some recovery from recent depreciated prices, on improved traffics and dividend anticipations. Ottoman rails are much depreciated, and, apparently, financial troubles are ahead of this concern, owing to an extraordinary decline in receipts. Mexican rails suffered early in the year from the continued decline in silver, and from the Spanish-American war, but have recovered much of late on excellent traffics. Grand Trunks and Canadian Pacifics had a large advance early in the year, and the former reached higher prices than for some years past. Then came the rate troubles with the American roads, combined with a war between the two chief Canadian lines themselves, only settled in November, too late to enable them to retrieve their losses this year. A review of 1898 would hardly be complete without some reference to the important political influence which railways have exercised in all quarters of the globe. In China, Burmah, Turkey, the Congo State, and Uganda the growing importance from commercial, political, and military standpoints of railways and railway concessions has been borne in upon the mind of the British public in a manner probably never before witnessed in any single year. The brilliant success which has attended the operations of the Anglo-Egyptian forces in the Soudan is also a unique testimony to the great aid which the iron road lends to military enterprise.

### THE AUSTRALIAN RAILWAYS.

If practical warnings were of any avail in demonstrating to the advocates of State and municipal ownership of railways and tramways the danger attaching to their hobby, we could feel that the Australian colonies had performed a service to the empire. At no small loss to themselves they have proved that which required no proof, the practical inability of Government Departments to manage great commercial undertakings and the impossibility of dissociating such management from political considerations. We use the word political in its most debased sense, but unfortunately politics, as the science of the welfare of the State, can hardly in the newer and democratic countries be distinguished from politics as the opportunism of party. And hence the financial smash some years ago in our self-governing Australasian colonies. The credit of individuals is at all times dependent upon the credit of the State, and speculation on the part of the latter, with its inevitable evils, is repeated tenfold by those who as separate entities make up the body politic. The Australian railways were cradled in a system as unjustifiable—we had almost said criminal—as is speculation with trust funds for personal ends. A branch line here, an increase of staff there, a rise in wages everywhere, the failure to exact a fair day's work for a fair and more than fair day's pay—these were the ways in which to catch a vote. An enormous debt was created, ostensibly based on the security of the railway systems, but in reality forming a charge upon the revenues of the colonies. All this, however, is a matter of history, as is the bold and successful attempt made by New South Wales to meet the evil. The appointment by that colony in 1888, of Mr. E. M. G. Eddy, an experienced railway manager, as chief commissioner in place of the previous Ministerial control, was the turning-point in that colony, and the lead was in due course followed by all. Gradually deficits on working were turned into profits, and actually something was available to relieve the revenue in its debt obligation. In New South Wales the drastic programme initiated swept away

at one cast the main tissue of official corruption, and even the opponents—not a few—who stood up against such a policy as that of closing many unprofitable branch lines were forced to an unwilling silence, followed by a grudging admiration, when the results upon the whole became apparent. Yet it was by reducing expenditure rather than by curtailing facilities that it is possible to show a net return of 1,412,143*l.* in 1898, upon a capital of 37,719,402*l.*, as against a profit of only 764,573*l.* upon the 1888 capital of 27,722,748*l.* The example of Mr. Eddy was unfortunately followed by his colleagues of the other colonies at a distance proportionate to the variation in their geographical position. It would almost seem that the fire had lost its heat in radiation, and certainly the force of character which was at the root of the reform in the older colony was lacking in its sisters. The time is appropriate for calling attention to this fact, for concurrent with the growth of the federal idea has unfortunately gone some return to that political laxity in labour and other questions affecting public works which we have alluded to above. Thus the reports of the Railway Commissioners for Victoria and South Australia for 1897-8 are somewhat dismal reading, the revenue having decreased while the expenditure has mounted up. This in the face of a satisfactory improvement in the net profits of New South Wales for the same period—the colony whose vote it was that actually blocked the federation proposals—gives some colour to our theory that the diversion of attention from strictly home affairs has given an unfortunate opening to certain politicians of the unscrupulous order. To signify the undoubted variation in the standards of economical working, even remembering the different circumstances involved, it is only necessary to observe the working ratios of these colonies. In 1897-8 these were as follows:—

New South Wales .....	53:84	Victoria .....	63:09
Queensland .....	58:01	Tasmania .....	74:98
South Australia .....	60:71	West Australia .....	77:11
New Zealand .....	62:30		

It is very evident, therefore, that some of these colonies must pull themselves together, and in so doing they must abandon the isolated attitude hitherto persisted in, and which also springs largely from political influences. We refer principally to the question of a uniform gauge for the whole of Australia. The situation in which the smaller colonies, from the trading standpoint, find themselves is one that stifles expansion and does more harm to themselves than to their richer, and consequently more independent, neighbours. Their railways are less utilised than they should be, and the incidence of working charges is proportionately increased. For more than ten years the matter has been a burning one, and it is probable that not a few railway extension projects of an intercolonial character have been postponed pending a decision. The annual congress of railway commissioners, whose recent proceedings we reported a fortnight ago, could do no more than reaffirm the arguments and prospective advantages which have never been seriously questioned. The neglect of so vital a subject by the governing authorities leads to the unwilling conclusion that the commissioners have not sufficiently stiffened their backs. Any survey of the railway position in Australia would be incomplete without some reference to the almost mushroom-like growth of the system of Western Australia. When it is said that that colony possesses no less than 1,780 miles of line open or under construction, this being on the unprecedented scale of 105 miles per 10,000 inhabitants, and further, that five-sixths of the debt of the colony is represented by this asset, it is obviously important that the security shall be found satisfactory. Unfortunately, there are well-grounded rumours to the contrary. Laid against time, as many of these lines were, by contractors who received the right to work the road and charge what rates they pleased

up to the official handing over to Government, it was inevitable that much slipshod work should have occurred without detection. The maintenance expenses are already heavier than the mere traffic over a comparatively new line should render necessary, and even if allowance be made for a falling-off in the imports of the colony, the reduction in railway net earnings is out of all proportion. From 177,000*l.* in 1895-6 these rose to 207,000*l.* in 1896-7, only to fall with a crash to 63,139*l.* in the last completed year. It looks as if some of the hastily sanctioned branches, conceded to the demands of an excited mining population, had ceased to pay their way. Sir John Forrest has begun—none too soon—to put his foot down more firmly upon the broad question of sacrificing the general welfare to the fleeting interests of particular localities. But more remains to be done than is implied by a mere policy of inactivity. West Australia must follow her older sisters, and, by placing her railway system under an impartial technical chief, must divorce business from politics, to the benefit of both.

### MEXICAN RAILWAYS.

In sympathy with American railroad securities, and on some excellent traffic returns, considerable improvement has taken place in the quotations for the various Mexican railway stocks. Subjoined is a comparison of current quotations with the lowest ruling in November:—

Stock.	Lowest in November, 1898.	Present price.
Mexican (Vera Cruz) ordinary .....	17½	20½
" " " 1st preference .....	68½	75½
" " " 2nd preference .....	28½	32½
Mexican Central 4 per cent. bonds .....	64½	72
" " " 1st income .....	13	16
Mexican National A certificates .....	38½	46½
" " " B certificates .....	9	10
Mexican Southern 1st debenture .....	84½	86
" " " 2nd debenture .....	57½	63

Prices are still much below quotations of former years; but if traffics are maintained at anything like the level recently shown, we may see a sustained recovery. It will be noticed that a specially large improvement has taken place in Mexican Central first mortgage 4 per cent. bonds, or "mentals," as they are called in Stock Exchange phraseology. In every year up to the present the 4 per cent. on these bonds has been regularly forthcoming. The concern is under American control, its head-quarters being in Boston. Down to 1892 the company was actually paying the full 3 per cent. on its first income bonds, as well as earning its obligatory charges. But since then the depreciation of its silver earnings has been so severe that in spite of a continuous increase in the currency receipts, there has been a deficiency in earning the interest on its bonds. This deficiency has, in every case, been met by a draft on the subsidy fund, which is specially set aside for this purpose, and the balance of this fund still available for future use was \$8,647,000 at the end of 1897. It is only on this account that the bonds, which are certainly much better than a good many American securities quoted considerably higher, can now be obtained to yield over 5½ per cent., as very few bond issues now stand in the early seventies—in fact, allowing for the 2 per cent. of half-yearly interest to come off on the 1st prox., the bonds stand at only 70 "clean." A scheme of some sort is apparently under weigh to split these bonds in A and B issues. In this way it is believed that a considerably higher price will be obtained, because the A issue, ranking first upon earnings, would show a surplus even under recent adverse conditions, and would probably be worth something approaching par. The B issue, whilst receiving its full rate would be partly dependent upon the subsidy pending the development of net

earnings. It looked as if in 1897 the full interest charges would again be covered by net earnings; but the further drop in silver and the extra outlay entailed by floods prevented this desirable end from being attained. Earnings lately have been excellent, and for the third week of December the Mexican Central secured the gross increase of \$57,054, making the gross increase for the year to that date \$676,500. Net earnings also have much improved in the second half of 1898. To the end of October the Mexican Central showed a net increase of \$230,000, half of which was secured in October alone. As gross receipts since then have shown great improvement, it is to be expected that the net result will be much improved by the November and December returns. The Mexican National, like the Central, showed a decline in net results in the early part of 1898, but has since been recovering lost ground. Its October statement showed a net improvement in interest available for bonds of \$46,000, after meeting extraordinary outlays and depreciation in currency. Since the end of October the gross earnings of the Mexican National have improved by \$135,000, and it is probable that the whole year's net results will show sufficient to pay the same rate as in 1897 on the A certificates. If the interest on the prior lien issue could be reduced to its proper level, of course, the whole 5 per cent. on the A certificates would soon be forthcoming. It will be remembered that it was to negotiate with the prior lien holders with this end in view that the Mexican National Railway Company was constituted, it being in effect nothing more than a pooling of the old A and B bonds, and the issue thereagainst of A and B certificates. The old Mexican has done well with regard to gross receipts, its increase to date being \$168,350. Whether this will produce much advantage in net profit may be doubted, for a gross increase in the first half of 1898 yielded no appreciable increase in net receipts. But in that half-year the company had to pay \$123,000 extra for fuel on account of the Spanish-American War and the South Wales coal strike. It may to some extent escape these extra charges, besides which there has been some improvement in exchange compared with last half-year.

### A BRIGHTON CANARD.

The secretary of the Brighton line has recently declared that he will neither confirm nor contradict the rumour as to the alleged inclusion of his company in a general scheme for the combined working of the southern railways. That such a rumour would be spread sooner or later in connection with the South Eastern and Chatham fusion was a foregone conclusion. It cannot be denied that a certain attractiveness attaches to the idea of a "Great Southern" Company which would include the whole of the cross-Channel services, and dictate terms to the wealthy and populous counties of Kent, Surrey, and Sussex. The possibilities are too great to analyse, however, when the probabilities are so remote. The competing points of the Brighton and South Eastern are neither sufficiently numerous nor important to cause the former company to seek an alliance with a neighbour who has already taken a partner of hardly conspicuous financial strength, and whose interests are still more distant. We fancy that the rumour referred to is based on no more than the decennial continuance of the existing South Eastern and Brighton agreements originally made under the awards of Sir Henry Oakley in 1889, which come up in due course for fresh confirmation at the Brighton meeting advertised for January 25th, 1899. These refer merely to the division, in stated proportion, of the receipts arising from traffic at certain competitive points, and to the conditions, financial and otherwise, under which the two companies run over the lines between London and Redhill,

which short length of some 20 miles is owned in various sections by one or other of the two companies in the most confusing manner. So far from bringing the South Eastern and Chatham joint board into contact with the London Brighton and South Coast Railway, the Bill regulating the joint working of the former specifies that the receipts derived from the Redhill line under standing agreement with the Brighton Company are to continue to accrue to the South Eastern, and will not be brought into the pool. It was hardly necessary to trouble the Brighton secretary.

### PASSING NOTES.

The traffic receipts for the week ending December 25th, on thirty-three of the principal lines of the United Kingdom, amounted to 1,823,244*l.*, which was earned on 19,253½ miles. For the corresponding week in 1897 the receipts of the same lines amounted to 1,652,345*l.*, with 19,034½ miles open. There was thus an increase of 170,899*l.* in the receipts, and an increase of 219 in the mileage. The aggregate receipts for twenty-six weeks to date amounted on the same thirty-three lines to 46,514,914*l.*, in comparison with 44,860,654*l.* for the corresponding period last year; increase, 1,654,260*l.*

A memorial, extensively signed by season-ticket holders, has been forwarded to the secretary to the Great Northern Railway Company on the subject of the overcrowding of the suburban passenger trains. The memorial states:—"This overcrowding, you must be aware, is increasing to an alarming extent, and naturally creates an immense amount of dissatisfaction. You will note that those who have signed are fairly spread over all sections of your suburban lines. They comprise six magistrates, several county councillors, and district councillors, and one sheet you will find is signed by seventy members of the Stock Exchange." The memorialists ask the directors to receive a deputation, and state that the servants of the company use no efforts to prevent the overcrowding.

The London Brighton and South Coast Railway Company's time-tables for January next are now on sale at the booking-offices. The principal alteration in the train service is the acceleration of several evening trains from Brighton to London. The Sunday Pullman, Limited, to and from Brighton, which has been very successful, will continue to run to the end of March. The new fast Sunday train to and from Eastbourne will also continue to run during the same period.

The North Metropolitan Tramways Company announce that on and after Monday next they will run an all-night service of workmen's cars from Stratford to Aldgate and *vice versa*. The fare for the single journey any distance will be 1*d.*, and return tickets will be issued for 2*d.* The distance on the line mentioned is 4 miles. The company has also decided to introduce as soon as possible similar services on such other lines as they believe may be successful.

The Railway and General Ticket Printing Syndicate, Limited, is the title of a company which has been registered (by G. H. Holman, 20, Budge-row, E.C.) with a capital of 3,500*l.* in 17 shares. The objects of the company are to carry on the general business of printers and publishers, and to acquire and turn to account certain inventions relating to improvements in printing railway tickets. Table A mainly applies.

Experiments were made on Monday on the line between Brussels and Ghent to test the speed of the new Scotch locomotives now in use on this section of the line. An engine drawing eight heavy coaches covered the distance in forty minutes, beating all previous records with Belgian engines by nearly two minutes. The average speed attained was 53 miles an hour, including stoppages.

Consequent upon the resignation of Mr. H. C. Corfield, the board of the Cambrian Railways Company have appointed Mr. J. Parry-Jones to the position of solicitor to the company, the appointment to take effect on January 1st, 1899. Communications

for the solicitor should be addressed to Mr. J. Parry-Jones, Solicitor's Office, Cambrian Railways Company, Oswestry.

On inquiry being made on Thursday at London-bridge, the secretary of the London Brighton and South Coast Railway declined either to contradict or confirm the rumour that negotiations are in progress for the Brighton Company to join in the working agreement already arranged between the South Eastern and London Chatham and Dover railways.

Having completed the second term of five years, the *ex officio* Railway Commissioners for Scotland and Ireland (Lord Trayner and Mr. Justice Murphy) retire with the close of the present year. Mr. Justice Gibson, the brother of the Lord Chancellor of Ireland, will succeed Mr. Justice Murphy. The successor to Lord Trayner has not yet been appointed.

On Tuesday morning Mr. Bernard Lynch, chief inspector of the permanent way to the Dublin Wicklow and Wexford Railway Company, was knocked down by a shunting engine just outside Bray Station. The unfortunate man's legs were nearly severed from his body, and death was almost instantaneous.

It is understood that Sir Benjamin Baker, the engineer, and Mr. John Aird, the contractor, will leave England about January 10th for Egypt, in order to inspect the great works now being laid down at Assuan and Assiut for the new Nile reservoirs.

The Great Western Railway Company have entirely remodelled their public time-book, and the revised edition is being issued for January. The type, which is entirely new, is exceedingly clear, and the style of the publication is thoroughly up to date.

The Nantyglo and District Council, at their meeting last week, extended their cordial support to the proposal to bring before the next session of Parliament a Bill which has the object of establishing a line of railway between Brynmawr and Nantyglo.

A locomotive and carriage and wagon superintendent is required by the Cambrian Railways Company. Particulars will be found in our advertisement columns.

Mr. R. Bell, the general secretary of the Amalgamated Society of Railway Servants, has been invited to contest the Kennington Division of Lambeth at the next election.

The subject of the "Illustrated Interview" in the current number of the *Railway Magazine* is Mr. T. A. Wilson, general manager of the Highland Railway.

## Money and Stock Markets.

The monthly settlement in Consols takes place on the 5th prox.; the fortnightly settlement in other Securities commences on the 11th prox.

CITY, FRIDAY EVENING.

The MONEY MARKET continues hard, and the demand for accommodation, both as regards loans and discounts, is good. Call loans to-day were quoted about  $3\frac{1}{2}$  per cent., and fixtures into next week  $3\frac{1}{4}$  to 4 per cent. The working rate for fine bills at three months was  $3\frac{1}{4}$  per cent. The Bank return issued yesterday shows a further addition of more than 3 millions to the "other securities," caused by the market's heavy borrowing and discounting. Of this amount, nearly 2 millions have been left to the credit of the private deposits, while 1,138,861*l.* was required to meet the exports and increased circulation, this being the extent of the net decrease in the reserve, which now stands at 18,832,000*l.*; the proportion to the current liabilities is  $4\frac{1}{2}$  lower at  $43\frac{1}{4}$  per cent. The public deposits show an increase of only 41,000*l.* Gold to the amount of 110,000*l.* went into the Bank yesterday.

The Bankers' Clearing-house return for the week ending December 28th, 1898, shows a total of 127,826,000*l.*, as compared with 105,382,000*l.* for the corresponding period last year.

Subjoined is a comparison of the present position of the Bank of England, the Money Market, the prices of Consols French Renten, &c., with the position at the corresponding period last year:—

	At Present.	Same Week last Year.
Coin and Bullion .....	£29,337,841	£30,453,493
Total Reserve .....	£18,831,556	£19,906,413
Proportion of Reserve to Liabilities...	43½ per cent.	40 per cent.
Notes in Circulation .....	£27,306,285	£27,347,080
Bank Rate of Discount .....	4 per cent.	3 per cent.
Open Market ditto .....	3½ per cent.	3 per cent.
Consols (account) .....	111	113
French Renten (account) .....	101 <i>l.</i> 8 <i>7c.</i>	103 <i>l.</i> 0 <i>7c.</i>
Paris Cheque Exchange .....	25 <i>l.</i> 23 <i>0c.</i>	25 <i>l.</i> 24 <i>0c.</i>
New York 60 days ditto .....	\$48½	\$48½

Silver bars are now quoted at 27½*d.* per oz., being ½*d.* lower on the week. A year ago the price was 26½*d.*

Eastern exchanges are telegraphed as follows:—Bombay, 1*s.* 4 1-32*d.*; Calcutta, 1*s.* 4 1-32*d.*; Hong Kong, 1*s.* 11½*d.*; Shanghai, 2*s.* 8½*d.*; Singapore, 1*s.* 11 15-16*d.*

The premium on gold at Buenos Ayres has fallen during the week from 113'00 per cent. to 108'20 per cent., making the paper dollar (nominally worth 4*s.* 2*d.*) now actually worth 1*s.* 10'87*d.* A year ago the premium was 175 per cent., and the value of the paper dollar 1*s.* 5'31*d.*

The Valparaiso 90-day exchange comes over to-day at 12½*d.*, being 1-16*d.* lower on the week. A year ago it was 17 15-16*d.*

The Rio de Janeiro exchange on London is 7½*d.*, being ½*d.* higher on the week. A year ago it was 7 3-32*d.*

The STOCK MARKETS this week show a further all-round improvement, which was continued right up to the close to-day. British railway stocks are, without exception, higher, and in several cases the improvement is quite substantial. In a measure this is due to the cheaper aspect of money—which is largely responsible for the rise of  $\frac{1}{8}$  in Consols—but the satisfactory traffics also partly account for the rise. Brighton deferred has been a conspicuous feature, and has been rushed up 4½ points during the last few days, whilst the next most important movement has been in Midland deferred, which at its present figure is certainly as high as prospects warrant. A large business has again been done in Yankee Rails—in Wall-street, at all events, and prices here have fully responded to the rise on the other side. Prices are being run up wholly regardless of merit—if ever a Yankee railway stock possessed such a quality. From every interested quarter—railroad presidents, financial magnates, and so forth—the word goes forth to the investor to buy, buy, buy, and he will be readily fed with all the stock he can digest. Canadian Rails, for the first time for some weeks past, have moved in sympathy with their Yankee neighbours. As regards Foreign Railway stocks most South American issues have been in request. Nitrate Rails, after easing off a trifle, to-day resumed their activity and their upward course, and the price in the Official List ( $5\frac{1}{2}$  6½ for the preferred, and  $7\frac{1}{4}$  8½ for the ordinary) is as misleading as usual. The dealing price for the preferred at three o'clock (when the list was made up) was 6 1-16 to 6 3-16, and for the ordinary 8 to 8½, and these prices were about maintained to the close. Buenos Ayres and Pacific first preference has been marked up 6 points, on talk of a scheme for capitalising the arrears of interest.

The principal movements on the week, so far as they relate to securities in which the readers of this journal are likely to be most interested, are set forth in the following table:—

Name of Stock.	Rise.	Fall.	Name of Stock.	Rise.	Fall.
<i>British Funds, &amp;c.</i>					
Consols, 2½ per cent. ....	—	—	Gt. Nthrn. Pref. Con. Ord. ....	½	—

Mr. Basil R. Woodd, a broker in a fair way of business, was yesterday declared a defaulter upon the Stock Exchange. It is said that the "House" has managed to protect itself, as usual, though the losses outside (i.e., to the hammered broker's clients) will be considerable.

The Stock Exchange Committee have ordered the under-mentioned securities to be quoted in the Official List:—Denver and Rio Grande Railroad Company—\$4,348,000 first consolidated mortgage 4½ per cent. gold coupon bonds of 1936, Nos. 34,619 to 38,966 of \$1,000 each; Northern Pacific Railway Company—\$1,797,000 additional prior lien railway and land grant 4 per cent. gold coupon bonds, Nos. M76,080 to M77,851, of \$1,000; and D20,051 to D20,100, of \$500 each.

The death is announced of Mr. Frederick Chalmers, a partner in the firm of Messrs. Brown, Shipley, and Co.

As usual on the first working day of the year, the Stock Exchange will be closed on Monday next.

Messrs. Thackeray and Co., of Cardiff, under date December 29th, report as follows:—Barry Railway undivided, 264½ (a rise of 2); Barry preferred, 122 (unchanged); Barry deferred, 143 (a rise of 2); Cardiff preferred, 111½ (unchanged); Port Talbot, 9½ (a fall of ½); Rhondda and Swansea Bay, 5 (unchanged); Rhymney undivided, 260½ (unchanged); Rhymney preferred, 119½ (unchanged); Rhymney deferred, 140½ (unchanged); Taff Vale, 75½ (unchanged); Vale of Glamorgan, 120½ (unchanged). Although markets show a much healthier tone, business has not been very brisk owing to the intervention of the Christmas holiday. Barry new stock has been the chief attraction, and shows an advance of about 3½ points.

## General News.

### RAILWAY BILLS FOR NEXT SESSION.

#### BIRMINGHAM NORTH WARWICK AND STRATFORD-UPON-AVON RAILWAY BILL.

Under this Bill power is sought to construct just over 1½ mile of new lines for the purpose of forming two junctions with the Great Western Company's Oxford and Birmingham line at Yardley and Aston respectively. Power is thereunder sought to enter into working and traffic agreements with the Great Western Railway Company, including the construction, management, use, and maintenance by the Great Western Company of the railways and works of the company, or any part thereof. The company also ask for an extension of time until August, 1901, within which to acquire the lands necessary for the authorised railways, and for an extension of time until August, 1905, within which to complete the railways. These extensions of time are respectively two and three years beyond the period already granted.

#### GLASGOW DISTRICT SUBWAY BILL.

The preamble of this Bill recites that the company have raised and expended the whole of its authorised share and loan capital, amounting to 1,487,000l., but that the completion and equipment of the subways and relative works have required an expenditure in excess of the authorised capital, and that, for the purpose of

extinguishing the amount at the debit of the capital account, it is expedient that further capital should be raised. In accordance with this preamble, the Bill proposes to authorise the company to raise 200,000l. additional capital "by the issue at its option of new ordinary shares or stock or new preference or guaranteed shares or stock." The Bill expressly provides that the new shares or stock shall be first offered ratably to the registered holders of the ordinary shares of the company.

#### GREAT SOUTHERN AND WESTERN AND WATERFORD AND LIMERICK RAILWAYS AMALGAMATION BILL.

The following is a summary of the main provisions of this Bill:—Clause 7 provides that holders of debenture stock of the Waterford and Limerick Railway shall receive such an amount of debenture stock of the amalgamated company as will produce the same amount of interest as that received by the holders at present. Clause 8 provides that holders of 5 or 5½ per cent. preference shares in the Waterford and Limerick Railway shall receive as much Great Southern and Western 4 per cent. preference stock as will produce the amount of their present dividends. Clause 9 provides that every 100l. of Waterford and Limerick 3½ per cent. preference stock shall be exchanged for 75l. Great Southern and Western 4 per cent. preference stock, reserving, however, the right of holders of Waterford and Limerick 3½ per cent. preference stock to receive instead 105l. in cash for each 100l. of their present holding. Clause 10 of the Bill provides that holders of ordinary stock of the Waterford and Limerick Railway shall have their stock exchanged for guaranteed stock of the Great Southern and Western Railway, bearing 1½ per cent. the first year, 1½ per cent. the second year, 2 per cent. the third year, 2½ per cent. the fourth year, and 2½ per cent. in perpetuity. The guaranteed stock is to be exchanged for an amount of 4 per cent. stock of the Great Southern and Western Railway, producing the equivalent of 2½ per cent. on the original holding after the fourth year. Clause 11 provides that baronial guaranteed shares held by the Waterford and Limerick Railway Company, in connection with the line from Claremorris to Sligo, shall become baronial guaranteed shares of the Great Southern and Western Railway, but the incidents or privileges of the shares are not to be altered. Clauses 24 and 25 of the Bill read as follows:—

24. (1) The rates charged by the Waterford Company on December 31st, 1898, in respect of traffic of every description conveyed or carried by them between any stations or places on the lines of the Waterford Company shall not be increased after the passing of this Act except as far as may be necessary to meet any increase which there may be after December 31st, 1898, in the expense of dealing with the traffic to which the increased rate applies, or in particular instances in which the rate charged by the Waterford Company on December 31st, 1898, is exceptionally low when compared with other rates of the Waterford Company applying to similar traffic conveyed or carried under similar circumstances; (2) if any dispute arises as to the right of the company to raise any rate complaint may be made by any person interested to the Judge of the county court within whose jurisdiction the station or place to or from which the rate applies is situate, who shall have hereby conferred upon him jurisdiction to hear and determine any such complaint, or such complaint may be made by such person to an arbitrator appointed by the Board of Trade; (3) upon any complaint being made as hereinbefore provided it shall lie upon the company to prove that the increased rate is justified upon the grounds specified in this section; (4) in this section the expression rate includes charge and fare.

25. On and after the date of amalgamation the following provisions for the protection of the Port of Waterford shall have effect, that is to say:—(1) The company shall give all reasonable railway facilities to induce traffic to pass to or from *via* Waterford, and shall not by their rates or fares (whether local, or through, or otherwise) place the port or city of Waterford at an undue disadvantage as compared with any other port or city in Ireland, to or from which traffic is, or may be carried by means of the railways of the company. (2) There shall be a reasonable system of through booking, with through rates and fares *via* Waterford and New Milford, or *via* Waterford and Fishguard, when the cross-Channel service *via* Fishguard and Rosslare is established between stations on the railways of the company, on the one hand, and stations on the railways of the Great Western Railway Company on the other hand, between which through rates and fares are, for the time being, in operation *via* Rosslare and Fishguard, and such through rates and fares may be applied for by any railway company, or by the Waterford Corporation, or by the Waterford commissioners, or by any incorporated steamship company regularly trading with the port of Waterford and the Great Western Railway Company on the one hand, and the company on the other, shall, so far as they can control or influence the same, extend such through bookings to stations beyond their respective systems. (3) The said through rates and

fares shall not be higher for the same description of traffic between the same stations than the through rates and fares for the time being charged by the same companies *via* Rosslare and Fishguard. (4) The Waterford Commissioners or the Waterford Corporation, or any such incorporated steamship company, as aforesaid, may complain to the Railway and Canal Commission that the company are not duly fulfilling their obligations under this section, or taking all reasonable and necessary steps for that purpose, and the said Commission may thereupon make such order as they think fit for giving full effect to this enactment, and the said Commission shall have the like jurisdiction to hear and determine the subject-matter of any complaint under this subsection as if the same had been referred to their decision by the Railway and Canal Traffic Act, 1888, and any order made under this subsection may be enforced in the same way as an order made by the same Commission under the Railway and Canal Traffic Acts, 1873 and 1888.

Clauses for the protection of the ports of Limerick and Fenit are also contained in the Bill.

#### HULL BARNSLEY AND WEST RIDING JUNCTION RAILWAYS AND DOCK BILL.

Under this Bill, which comprises only fifteen clauses, power is sought to abandon the construction of two short railways at Hull which were sanctioned at the incorporation of the company in 1880. The Bill also proposes to enable the directors to pay the dividends on their second debenture and preference stocks half-yearly instead of yearly. By clause 11 "the directors of the company may from time to time, with the consent of the committee of the Railway Clearing System Superannuation Fund Association, make special contributions or subscriptions to that fund in the case of any officers or servants of the company being contributing members to that fund." The Bill does not propose the creation of any new capital.

#### LONDON CHATHAM AND DOVER RAILWAY BILL.

The preamble of this Bill sets forth in detail the circumstances and conditions under which the arbitration preference stocks were raised under Acts passed in 1885 and 1890. The refusal of the shareholders in 1891 to sanction the Bill then promoted to reduce the ordinary capital from 11,257,782*l.* to 3,750,594*l.* is also referred to at some length. The preamble then recites as follows:—Whereas, having regard to the strong expression of opinion, not only at that meeting, but at subsequent general meetings of the company, any attempt to promote a Bill for the same object would certainly fail to be approved by the shareholders; and whereas, under these circumstances, to raise, by means of ordinary stock, the moneys required to redeem the 400,000*l.* of arbitration preference stock authorised by the Act of 1890 within the period limited by that Act would either be impossible, or could only be effected by issuing ordinary stock at such a discount as would greatly add to its already excessive amount, with an effect most injurious to the interests of the holders of the existing ordinary stock by greatly depreciating the market value of their holdings, it is therefore expedient that the section of the Act of 1894 should be repealed which requires the redemption of this stock; and whereas it would be impossible to redeem the 600,000*l.* of arbitration preference stock created and issued under the powers of the Act of 1835 within the period limited by that Act, by the creation and issue of preference or ordinary stock as thereby provided, except upon terms which must operate greatly to the prejudice of the holders of the existing preference and ordinary stocks of the company, it is, therefore, expedient that the powers requiring the redemption of this stock should be repealed; and whereas the sums of 400,000*l.* and 250,000*l.* authorised by the Acts of 1890 and 1896 have been expended with beneficial results to the interests of the holders of the postponed second preference shares and of the ordinary shares of the company, which could not have been obtained but for the company having been authorised to raise the said sums by means of the arbitration preference stock bearing a low rate of dividend; and whereas the moneys so raised are not sufficient to execute the works of the company, to provide the rolling stock, to enlarge the stations, and to provide the steamboats and the various accommodations necessary to meet the exigencies of the increasing traffic of the company, and further moneys to the amount of 450,000*l.* are absolutely required for these purposes; and whereas the company cannot under present circumstances as a separate company raise further capital by means of either preference or ordinary stocks, except upon terms injurious to the permanent interests of the company, but they are in a position to raise the moneys so required by means of debenture stock upon terms which will impose a much less onerous burden upon the revenue of the company—that is to say at a rate not exceeding 3*l.* 10*s.* per cent. per annum—it is therefore expedient that they should be authorised to raise the sum of 450,000*l.* by debenture stock. In accordance with this preamble clause 4 repeals so much of the Acts of 1885 and 1890 "as relates to and requires the

redemption and cancellation" of the arbitration preference stocks issued under the powers of those Acts. By clause 4 power is sought to create debenture stock by the amount mentioned ranking after the existing debenture stock, and entitled to interest at a rate not exceeding 3½ per cent. per annum. Clause 6 provides that—"If the company and the South Eastern Railway Company shall be authorised by Parliament during the present session thereof to work, maintain, improve, and manage their undertakings jointly as one undertaking, and to construct new works in connection therewith, and to raise additional capital for the purposes of such working, maintenance, improvement, and management, then, and in that case, the two companies may, with the consent of their respective shareholders in general meeting duly convened with notice of the object, make and carry into effect, subject to the provisions and for the purposes of this Act and for the general purposes of the joint undertaking, arrangements and agreements with respect to the measures and proportions by and in which the said additional capital may be raised by the two companies respectively or by one of them, and if raised by the South Eastern Railway Company, then with respect to the interest or dividend to be paid by the company upon the proportion of the said capital which would otherwise fail to be raised and contributed by the company for the purpose of so working, maintaining, improving, and managing the said joint undertaking, provided always that the sum so to be paid to the South Eastern Railway Company by way of interest or dividend shall not exceed the rate of interest payable upon the sum by this Act authorised to be raised by the creation and issue of debenture stock."

#### MIDLAND AND SOUTH WESTERN JUNCTION RAILWAY BILL.

By this Bill the company ask Parliament to sanction the creation of 191,117*l.* additional C debenture stock, ranking equally with the existing C debenture stock both as regards capital and interest. According to the preamble of the Bill it is anticipated that the creation of this stock will enable the company to raise the sum of 300,000*l.* which is required mainly for the purpose of "improving the company's lines and extending their station at Ludgershall" and "in providing such additional rolling stock as may be required to meet the demands of the increased traffic." The Bill also proposes to enable the company to acquire the undertaking of the Marlborough and Grafton Railway Company. The purchase of this undertaking is proposed to be effected by the creation of a rent-charge stock to the amount of 165,334*l.*, which is to be distributed among the holders of the debenture stock and ordinary stock of the Grafton Company. The rent-charge stock is to be entitled to a perpetual guaranteed 3 per cent. dividend, which will amount to an annual payment of 4,960*l.* per annum. This payment is to be a first charge upon the whole gross revenue of the company arising from all traffic conveyed upon the Grafton Railway, and, if the rent shall fall into arrear, it is to be a charge upon the revenue of the purchasing company. The transfer of the Grafton Company is to take effect immediately upon the Act receiving the Royal Assent.

#### WEST METROPOLITAN RAILWAY BILL.

Under this Bill Parliament will be asked to incorporate a new London railway undertaking, to be called the West Metropolitan Railway Company. Upon the promoters of this scheme power is proposed to be given to construct a railway from Hammersmith, where it will form a junction with the Hammersmith and City line of the Great Western and Metropolitan companies, to Acton, where it will terminate by a junction with the Great Western Railway. The capital of the proposed company will be 180,000*l.*, with power to borrow a further sum of 60,000*l.* The first directors of the company will be Mr. George Bush, Mr. Herbert Sartoris, and one other person to be nominated by them. Power is sought to enable the company to enter into working agreements with the Great Western and Metropolitan companies.

#### RAILWAYS IN CHINA.

The French Senate on Saturday passed the Indo-China Railway Loan Bill. An amendment to reduce the amount from 200,000,000*fr.* to 80,000,000*fr.* was rejected by 201 to 41.

In confirmation of Article V. of the Northern Railway Extension contract, the Tsung-li-Yamen has made an official declaration to the British Minister, Sir Claude Macdonald, that the Chinese Government will not alienate, or part with to any foreign Power, the railway connecting Shanhai Kwan with Niu-chwang, for the construction of which the Hong Kong and Shanghai Bank has agreed to advance 2,250,000*l.* sterling at 5 per cent. to the Chinese Government.

The recent resolution of the Tsung-li-Yamen to decline granting any further railway concessions until the railway lines already authorised have been completed is said to be due to the

fact that the Tsung-li-Yamén considers that the foreign Ministers will in all probability oppose the new mining and railway regulations. Reuter's agent at Peking says:—"The decision was, no doubt, come to at the instance of the anti-foreign element in the Tsung-li-Yamén, which is now very strong, with the object of discouraging the further investment of foreign capital in railway enterprises here." Baron Heyking, the German Minister, has protested against the new regulations concerning mining and railways.

A correspondent of the *Globe* at Shanghai sends a complete copy of the terms of agreement entered into between the American syndicate who have undertaken the construction of the great Hankow Canton Trunk Line and the Chinese Government. In connection with this very important concession it is to be noted that should the terms of the concession, which was granted to a Belgian syndicate in May, 1897, for the construction of a railway from Lukowohiao to Hankow, be cancelled, then the American China Company is to be at liberty to construct this line, and to raise the sum of 5,000,000*l.* on similar terms as set out in the Hankow-Canton contract. The following is a condensed report of the agreement:—

"Under an Imperial Edict, His Majesty the Emperor of China has granted to his Excellency Sheng Tajen the right to construct a railway from the city of Hankow to Canton, and a Chinese company has been formed, under Imperial sanction, called the 'China Railway Company,' of which his Excellency Sheng Tajen is to be director-general. His Excellency has, however, deputed his right and powers in the above capacity to his Excellency Wu Ting Fang, to enter into a contract with the American-China Development Company, by which the latter-named company agrees *inter alia* to provide a sum of 4 millions sterling for the construction and equipment of the road. In order that this loan may be secured, the Chinese Government has agreed that Imperial gold bonds, similar in form to those secured on the Imperial Customs, shall be issued upon the security of a first mortgage on the railway and its appurtenances. These bonds, which will be issued at 90 per cent. of their face value to the American-China Development Company, will be sealed by the director-general of the China Railway Company and countersigned by the Chinese Minister at Washington, and will carry interest at the rate of 5 per cent. per annum, payable half-yearly. The company is to be at liberty to issue these bonds to the public at discount or otherwise, and it further agrees to construct the road in accordance with certain plans, which, however, are subject to the approval of the director-general of the railway. There is an important proviso in the agreement which, after stating that the line shall be built and equipped in accordance with the best modern systems, states that if thought necessary, the company shall have the right not only to build and equip the line to Canton, but from Canton to the sea, and to such other places as may be agreed upon with the director-general, or, in other words, to construct short branches wherever it may be deemed advisable to insure important traffic connections. In connection with the construction, administration, or management it is to be expressly understood that particular heed shall be paid to the opinions, habits, and ideas of the Chinese people, and that in point of fact, so far as regards construction or management, they are to be consulted and conciliated as far as possible. Whenever it is practicable, the American-China Company has agreed to employ Chinese in positions of trust and responsibility, both in connection with the construction and administration of the railway. It is important to note that with reference to the construction of the line, once the plans have been approved of, no interference or obstruction either of Chinese or foreigners will be permitted, nor shall the work of the survey party be in any way hampered. The fourth clause of the agreement provides that all materials required for the railway are to be purchased in the open market at the lowest price. If, however, Chinese materials can be had as cheaply, they are to be preferred. All materials, however, which may be required and purchased outside China are to be admitted free of duty, in a manner similar to that adopted in the case of the Chinese Imperial Railways in the north. To compensate the American-China Company for superintendence, it is to receive 5 per cent. of the cost of construction, except land and earthworks. When the line, or any portion of it, is open for traffic, the American-China Company, subject to the approval of the director-general, shall appoint such officials as are necessary, or a department similar to the Chinese Imperial Customs shall be formed, and officials shall obey the orders of this department. The sixth clause is a somewhat peculiar one, providing as it does for the ordinary expenses in maintaining and conducting, goes on to state that the American-China Company shall, after these have been paid, receive 20 per cent. of the net profits, 'to be represented by and in form of debentures to an amount equal to one-fifth of the cost of the line.' These are to be issued at the

same time as the first mortgage bonds, the Chinese-America Railway to have the right to redeem these at any time at par, and if not redeemed shall expire after forty-three years without payment. There is no time intended to be lost. Immediately upon the signing of this agreement the survey is to be commenced, and the line must be completed within three years, the expenses of the survey being borne by the Chinese Railway Company and by the American-China Company jointly. The first mortgage bonds shall have a tenure of fifty years, and are to be redeemable at any time up to twenty-five years from date of issue at \$102½ for every \$100, but at any period after the redemption price shall be par value—\$100. When these bonds are paid off the Chinese Railway Company may, if so disposed, elect to take the entire management into their own hands, and may dispense with all or any foreign officials. In order to ensure the due fulfilment of this contract it is provided that as soon as it has been signed the American-China Company shall deposit in trust at Washington \$100,000. If within six months this amount has not been expended on the line, then it is to be forfeited. Should, however, this condition be complied with, this sum will be handed back to the American-China Company. Care is taken that the Chinese themselves shall not be left in the cold as to the methods of construction, and it is provided that the American-China Company shall establish at its own expense a school of practical instruction, in order to educate Chinese in matters pertaining to railway construction and management. In time of war troops and ammunition are to be carried at half-cost, and shall have priority over other traffic. A clause strictly prohibiting any interference with the terms of the contract or in any way attempting to minimise or impair them has been wisely introduced."

#### NITRATE NOTES.

Deprived of the diplomatic services of Sir Francis Evans, M.P., the directors of the New Tamarugal Nitrate Company made a sad mess of last Tuesday's meeting. The new chairman, Mr. George Bush (formerly manager, now director, of the Nitrate Railways), failed to hypnotise his audience, which, like the down-trodden worm, turned, and with one dissentient passed a resolution adjourning the meeting for a month. The board will no doubt in the interval fortify themselves with proxies, and next time take the precaution of filling the empty benches at Winchester-house. Otherwise we would advise the shareholders to insist upon a committee of investigation, and an impartial one at that. If ever there was a case for investigation "Tamarugal" is that one, from shady beginning to murky end; and an inspection of the "sales account" would be a revelation even in the nitrate world. The concern might as well, for all practical purposes, be the private property of Messrs. Inglis and Schintz, the benevolent directors who have guaranteed the debenture interest to August 1st next; but there is no reason why the "consideration" should not be disclosed. By the way, Mr. Bush distinguished himself by establishing a new standard of computation of directorial fees so recondite as to have evidently been prepared for the occasion. The reduced amount of 1,533*l.* 6*s.* 8*d.* (the odd £ *s.* *d.* possibly paid to the retiring chairman) contributed by the shareholders last year represented, Mr. Bush said, only ¼*d.* in the pound on the capital! On the same basis, the directors' fees on the London and North Western Railway Company would be 375,000*l.* per annum.

The meeting of the Santa Elena Nitrate Company, immediately following that of the Tamarugal seems to have gone off with *éclat*, despite the absence of the chairman, Mr. A. R. Robertson, who may have been recuperating from the vote of censure passed on him and his colleague, Mr. George M. Inglis, by the proprietary of the Great Boulder Company; the last-named expert, however, added to his oratorical laurels by seconding the adoption of the saintly Ellen's accounts. Another feature of the meeting was the announcement by the non-expert chairman (evidently undergoing his baptism of nitrate) of the momentous fact that "the combination (*sic*) had arrived at the conclusion of proposing a total output of 52,391,000 quintals." We were under the impression that half that quantity was as much as the market can digest—but no matter. Santa Elena may be claiming a "quota" of sundry millions of quintals after her long repose, and Mr. Baptie did well to be "cautious and reticent as to the future."

Judging from the Stock Exchange quotation shareholders of the Lagunas Company do not seem to have increased their holdings after being fooled to their hearts' content at the recent meeting. If, *paces* Mr. Henry W. Lowe, the *gross* trading profits of 34,342*l.* enabled the company to reduce the sundry creditors by 67,510*l.* among other numerous feats of financial legerdemain (including the payment of 35,969*l.* of law expenses) the shares

ought certainly to stand at a handsome premium. No wonder Mr. Lowe is in such request on the boards of "silent" companies. Mr. Robert Harvey's position as arch-expert will soon be threatened, but for the time being we confess a preference for his opinion on matters appertaining to nitrate.

We have become fairly accustomed to the garbled reports of companies' meetings supplied at so much per column by the *Financial News* and other similar journals, and the system of "duplicating" these reports in many papers is also too common a practice to call for particular notice. But when the latter duplicating process is applied to the leader columns it does make one sit up a bit. In the case of the *Financial News* (the paper presided over by Mr. James Head, a director of the Nitrate Railways Company and an old associate of Mr. Harry Marks, of Hooley and other fame) we should not be surprised at anything, but we shall decline to believe that the *Financial Times* would wittingly be a party to the dissemination of obviously inspired "puffs" like the subjoined, and in the present instance we should imagine it to have been the victim of misplaced confidence. We may mention that Mr. George Bush, who presided at the New Tamarugal meeting on Tuesday, is, like Mr. Head of the *Financial News*, a director of the Nitrate Railways Company, and this may account for some of the milk in the cocoanut, so far, at all events, as the *Financial News* puff is concerned:—

(*Financial News*.)

December 28th, 1898.

As was to be expected, considering the state of the nitrate industry, the information given to the New Tamarugal shareholders at yesterday's meeting was anything but satisfactory, and this was accentuated by the indisposition of the chairman. With some show of reason, shareholders present complained that they had been called to the City on a day which it had been almost universally decided to keep as a holiday. For this it is somewhat hard to blame the directors. The derangement of Chilean commerce by the moratorium decreed by the Chilean Government and the vagaries of exchange which followed this decree, caused delay in the completion of accounts on the coast, and the only way to fulfil the requirements of the articles of association was to call the meeting during the concluding days of the year. Such cause of complaint as there was the board removed by falling in with a shareholder's motion that the meeting should be postponed for a month.

What is the connection between nitrate-making and gold-mining that so many directors of the former class of company get mixed up with the most wretched type of mining ventures from Australia? Messrs. Robertson, North, and Inglis, of nitrate notoriety, are between them directors of about as nice a batch of Westralian shows as one could single out in a day's search—Great Boulder, of course, excepted. But if they are to be beaten it would probably be by the lot which enjoy the directorial services of Mr. H. W. Lowe, chairman of the Lagunas Nitrate Company. Yesterday, Mr. Lowe presided at a meeting of the Hit or Miss Gold Mines, Limited, and was seconded in his efforts by Mr. Baptie, of the Santa Elena Nitrate Company. Hit or Miss is a very bad specimen even of the Westralian wild cat. Already two capitals have been frittered away upon it, and now it is being attempted to tap the shareholders for a further assessment of 4s. in the pound, under the cloak of a "reconstruction scheme" of about the most hare-brained character ever devised. It is doubtful, however, whether the shareholders are "taking any" this time, and Mr. Lowe at yesterday's meeting had not the most enjoyable time conceivable. However, a "committee of shareholders" was appointed, and no doubt things will be made pleasant all round between now and the confirmatory meeting, as there are several directorships available, and the fees will be all right for a year or two if the reconstruction scheme should be pulled off.

(*Financial Times*.)

December 28th, 1898.

The general meeting of the New Tamarugal Nitrate Company was held yesterday, and, as was to be expected considering the state of the nitrate industry, the information given to the shareholders was anything but satisfactory, and this was accentuated by the indisposition of the chairman. With some show of reason, the shareholders complained that they had been called to the City on a day which it had been almost universally decided to keep as a holiday. It is only fair to remember, however, that the derangement of Chilean commerce by the moratorium decreed by the Chilean Government and the vagaries of exchange which followed this decree caused delay in the completion of accounts on the coast, so that the only way to fulfil the requirements of the articles of association was to call a meeting during the closing days of the year. The board readily fell in with the shareholders' notion that the meeting should be postponed for a month, so all's well that ends well.

## WORKMEN'S TRAINS IN MANCHESTER.

The subject of workmen's trains and trams in and about Manchester is just now engaging the attention of the Sanitary Committee of the City Council. An official inquiry has been made in connection therewith in order, firstly, to enable the committee and the council to convince the Board of Trade that lower fares by rail and some modification of train times are under the circumstances reasonable; and, secondly, to gauge correctly when the time arrives the alterations desirable in the service of workmen's trams. The area to which the inquiry extends is a circle of 10 miles radius round Manchester, excluding Oldham, which lies in part within that radius. The population within the radius is estimated at 1,456,647, and the area is 198,705 acres. Apart from employers, the industrial population of Manchester is set down at 179,686, consisting of 119,304 males and 60,382 females. The demolition of house property for purposes of street improvements and widenings, railway extensions, and enlargement of stations, or through the action of the Unhealthy Dwellings Committee, has necessarily tended to increase the overcrowding in adjacent districts. In order as far as possible to counteract this tendency, the Lancashire and Yorkshire and the Great Northern railway companies have been placed under statutory obligation to provide a number of workmen's dwellings as a measure of rehousing the population which they have disturbed. The Improvement and Buildings Committee and the Sanitary Committee of the corporation have also schemes of corporation dwellings in hand with the same object, and the whole may be thus summarised:—Improvement Committee 82 cottages, Sanitary Committee 13 shops with five-room dwellings, 652 tenements, 1 lodging-house; Lancashire and Yorkshire Railway Company, 75 cottages, 142 tenements; Great Northern Railway Company, 98 cottages. The issue of workmen's tickets from and to Manchester is, with hardly an exception, confined to the company owning the line, although other companies may have running powers over some section of that line. The Great Central Railway Company despatches eleven trains from London-road Station, and receives nine for which workmen's tickets are available. This company stipulates as a rule that workmen's tickets are only available for journeys which conclude by 8 a.m., but the time-table shows many cases in which a later limit is allowed, and on Mondays the time is extended to nine o'clock. This is the only company which allows the Monday extension of time. It would be a great convenience to many workmen if the other railway companies could be induced to make the same concession, the reason being that many trades commence work later on Mondays than on other week-days. In none of the companies' fares is there a uniform ratio maintained between the price charged and the miles run, and an average can only be struck on the incorrect supposition that an equal number of tickets is sold for each place on the list; on this basis the average gives 26 miles for 11d., or 0.423d. per mile. The Great Central Company also provide a portion of the accommodation to and from the central station and Chorltoncum-Hardy, Fallowfield, and Levonsulme, the remainder being undertaken by the Midland and the London and North Western. Here, again, the time limit, arrival by eight o'clock, is not insisted on, a train leaving the Central at 8 a.m. and another arriving at 8.20 being available by workmen's tickets. The return half of a workman's ticket is available by any ordinary train after 4 p.m., on Saturday after twelve noon, but in a few instances, where there is no convenient train after noon the Great Central Company allows the holder to return before noon. This concession is not made by any other company. The London and North Western Railway Company, at London-road station, despatches 10 trains and receives 14 trains on which workmen's tickets are available: at Exchange station the company despatches 10 and it receives 10 workmen's trains. Some of these are largely filled with contract ticket-holders, commercial men, warehousemen, and clerks, and it is impossible to conjecture how many travel on them by means of workmen's tickets. None of the companies, however, appear to object to the use of workmen's tickets by people who are by no means "workmen" in the meaning of the Cheap Trains Act. The average rate on the London and North Western Railway by cheap ticket is about 16 miles for 7d., or 0.438d. per mile. Every morning twenty-seven trains are despatched from Victoria station, and twenty-nine are received there by the Lancashire and Yorkshire Railway Company. The average rate of cheap tickets is 25 miles for 1s., or 0.48d. per mile. The Midland Company provides five cheap trains from the central at a rate of 20 miles for 7d., or 0.350d. per mile; the Cheshire Lines Committee to Urmston, Flixton, and Irlam has a rate of 29 miles for 1s. 2d., or 0.483d. per mile, and the average workmen's rate on the Manchester South Junction and Altrincham Railway is 13 miles for 6d., or 0.462d. per mile. The lateness of the first trains from some of the stations contrasts strangely with the general activity of our railways. Eleven workmen's trains put off from London-

road, Victoria, and Exchange stations before one leaves the Central and twenty-six have left Manchester for various parts before the first workman books to Old Trafford, Stretford, Sale, Brooklands, Timperley, or Altrincham. A comparison between the workmen's fares and the yearly third-class contract tickets shows that on the lines of the six companies providing railway accommodation for the city the contract-holder pays only two-thirds the fare obtained from the workman's ticket-holder, and has the privilege of making as many journeys daily as he chooses and by any train. But this is not all. Two members of a family obtain contract-tickets at a reduction of 10 per cent., three or more members at a reduction of 15 per cent., and pupil-teachers, scholars, students, apprentices, and articulated clerks under 18 are carried at half rates in most cases, if not all. Further, in case of injury or death by accident the workman's claim for compensation is expressly limited to 100*l.* maximum; and on condition of affording sufficient cheap accommodation for workmen going to and from their work the Board of Trade remits the duty on all fares of 1*d.* a mile or less. Many more important statistics have been obtained by the official inquirer, who is of opinion that the present service might be increased tenfold, and not even then carry the whole of those who have as much right of conveyance as the 1,740 persons who now daily use the workmen's trains. As a result of the inquiry it is probable that the City Council will be asked to empower the Sanitary Committee to confer with all the railway companies running trains into Manchester, and to urge them to provide a sufficient number of workmen's cheap trains into and out of Manchester from 5 a.m. to 8.30 a.m., and from 5 p.m. to 7.30 p.m., within a radius of 6 miles from the city at a fare of a penny for each journey, with liberty of stopping or starting at any intermediate station; also that the same facilities be given to workmen within a radius of 10 miles from Manchester at a fare of 2*d.* for each journey. Failing satisfactory arrangements being made with the railway companies, the committee may ask to be authorised to appeal to the Board of Trade to give to Manchester workmen equal facilities for going to and from their work to those which are enjoyed under the Cheap Trains Act, 1883, by the workmen and workwomen in Glasgow and London.

#### TANGANYIKA RAILWAY SURVEY.

The mails from Rhodesia announce that Sir Charles Metcalfe has arrived at Salisbury from a flying survey of the country between Gwelo and the Kareba Gorge, through which the Zambesi passes, in connection with the Tanganyika Railway survey. In an interview published in the *Rhodesian Times* Sir Charles Metcalfe asserts that the idea of the country between the Zambesi and Gwelo being unhealthy is absurd, as the greater part of their journey was at an altitude of 4,000*ft.* For 100 miles from Gwelo the country is pegged, but very little work has been done. Sir Charles is astonished at the theory that it is impossible for work to be carried on in the mines during the wet season, and contends that there is not the slightest danger. His engineers work all through the season. The party made a wagon road for about 100 miles to Katamanques, and encamped near by, about 50 miles from the gorge. Between the camp and the river there are ranges of hills about 20 miles across, of slate and quartz formation. These hills are considered to be well worth the attention of prospectors. The statements as to the Sanyati river being 1,000 yards across are exaggerated. It runs into the Zambesi through two mouths, one mouth being about a mile above the Kareba gorge, the other opening being directly into the gorge. A short distance above the gorge the Zambesi is about 2 miles wide, graduating down until it is enclosed by an immense basaltic bar which confines the channel to a limit of 50 yards for a distance of about a mile. While it is quite possible to negotiate the Zambesi with a railway at this point, it is the opinion of Sir Charles that it would carry the line too far to the westward of Tanganyika, and necessitate the crossing of the Kafue, the Loanga, and several other large rivers. Mr. Tower, one of Sir Charles's engineers from the Chiromo-Nyassa survey, is on his way down from Kota Kota, travelling to the westward of M'pesenis down the Loanga to a point within the British South African Company's territory near Zumbo, to look out for a satisfactory crossing in that vicinity. A crossing in that direction would particularly benefit the Lo Mogundi district and affect Salisbury to its advantage. Mr. Mansergh is to have charge of the survey from Gwelo to the North, which will start in about three weeks' time.

Mr. MARSHALL, the Collector and Consular Judge of the district of Tanganyika, who recently visited Buluwayo, has also been interviewed, and has given some interesting information, from which we extract the following:—"There is a very fine harbour, he says, on Lake Tanganyika, protected from the north by an island, but at present there is only one small British steamer on

the waters. Little is known of the mineral wealth of the region, as it has not been prospected. Referring to the Transcontinental Telegraph, Mr. Wallace thought that no provision had been made at present for carrying the line beyond the lake. In regard to a cable through the lake, he said that soundings would have to be taken. The lead had already been down 900*ft.*, and had not reached bottom. Tanganyika, as well as Nyassa, was very deep, and on the banks of the former mountains rose to a height of 10,000*ft.* Just before they left a German officer arrived with a gunboat which the Germans are placing on the lake, while the British have only a little "toy steamer" which cannot carry more than ten tons. This little steamer, while coasting along the shores, was fired upon by the Congo Free State rebels. The waters of Lake Tanganyika cannot be called brackish, yet they are not quite fresh, while Lake Nyassa is absolutely fresh. The proposed railway would not touch the lake at Abercorn, as the drop would be too sudden, but would join to the west."

#### ANOTHER BOLIVIAN RAILWAY CONCESSION.

The Bolivian Government has just granted a concession for the construction of a railway from Puerto Suarez, on the River Paraguay, running through the agricultural districts to Santa Cruz, from there to St. Xavier and Concepcion (gold regions), from Santa Cruz to Trinidad (indiarubber regions), from there to La Paz and Cochabamba to Oruro, to meet the projected extension of the Antofagasta Railway from Huanchaca, continuing on to the capital, Sucre, from there to Potosi and Huanchaca to meet the completed part of the Antofagasta Railway that has been especially constructed to convey the saltpetre from Huanchaca to the Chilean coast. From Potosi the line will run to Tupiza to meet the projected extension from Jujuy, branching off to Tarija, and so back to Sucre, and from there direct to Santa Cruz. The length of the line will therefore be some 3,500 kilometres, placing Bolivia in communication with Peru, Chili at two points, Argentina, and Brazil. The terms of the concession are favourable to the railway company, the chief points (according to the *Buenos Ayres Standard*) being the following:—"During ninety-nine years no similar concession will be granted that will permit another line approaching within 50 kilometres of the present one. The Empress is permitted to take away gratis from the neighbouring fiscal lands all materials for construction, such as stone, lime, coal, fuel, wood, &c.; as there is a vast amount of quebracho, the saving on sleepers alone, say, of \$1 paper each, represents \$3,500,000 paper. The branches have the same advantages as the main line. The company is conceded as freehold property one square league of land on each side of the line for the whole of its extent, with an option to exchange any part of it for the equivalent in fiscal lands in other parts of the country. The deposit money—\$50,000 bolivianos—will be returned when work to that value is completed. All machinery, stores, and materials will be admitted free of duty for ninety-nine years. All documents appertaining to the concession need no stamps. The Government grants full expropriation rights and pays all indemnities. The company is exempt from Government, provincial, and municipal taxes that exist or may exist during the term of the concession. The main line from Puerto Suarez to Santa Cruz is especially suitable for railway construction, being on a hard cart road with a grade of 1 in 1,000, with no mountains to climb nor tunnels, embankments, or cuttings to make, and only two narrow and shallow rivers to cross."

#### "REASONABLE AND JUST REBATES."

The Railway and Canal Commissioners for Scotland on the 23rd inst., in the High Court Room, Edinburgh, Lord Trayner presiding, issued judgment on the application by Charles Tennant and Co., Limited, chemical manufacturers, Carnoustie, against the Caledonian Railway Company and the North British Railway Company as joint owners of the Dundee and Arbroath Joint Line. The applicants' premises are connected with that railway by means of a siding, which also belongs to the applicants. Lord TRAYNER said that in this case the court was asked to pronounce an order (1) determining what are reasonable and just rebates to be hereafter made by the respondents for certain rates charged by them to the applicants; (2) directing the respondents to repay to the applicants the sum of 4,708*l.*; and (3) alternatively to find the respondents liable to the applicants in the sum of 4,708*l.* as damages. Dealing with the second and third heads, his lordship said that on the whole matter he was of opinion that the agreement between the parties was intended to cover, and did cover, the question of rebates which the applicants were now insisting in. The whole claim here made was for rebates on charges incurred and paid prior to the service of this application, and, in the opinion of the court, the claim could not be allowed, and that the application in so far as the second and third heads of the prayer were concerned should be refused. As to

the first head of the prayer, his lordship concurred in the opinion expressed by Sir Frederick Peel. Sir FREDERICK PEEL held that the claimants were right in giving a comparison between the rates of Panmure Siding and the rates to Barry on the one hand, and Carnoustie on the other. Substantially it appeared that the rates to these other stations were the same as to Panmure Station. Now, at these other stations it was undoubted that the railway company had to give terminal service and provide station accommodation, whereas Tennant and Co. not only had station accommodation of their own on land which it was admitted was the applicants' own property, but they also performed the terminal service of loading and unloading, and covering and uncovering, &c. In these circumstances, it was reasonably clear that the charges made by the railway company as against Tennant and Co. did include a proportion in respect of station accommodation and terminal service, to which they were not entitled. Accordingly, rebate would have to be allowed to the applicants, and the amount would be fixed upon the principle applied in Redcock. On the other points he concurred with Lord Trayner. Lord COBHAM concurred in these opinions.

### THE STOCK EXCHANGE SETTLEMENT.

The making-up prices for the principal railway stocks, and the extreme rates of continuation current at the Stock Exchange settlement on Wednesday, are shown hereunder:—

Making-up Price.			Stock.	Continuation rate.
Nov. 28.	Dec. 13.	Dec. 28.		
150	150	151	Caledonian .....	—

### RAILWAY CONSTRUCTION IN INDIA.

A careful examination of the railway programme of construction, now in course of being carried out by the Government of India, or by companies, will serve to show that chord lines and those which give cross-country connection between existing main lines are much in favour. In the North-West Provinces, for example, says the *Pioneer Mail*, we have the Ghaziabad-Moradabad line, 87 miles in length, which will place the western section of the Oudh and Rohilkund Railway in direct communication with the East Indian in the neighbourhood of Delhi, the detour from Chandausi via Aligarh being avoided. This line is, of course, on the standard gauge, and will cost less than a lakh per mile, including the expenditure on a bridge over the Ganges. It should command a large amount of goods traffic, particularly as the Southern Punjab Railway with Delhi as its starting point has now materially shortened the distance by rail between Karachi and the central parts of Upper India. Another project which has been sanctioned, and which will be taken up in next year's programme, is the broad gauge line from Agra to Delhi via Muttra. This will be 121 miles in length, but its cost will be only about Rs.75,000 per mile. As the Indian Midland has its northern terminus at Agra, this new line, when built, should increase the traffic to and from Bombay by the Jhansi-Itarsi route. One cannot but note how Delhi is becoming more and more a great railway centre; it is not surprising, therefore, that the volume of trade attracted to the old Moghal capital has expanded amazingly during the past few years.

### THE RAILWAYS OF SWEDEN.

A report recently published by the Swedish Board of Trade states that the capital value of all the State railways at the end of the year was estimated at 18,699,500*l.* The total gross receipts for the year amounted to 2,005,000*l.*, an advance of 240,000*l.*, or nearly 13 per cent. over the previous year. The cost of working averaged 233*l.* per kilometre of rail, or nearly 24 per cent. more than for the year 1896. The highest rate of interest on the capital invested was given by the eastern trunk line—i.e., 7.99 per cent. The Western Trunk line gave a dividend of 7.48 per cent., the line connecting Gellivara and Boden 6.81 per cent., the line between Storwick and Stockholm 6.71 per cent. The rate of interest given by the West Coast line was 5.75 per cent., which is somewhat more than the average rate of interest of the whole of the State lines taken together, but less than the average rate for the lines south of Storwick, which is 6.35 per cent. The receipts for passenger traffic amounted to 713,200*l.*, or 22.2 per cent. more than for the year 1896. The number of passengers amounted to 8.5 millions. It is estimated that each main division of the State railways conveyed 25,000 more passengers than the year before. This unusually rapid increase in the number of journeys was in a great measure caused by the Stockholm exhibition. The gross receipts for the goods traffic amounted to 1,207,600*l.*—25 per cent. of the total goods freight consisted of timber, 14 per cent. consisted of iron ores, 6.25 per cent. of coal and coke, 6.17 per cent. of beetroot for the sugar factories, manufactured iron 5.82 per cent., stone, tiles, and building material 5.42 per cent., grain, 5.87 per cent. The rolling stock consisted at the end of the year of 493 locomotives, 917 passenger carriages, 37 post waggon, 61 combined passenger, post, and baggage carriages, 216 baggage wagons, and 11,946 goods trucks. 1,222,200*l.* has up to the present time been the cost of the locomotives, and 2,388,800*l.* has been the cost of the carriages and trucks. During the year 15 railway employes and 22 passengers lost their lives through accidents; 114 employes were injured.

### STOCK EXCHANGE VALUES.

The *Bankers' Magazine* states that the easy money rates which have prevailed during the last month of the year have had a favourable effect upon the course of Stock Exchange securities. There has been some small renewal of investment buying of gilt-edged stocks, while the sharp advance in American railroad securities has given a stimulus to almost all speculative departments. The net appreciation for the month in the value of our representative stocks is as follows:—

Aggregate value of 325 representative securities on	
November 19th, 1898 .....	£3,205,000,000
Aggregate value of 325 representative securities on	
December 19th, 1898 .....	3,241,219,000

Increase .....

£35,219,000
-------------

Dealings during the month have mainly centred around American railroad securities, and the appreciation in that department is considerable. A material increase has taken place in gold and sterling bonds of American companies, but in the ordinary shares, which have been chiefly dealt in, the rise averages fully 6 per cent. English railroad stocks, which have been comparatively neglected during the greater part of the

half-year, show a substantial recovery as compared with a month ago, the market being favourably affected both by the comparative cheapness of money and the continuance of excellent traffic receipts. Favourable trade conditions, as reflected in railway traffic receipts, are also indicated in the noticeable rise which has taken place in the shares of iron and steel companies. Foreign Government securities, although showing only a small percentage of increase (the valuation being spread over a very large number of stocks), have been a decidedly firm market. The same magazine gives a table which shows that, even allowing for the recovery which has taken place during the past two months, there is still a considerable net depreciation as compared with this time a year ago, taking the same 325 representative securities in each case:—

End of Dec., 1897 ...	3,276 millions.	End of July, 1898 ...	Not calcul'd.
End of Jan., 1898 ...	3,291 "	End of Aug., 1898 ...	3,225 millions.
End of Feb., 1898 ...	3,285 "	End of Sept., 1898 ...	3,227 "
End of Mar., 1898 ...	3,233 "	End of Oct., 1898 ...	3,196 "
End of April, 1898 ...	3,164 "	End of Nov., 1898 ...	3,206 "
End of May, 1898 ...	3,173 "	End of Dec., 1898 ...	3,241 "
End of June, 1898 ...	3,215 "		

### NICARAGUA CANAL.

The annual report transmitted to the United States Congress by Secretary Bliss says the Maritime Canal Company has issued 10,145 shares of stock for which \$1,007,840 has been paid in. Other receipts have brought the total amount of cash received up to \$1,150,421. For construction work the company has paid \$1,146,330 in cash, 31,900 shares of stock of the par value of \$3,199,000 first mortgage bonds aggregating \$150,000 and its obligations for \$6,705,000 of first mortgage bonds. In payment of rights and franchises the company has also issued stock to the par value of \$18,000,000. The liabilities of the company consist of the amounts still due under concessions granted to the company; of the \$6,705,000 of bonds before mentioned, which are due to the assignees of the Nicaragua Canal Construction Company for work and labour done and materials furnished; and of cash liabilities outstanding amounting to \$100,000. The assets of the company consist of its unused capital stock, of \$518,500 first mortgage bonds, 2,420 shares of capital stock received in liquidation, together with concessions, rights, franchises, and the plant and other property.

### THE RAILWAYS OF SOUTH AUSTRALIA.

From the report of the Railways Commissioner of South Australia (Mr. Alan G. Pendleton) for the year ending June 30th, 1898, we take the following summary, together with comparative figures for the previous year:—

	1896-7.	1897-8.
Miles open at close of year, 3ft. 6in. gauge	1,229½	1,229½
Miles open at close of year, 5ft. 3in. gauge	494½	494½
Average miles worked during the year	1,723	1,723½
Capital cost of lines open & completed	£12,599,892	£12,764,106
per mile	£7,310	£7,405
Coaching traffic	£297,026	£291,411
Goods, minerals, and live stock	£700,629	£664,348
Miscellaneous earnings	£27,380	£28,469
Revenue (gross earnings)	£1,025,035	£984,228
Working expenses	£614,254	£603,474
Net revenue	£410,781	£380,754
Per-centage of working expenses to revenue	59.92	61.31
Per-centage of net revenue to capital cost on average miles open	3.26	2.98
Passengers carried—Ordinary and season tickets	5,789,297	6,050,189
Goods and live stock, gross tonnage, freight paying	1,146,293	1,189,095
Cattle, calves, and horses carried	53,560	58,915
Sheep carried	714,944	572,538
Average miles travelled per passenger	13.70	12.83
Average miles travelled per ton of goods	139.10	132.15
Average receipts per passenger per mile	0.70d.	0.70d.
Average receipts per ton of goods per mile	1.05d.	1.01d.
Train miles	3,674,713	3,715,714
Total earnings per train mile	66.95d.	63.57d.
Total working expenses per train mile	40.12d.	38.98d.
Total earnings per mile open	£595	£571
Total expenses per mile open	£356	£350
Locomotives	320	332
Coaching vehicles	369	365
Goods and live stock vehicles	6,219	6,004
Population, excluding aborigines, at close of year approximately	360,000	360,000
Miles of line open for every 1,000 of population, approximately	4.79	4.79
Population for every mile of line opened	209	209

### RUSSIAN RAILWAY ENTERPRISE.

Reuter's St. Petersburg correspondent, writing under date 25th inst., says:—"A Berlin journal lately attributed to Russia the intention of asking for the moral and financial support of France in a scheme to establish an immense network of railways connecting Russia with Turkestan, Persia, Arabia, and the Red Sea, where a Russian naval station would then be established. A positive contradiction is given in well-informed quarters to this statement, which is described as purely apocryphal. It is, moreover, observed that the best proof of its incorrectness is that the French Government has several times failed during the last few years in its attempts to induce the Russian Government to lend its support with a view to the settlement of the Egyptian question. It is true that in Russian political circles there are ardent partisans who are convinced of the expediency of Russia's adopting a policy of expansion towards Western Asia, and, in particular, of the junction of the network of Russian railways with one or more ports on the Indian Ocean, but no idea is entertained of an immediate realisation of these aspirations, which are regarded as concerning a more or less distant future. At present the efforts of the Russian Government are directed to ensure the earliest possible completion of the Trans-Siberian Railway and the branch line through Eastern China. Pending the accomplishment of this gigantic enterprise and of Russian expansion in the Far East, there cannot, therefore, be any such displacement of the centre of gravity in Russia's present national action as indicated by the Berlin journal above referred to.

### A POINT CALLING FOR "VERY SERIOUS CONSIDERATION."

Lieut.-Colonel Addison has reported to the Board of Trade the result of his inquiry into the accident that occurred on October 26th at the Central Station, Newcastle, on the North Eastern Railway. In this case, as an excursion train to Alnwick was leaving No 9 platform, at Newcastle, it came into collision with a light engine which was standing just foul of the outgoing line to the north. Colonel Addison says:—"The want of proper accommodation in the station for engines is a great blot on the present arrangements. The sketch, page 1, gives but little idea of the place where the light engine stood, for it shows only enough, as I have said above, to enable the evidence to be followed and understood. The engine was across the incoming and outgoing roads of two other platforms, Nos. 2 and 3, from and to the south; and as all the lines from the platforms on the south side of the station to Alnwick and the north cross the platform lines on the north side of the station to York and the south, there must be many other spots where it is equally undesirable to leave engines standing, but where it is necessarily done very often. To attempt to protect all engines so placed by fouling bars would seem to be out of the question. This is a point calling for very serious consideration. Newcastle is not the only important station belonging—wholly or jointly—to the North Eastern Company where I have had to draw attention to the almost complete absence of standing room for engines clear of the running lines."

### FOREIGN AND COLONIAL ITEMS.

The Buenos Ayres and Valparaiso Transandine Railway Company, Limited, has removed to Dashwood-house, 9, New Broad-street, E.C.

Messrs. B. Raphael and Sons announce that the coupons due on January 1st on the 5 per cent. bonds of the Piræus Athens and Peloponnesus Railway will be paid at the rate of 3 per cent. per annum.

Mr. Cecil Rhodes, accompanied by Dr. Harris and Sir C. Metcalfe, left Capetown on Wednesday for England. From here he will proceed to Egypt and the Soudan, to make final arrangements for the Trans-Continental Railway.

A party consisting of ex-President Uriburu, several Senators and engineers, accompanied by Mr. Barrow and Mr. White, of the Buenos Ayres Great Southern Railway, recently made a trip over the system to the end of the rails on the Neuquen extension.

A despatch from Colon states that Dr. Marroguen, Vice-President of Colombia, and Senator Zubieta have telegraphed from Bogota confirming the report that the Colombian Congress will grant the extension of time necessary for the completion of the Panama Canal.

A meeting of the Chief Railway Accountants of the Australian colonies has been held in Sydney under the direction of the various Railway Commissioners. The object of the meeting was

to secure uniformity in regard to railway account keeping between the colonies.

The Victorian Government has accepted the tender of the Pennsylvania and Maryland Steel Company to supply 35,000 tons of steel rails and fishplates for 190,000*l.* The amount of the tender was 16,000*l.* less than the joint British tender, and lower than Messrs. Krupp's tender.

Bulgaria up to 1894 had only 479 kilometres of railways, whereas by next year 1,220 kilometres will be in full operation. These results have been achieved without the creation of new taxes, and without increasing the Budget expenditure, which is now 3 per cent. less than in 1894.

The Central News says the Uganda Railway has now reached Siniba Camp, 240 miles from Mombasa. Considerable damage was done in November to the section last finished by a terrible hurricane and heavy rains, which washed away not only the rails but also some embankments, and did considerable damage to plant.

A Dalziel telegram from Perth, Western Australia, says:—"Inquiries concerning the present state of the market in Australian hard woods have been received here from America. The Government has decided to afford complete information, and a large increase in the present trade is expected to result therefrom."

Messrs. J. Henry Schröder and Co. publish the numbers of bonds of the Bank of Commerce, United Railways of the Havana and Regla Warehouses Company's issue of 1,600,000*l.* 5 per cent. first mortgage bonds (1890), amounting to 55,600*l.*, which have been drawn for payment at par, together with the half-yearly coupon due January 1st, on and after the 2nd prox.

Messrs. G. A. Tinley and Co., secretaries to the Liverpool board of the Carrizal and Cerro Blanco Railway Company, advise the receipt, per mail just in, of a draft at sixty days' sight, due February 28th, 1899, for the half-year's dividend ended June 30th last of \$15 per share, at 13½*d.* exchange, equal to 16s. 4½*d.* per share. Warrants will be forwarded on March 1st next.

In answer to a minute of the Senate the Governor of the province of Buenos Ayres has sent a message in which he states that from September 13th to November 18th thirteen concessions had been granted for the construction of light railways in the province of Buenos Ayres, and he further states that none of the concessionaires have made the guarantee deposit called for, nor have they signed the contract.

Mr. Alexander Young has issued a circular to the debenture-holders of the New Zealand Midland Railway Company, Limited, stating that, according to cable advices just received from New Zealand, the application made to the Colonial Court to establish the debenture-holders' right to the railway was heard on the 12th inst. After two days' argument the Court reserved its decision, which is expected during February next.

The Department of the Belgian State Railways is, it is said, considering the abolition of the commercial State agencies established abroad, or, at least, the reduction, to a certain extent, of the expenditure, which hitherto has not been at all in proportion to the advantages obtained. At present there are five of these agencies which cost over 100,000*fr.* per annum. That at Basle spends 25,000*fr.* per annum, those at Berlin and Elberfeld 15,000*fr.* each, and those at Frankfurt and London 25,000*fr.* each.

The numbers are announced of four bonds of 100*l.* each, series "A," and fifteen bonds of 20*l.* each, series "B," of the issue of 1,890,000*l.* 5 per cent. first mortgage debentures of the Royal Trans-African Railway Company, guaranteed by the Portuguese Government, drawn for redemption, and will be paid, together with the coupons due January 1st, on and after January 2nd, at the Capital and Counties Bank, Limited, 39, Threadneedle-street, E.C., or at the company's agents in Amsterdam and Brussels, or at the offices of the company in Oporto or Lisbon.

In the New South Wales Assembly recently, Mr. Young, the Minister for Works, gave expression to an important principle in regard to the ownership by private individuals of lines of railway. He was asked whether, in view of the urgent need for a line from Hay to Deniliquin, and the reluctance of the Government to construct it, he would be inclined to allow private enterprise to take it up. He replied that he was not in favour of allowing any important line to be owned by private people,

adding that he was simply giving expression to a broad principle, without considering any particular line.

The Berlin correspondent of the *Standard* states that a "Black Railway Company," on the model of that in the Congo State, is to be formed for the building of the Central Railway in German East Africa, and is expected to prove better fitted for the work than Europeans would be. Fifty of the warlike tribe of the Wanjemba are to form the nucleus of the company and protect the navvies, their dwellings, and the caravan roads leading to the railway. The Governor of German East Africa is actively exerting himself on behalf of the Central Railway, the cost of which he estimates at about 80,000,000 marks. Experts, however, place it much higher.

### RAILWAY PATENTS.

[This list is specially compiled for THE RAILWAY TIMES by Messrs. Rayner and Co., registered patent agents, 37, Chancery-lane, London, W.C., from whom all information relating to patents, designs, trade marks, copyrights, &c., may be obtained.]

25,035. Austin Bowen Payne, Singleton Farm, Sketty, near Swansea—Payne's appliance for controlling railway platform trolleys and barrows, and the like, when not in use. November 28th.

25,037. James Marshall, 100, Wellington-street, Glasgow—Improvements in apparatus for simultaneously locking the carriage-doors of a railway train. November 28th, 1898.

25,040. George Phoenix Edwards, commonly known as George Phoenix, Prince's-chambers, Wolverhampton—Improvements in or connected with railway platform trucks. November 28th, 1898.

25,080. Charles Brawn, 51, the Chase, Clapham-common, London—An improvement in railway signals for the protection of men working on the lines. November 28th, 1898.

25,166. Charles Ernest Cooper, 22, Glasshouse-street, Regent-street, London—A new or improved method of and means for simultaneously locking and unlocking railway carriage-doors. November 29th, 1898.

25,172. Thomas Samuel Lewis, 7, Staple-inn, London—Improvements in joining railway signal-rods and point-rods. November 29th.

**Railways in Switzerland.**—Under the name of the Jungfrau Bahn Gesellschaft (says a Berne correspondent), a company has been promoted at Berne for the construction of the Jungfrau Railway. The share capital has been fixed at 4,000,000*fr.*, 2,000,000*fr.* of which is to be issued at first in fully-paid shares. The new concern takes over an electric railway, authorised by a concession on December 21st, 1894, from the Scheidegg, *via* the Eiger and the Mönch, to the summit of the Jungfrau. The present possessor of the concession, Mr. Guyer-Zeller, cedes his rights as well as the works at cost price, and, moreover, guarantees the placing of 2,000,000*fr.* shares and 2,500,000*fr.* debentures. Up to the present about 2,500,000*fr.* has been spent on the undertaking. In the early days of the coming year subscriptions will be invited for 1,000,000*fr.* in shares and 2,000,000*fr.* in debentures.

**The Beira Railway Company, Limited,** gives notice that Coupon No. 12, due January 1st, 1899, of the first mortgage debentures for 250,000*l.*, Series "A," and Coupon No. 9, due January 1st, Series "B," will be duly paid on that date. The company also give notice that, pursuant to the provisions of its debenture issue, it will postpone payment of the interest accruing upon the first mortgage debentures for 600,000*l.*, Series "C," on January 1st, 1899, until January 1st, 1900. The company offers in payment of coupons due January 1st, 1899, an equivalent nominal value of the above debentures where the interest amounts to 20*l.* or a multiple thereof, but without bonus shares. Where the interest amounts be less than 20*l.* credit notes can be obtained, and on presentation of such notes for 20*l.*, or a multiple thereof, they can be exchanged for debentures of an equivalent nominal amount.

**American Wagons in Scotland.**—An innovation is about to be introduced by the Caledonian Railway Company in the working of mineral traffic in the United Kingdom. The company is preparing plans for the immediate construction of 100 bogey American freight wagons capable of carrying 50 tons each, the cars weighing about 16 tons each. The same company has also decided to construct 3,000 new ordinary goods wagons. The object is to improve the facilities for coping with the demands of the coal and iron ore traffic. As is well known amongst traders in the West of Scotland, the means at the command of the railway companies have proved altogether inadequate for undertaking the greatly increased mineral traffic of Lanarkshire. The railway companies assert that this to a large extent is due to the iron-masters keeping trucks loaded with iron ore because they cannot get the labour to empty them. The new freight wagons,

it is stated, will obviate this, for they are to be built on the hopper system, and can therefore easily be emptied.

**Luggage in Advance.**—It is announced by the London and North Western Railway Company that the system of collecting and forwarding luggage in advance at 6d. per package, which has been very successfully adopted with the luggage of families and tourists travelling to the sea-side and other tourist resorts, will, with the new year, be extended to apply to luggage for all towns on the London and North Western Railway in England, Wales, and Ireland, or on the Caledonian Railway in Scotland. By this system the traveller can have his luggage collected by the company's cart from his house or hotel and forwarded a day or so before that on which he intends to travel. The charge of 6d. per package includes delivery within the usual boundary at destinations where the company have their own cartage staff, a list of which is shown in the company's time-tables. At other places the luggage can be addressed to be left "till called for" at the station. The company have also arranged a system of registration under which each package of luggage will be numbered and a receipt with a corresponding number given to the owner when it is handed to the company for conveyance.

**Mashonaland Railway Debentures.**—A correspondent writes:—"As a holder of 1,000l. 5 per cent. debentures of the Mashonaland Railway Company, Limited, which was allotted to me, I feel very disappointed at the failure of the company to obtain a Stock Exchange quotation for the same, although fifteen months has now elapsed. I was induced to subscribe on the undertaking given in the prospectus sent me that a Stock Exchange official quotation would be applied for in due course, and which I expected would be obtained in the course of, say, three months, provided that the ordinary conditions required by the London Stock Exchange Committee were complied with. This is not 'a twopenny-halfpenny issue,' but one of over a million sterling, and in which the interest of the many subscribers is very materially prejudiced, as without doubt this stock, the 5 per cent. interest on which is guaranteed for twenty-two years by the Chartered Company, and the line under contract to be completed within the next three months would not be standing at the present depreciated price of 84 per cent. if it was officially quoted. This result I feel certain must in a very great measure be owing to the remissness of the company, and is, to say the least of it, anything but creditable to it or its brokers."

**The Bulgarian Railway Crisis.**—As briefly announced in these columns last week, a political crisis has arisen in Bulgaria over the agreement which the Bulgarian Government has concluded with Messrs. Bauer, Kuhlmann and Adler, representing the Oriental Railway Company, for the purchase by the Government of the Oriental lines in Eastern Roumelia, measuring 312 kilometres—viz., Bellova-Mustapha Pasha, 206 kilometres, and Tirnova-Seymen-Yamboli, 106 kilometres. The rent payable to the company per annum is 4,150fr. per kilometre, or 1,294,800fr. for the two lines. Capitalised at 5 per cent., this annuity represents a capital sum of close upon 28 millions, which amount the company agrees to receive in Bulgarian rentes at their face value. In view of this arrangement, the Government will create 35 millions of 5 per cent. stock. The Oriental Railway Company further cedes to the Government the workshops at Sarambey, Yamboli, and Tirnova-Seymen, worth more than 1,000,000fr. By this arrangement the Bulgarian Government acquires proprietary rights in all the railways in Bulgarian territory. The agreement, to be valid, requires the sanction of the Bulgarian Sobranje, and of the Ottoman Government, and the former has already been given, though under protest from the Opposition members.

**Dublin Link Line Railway.**—Satisfactory progress is being made with the works of the link line railway, promoted by the

Great Southern and Western Railway Company. The line in course of construction commences at a point on the western side of the city called "the Sluts," in the neighbourhood of the Liffey Junction of the Midland Great Western system, where a junction has been formed with the line of the Great Southern and Western Company. On the western section the new line has been almost completed from Glasnevin Junction to Drumcondra-road. In the Spring-garden and North Strand section the work is steadily progressing, and within the next twelve months the line will be an accomplished fact. There can be no doubt of the great advantages which the link line will confer on the traders and residents of Glasnevin and Drumcondra, who have not, up to the present, in the slightest degree benefited by the Liffey Junction branch of the Midland Great Western Company, which never brought either goods or passengers for the township. When the new line has been opened, it will afford direct communication with Howth, Kingstown, Bray, the Great Southern and Western Company, the Midland Great Western line, and, in fact, with the whole railway system of Ireland. Beyond this, however, is the subject of the rapid conveyance of the American mails *via* Queenstown, which the link line will certainly accomplish.

## METROPOLITAN RAILWAY CARRIAGE AND WAGON COMPANY, Limited.

SALTLEY WORKS, BIRMINGHAM.  
Successors to Messrs. Joseph Wright and Sons.  
MANUFACTURERS OF RAILWAY CARRIAGES, TRAMWAY CARS, WAGONS, and RAILWAY IRONWORK of every description. Railway Carriages and Wagons built for cash, or upon deferred payments extending over a period of from three to ten years. A large number of coal, Ironstone, Ballast, and other wagons to be let on hire.  
Manufactory and Chief Offices—Saltley Works, Birmingham.

## WEST AUSTRALIAN HARDWOODS.

# KARRI & JARRAH

FOR  
SLEEPERS, STAIR TREADS, BRIDGES, PILES,  
PLATFORMS, CHAIR KEYS.  
REGISTERED TRADE MARKS:—

Full Particulars and Prices on application to—  
**MILLARS' KARRI & JARRAH FORESTS, LIM.**  
72, BISHOPSGATE-STREET WITHIN, LONDON, E.C. 3  
Cable advice from Company's Mills gives the output of Karri and Jarrah for the months ending June 30, 1898, as 33,371 loads, or 20,022,600 feet super.  
Telegraphic Address—"Jarrah, London." Telephone—290, London Wall.

ESTABLISHED 1774.

# WILLIAM JESSOP & SONS, LIM<sup>d</sup>., BRIGHTSIDE WORKS, SHEFFIELD.

TOOL STEEL. FINEST SELF-HARDENING STEEL.  
FORGED AXLES AND LOCO: CRANKS.  
LAGGING SHEETS. PLANISHED SHAFITING BARS.  
LOCO: CASTINGS, WHEEL CENTRES & HORN-BLOCKS.

# BLAENAVON COLD BLAST PIG IRON

(MADE WITH THE CELEBRATED BLAENAVON CHARCOAL COAL).

- No. 1 Foundry.**—A Dark, Grey, Soft Iron, used for Castings, where toughness and strength are required, such as Toothed Wheels for Agricultural, Cotton and other Machinery; also by various Governments, for Guns and other superior work.
- No. 2 Foundry.**—A more Open Quality, used for similar purposes, and largely by nail makers.
- No. 3 Foundry.**—An Open Grain, Harder Iron; used for both Foundry and Forge; it has a high transverse strength in Castings, but not so tough as the No. 1 and No. 2; gives a strong fibre in wrought iron.
- No. 4 Grey Forge.**—An Open, Soft Iron; possesses great strength; suitable for toughening and tempering harder qualities; it is a very superior Forge Iron.
- No. 5 Common Forge.**—A Harder, Finer Grain, very Strong Iron; suitable for Heavy Machinery, such as Shafts, Large Wheels, and also for Steam and Blowing Cylinders, Guides, Slides, &c., as well as for Forge purposes in Cable Bolts, Boiler Plate, and B.B. Merchant Bars.
- No. 6 Strong Forge.**—A still harder and Closer quality used for Mill Rolls and for bringing up the strength of weaker Forge Irons.

**MOTTLED.**—Used for Chilled Rolls in tempering; and for other similar purposes.

\* These qualities have a high tensile strength in wrought iron, and are used for bringing up weaker iron to stand the Government tests.

Extract from Report made by the Officers of H.M. Government to the Royal Arsenal on the strength of various descriptions of Iron, showing the general average of a number of Specimens prepared and tested from fifty-seven samples and also from five samples of Blaenavon Iron.—Parliamentary Paper No. 4971, Session 1888.

	Specific Gravity.	Tensile Strength.	Transverse Strength.	Crushing.
Average of 57 samples including Blaenavon	850 Specimens 7.140	850 Specimens 23,257	346 Specimens 7,102	273 Specimens 91,061
Average of 5 samples of Blaenavon only.	63 Specimens 7.175	63 Specimens 25,688	46 Specimens 7,488	21 Specimens 109,361

Prices and any further information as to quality suitable for special purposes may be obtained from

THE BLAENAVON COMPANY LIMITED, 86, CANNON-STREET, LONDON, E.C.

DARLINGTON FORGE CO., LD.,  
DARLINGTON.

STEEL CASTINGS UP TO  
50 TONS.

**STEEL CASTINGS AND STEEL FORGINGS.**

LOCO.  
CRANK SHAFTS,  
CROSS HEADS, PISTONS,  
AND CONNECTING RODS.  
ECCENTRIC STRAPS, SHEAVES, & RODS.  
WHEEL CENTRES, BOGIE & WAGGON WHEELS,  
AXLE BOXES, CROSSINGS, BUFFER CASES, &c. &c.  
ALL STEEL BY SIEMEN'S OPEN HEARTH & CRUCIBLE PROCESSES.

**BEMROSE'S "PERFECTION"**  
**SENSITIZED PAPERS.** 5 Varieties.  
UNSURPASSED RESULTS!!

LATEST—**BROWN PROCESS**—PRODUCTION.

**BEMROSE & SONS, LTD.**  
**IRONGATE, DERBY.** **23, OLD BAILEY, LONDON.**

**COVERS & CASINGS**  
BLOCKS, CLEATS,  
BOARDS FOR SWITCHES,  
IN STOCK AND MADE TO ANY  
DESIGN.  
ACCUMULATOR CASES AND  
BATTERY BOXES  
MADE TO ORDER.

**J. F. & G. HARRIS,**  
Timber Merchants and Moulding Manufacturers.

OFFICES, { 58, Wilson-street, Finsbury, E.C.  
YARDS, & { 42, Orange-street, Gravel-lane, Southwark, S.E. } LONDON.  
MILLS—Palmer's-road, Green-street, Bethnal-green, N.E. }

## PATENT VICTORIA STONE.

ESTABLISHED 1868.

Laid on London Stations for over 20 years and is used extensively by Great Eastern, Great Western, North London, Great Central, and other Railway Companies for Platform coping and paving, &c.

**ALL KINDS OF ARCHITECTURAL WORK TO MATCH PORTLAND AND RED AND YELLOW MANSFIELD STONES AND OTHER PLEASING COLOURS.**

**THE PATENT VICTORIA STONE COMPANY, LTD.**

HEAD OFFICES: 10, 11, 12, AND 13, HAMILTON HOUSE, BISHOPSGATE-STREET WITHOUT, E.C.  
(TELEPHONE 2266 AVENUE).

WORKS: { STRATFORD MARKET STATION, G.E.Ry.  
GROBY QUARRIES, near LEICESTER.

BRANCH OFFICES: { TOWER BUILDINGS, LEICESTER.  
43, YORK-STREET, MANCHESTER.

Established over 20 years.

**LOCO GREASE,**  
SPECIALLY PREPARED FOR RAILWAY USE.  
HIGH STANDARD OF LUBRICATION.
